¹ The item "Turnover" represents the "Revenues" reported in the income statement.

² EBITDA is a performance indicator used by the Management of the Group in order to assess the operating performance of the company and is not identified as an accounting item within IFRS; it is calculated by IRCE S.p.A. by adding amortisation/depreciation, allocations and write-downs to EBIT.

³ Adjusted EBITDA and EBIT are respectively calculated as the sum of EBITDA and EBIT and the income/charges from operations on copper derivatives transactions (€ -1.92 million in 2017 and € +1.68 million in 2016). These indicators are used by the Management of the Group in order to monitor and assess the operational performance of the Group and are not identified as accounting items within IFRS. Given that the composition of these measures is not regulated by the reference accounting standards, the criterion used by the Group could potentially not be consistent with that adopted by others and therefore not be comparable.
