

A multibrand company

Q1 2020 RESULTS MAY 14TH 2020

DISCLAIMER

This presentation might contain certain forward-looking statements that reflect the Company's management's current views with respect to future events and financial and operational performance of the Company and its subsidiaries. These forward-looking statements are based on Newlat Food S.p.A.'s current expectations and projections about future events.

Any reference to past performance of Newlat Food shall not be taken as a representation or indication that such performance will continue in the future.

This presentation does not constitute an offer to sell or the solicitation of an offer to buy Newlat's securities, nor shall the document form the basis of or be relied on in connection with any contract or investment decision relating thereto, or constitute a recommendation regarding the securities of Newlat Food.

Newlat's securities referred to in this document have not been and will not be registered under the U.S. Securities Act of 1933 and may not be offered or sold in the United States absent registration or an applicable exemption from registration requirements.

Statement

Rocco Sergi, the Manager responsible for preparing the corporate accounting documents, declares that, pursuant to art. 154-bis, paragraph 2, of the Legislative Decree no. 58 of February 24, 1998, the accounting information contained herein correspond to document results, books and accounting records.

REVENUES

€80.3m, +12.4% vs Q1 2019

- ➤ with strong growth in *all main BUs*
- > revenues from foreign countries accounts for approx. 50%
- Organic growth 6.8%

EBITDA

Adj. EBITDA €6.9m, +26.2% vs Q1 2019

Adj. EBITDA margin 8.6% vs 7.6% Q1 2019

(EBITDA €6.7m, + 26.8% YoY)

with high double-digit margins in dairy, bakery and special products as well as an overall increase in margins in all BUs

EBIT

€3.3m vs. €2.0m Q1 2019, +63% with good profitability in all BUs

driven by an increase in sales volumes and improvements in supply chain efficiencies

CASH CONVERSION

90% vs 90.6% in Q1 2019

strong cash conversion⁽¹⁾ enabling Newlat to deleverage.

NET INCOME

€2.3 m, +92.2% vs €1.2 m Q1 2019

net income margin increased to 2.9% vs 1.7% Q1 2019

NET FINANCIAL POSITION

NFP equal to positive €52m vs positive €48.6m FY2019

Excluding the effect of *IFRS 16 lease liabilities*, NFP would have been positive by \in 68.6 million.

REVENUES AND COSTS IN CONSTANT IMPROVEMENT

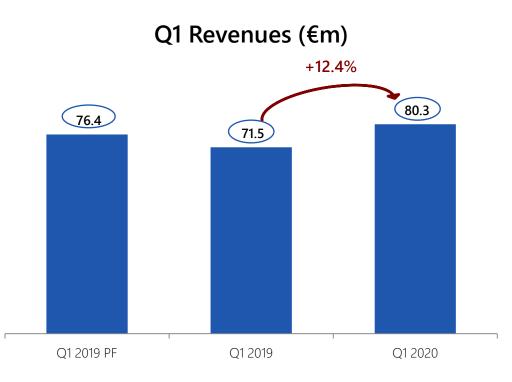

Despite the Covid-19 emergency, the first quarter of 2020 saw extremely positive results, with an **increase in sales in all business units and geographies**.

The company's consolidated revenues in Q1 amounted to € 80.3 million, up 12.4% compared to Q1 2019.

For the sake of consistency with previous presentations, Q1 2019 proforma revenues* are also reported – Q1 2020 revenues increased by 5.2% vs. 2019 proforma revenues.

Cost of goods sold for the period was equal to **83.3%** of sales as opposed to 84.8% in Q1 2019, this was mainly driven by a better procurement policy.

*2019 Proforma figures include:

- i. acquisition of 100% of Delverde Industrie Alimentari S.p.A;
- ii. acquisition of 100% of Newlat Deutschland from Newlat Group SA.

REVENUE BREAKDOWN BY BUSINESS UNIT

• **Pasta** confirms to be Newlat's **main business unit** in terms of sales volumes with a share of 46.9%.

• Revenues relating to the *pasta* segment show an increase of **19.6%**; net of the Delverde contribution, organic growth is equal to **6.8%**, mainly due to an increase in sales volumes in the German market and in other countries.

•*Milk products* revenues increased by **7.1%**, mainly due to an increase in sales volumes.

