2018 Market Shares¹

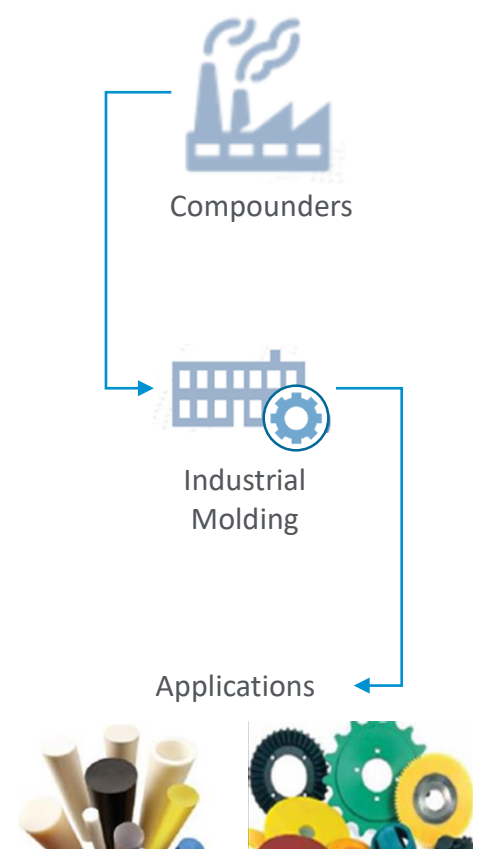

Textile mass production is in APAC, with Europe's core focus is on high-end production. Fast fashion needs lead to growing production out of Turkey, which can be served by European NTF players

A leading player with limited competition. Only 3 suppliers capable of offering products starting from monomer and intermediate handling. APAC moving slowly towards high-end production

C EP <i>Engineering Plastic</i>	Description
 <p>The diagram illustrates the value chain for Engineering Plastic (EP). It starts with Compounders, represented by a factory icon, which supply semi-finished products to Industrial Molding, shown as a building with a gear icon. These molded products are then used in various Applications, depicted by icons of pipes, tubes, and gears.</p>	<p>Aquafil manufactures nylon 6 and raisin pellet polymers for compounders. Once the polymer has been transformed into a techno-polymer, compounders sell the semi-finished product to the industrial molding companies, which model it based on the final product requested by the client</p>

ENDLESS POSSIBILITIES

**THE ECONYL[®]
REGENERATION SYSTEM**

- 100% regenerated & regenerable nylon
- Unique proprietary technology
- Ca 38 % of Aquafil Fiber 2019 Revenues

WWW.ECONYL.COM

STEP 1: RESCUE

The ECONYL® Regeneration System starts with rescuing waste, like fishing nets, fabric scraps, carpet flooring and industrial plastic from landfills and oceans all over the world. That waste is then sorted and cleaned to recover all of the nylon possible.

STEP 2: REGENERATE

Through a radical regeneration and purification process, the nylon waste is recycled right back to its original purity. That means ECONYL® regenerated nylon is exactly the same as virgin nylon.

STEP 3: REMAKE

ECONYL® regenerated nylon is processed into carpet yarn and textile yarn for the fashion and interior industries.

STEP 4: REIMAGINE

Fashion brands and carpet producers use ECONYL® regenerated nylon to create brand new products. And that nylon has the potential to be recycled infinitely, without ever losing its quality.
