The above-mentioned results are unaudited.

The Q3 2019 P&L posts total revenues around EUR 14.3M, showing a +57% increase versus the same period of 2018. Sales growth in the first nine months of 2019 exceeds +60%, of which 56% organic. As per the results by business line, the SMS line - dynamic, volatile and highly price-oriented by nature – posted the biggest top-line growth of 3.9M (+65%) versus Q3 2019 at over EUR 30.6M consolidated sales, particularly because of Agile Telecom's volume growth. The Email line, steadier and consolidated by nature within the Group, showed a +21% increase, with Q3 2019 revenues of EUR 3.4M. Positive if subdued is the trend for Professional Services, on-demand consulting for customisation and training on the Group platforms, which more than doubled over Q3 2019 and showed a progressive growth trend in excess of +68%. The Predictive Marketing line also posted excellent results, thanks to the performance of the newly acquired Datatrics B.V. (December 2018) and the newly incorporated domestic subsidiary Datatrics S.r.l., contributing revenues for EUR 0.7M revenues in Q3 2019 and EUR 1.5M for the first nine months.

Consolidated EBITDA amounted to EUR 1.2M in Q3 2019, growing by +59% versus Q3 2018. In the first nine months of 2019 consolidated EBITDA exceeded EUR 3.3M, with an EUR 0.7M increase (or +28%) over the same period of 2018. As already explained in the comments to 1H 2019 results, the positive net variation of consolidated EBITDA is mainly due to the following factors: (i) the positive impact from first-time adoption of the new IFRS 16 on lease accounting without comparative data restatement, starting from 1 January, 2019 (EUR 230k in Q3 2019); (ii) the negative impact from certain contingent liabilities, i.e. extra expenses for 2018, on certain supplies for Agile Telecom, which will be discontinued during 2H 2019; (iii) the negative effect of Datatrics start-up margins.

The consolidated Net Financial Position as of 30 September 2019 is negative (for net cash) and amounts to EUR 1.3M, decreasing versus the previously recorded (net cash) amounts of EUR 6.4M as of 31 December 2018. The variation is positively influenced by the operating cash flow, but it is counterbalanced by the bigger debt figure from IFRS 16 first-time adoption, for an

amount of EUR 4.9M, as well as cash outs for the last earn-out tranche on Agile Telecom (EUR 600k paid in June 2019) and second tranche on Datatrics's purchase price (EUR 374k paid in April 2019).

Matteo Monfredini, Chairman and founder of MailUp Group, stated: "We are very satisfied to be able to enrich our path of transparency and communication with the financial community, starting today to disclose quarterly results on a voluntary basis, in alignment with the best domestic and international market practice. I wish to thank all our employees, particularly the Administration, Finance and Control people for this new important milestone."

Nazzareno Gorni, CEO and founder of MailUp Group, stated: "We are very pleased with the positive Q3 2019 results, especially in light of the structural seasonal weakness of the quarter, which includes the summer months, during which the economic and trading activities consistently slow, particularly in Italy. More in detail, we are more and more convinced of our strategic choice to invest on the most innovative SaaS businesses, growing triple-digit, as it is shown by the importance gained by both Predictive Marketing (Datatrics) in a short time, which sales representing almost 5% of Q3 2019 revenues, and BEE (beefree.io), for which important news are expected over the coming months, among which the launch of a new platform allowing third-party software houses to develop add-ons for the BEE editor."
