For Immediate Release

VARD REGISTERS HIGHER EBITDA MARGINS; SUSTAINS HEADWAY INTO NEW MARKET SEGMENTS

- *Year-on-year improvement of 2.3 percentage points in EBITDA margin to 2.8% in 2Q 2017*
- *2Q 2017 revenue remains flat from 2Q 2016, and up 20% from 1Q 2017*
- *New order intake of NOK 1.60 billion and successful delivery of one offshore vessel in 2Q 2017*
- *44 vessels in the order book as at 30 June 2017*

Singapore, 25 July 2017 – Vard Holdings Limited (“VARD”, and together with its subsidiaries, the “Group”), one of the major global designers and shipbuilders of specialized vessels, today announced its financial results for the second quarter and first half-year ended 30 June 2017 (“2Q 2017” and “1H 2017” respectively).

VARD registered a revenue of NOK 2.13 billion in 2Q 2017, largely unchanged from the previous corresponding quarter (“2Q 2016”), and up 20% from the preceding quarter ended 31 March 2017. VARD’s overall revenue was affected by softer activity at the Norwegian yards and the cessation of operations in Vard Niterói, as it declined to NOK 3.91 billion in 1H 2017, from NOK 4.24 billion in the previous corresponding half-year (“1H 2016”).

EBITDA before restructuring cost climbed to NOK 60 million and NOK 100 million in 2Q 2017 and 1H 2017, from NOK 11 million and NOK 68 million for 2Q 2016 and 1H 2016 respectively. Correspondingly, EBITDA margins increased by 2.3 percentage points to 2.8% in 2Q 2017 from 0.5% in 2Q 2016, and 1.0 percentage point to 2.6% in 1H 2017 from 1.6% in 1H 2016.

The Group recognized restructuring costs of NOK 4 million in 2Q 2017, and NOK 10 million in 1H 2017, down from NOK 38 million in 2Q 2016 and NOK 49 million in 1H 2016. Depreciation and amortization costs for 2Q 2017 and 1H 2017 were slightly higher compared to 2Q 2016 and 1H 2016 due to the gradual completion of ongoing investments. With these costs incurred, the Group recorded operating losses of NOK 4 million in 2Q 2017 and NOK 23 million in 1H 2017. This marks a significant reduction from the operating losses of NOK 78 million and NOK 83 million recorded in 2Q 2016 and 1H 2016 respectively.

Due mainly to foreign exchange losses, the Group realized net financial items of negative NOK 49 million and NOK 53 million for 2Q 2017 and 1H 2017 respectively. Due to losses in associated ship-owning entities, which reflect the downturn in the offshore market, VARD’s share of results of associates was negative NOK 17 million for 1H 2017.

As a result, VARD recorded losses of NOK 69 million and NOK 96 million for 2Q 2017 and 1H 2017 respectively. This is compared to losses of NOK 67 million and NOK 24 million incurred in 2Q 2016 and 1H 2016 respectively.

Cash flows from operating activities were NOK 172 million negative in 2Q 2017 but NOK 71 million positive for 1H 2017 in total. Cash flows used in investing activities amounted to NOK 86 million in 2Q 2017 and NOK 179 million in 1H 2017, mainly driven by investments in property, plant and equipment related to the expansion of facilities at Vard Tulcea. Cash and cash equivalents as at 30 June 2017 amounted to NOK 694 million.

In 2Q 2017, one Offshore Subsea Construction Vessel (OSCV) was delivered to DOF Subsea. VARD's order intake was NOK 1.60 billion in 2Q 2017, with two new contracts secured for the design and construction of a Research Expedition Vessel (REV) and a live fish transportation vessel. As at 30 June 2017, VARD had 44 vessels in its order book, of which 37, or 84%, will be of VARD's own designs. VARD's order book value as at 30 June 2017 stood at NOK 12.88 billion, surpassing its 31 December 2016 order book value of NOK 12.65 billion.

Sustained headway into new market segments in Norway

While yard utilization in Norway remains low and variable, VARD is gearing towards mobilizing resources and strengthening its cooperation with Fincantieri in certain areas of expertise. Vard Søviknes and Vard Langsten are advancing preparations for the first cruise vessel projects, and the design and procurement phases for these projects are either completed or progressing in a timely manner. Vard Brattvaag was designated as the outfitting yard for two major projects contracted in 1H 2017 – the krill fishing vessel for Aker BioMarine and the REV for Rosellinis Four-10.

Solidifying its foothold in the aquaculture market, Vard Aukra has received its first contract for a Live Fish Transportation Vessel. Vard Brevik continues to pursue new business opportunities, several of which are related to Liquefied Natural Gas (LNG) technology.

