- CET1 ratio at 10.5% and Total Capital Ratio at 15.7%, without taking account of the result of the period in any way

Milan, 31 July 2019 - The Board of Directors of Banca IMI, the investment bank within the Intesa Sanpaolo Group, led by CEO **Mauro Micillo** and General Manager **Massimo Mocio**, has approved the separate and consolidated financial statements as at 30 June 2019 in a meeting held today and chaired by **Gaetano Miccichè**.

The half-yearly final balance shows a consolidated profit for the year of **710 million** euro. The figure shows an increase of more than 64% compared to 433 million euro as at 30 June 2018 thanks to the rise in revenues, characterised by a robust level of net interest - which has gradually increased since the start of the year (up 43.7% on the comparison period) - and by profits from financial transactions (up 65.1% from the comparison period).

The revenues recorded in 2Q19 of 841 million euro are the highest quarterly level ever achieved, bringing the **total income** for the first half of the year to **1,358 million** euro (+45.1%, an increase of 422 million euro) **Capital Markets** assets contributed **1,176 million** euro and **Investment Banking** and **Structured Finance** assets contributed **182 million** euro.

Thanks to a well-controlled operating cost structure (229 million euro, down -1.6%), the effect of higher revenues flowed entirely to **operating profit**, which rose to **1,129 million euro** (up 60.6% compared to 30 June 2018), bringing the **cost/income ratio** to **16.9%** from the previous 24.9%.

Impairment losses, provisions and other operating expenses accounted for a total of 63 million euro. This amount includes 59 million euro for contributions paid for 2019 to the European and Italian Single Resolution Funds.

A key factor contributing to the economic performance was also the growth in **total assets**, which rose to 203 billion euro from 165 billion euro as at 31 December 2018. In addition to the organic growth of the securities portfolios in the banking book, there was also an increase in on-balance-sheet structured finance loans and investments in securities in the HFT portfolio.

The careful management of market risks brought the Risk Weighted Assets down to 31.6 billion euro from the previous 34.3 billion euro as at 31 March 2019.

**Own funds** for regulatory purposes as at 30 June 2019 equal **4,951 million** euro, and do not consider the financial result for the period in any way.

For the second year and in compliance with the approach adopted by the Intesa Sanpaolo Group, the calculation of own funds implements the option of mitigating the impact of first-time-adoption of the new IFRS 9 with regard to the impairment share accounted for (the "static" approach). The Common Equity Tier 1 Ratio, Total Capital Ratio and Leverage Ratio so calculated reached 10.52%, 15.66% and 4.12%, respectively.

In compliance with the provisions set out in (EU) Regulation 2017/2395 of 12 December 2017, information regarding own funds for regulatory purposes and prudential ratios of Banca IMI, both with and without application of the transitional rules set out in the regulation, are provided below.