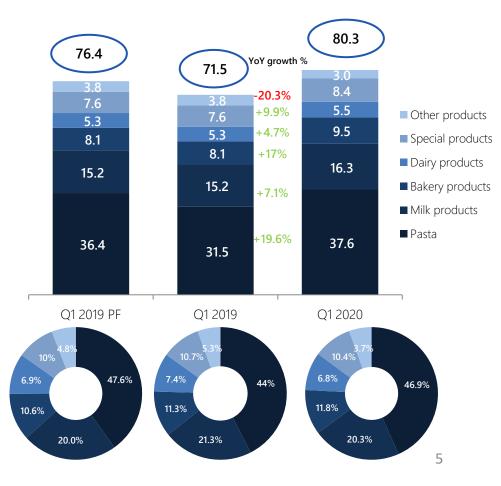

•Revenues relating to the **Bakery products** segment recorded a significant increase compared to the same period of the previous year (+ **17%**) due to the higher sales volumes recorded especially in Italy.

•*Dairy products* went up **4.7%**, mainly due to the increase in mascarpone sales.

•*Special Products* sales increased by **9.9%** mainly due to the renegotiation of price lists with Kraft-Heinz, as well as the consequence of the increase in sales volumes.

•*Other products* sales decreased by -20.3% compared to the same period of the previous year as a consequence of a reduction in sales volumes in the food service and normal trade sector as a result of COVID- 19. The marginality, however, results in line with an increasing EBIDA Margin.

Revenue Breakdown (€m)

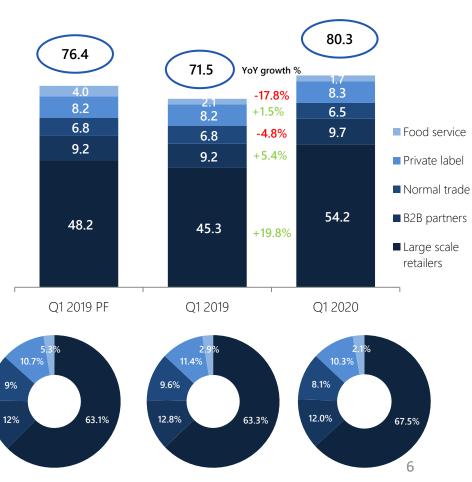

•Revenues from the **large-scale retail distribution** channel went up **19.8%** mainly due to the organic growth recorded in all segments and also thanks to the Delverde contribution.

•Revenues related to the **B2B partners** channel increased by **5.4%** as a consequence of an increase in sales volumes.

•The revenues from the **Normal trade** channel decreased by **4.8%** mainly as a result of the decrease in sales volumes of the "Other Products" category as a consequence of COVID-19.

•Revenues relating to the **private label** channel recorded an increase of **1.5%** compared to the same period of the previous year.

•Food Service sales decreased by 17.8% compared to the same period of the previous year as an effect of the industry lockdown all throughout March 2020.

Revenue Breakdown (€m)

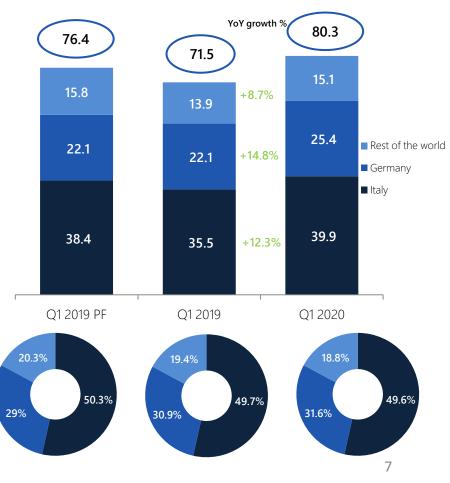

• Revenue distribution by geography remains substantially the same between the two periods. The domestic market accounts for 49.6% of sales, Germany 31.6%, while the rest of the world represents 18.8% of sales.

•Revenues in **Italy** increase by **12.3%** mainly due to the organic growth in the *milk, dairy and bakery* sectors and the contribution of Delverde.

•Revenues in **Germany** are the best performing area in the Group, and were up **14.8%** due to the higher sales volumes in the *pasta* segment.

•Revenues relating to **Other countries** increased by **8.7%** in the periods under examination due to organic growth in all segments.

