- Total assets of more than 216 billion euro, up +31% from 165 billion euro as at 31 December 2018
- CET1 ratio at 10.6% and Total Capital Ratio at 15.4%, without taking account of the result of the period in any way

Milan, 5 November 2019 - The Board of Directors of Banca IMI, the investment bank within the Intesa Sanpaolo Group, led by CEO **Mauro Micillo** and General Manager **Massimo Mocio**, has approved the separate and consolidated financial statements as at 30 September 2019 in a meeting held today and chaired by **Gaetano Miccichè**.

In the first nine months of this year, the Company significantly exceeded the one billion profit mark for the first time in its history. Net consolidated profit of **1,117 million** euro shows an increase of more than 85% compared to 602 million euro as at 30 September 2018 thanks to the rise in revenues, characterised by a robust level of net interest income - which has gradually increased since the start of the year (up +48.2% on the comparison period) - and profits from financial assets which have effectively doubled (+97%).

The revenues recorded in 3Q19 of 731 million euro are once again very high, bringing the **total income** for the first nine months of the year to **2,089 million** euro (+57.6%, an increase of 763 million euro). **Capital Markets** assets contributed **1,814 million** euro and **Investment Banking** and **Structured Finance** assets contributed **275 million** euro.

Thanks to a well-controlled operating cost structure (343 million euro in the first nine months, down -0.8%), the effect of higher revenues flowed entirely to **operating profit**, which rose to **1,745 million** euro (up +78.2% compared to 30 September 2018), bringing the **cost/income ratio** to a noteworthy **16.4%** from the previous 26.1%.

Impairment losses, provisions and **other operating expenses** accounted for a total of **77 million** euro. This amount includes 59 million euro for contributions paid for 2019 to the European and Italian Single Resolution Funds.

A factor contributing to the economic performance was the growth in **total assets**, which rose to 216 billion euro from 165 billion euro as at 31 December 2018. In addition to the organic growth of the securities portfolios in the banking book with more than 9 billion euro in new investments in 3Q19, there was also an increase in on-balance sheet structured finance loans with +1.5 billion in new net production since the end of the previous year. The growth in banking book assets together with the increase in market risk requirements brought the Risk-Weighted Assets to 34 billion euros at the end of the quarter.

Own funds for regulatory purposes equal 5,228 million euro, and do not consider the financial result for the period in any way.

For the second year and in compliance with the approach adopted by the Intesa Sanpaolo Group, the calculation of own funds implements the option of mitigating the impact of first-time-adoption of the new IFRS 9 with regard to the impairment share accounted for (the "static" approach).

The Common Equity Tier 1 Ratio, Total Capital Ratio and Leverage Ratio so calculated reached 10.58%, 15.37% and 4.25%, respectively. In compliance with the provisions set out in (EU) Regulation 2017/2395 of 12 December 2017, information regarding own funds for regulatory purposes and prudential ratios of Banca IMI, both with and without application of the transitional rules set out in the regulation, are provided below.
