development of technological solutions aimed at making human mobility easier and more convenient, both for people and as an employee of an organization, in all its possible aspects. Business started with the development of solutions that allow a safe return to work after the period of suspension of activities imposed by the COVID emergency. Be Shaping the Future S.p.A. owns 51% of the company.

## 5. Presentation criteria

The Interim Management Report at 30 September 2020, is not audited and was prepared in accordance with the provisions of art. 154-ter of Italian Legislative Decree no. 58/1998 (Consolidated Law on Finance).

The Interim Management Report has been prepared in accordance with international accounting standards IAS/IFRS, issued by the International Accounting Standards Board (IASB) and endorsed by the European Commission following the entry into force of European Regulation no. 1606/2002 and specifically on the basis of international accounting standard IAS 34 - Interim Financial Reporting, applicable to interim financial reports.

The Interim Management Report includes a concise disclosure on the financial statements, comprised of the income statement, statement of financial position, statement of cash flows and statement of changes in shareholders' equity. The information provided in the statement of financial position refers to 30 September 2020 and to 31 December 2019. The information provided in the income statement regards the situation at 30 September 2020 and 2019. and refers to the pre-tax position. The reclassified consolidated statement of cash flows indicates cash flows during the period and classified among operating, investing and financing activities. The data are provided on a consolidated basis and presented in thousands of Euro (the functional currency) unless otherwise indicated. There could be differences in the unit amounts shown in the tables below due to rounding.

### 5.1 Scope of consolidation

Compared to 31 December 2019, the scope of consolidation has been altered by the following events:

- in April 2020, Be acquired 51% of the capital of the company Dream of Ordinary Madness Entertainment S.r.l., operating in the business area dedicated to digital engagement, with considerable focus on the European Financial Industry. The parties also agreed on a "Put & Call" structure to purchase the residual capital in two tranches by 2027.
- in June 2020, Be created a centre of excellence dedicated to solutions supporting human mobility. The aim is not only to provide a high-impact tool for the return to normality but to design an entire ecosystem of services designed to facilitate the life and movement of people within companies. Starting from an idea of Stefano Quintarelli, Luca Mastrostefano and Marco Locatelli (minority shareholders), the company "Human Mobility Srl" is 51% owned by the Be Group. Minority shareholders will be remunerated for a total of Euro 1.99 million in two subsequent tranches by 2026. This value was determined on the basis of the best estimate available to date. The operation will imply the subsequent purchase of the remaining capital of the company by 2026.

- Note that in April 2020, following the implementation of the Group's Rebranding&Positioning project, the companies Be Consulting Think, Project & Plan S.p.A., Be Solutions Solve, Realize & Control S.p.A. and Targit GmbH changed their company name to Be Shaping The Future, Management Consulting S.p.A. (Be Management Consulting S.p.A. for short), Be Shaping The Future, DigiTech Solutions S.p.A. (Be Solutions S.p.A. or Be DigiTech Solutions S.p.A. for short) and Be Shaping the Future GmbH, respectively. Further on in August the company Be Poland Think, Solve and Execute, sp zo.o changed its company name in Be Shaping the Future, sp zo.o and in September the companies Be Think, Solve, Execute GmbH and Ibe Tse Limited changed their company name in Be Shaping the Future GmbH and Be Shaping the Future Management Consulting Limited respectively.

## 5.2 Discretionary measurements and significant accounting estimates

The Interim Management Report at 30 September 2020 requires discretionary measurements and accounting estimates that have an effect on the value of statement of financial position assets and liabilities and on disclosures. The final results could differ from such estimates.

The estimates are used to measure goodwill, to recognise credit risk provisions, to determine write-downs on investments or assets, and to determine amortisation and depreciation and provisions for risks and charges. The estimates and assumptions are periodically reviewed and the effects of any change are immediately reflected in the income statement..

## 6. Disclosure on Operating performance

The following table illustrates the Be Group income statement at 30 September 2020 compared with the same period of the previous year.

One of the main indicators adopted to assess the economic and financial performance of the Group is the Gross Operating Margin, or Earnings before Interest, Taxes, Depreciation & Amortisation (EBITDA) - an indicator not envisaged by the IFRS (Communication CERS/05-178b). ## 6.5 Related Party Transactions

The Company's Board of Directors adopted the "Regulations on Related Parties" on 1 March 2014, replacing the one previously approved on 12 March 2010. For further details, this document is published on the Company web site ([www.be-tse.it](http://www.be-tse.it)). Note that the Be's Board of Directors has approved a new version of the procedure for transactions with the Company's related parties. The Procedure was changed in order to reflect some changes made by Consob to the Regulation for Related Party Transactions (approved on 22 March 2018) in order to align domestic legislation with that envisaged by the "Market Abuse Regulation".