Higher workload for Romanian shipyards

During the quarter, VARD's two Romanian shipyards experienced very high workloads, on the back of ongoing work for the cruise projects for PONANT and Hapag-Lloyd Cruises, and the Module Carrier Vessel (MCV) projects for Topaz Energy and Marine, and Kazmortransflot. These projects are advancing well. Work on two cruise vessel sections for Fincantieri is scheduled to be completed in the third and fourth quarter of 2017, and the construction of two more sections is expected to commence in the second half of the year.

Following the latest installation and testing of the new gantry crane at Vard Tulcea, VARD is close to completing a phase of investments at the yard, thereby growing its throughput and capabilities. In addition, VARD is undertaking a challenging hiring plan for workers and subcontractors, including the hiring of local and expatriate workers.

Steady progress in Vietnam and Brazil, and notable milestones in Equipment and Solutions businesses

Operations at Vard Vung Tau in Vietnam remains stable, amidst healthy progress on the MCV projects, with the first MCV completed during 2Q 2017, and successfully delivered since.

Having acquired the remaining 4.85% of shares in Vard Promar, the Group now holds full control of its operations in Brazil. The shipyard is progressing on four projects under construction, with the fifth Liquefied Petroleum Gas (LPG) carrier for Transpetro in the final phase of testing and commissioning, in preparation of delivery in 3Q 2017.

VARD's Equipment and Solutions businesses achieved several significant milestones in 2Q 2017. In particular, Vard Electro's new bridge solution, SeaQ Bridge, was installed and successfully tested on a vessel for the first time. Vard Electro also secured a contract for the installation of battery packages for five hybrid gas-electric ferries for Torghatten Nord, two of which will be built by VARD. In addition, Vard Electro will provide the SeaQ energy storage system for the hybridization of a Solstad Farstad-owned Platform Supply Vessel (PSV), delivered by VARD in 2014. VARD's subsidiary Seaonics was selected to provide a comprehensive research equipment package for the REV contracted during 2Q 2017.

Relentless focus on diversification of product portfolio

Efforts to diversify VARD's suite of product offerings remain ongoing, as the Group looks to leverage its innovative culture and extensive experience in highly specialized vessels to bolster its order book. This strategy is further underpinned by the management's focus on mitigating risks still inherent in the offshore project portfolio.

Although a Letter of Intent for an exploration cruise vessel signed in January 2017 expired without resulting in a firm contract, there are still unrealized opportunities for VARD in this segment. The fisheries and aquaculture markets also continue to see high activity, despite strong competition.

Moving forward, the Group faces the challenge of managing varying degrees of workload across the different yards. With a high utilization rate in Romania, low and variable workload in Norway, and in view of a decreasing workload in Brazil, VARD continues to seek new opportunities to utilize its innovation power and global shipbuilding capacities.

Roy Reite, Chief Executive Officer and Executive Director of VARD, commented, "VARD's business transition continues to progress amidst challenging market conditions. VARD has adopted a two-pronged approach in sustaining its efficiency by fostering and exploring new opportunities in diverse markets, whilst internally working towards stabilizing workloads across the different shipyards. With long-standing experience in the design and construction of highly specialized vessels, VARD is well placed to tap on unrealized opportunities in various new market segments."

– End –

About VARD

Vard Holdings Limited ("VARD"), together with its subsidiaries (the "Group"), is one of the major global designers and shipbuilders of specialized vessels. Headquartered in Norway and with 9,000 employees, VARD operates nine strategically located shipbuilding facilities, including five in Norway, two in Romania, one in Brazil and one in Vietnam. Through its specialized subsidiaries, VARD develops power and automation systems, deck handling equipment, and vessel accommodation solutions, and provides design and engineering services to the global maritime industry.

VARD's long shipbuilding traditions, cutting-edge innovation and technology coupled with its global operations and track record in constructing complex and highly customized vessels have earned it recognition from industry players and enabled it to build strong relationships with its customers.

VARD was listed on the Main Board of the Singapore Exchange on 12 November 2010. Majority shareholder Fincantieri Oil & Gas S.p.A., a wholly owned subsidiary of FINCANTIERI S.p.A., owns 78.03% in the Group. Headquartered in Trieste, Italy, FINCANTIERI is one of the world's largest shipbuilding groups and has, over its 200 years of maritime history, built more than 7,000 vessels.

1 UNAUDITED FINANCIAL STATEMENTS (cont.)

(d)(ii) Share Capital

There were no ordinary shares issued in 2Q 2017. There are no treasury shares, nor subsidiary holdings, as at 30 June 2017 and as at 30 June 2016.

Share Options

There were no outstanding options to subscribe for shares as at 30 June 2017 (30 June 2016: 0).

(d)(iii) Number of Issued Shares excluding Treasury Shares

The number of issued shares (excluding treasury shares) as at 30 June 2017 is 1,180,000,000 ordinary shares (31 December 2016: 1,180,000,000 ordinary shares).

