Press release

GO internet reaches 30,503 active customers, +37% on 2014

The new Huawei 3.5 Ghz smartphone opens the path to growth opportunities

Gubbio, 1st December 2015 – GO internet S.p.A. reaches 30,503 active customers as of 30th November 2015, 37% more than the number registered in 2014.

“Customers data in November show that the company’s growth is in line with the previous months. The growth is supported by the launch of the new 4G LTE service as well as by the constant acquisition of new sites to expand the network coverage. We intend to grasp new development opportunities and have just presented with Huawei the first smartphone that can connect directly to GO internet’s network in the 3.5 Ghz frequency. The new Huawei smartphone, that will grant our customers a wireless connection to our network without the need for a GO Box, opens the path to important commercial developments for GO internet. Finally, we are following particularly closely the opportunity represented by the award of the 3.6-3.8 GHz frequencies which may help us increase the number of regions where we can develop our business” said Flavio Ubaldi, Chief Operating Officer and Head of Sales of GO internet.
