Founded at the beginning of the 1950s, SABAF has grown constantly and has today become the main producer in Italy and one of the world's leading producers of components for kitchens and gas-burning domestic appliances.

Production is based on four main lines: valves, thermostats and burners for gas-burning appliances and hinges for ovens, washing machines and dishwashers.

Technological know-how, production flexibility and the capacity to offer a wide range of components – also planned on the basis of the needs of individual kitchen producers, hob ranges and built-in ovens, and in line with the specific characteristics of the various reference markets – are SABAF's main strong points in a highly specialised sector, in which demand is continuously evolving and increasingly oriented towards products which guarantee absolute reliability and safety.

The Sabaf Group employs more than 700 persons and operates together with the parent company SABAF S.p.A. and with the subsidiaries Faringosi Hinges, leader in the production of hinges for ovens and dishwashers, Sabaf do Brasil, Sabaf Turkey and Sabaf China, operating in the production of burners.
