Executive summary.

- Net result DIS posted a Net profit of US\$ 15.4m in the first 9M'20 vs. US\$ (32.5)m in the first 9M'19 and Adjusted net result (excluding non-recurring/non-cash items from both periods) of US\$ 26.1m in the first 9M'20 vs. US\$ (15.1)m in the first 9M'19 (a US\$ 41.1m increase y-o-y). In Q3'20, DIS posted a Net result of US\$ (1.7)m vs. US\$ (8.2)m recorded in the same quarter of last year. Excluding non-recurring items from both Q3'20 and Q3'19, the Net result would have been of US\$ (0.4)m and US\$ (5.9)m respectively for the two periods.
- TCE DIS' daily spot rate was US\$ 18,592 in the first 9M'20 vs. US\$ 12,786 achieved in the same period of last year, equivalent to a 45.4% or US\$ 5,806/day improvement year-on-year. In Q3'20, DIS generated a daily spot average of US\$ 12,866 vs. US\$ 11,616 achieved in Q3'19. In the first 9M'20, 63.5% of DIS' employment days were 'covered' through TC contracts at an average daily rate of US\$ 16,041 (9M'19: 48.7% coverage at US\$ 14,610/day). DIS achieved a total daily average rate of US\$ 16,973 in the first 9M'20 vs. US\$ 13,674 in the first 9M'19 and of US\$ 14,864 in Q3'20 vs. US\$ 13,264 in Q3'19.
- Leverage reduction DIS' NFP (excluding IFRS16) to FMV ratio was of 65.1% at the end of Sep'20 vs. 64.0% as at the end of 2019 and compared with 72.9% as at the end of 2018. This improvement relative to 2018 reflects DIS' strong operating cashflow generation in the first 9 months of 2020, as well as the Company's constant focus on deleveraging, also through vessel disposals and equity capital increases, to achieve a sound financial structure, increasing our strategic and operational flexibility going forward.
- Vessel sales In April'20, DIS announced that GLENDA International Shipping (a 50/50 joint venture with the Glencore Group) signed a memorandum of agreement for the sale of the MR vessel GLENDA Meredith. In Q2'20, this transaction allowed GLENDA to generate around US\$ 18.8m in cash net of commissions. In May'20, DIS announced that d'Amico Tankers signed a memorandum of agreement for the sale of the Handysize vessel Cielo di Guangzhou. In Q2'20, this transaction allowed d'Amico Tankers to generate around US\$ 8.8m in cash net of commissions. Both of these vessels were delivered to their new owners before the end of the first semester. In July'20, DIS announced that d'Amico Tankers signed a memorandum of agreement for the sale of the two MR vessels High Progress and High Performance. This transaction will allow d'Amico Tankers to generate a total net cash of around US\$ 16.3m in H2'20 (of which US\$ 8.3m already in Q3'20). In Sep'20, DIS announced that d'Amico Tankers signed a memorandum of agreement for the sale of the MR vessel High Courage. This further transaction will allow d'Amico Tankers to generate a total net cash of around US\$ 8.9m between Nov'20 and Jan'21.

Executive summary (continued).

• Market update – At the beginning of the year, the general outlook for the tanker sector was very positive, based on strong fundamentals linked to the implementation of IMO 2020 and its anticipated positive effects on the demand for the seaborne transportation of refined products. This coupled with a very limited nominal supply growth and an even lower effective fleet growth, due to sanctions, scrubber installations and port congestion, provided strong support to the markets.

The sentiment rapidly changed in late January as the spread of COVID-19 in China weighed down on oil demand and refining activity in the world's largest crude-importing nation. Product tanker rates softened considerably reaching a trough around mid-February. In early March, however, OPEC+ members failed to strike an agreement on production cuts to offset falling oil prices caused by the outbreak of the virus. OPEC+ countries started pumping oil at free will, leading to a price war between Saudi Arabia and Russia and to a sharp reduction in oil prices. Increased production combined with a steep decline in demand moved the forward oil and refined products prices into a steep contango, quickly reducing land-based storage capacity and pushing large quantities of crude and petroleum products into tankers as floating storage. This situation was extremely beneficial for both crude and product tankers with spot rates surging in April.

The OPEC+ production cuts agreed in April as well as the gradual unwinding of the lock-down measures, led to a rebound in oil demand with oil prices rising and the forward oil price curve flattening up to around the end of August. These trends contributed to a gradual reduction of floating storage and to a sharp correction in freight markets. More recently, from September, a resurgence of COVID 19 cases in Europe and acceleration of contagion in some large emerging markets, has dampened oil demand growth and contributed to some weakness in the front-end of the oil price curve, with some opportunities for floating storage re-emerging. The uncertainty regarding the future developments is still significant, and hinges and on how strict and effective the new confinement measures being adopted by developing economies to contain the spread of the ongoing second wave of COVID-19 cases will be.