With regard to related party transactions, including therein intercompany transactions, note that the same cannot be quantified as atypical or unusual, as part of the normal course of operations of Group companies. Said transactions are settled at arm's length, on the basis of the goods and services provided.

The Be Group's related parties with which economic and equity transactions were recognized at 30 September 2020 are: TIP Tamburi Investment Partners S.p.A.. It should be noted that its Chief Executive Officer, Anna Lambiase, has no longer been a member of the Board of Directors of Be S.p.A. since 22 April 2020, as her term of office has expired.

With regard to Messrs Stefano Achermann and Carlo Achermann and the companies controlled by them - Carma Consulting S.r.l., iFuture S.r.l. and Innishboffin S.r.l. - the economic transactions that took place in the period substantially refer only to fees paid for the positions of Executive and Company Director of Group companies and, like remuneration for other members of the Board of Directors and Board of Statutory Auditors, are not included in the following tables.

The following tables illustrate the Group's costs and revenue, payables and receivables due to/from related parties:

## 7. Other disclosures

### 7.1 Main risks and uncertainties to which the Be Group is exposed

Detailed below are the main risks and uncertainties that could affect the business activities, financial conditions and prospects of the Company and the Group.

#### - Risks associated with “Operating Performance”

In order to further improve operating performance, the Company believes it is important to achieve the strategic objectives of the 2020-2022 Business Plan. This Plan was prepared by the Directors on the basis of forecasts and assumptions inherent to future trends in operations and the reference market. The forecasts represent the best estimate of future events expected to arise and of action that management intends to take. These were estimated on the basis of final figures, orders already received or sales to be made to established customers, as such presenting a lower degree of uncertainty and therefore a higher probability of actually occurring. Vice versa, the assumptions relate to future events and actions, fully or partly independent from management action. Consequently, the Directors acknowledge that the strategic objectives identified in the 2020-2022 Plan, though reasonable, present profiles of uncertainty due to the chance nature of future events occurring and the characteristics of the reference market, and also as regards the occurrence of events represented in the plan, their extent and timing.

#### - Risks associated with the “Financial Position”

The Be Group is exposed to financial risks associated with its operations, particularly interest rate risk, liquidity risk, credit risk and the risk of cash flow fluctuations. In

addition, essential upkeep of the bank credit facilities held is important to the Group in order to meet its overall current funding needs and to achieve the objectives of the 2020-2022 Plan.

- **Risks associated with “Goodwill Impairment ”**

The Be Group could have a negative impact on the value of its shareholders’ equity if there should be any impairment to goodwill recognised in the financial statements at 30 September 2020. The Be Group could have a negative impact on the value of its shareholders’ equity if there should be any impairment to goodwill recognised in the financial statements at 2020-2022 Plan.

- **Risks associated with “Litigation Liabilities”**

The Be Group is involved in proceedings before various judicial authorities, divided into litigation cases as defendant - i.e. where the Company has been summoned by third parties - and cases as plaintiff where the Company has summoned third parties..

- **Risks associated with “Restructuring” activities**

In recent years, the Be Group began a restructuring of its area of business with necessary actions to reduce personnel, also through transfers. There is a risk of appeals against such actions and the proceedings have given rise to prudential allocation of provisions in the company financial statements. Uncertainty remains in any event regarding the decisions of the authorities involved

- **Risks associated with “Competition”**

The ICT consulting market is highly competitive. A number of competitors could be able to expand their product mix to our detriment. In addition, an intensification of the level of competition could affect Group business and the option of consolidating or widening its competitive position in the reference sectors, with subsequent repercussions on business and on the income, equity and financial positions.

- **Risks associated with “Technological Change”**

The Group operates in a market characterised by profound and continuous technological changes that call for the Group capacity to adapt quickly and successfully to such developments and to the changing technology needs of its customers. Any inability of the Group in adapting to new technologies and therefore to changes in the needs of its customers could have a negative impact on operating performance.

- **Risks related to dependence on key personnel**

The Group’s success depends largely on certain key personnel that have been a determining factor in its development, in particular the executive directors of the Parent Company. The Group companies also have an executive team with many years of experience in the field, playing a crucial role in managing the Group’s activities. The loss of any of these key figures without a suitable replacement, and the inability to attract and retain new, qualified resources, could have a negative impact on the Group’s prospects, business activities, operating performance and financial position. Management considers in any event that the Company has an operational and executive structure capable of ensuring management of corporate affairs as a going concern.