(d)(iv) Sales, Transfers, Cancellations and/or use of Treasury Shares

Not applicable. The Company has no treasury shares.

(d)(v) Sales, Transfers, Cancellations and/or use of Subsidiary Holdings

Not applicable. The Company has no Subsidiary Holdings.

2 AUDIT

The figures have not been audited nor reviewed by the auditors.

3 AUDITORS' REPORT

Not applicable.

4 ACCOUNTING POLICIES

The Group has applied the same accounting policies and methods of computation in the financial statements for the current financial period compared with those of the audited financial statements for the year ended 31 December 2016.

5 CHANGES IN ACCOUNTING POLICIES

The Group has not implemented any new or revised financial reporting standards in 2017.

6 EARNINGS PER ORDINARY SHARE

Earnings per ordinary share (attributable to Equity holders of the Company) for the current financial period reported on and the corresponding period of the immediately preceding financial year:

	Group			Group

The SGD amounts are translated from NOK based on the exchange rates prevailing at the reporting date as shown above.

8 REVIEW OF GROUP PERFORMANCE

(a) Statement of comprehensive income:

Revenues for 2Q 2017 were NOK 2.13 billion in line with 2Q 2016, while they were 20% higher compared to revenues for 1Q 2017. Revenues for 1H 2017 were NOK 3.91 billion, down from NOK 4.24 billion in 1H 2016. The reduction is caused by reduced activity, especially at the Norwegian yards, as well as the cessation of operations in Vard Niterói during the third quarter 2016.

EBITDA before restructuring cost for the quarter was NOK 60 million for 2Q 2017 and NOK 100 million for 1H 2017, up from NOK 11 million for 2Q 2016 and NOK 68 for 1H 2016. The EBITDA margin increased from 0.5% in 2Q 2016 to 2.8% in 2Q 2017 and from 1.6% in 1H 2016 to 2.6% in 1H 2017.

In Norway, Vard Sjøviknes and Vard Langsten continued their preparations for the first cruise vessel projects. The design and procurement phases for the projects are completed or progressing according to plan. Management focus is now on mobilizing adequate resources and strengthening cooperation with Fincantieri in certain areas of expertise. Vard Brattvaag was designated as the outfitting yard for two major projects, the krill fishing vessel for Aker Biomarine announced in 1Q 2017 and confirmed in the second quarter, and the Research Expedition Vessel for Rosellinis Four-10 contracted during the quarter. Vard Aukra continued to strengthen its position in the aquaculture market with its first contract for a live fish transportation vessel, while Vard Brevik pursues new business opportunities, several of which related to LNG technology. Yard utilization in Norway during the quarter was variable but generally low.

The two shipyards in Romania experienced a very high workload during the quarter. A challenging hiring plan is being implemented for both own workers and subcontractors, and including hiring of expatriate workers. The phase of investments at Vard Tulcea is close to completion, with the new gantry crane installed and tested during the quarter. Work on the cruise projects for PONANT and Hapag-Lloyd Cruises is progressing in different stages of construction. The MCV projects for Topaz Energy and Marine and Kazmortransflot are progressing well. Work on two cruise vessel sections for Fincantieri is scheduled to be completed in 3Q and 4Q 2017, and work on two more sections is to start up in 2H 2017.

Operations at the shipyard in Vung Tau in Vietnam were again stable, amid good progress on the Module Carrier Vessel (MCV) projects. The first MCV was completed during the quarter and has been successfully delivered since.

In Brazil, the Group acquired the remaining 4.85% of shares in Vard Promar pursuant to previously agreed options, giving it 100% control of its operations at the new shipyard and providing for an amicable termination of the partnership with PJMR. Operationally, work is progressing on four projects under construction at the yard. The fifth Liquefied Petroleum Gas (LPG) carrier for Transpetro is in the final phase of testing and commissioning, in preparation of delivery in 3Q 2017.

The Group's Equipment and Solutions businesses, and in particular Vard Electro, achieved several milestones during the quarter. Vard Electro's new bridge solution, SeaQ Bridge, was installed and successfully tested on a vessel for the first time. A contract was secured for the installation of battery packages for five hybrid gas-electric ferries for Torghatten Nord, two of which will be built by VARD and three at a third-party shipyard. Vard Electro will also provide the SeaQ energy storage system for the hybridization of a SolstadFarstad-owned PSV, delivered by VARD in 2014. Seaonics was selected to provide a comprehensive research equipment package for the Research Expedition Vessel (REV).

The Group recognised restructuring cost of NOK 4 million during the quarter and NOK 10 million in the 1H 2017, related to termination benefits and statutory payments for temporary redundancies, mainly in Europe and Brazil.

