(COMPARED TO €50.3 MILLION AS AT DECEMBER 31, 2015)

Milan, July 28, 2016

The Board of Directors of Reno De Medici S.p.A. ("**RDM**" or the "**Company**"), parent company of second largest European producer of recycled cartonboard, met today under the chairmanship of Mr. Robert Hall, examined and approved the **Half-Year Consolidated Report as at June 30, 2016** of the Reno De Medici Group ("**RDM Group**" or the "**Group**").

The Reno De Medici Group ends the first half of 2016 recording a positive result, with net profit at 4.7 million euro, compared to 6.9 million euro reached in H1-2015, when it benefited from an exceptionally favourable market environment.

The first half of 2016 has been characterized by the acquisition from Cascades Canada ULC, on June 30, 2016, of 100% of **Cascades S.A.S**, French company that produces and distributes packaging carton board based on virgin fiber. The consideration was 11.3 million euro offset of the Net Indebtedness of the acquired Company at the acquisition date, which amounts to 8.7 million euro.

Such a transaction represents the completion of the 2008 business combination with the European assets of Cascades Group. Thanks to the acquisition, the Reno De Medici Group will consolidate its market position by expanding its activities to a new segment, carton board packaging products based on 'virgin' fiber. In addition, the branding strategy of the Group will benefit from the transaction, as all the products will be marketed under the Reno De Medici brand, including the products currently marketed with the Cascades brand. Moreover, synergies are expected in various operating areas.

As a consequence, from June 30, 2016, the Reno De Medici Group consolidates Cascades S.A.S. on a line-by-line basis. As the transaction was carried out at the end of the six-month period, its impact on the Half-Year Income Statement is only represented by the acquisition costs, for an amount of 505,000 euro. Conversely, the Balance Sheet and the related reports fully consolidate Cascades S.A.S.'s balances.

Introduction

In the **White Lined Chipboard** sector, in which Reno De Medici operates, the evolution of H1-2016 European **demand** weakened compared to the same period of the previous year, when the order inflow was exceptionally high, recording a 1.5% decrease. In all major European countries the comparison shows negative changes, except for Germany, where demand remains broadly stable. Higher sales to *Overseas* markets have partially, yet not entirely, compensated for the decline experienced on the European markets.

As regards the main **factors of production**, in the first half of 2016 average prices of **recycled fibers** were higher than in H1-2015, even though prices at the end of June 2016 came back in line with those at the end of June 2015.

In the first half of 2016, the average prices of **energy components** resulted in being substantially lower than those of the same period of the previous year, despite the rebound occurred in Q2-2016 from the bottom levels recorded in February and March 2016. Such bouncing back movement characterized the whole energy sector (oil, gas, electricity, coal), although with different drivers and to different extents.

The following table summarizes key Income Statement indicators as at June 30, 2016 and 2015.

	06.30.2016	06.30.2015
(Thousands of euros)		
Revenues from sales	216,292	226,037

As at June 30, 2016, the RDM Group **Revenues from Sales** amount to **216.3 million euro**, vs. 226.0 million euro in the H1 of the previous fiscal year. In a weaker market scenario, the change is also due to lower volumes produced and sold by the Arnsberg mill (Germany), where a technical stand-still was needed for allowing an important investment, aimed to the rebuilding of an equipment, and the relevant following commissioning. The investment will both increase the production capacity of the mill, and reduce the per-unit production costs. The project, which was successfully completed, generated inevitable temporary inefficiencies, with consequent impact on Q2-2016 results. All other mills worked at full production capacity.

The **volumes sold** by the Reno De Medici Group in the first half of 2016 amount to **417,000 tons**, vs. 429,000 tons solid in first-half 2015.

As at June 30, 2016 **Gross Operating Profit (EBITDA)** is **17.4 million euro**, compared to 23.0 million euro in H1-2015. The **EBITDA change** is basically due to two drivers: weaker market scenario compared to the previous year, and lower production in the Arnsberg mill, following the investment carried out in April 2016. The demand in first-half 2016 was much weaker compared to H1-2015, especially in February, March and in early April; it stabilized in the following months at more satisfactory levels; at the end of June 2016 the demand came close to the levels of the end of June 2015, although remaining still lower. The geographical revenues' market-mix was also less favourable,

Main Consolidated Results as at June 30, 2016

due to the higher weight of sales in Overseas markets.

In H1-2016 **Operating Profit (EBIT)** totalled **6.7 million euro**, compared to 10.6 million euro in H1-2015.

Net Financial Expenses amount to 1.7 million euro, in line with those of H1-2015. The decrease of interests and other financial charges was offset by the lack of profit from **exchange differences** recorded in H1-2015 as a result of the revaluation of US\$ and of the devaluation of GBP against the Euro.

Profits from Investments were 0.7 million euro, slightly higher than 0.5 million euro recorded in H1-2015. The amount includes a consolidated plus value of 0.5 million euro, generated by the sale of a stake in Emmaus Pack S.r.l., which took place on 14 March 2016.

The provision for **Income Tax** amounts to 0.7 million euro, a decline compared to 2.1 million euro in the first half of 2015, due to the lower taxable income, and to the lower IRAP charge in Italy.

Net Consolidated Profit ante Discontinued Operations amounts **4.9 million euro**, compared to 7.3 million euro in H1-2015.

Result from Discontinued Operations was **slightly negative, by 0.2 million euro**, vs. -0.4 million euro in H1-2015, due to the dissolution of the subsidiary Reno De Medici UK Ltd.

In H1-2016, **Net Profit** is equal to **4.7 million euro**, vs. 6.9 million euro in H1-2015.

Capital Expenditures made in the period by the Reno De Medici Group were €8.3 Million (€3.1 Million in the first-half of 2015).

Net Financial Indebtedness as at June 30, 2016 is **60.3 million euro**, vs. 50.3 million euro as at December 31, 2015. The 10 million euro increase is due to the acquisition of Cascades S.A.S., which produced an overall financial impact on Group's Indebtedness of approximately 19.9 million euro. Without considering the Cascades S.A.S.'s acquisition, the Group's Net Financial Indebtedness would amount to 42.6 million euro, a 7.6 million euro improvement compared to December 31, 2015.

Outlook

As regards the general macroeconomic scenario, no major changes are expected in the short-term; its evolution however remains uncertain, also considering the geopolitical crisis that are affecting some part of the world, and lastly Turkey. The Brexit represents a source of specific uncertainty for Europe. In both cases, the political crisis in Turkey and the Brexit, presently their effects cannot be easily predicted.

In the European White Line Chipboard (WLC) segment, after 30 June 2016 in Europe the order in-flow seems stable, at levels that are in any case lower than in 2015; compared to the previous year, also the backlog is shorter.

In the European Folding Box Board (FBB) segment, in which the newly acquired Cascades S.A.S. operates, the order in-flow is stable; backlog seems to be stronger than in the WLC segment. However, this trend is also due to new *Tobacco Products Directive*, which benefits mainly Scandinavian producers.

The prices of raw materials, and in particular of recycled fibers, are currently firm; however, it remains difficult to predict what would be the evolution in the Fall. Energy prices are expected to remain low and stable at the current levels.
