Annexes

RDM is focused on the WLC business

Since 2008 RDM is focused on **one business segment**: White Lined Chipboard, “WLC”.

WLC growth drivers

Marketing needs for establishing a strong product **brand image**.

Favourable regulatory environment: UE committed to reduce **food waste over the coming 10 years**, leveraging on proper packaging of goods.

Recycled fibres well-perceived, since they contribute to forestry safeguard, CO₂ emissions' control and energy savings.

Quite a stable demand profile

WLC demand in Europe ('000 tons)

WLC capacity in Europe ('000 tons)

Source: CEPI

Despite WLC demand is highly correlated to GDP evolution, **European WLC demand** is not expected to grow in the short term. Only a stronger increase in industrial production in 2016 can drive demand growth, according to RISI forecasts:

Western Europe	2015E	2016E
----------------	-------	-------

Industrial production	+0.8%	+1.7%
-----------------------	-------	-------

Cartonboard demand	-0.7%	+1.0%
--------------------	-------	-------

Small and inefficient producers exiting the market generated the 2012 **decline in capacity** and an improvement in the **utilisation rate**.

Two players dominate competition

Mayr Melnhof and Reno De Medici as a whole represent a market share of ca. 50%. The rest of competition is atomistic.

No. of mills	Current installed capacity	2013 tons sold	2013 Revenues
