WE DESIGN BUSINESS  
EVOLUTION THROUGH DATA,  
TECHNOLOGY & CREATIVITY

Alkemy was founded in 2012 with the aim of supporting the **top management** of large companies in the **process of digitizing** their business model.

The market in which Alkemy insists is the **digital transformation market** which today is worth over **6 billion euros** in Italy and **grows** at a rate of between **7 and 10% per year**.

In this market, Alkemy has developed a **differentiated positioning** that has allowed it to grow with a **CAGR of 42%** (>3x the market), to move from the 23 starting resources to a team of over **650 people** and a turnover over **80M€**.

In these 7 years, Alkemy has **successfully** used the **M&A lever** (7 acquisitions) using the IPO proceeds in less than nine months, and the **EBITDA growth** of the four acquisitions made in Italy from 2013 to 2018 was between **150 and 440%**.

Alkemy has developed a **new organization** and a new Go-to-Market strategy that have laid the foundations for the **industrialization** and expansion of the business scale, resulting in **strong organic growth and higher marginality**.

We help companies to  
evolve their business in the

# LOOKING AHEAD

- > Alkemy will continue the process of industrialization of the business model, that we started over the course of 2019, defining our new organization and the new go to market strategy. Alkemy will continue to work in this direction with an elevated focus on both marginality and organic growth.
- > In 1H indeed Alkemy already started to register the first positive results in terms of marginality, thanks to the better mix and the business efficiencies generated.
- > In 1H 2020 the top line was impacted by an unprecedented crisis, but the management is confident that in a post COVID-19 world, the services offered by Alkemy for digital transformation and business evolution will be structurally necessary for current and future customers to be competitive and successful.
- > The evolution of the Business in the next few months will depend mostly on exogenous factors such as the dynamics of the pandemic, the resilience of our clients on one hand, and government interventions in support of the economy and investments in the digital field on the other.
- > The management will monitor continuously and carefully the developments of the events, in order to be ready to promptly take the necessary actions to mitigate any impacts on business performance resulting from the tough economic environment in key geographies.
- > Taking into account the results achieved in the first half of 2020, and current trading conditions, excluding the occurrence of events that cannot be foreseen at the moment (ie new lockdowns), in FY 2020 we expect to reach an EBITDA no less than that of 2019, despite the decline in revenues expected, mainly on foreign markets.
