 - ◆ Sound underlying asset quality trend in all divisions and regular Consumer NPL disposal

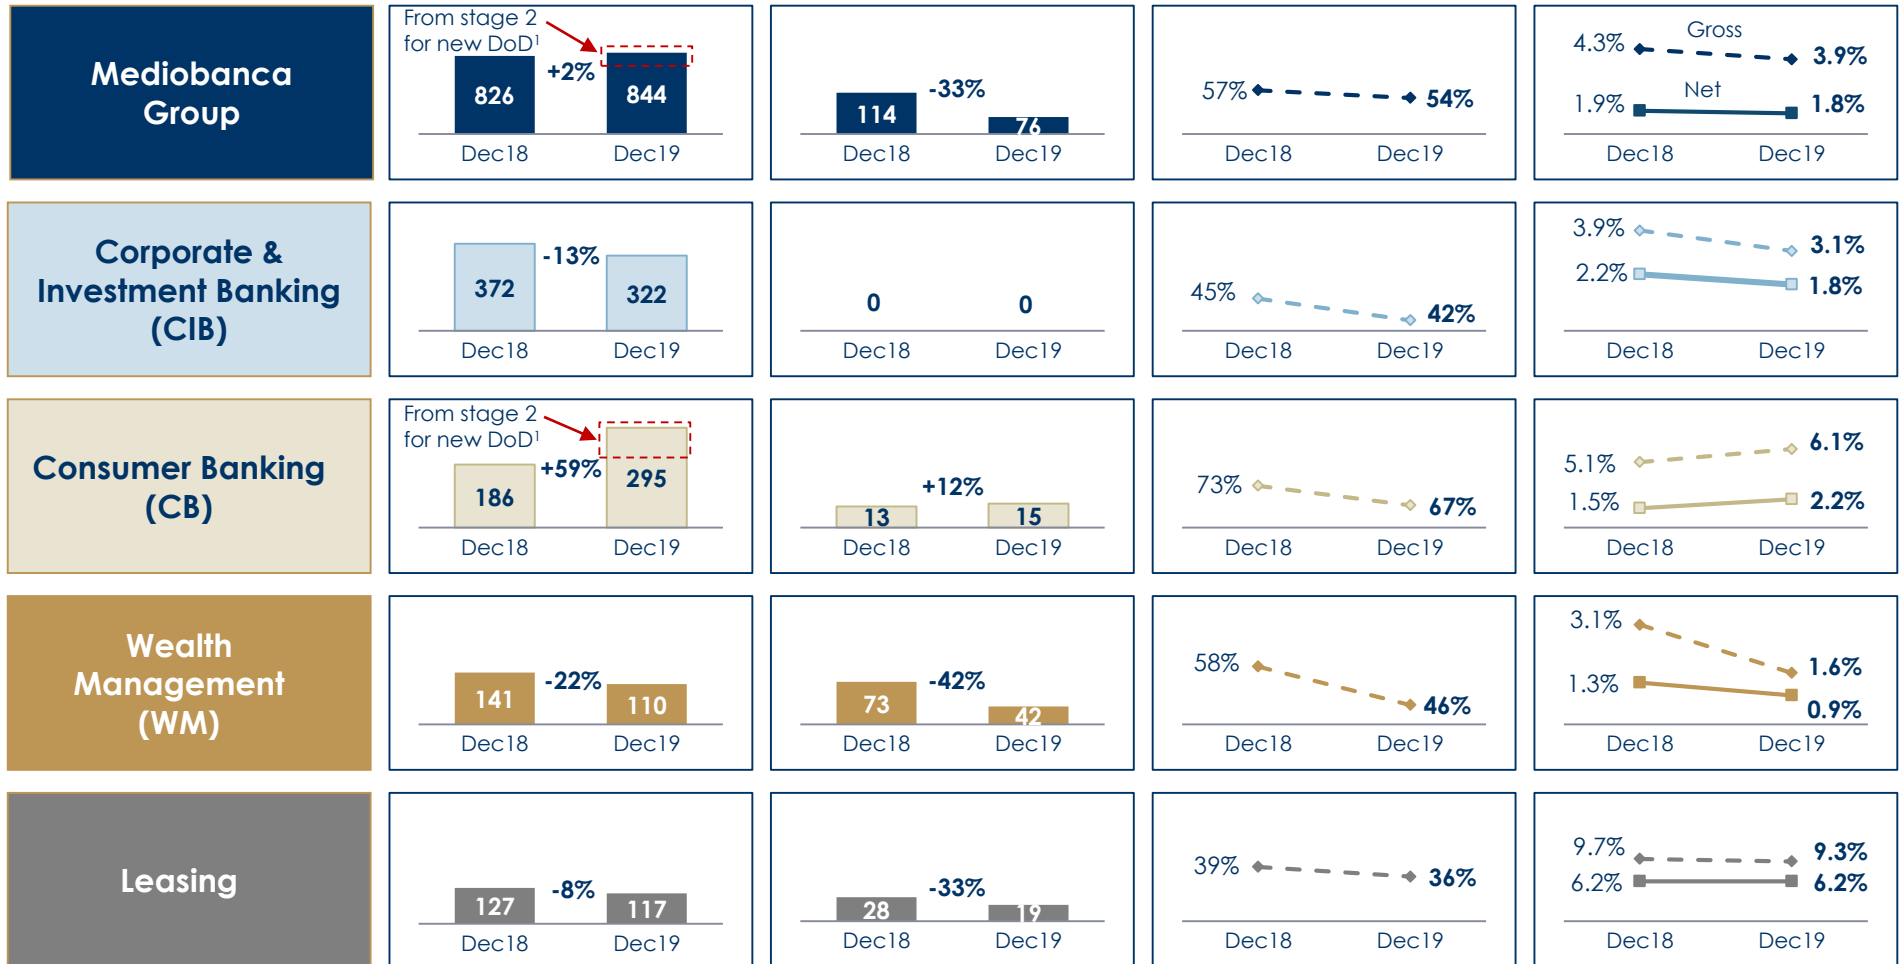

1) Starting from 1Q20 the MB Group has applied a new definition of default (on a voluntary basis and subject to prior authorization for the AIRB segments), fully aligned with the EBA Guidelines in this area (EBA/GL/2016/07), with the provisions of Commission Delegated Regulation (EU) 2018/171 of 19 October 2017, and of Regulation (EU) 2018/1845 of the ECB of 21 November 2018. The new regulations govern the classification of default based on stricter criteria for obligations which show non-payments or are overdrawn on an ongoing basis, "past due or overdrawn", and for the mechanisms for return to a non-default status. The introduction of the new definition of default (DoD) increased NPLs in Sept.19 (~€170m of gross exposure, 90% of which in Consumer Banking, has been moved from stage 2 to stage 3), with no major impact on LLPs as positions were already covered