DIS has, however, been significantly strengthening its liquidity position in 2020 thanks to the strong freight markets and the recently announced vessel sales. Furthermore, in Q4 2020 DIS will benefit from significant contract coverage. The company is therefore favourably positioned to confront a near-term soft patch in the market. Longer-term, the expected slow-down in fleet growth in 2021, coupled with a rebound in oil products consumption, should contribute to a relatively quick rebalancing of markets, with a sustainable recovery in freight rates.

A modern, high-quality and versatile fleet.

			September 30 th	¹ , 2020	
DIS Fleet ¹	LR1	MR	Handy	Total	%
Owned	5.0	10.0	6.0	21.0	51.2%
Bareboat chartered	1.0	8.0	0.0	9.0	22.0%
Time chartered-in long-term	0.0	8.0	0.0	8.0	19.5%
Time chartered-in short-term	0.0	3.0	0.0	3.0	7.3%
TOTAL	6.0	29.0	6.0	41.0	100.0%

- DIS controls a modern fleet of 41.0 product tankers.
- Flexible, young and efficient double-hull fleet:
 - ✓ 78.0% IMO classed (industry average²: 45%);
 - ✓ An average age of the owned and bareboat fleet of 6.8 years (industry average²: 10.9 years for MRs and LR1s (25,000 − 84,999 dwt));
 - ✓ 70% of owned and bareboat vessels is 'Eco-design' (industry average²: 25.1%).
- Fully in compliance with very stringent international industry rules and long-term vetting approvals from the main Oil Majors.
- 22 newbuildings ordered since 2012 (10 MRs, 6 Handys, 6 LR1s), all delivered between Q1'14 and Q4'19.
- **DIS' aims to maintain a top-quality TC coverage book**, by employing part of its eco-newbuilding vessels with Oil Majors, which for long-term contracts currently have a strong preference for these efficient and technologically advanced ships. At the same time, DIS' older tonnage is employed mainly on the spot market.

DIS has a modern fleet, a balanced mix of owned and TC-in vessels, and strong relationships with key market players.

Rapidly declining CAPEX¹ commitments.

- DIS invested US\$ 924.4m from FY'12 to FY'19, mostly related to the 22 newbuildings ordered since 2012;
- **DIS has no remaining investments for newbuildings**, since the last LR1 vessel was delivered in Oct'19.
- Maintenance CAPEX from 2020 to 2022 is likely to fall relative to figures included in graph above, as DIS sells some of its
 older vessels to capitalise on the expected stronger markets.

DIS' large investment plan, which led to an important renewal of its owned fleet, consisting now mostly of eco-vessels, was completed in Oct'19. DIS' Capex falls substantially in 2020 and even more so in 2021 and 2022.

Lighter bank debt repayments and low refinancing risk

Forecasted bank debt financing cash-flow (Excluding overdraft facilities)^{1,2,3}

Daily bank loan repayment on owned vessels (Excluding overdraft facilities)^{4,5}

- DIS has secured bank commitments to refinance the balloons of US\$42.4 million which are due in '21 (mostly in January)
 and expects to draw-down the new facility in Q4 '20.
- Following completion of this refinancing the next balloons for DIS are due only in 2022.

DIS benefits from a low refinancing risk and lighter debt repayments starting from 2020, with daily bank loan reimbursements for owned vessels dropping by US\$ 1.7k relative to the previous year (-28%).

^{1.} Based on the evolution of the current outstanding bank debt – with the exception of overdraft facilities.

Only balloon repayments are assumed to be refinanced.

^{3.} Repayment due on Vessels held for sale relates to early reimbursement on the following d'Amico Tankers vessels: 2 sold in the first 9M'20, 1 expected to be sold in Q4'20, 2 expected to be sold in FY'21.

^{4.} Based on the evolution of the current outstanding bank debt – with the exception of overdraft facilities.

Only balloon repayments are assumed to be refinanced. Daily bank loan repayments is equal to bank loan repayments (excluding balloons), divided by owned vessel days.

DIS' purchase options on leased vessels.

Vessel Name	Build Date	Purch. Option First Ex. Date	Purch. Obligation Date	First Ex. Option (In/Out of the money) ¹
High Priority	Mar-05	Oct-19	Oct-22	In the money
High Freedom	Jan-14	Feb-20	Feb-28	In the money
High Fidelity	Aug-14	May-20	May-27	In the money
High Trust	Jan-16	Jul-20	Jul-28	In the money
High Discovery	Feb-14	Sep-20	Sep-27	In the money
High Loyalty	Feb-15	Oct-20	Oct-28	In the money
High Trader	Oct-15	Dec-20	Dec-28	In the money
High Voyager	Nov-14	Apr-21	Apr-29	In the money
Cielo di Houston	Jan-19	Mar-24	Sep-25	In the money

DIS has flexible purchase options on all its bareboat-in vessels, allowing it to acquire all the vessels with three months' notice from the first purchase option exercise date. Based on today's depreciated market values and their respective first exercise prices, all of these options are "theoretically" in the money. Six of these options are already exercisable and an additional one will become so in December 2020.

