EXERCISE OF “MARKET WARRANT AQUAFIL S.P.A.” WARRANTS

EXERCISE RATIO FOR FEBRUARY 2018 IS 0.25

Arco (TN), February 2, 2018 – Aquafil S.p.A. (**Aquafil** or the **Company**) [ECNL IM] announces that, pursuant to Article 3.6 of the Rules for the “*Market Warrant Aquafil S.p.A.*” Warrants (the **Rules**), the arithmetic average of the weighted average price of all ordinary Aquafil shares (ISIN IT0005241192) traded on the MTA market in January 2018 (as announced by the calculation agent BNP PARIBAS Securities Services) is € 12.69.

Accordingly, the exercise ratio for the conversion of the *Market Warrant Aquafil S.p.A.* warrants (the **Warrants**) for February 2018 is 0.25.

The first exercise period will begin on February 5, 2018. Any and all applications for the exercise of the Warrants shall be submitted to the intermediary participating in the centralized management system of Monte Titoli S.p.A. with which the Warrants are on deposit by the final exchange business day of the current month.

The Subscription Price shall be paid in full upon the submission of the application for exercise, without any additional fees and expenses for the holders of the Warrants, to the banking account corresponding to IBAN IT 64 P 03032 01800.

In all cases in which, as a result of Rules, the exercise of the Warrants results in a fractional number of conversion shares, the holder of the Warrants in question shall be entitled to receive conversion shares rounded down to the next whole number and may not lay any claim to the additional fractional portion.

The related conversion shares must be made available for trading by the tenth exchange business day of the month after that in which the application for exercise is submitted. The Conversion Shares shall have the same dividend rights as the ordinary shares outstanding.

It bears recalling that all the Warrants not exercised by the expiration date (i.e., the earliest of the following dates: (i) the first exchange business day five years after December 4, 2017; and (ii) the first exchange business day 60 calendar days after the date of publication of the acceleration notice) shall be considered cancelled and thus invalid for all intents and purposes.

For further information, please refer to the Rules for the “*Market Warrant Aquafil S.p.A.*” Warrants, available from the Investor Relations section of the Issuer’s website (<http://ir.aquafil.com/eng/shareholders-information/>).

Founded in 1965, **Aquafil** is one of the main players, in Italy and worldwide, in the production of synthetic fibers, particularly for Polyamide 6 applications. The Group is present in three continents, with a workforce of over 2,700. It operates through two product areas:

1. BCF (Bulk Continuous Filaments): synthetic fibers used in textile floorings in the contract (offices, hotels and public buildings), automotive (car mats and upholstery) and residential sectors. The production of filaments for textile floorings has been Aquafil's core business (accounting for over 80% of the Group's turnover) since the company was founded. Today, the Group is the leader in Europe and the second largest global player in the BCF sector. Almost 20,000 different product codes are handled, all of which are produced internally as part of stylistic research and/or technological innovation projects, in close contact with the customer. The entire collection is renewed every 4 years.
2. NTF (Nylon Textile Filaments): synthetic fibers used in the clothing and sports industries Today, the Group is the main supplier to some of the leading Italian and European manufacturers of clothing, underwear and sportswear. Aquafil's constant commitment to research enables the Group to support its customers in the development of new textile products to respond to the latest aesthetic and performance trends for clothing and sportswear. The product range offered includes Dryarn® microfiber and ECONYL® regenerated polyamide yarn, which have always been developed from projects carried out in partnership with the final brands.

Aquafil is a pioneer in the circular economy also thanks to the ECONYL® regeneration system, an innovative and sustainable process able to create new products from waste and give life to an endless cycle. The Nylon waste is collected in locations all over the world and includes industrial waste but also products (such as fishing nets and rugs) that have reached the end of their useful life. Such waste is processed so as to obtain a raw material (caprolactam) with the same chemical and performance characteristics as those from fossil sources. The polymers produced from ECONYL® caprolactam are distributed to the Group's production plants, where they are transformed into BCF yarn and NTF yarn. Today, yarn produced with ECONYL® caprolactam already accounts for about 30% of the Group's revenues. In 2016 Aquafil's revenues amounted to approximately €482 million, EBITDA was about €65 million and net profit totaled about €20 million. Net financial position at December 31, 2016 amounted to about €118 million.