Revenue Breakdown (€m)

EBITDA BREAKDOWN BY BUSINESS UNIT

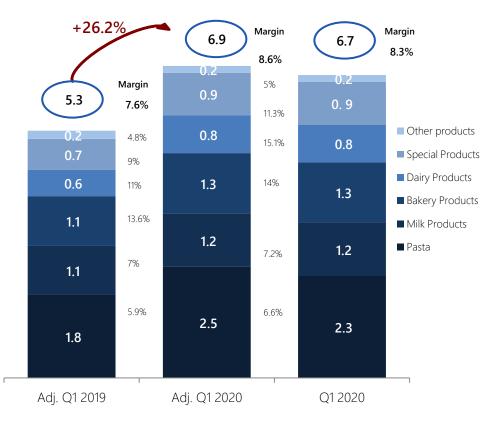

EBITDA went up **26.8%** and reached **€6.7m** versus €5.3m in Q1 2019. EBITDA margin was equal to **8.3%**, up 0.9% compared to Q1 2019.

Adjusted EBITDA was equal to **€6.9m**, up **26.2%**, with an adj. EBITDA margin of **8.6%**.

All Business Units recorded an improvement in Adj. EBITDA margin:

- Bakery, dairy and special products confirm their high profitability, displaying an exceptional increase, with double-digit margins in all three segments, respectively 14%, 15.1% and 11.3%.
- **Pasta** records a margin of **6.6%** as vs. 5.9% in Q1 2019.
- **Dairy products**' profitability is the highest at 15.1%, this is thanks to higher sales volumes of higher-margin products and better raw material costs.
- **Milk products**' profitability rose to **7.2%** thanks to a lower promotional activity.
- Special products' profitability also recorded double-digit margins of 11.3% in the period thanks to new contracts and price renegotiations of existing contracts.

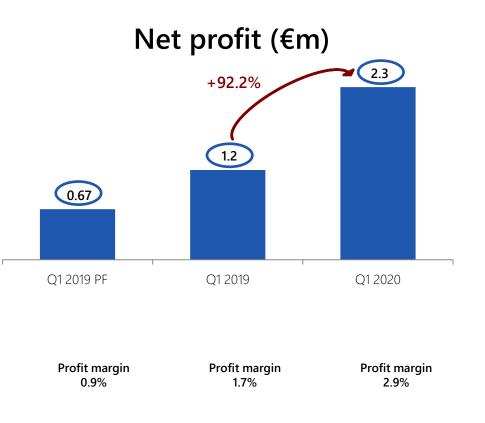

EBITDA breakdown by business unit (€m)

Net profit increased by 92.2% compared to Q1 2019, reaching €2.3 million. If we compare Q1 2020 results to the Q1 2019 proforma net profit, the figure shows an increase of 242%. This reflects the positive effects of the cost optimisation processes that Delverde underwent after its acquisition on 9 April 2019.

The factor that contributed the most to the improvement was the increase in overall profitability thanks to supply chain efficiencies and a better balanced mix contribution.

In fact, profitability visibly improved and reached **2.9%** vs 1.7% in Q1 2019.

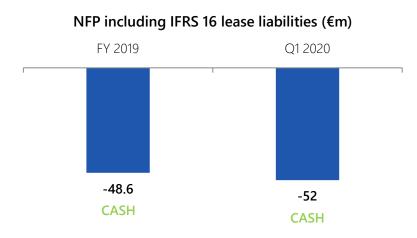

NET FINANCIAL POSITION EVOLUTION AND CASH CONVERSION

NFP continues its constant improvement compared to 2019. As at 31 March 2020, the Company had positive cash by **€52 million** as opposed to €48.6 million in 2019 thanks to its free cash flow generation and the excellent performance of the first quarter.

Excluding IFRS 16 lease liabilities, Newlat's NFP would be positive by €68.6 million vs €66.4 million at 31 December 2019.

 Cash conversion in Q1 2020 was equal to to **90%** vs. 90.6% in 2019.

Organic growth

CLI organic growth was 8% vs. Q1 2019 with revenues of ca. € 47 million, bringing combined revenues to €127.3m. Marginality

CLI shows impressive improvements in margins. This is mainly attributable to a good positioning of its brands and better mix contribution.

CLI **EBITDA margin** improves from 2.2% to **9.4%**. This is <u>before the implementation of any synergies</u> with Newlat (i.e., cost efficiencies + business aggregation of subsidiaries Centrale del Latte della Toscana and Centrale del Latte di Vicenza). Combined Adj. EBITDA margin is **8.9%**.

Norm. Free cash flow generation enabling CLI to deleverage without Newlat's support

The overall improvement in performance of CLI is also proven in its ability to generate free cash flow. Normalised free cash flow* for Q1 2020 is equal to € 2.50 m, thus giving an indication that CLI is able to deleverage on a stand-alone basis without the intervention of Newlat Food. The combined entity gives a **normalised FCF of € 7.31 m** and a norm. FCF as a percentage of EBITDA of **65.9%**.
