## FY 2014 Market Scenario

- Difficult market scenario due to political instability, China austerity policies, softening Russian tourist flow in Europe, poor consumer confidence and FX headwinds
- China sales trend mixed (Capitals suffering from austerity, $2^{\text {nd } / 3 r d ~ t i e r ~ c i t i e s ~ u p ~ d o u b l e-~}$ digit), while Hong Kong protests negatively impacting on local and travelers' market
- Europe continuing weak economics fairly counterbalanced by tourist flows, despite Russia-Ukraine and Middle East tensions still present
- US penalized by adverse weather conditions, sales benefitting from positive consumer confidence and increasing travelers' spending, mainly from Asia
- Japan recovering in the last part of the year, also favored by Chinese travelers
- Increasing importance of Travel Retail channel with airports becoming more and more luxury shopping destinations: international traffic up 6\% in FY2014, and Chinese still top nationality with new major destinations in Korea, Japan, Australia, Canada and US
- Shoes and Leather Goods still showing growth above average
- Lower EUR exchange rate parity opening to a positive FX momentum in the last part of the year