- **Risks associated with internationalisation**

As part of its internationalisation strategy, the Group could be exposed to risks typical of international operations, including those relating to changes in the political, macroeconomic, tax and/or regulatory frameworks and to fluctuating exchange rates.

## - Covid-19

With regard to the main factors of uncertainty existing on the date of submission of this Interim Management Report, we draw attention to those relating to the events that have gradually emerged over the course of the last nine months concerning the growing and progressive spread at international and national level of the medical emergency relating to the COVID-19 pandemic (Coronavirus).

Specifically, as mentioned previously, given the particular type of Be Group's reference market - mainly large financial institutions - the Covid-19 pandemic had almost no impact at 30 September 2020.

Therefore, with one the biggest global crisis ever in the background, with Italy at the forefront, the results for the first half of 2020, as highlighted above, confirm the solidity of the Be Group's business model. The crisis has accelerated the financial industry's need to adopt digital applications in all of their forms, bringing considerable benefits in terms of new opportunities for the Be Group. The Group expects this trend to continue in the coming months, especially in light of the greater dependence of credit institutions on remote relationship models.

When preparing the Interim Management Report at 30 September 2020, as part of the main valuation and estimation processes, it should be noted that, considering the results in line with the Plan used for the impairment test at 31 December 2019, as well as the hedges resulting from the impairment tests on the assets and liabilities recognised (as resulting from the sensitivity analyses conducted on 31 December 2019), the Company does not believe that there are elements of uncertainty as to recoverability. It was therefore considered reasonable not to carry out a new impairment test, since the Covid-19 was not deemed to be a trigger event for the Be Group.

## 7.2 Investment in development

The Be Group's development activities have always aimed to consolidate customer relations, develop new forms of business for them and acquire new customers. The main development activities conducted entail developing the Be Group-owned technological platforms; in particular, during 2020, investments mostly regarded the development and upgrade of the technological platforms "Universo Sirius" - relating to the management of Life and Non-life insurance portfolios, and the development of the company's internal ICT system - by Be Digttech Solutions, the development of the digital applications by Iquii, Juniper and the newly established Human Mobility, as well as the development of the IT platforms of Fimas GmbH and Be Shaping the future GmbH (Austria and Germany) specialised in various areas of the banking industry. The Be Group will continue to invest in development, and also plan other project opportunities. These new initiatives will aim to expand the product mix, creating technology platforms for the provision of services to its customers.

## 7.3 Significant events in the third quarter of 2020

In July 2020, Be participated in a dedicated capital increase of YOLO, the instant insurance on demand platform founded by Simone Ranucci Brandimarte and Gianluca de Cobelli. Be's investment in YOLO is added to those of Intesa San Paolo Vita, Banca di Piacenza and CRIF. Be's equity investment will be equal to 2.5% of YOLO's capital. Be also adheres to a new Shareholders' Agreement that links the founding members and new investors.

## 8. Events after 30 September 2020 and business outlook

In October Be gave notice of its intention to initiate a buyback programme of treasury shares up to a maximum of 3,000,000 Euros, to be completed by 31 January 2021. This was in execution of the relevant buyback resolution of the Shareholders' Meeting of 22 April 2020, pursuant to art. 144-bis of Consob Regulation no. 11971/1999 - with any subsequent purchases to be considered once the current programme will have been completed.

In October Be Group has formalised a commercial partnership agreement with U-ANT – an innovative start up by Professor Andrea Crisanti, an internationally known virologist – and Prof. Vittorio Carlei, professor of Advanced Analytics at LUISS Guido Carli, to support the continuity of work. The company specialises in Artificial Intelligence and Machine Learning algorithms applied to microbiology and epidemiological issues. U-ANT is the result of a research project entitled “Covid-19 company risk surveillance” funded by Leonardo Del Vecchio Foundation in collaboration with the Department of Microbiology and Virology of the University of Padova.

With reference to the Covid-19 pandemic, it should be noted that the Group constantly monitors any development in order to curb and try to virtually zero the effects with regard to health and safety at work and in economic, equity and financial terms, through the definition and implementation of flexible and timely action plans.

Therefore, taking into account the actions already implemented as well as those planned for the coming months the Group believes that it has adequate management levers available to counter the effects of the health emergency throughout 2020.

In light of the period results and in spite of the macroeconomic uncertainties due to the impact of the Covid-19 pandemic, at the present time it is reasonable to confirm the Company's yearly and overall targets under the 2020-2022 Business Plan.

The financial calendar for 2020, as announced, is currently confirmed.