Depreciation and amortization in the quarter and in the first six months is increasing compared with the corresponding periods of last year as consequence of the gradual completion of the investments ongoing.

As a consequence of the items discussed above, the operating loss is equal to NOK 4 million in 2Q 2017 and NOK 23 million in 1H 2017 improving from a loss of NOK 78 million in 2Q 2016 and NOK 83 million in 1H 2016.

(a) Statement of comprehensive income (cont.)

The net financial items went from NOK 25 million positive in 2Q 2016 to NOK 49 million negative in 2Q 2017 and from NOK 73 million positive in 1H 2016 to NOK 53 million negative in 1H 2017. The change is primarily related to foreign exchange gains and losses. In 1H 2017 there is a net foreign exchange loss of NOK 22 million, of which NOK 12 million relates to the yard construction loan in Vard Promar denominated in USD (1H 2016: NOK 195 million gain). In the corresponding period of last year, the group had a net foreign exchange gain of NOK 138 million.

Share of results of associates were NOK 17 million negative in 1H 2017 due to the losses in associated ship-owning entities reflecting the present down-turn in the offshore market.

Because of the aforementioned reasons, the loss for the period was NOK 69 million in 2Q 2017 and NOK 96 million in 1H 2017, compared to a loss of NOK 67 million in 2Q 2016 and NOK 24 million in 1H 2016.

(b) Statement of financial position:

The statement of financial position remains stable compared with 31 December 2016.

Total non-current assets increased marginally from NOK 3.89 billion as of 31 December 2016 to NOK 4.14 billion as of 30 June 2017.

Total current assets were NOK 9.54 billion as of 30 June 2017, stable compared to NOK 9.63 billion as of 31 December 2016, as result of increase in inventories and construction WIP in excess of prepayments offset by decrease in trade and other receivables and other current assets.

Total non-current liabilities were stable when comparing 30 June 2017 with 31 December 2016.

Total current liabilities have increased from NOK 9.36 billion end of 31 December 2016 to NOK 9.57 billion end of 30 June 2017. The increase is mainly driven by the utilization of construction loans and prepayments received in excess of construction work in progress partially offset by the decrease in current derivatives.

(c) Statement of cash flows:

Cash flows from operating activities were NOK 172 million negative in 2Q 2017 compared to NOK 50 million positive in 2Q 2016. For 1H 2017 cash flow from operating activities were NOK 71 million positive, compared to NOK 365 million positive in the corresponding period in 2016. Cash flows from operating activities can fluctuate significantly from period to period due to changes in working capital.

Cash flows used in investing activities amounted to NOK 86 million in 2Q 2017 compared to NOK 63 million in 2Q 2016. Cash flows used in investing activities were NOK 179 million in 1H 2017 compared to NOK 96 million in 1H 2016. Investments in property, plant and equipment during the first six months of 2017 were mainly related to the expansion of facilities at Vard Tulcea.

Cash flows from financing activities were NOK 30 million positive in 2Q 2017 compared to NOK 141 million negative in 2Q 2016. For 1H 2017 the Group had a positive cash flow from financing activities of NOK 86 million compared to NOK 193 million negative in 1H 2016. The group has not obtained any new loans during the quarter. NOK 83 million of the repayments relate to instalments paid on non-current loans.

Because of the aforementioned reasons, the cash and cash equivalents at the end of the financial period were equal to NOK 694 million for the period ended 30 June 2017 (30 June 2016: NOK 908 million).

9 VARIANCE FROM FORECAST STATEMENT

The Company has not disclosed any forecast to the market.

10 PROSPECTS

At the end of 2Q 2017, the order book value amounted to NOK 12.88 billion, up from NOK 12.65 billion at the end of 2016 and NOK 11.93 billion at the end of 2Q 2016. Aggregate order value at the end of the quarter was NOK 22.75 billion, and the order book comprised 44 vessels, of which 37 will be of VARD's own design. Order intake in 1H 2017 was NOK 3.48 billion and NOK 1.60 in 2Q 2017.

VARD continues to focus on the diversification of its product portfolio. The contract secured during the quarter for a Research Expedition Vessel (REV) marks the entry into another new market and demonstrates the Group's high innovation potential. Despite the Letter of Intent (LoI) for one exploration cruise vessel signed in January 2017 having expired without resulting in a firm contract, VARD still sees opportunities in this market. The fisheries and aquaculture markets continue to see high activity, but competition is also strong.

Operationally, the key challenge for the Group in the near term is to manage the varying workload at the different yards, namely a very high utilization in Romania, low and variable load in Norway, and a decreasing workload, especially for the early stages of vessel construction, in Brazil.

Risk inherent in the offshore project portfolio persists, and high attention is being devoted to mitigating actions.

11 DIVIDEND