E-MARKET SDIR CERTIFIED

Contracts and fleet mix to drive future results.

DIS' increasing % of 'Eco' fleet² (based on all controlled vessels)

% Eco vessels on total fleet at period-end

- TC contract rates have reached a bottom in Q2'19 and average rates of signed contracts rise throughout 2020.
- TC contracts allows DIS to:
 - consolidate strategic relationships with Oil Majors (Chevron, Exxon, Total, Saudi Aramco) and leading trading houses;
 - hedge against spot market volatility allowing DIS to secure TCE Earnings (Q4'20 US\$ 34.1m; FY'21 US\$ 52.5m; FY'22 US\$ 15.0m, are already secured as of today);
 - improve its Operating Cash Flow (TC Hires are paid monthly in advance).
- DIS aims usually for a TC coverage of between 40% and 60%.
- For Q4'20, DIS has covered 58.4% of its available vessel days at an average daily rate of US\$ 16,272.
- DIS' percentage of 'Eco' vessels was of only 38% in Q1'18, having increased to 66% in Q3'20 and expected to reach 78% in FY'21.
- The eco percentage should rise even higher than indicated on the chart on the left, as during the next two years DIS is likely to sell some of its older vessels in a stronger market.
- An increasing percentage of 'Eco' vessels will increase DIS' earnings potential, given the premium rates achieved by these vessels.

Takes into consideration the assumed sale of the vessels classified as 'held for sale' at the end of Q3'20, in the course of FY'20 (1 MR whose MOA has been already signed) and of FY'21 (1 MR). In addition, figures include the sale of 1 additional MR early in FY'21 (whose MOA was signed in Sep'20).

^{1.} Situation based on TC 'employment days' (net of estimated off-hire days), and on current contracts in place, which are always subject to changes

Large potential upside to earnings.

Estimated Fleet Evolution (Avg. N. of Vessels)^{1,2,4}

Based on DIS' estimated spot exposure, every US\$ 1,000/day increase/decrease in spot rates equals to:

- US\$ 1.5m higher/lower net result and cash flow in Q4'20;
- US\$ 10.1m higher/lower net result and cash flow in FY'21;
- US\$ 11.8m higher/lower net result and cash flow in FY'22.

Estimated Spot Exposure (Avg. N of Vessels)^{3,4}

Potential upside to earnings^{3,4}

Based on total estimated 'available days'.

Takes into consideration the assumed sale of the vessels classified as 'held for sale' at the end of Q3'20 (1 MR, whose MOA has been already signed) and an additional MR early in FY'21 (whose MOA was signed in Sep'20), as well as another MR at the end of FY'21.

Average number of vessels in each period based on contracts in place as of today and subject to changes.

Based on estimated spot 'employment days' (i.e. net of estimated off-hire days).

DIS has focused also on cost savings.

Daily Operating Costs – Owned and bareboat vessels¹

General & Administrative Costs – Total Fleet²

DIS has focused not only on increasing the top line but also on managing its vessels more efficiently, obtaining significant cost savings in the last two years.

Financial results. Net financial position

(US\$ million)	Dec. 31st, 2019	Sep. 30 th , 2020
Gross debt	(600.9)	(559.1)
IFRS 16 – additional liabilities	(122.8)	(103.6)
Cash and cash equivalents	33.6	59.3
Other current financial assets ¹	7.3	4.6
Net financial position (NFP)	(682.8)	(598.7)
Net financial position (NFP) excl. IFR16	(560.0)	(495.2)
Fleet market value (FMV)	874.5	761.3
NFP (excluding IFRS 16) / FMV	64.0%	65.1%

- Net Financial Position (NFP) of US\$ (598.7)m and Cash and cash equivalents of US\$ 59.3m as at the end of Sep'20 vs NFP of US\$ (682.8)m as at the end of Dec'19;
- The NFP (excluding IFRS16) to FMV ratio was of 65.1% as at the end of Sep'20 vs. 64.0% at the end of 2019 and 72.9% at the end of 2018. This improvement relative to 2018 is attributable to DIS' 2019 equity capital increase and to the Company's strong operating cash generation and additional vessel sales in the first-half of 2020, which was unfortunately partially offset by a recent decrease in its fleet's market value.
- **Bank debt repayments amounted to US\$ (46.6)m in the first 9M'20**, of which: i) US\$ (5.5)m were due to the reimbursement of the loan on M/T Cielo di Guangzhou, sold and delivered to her new owners in Q2'20; ii) US\$ (4.3)m were due to the reimbursement of the loan on M/T High Progress, sold and delivered to her new owners in Q3'20; iii) US\$ (5.7)m were due to reimbursement of the expiring facility on one of the Glenda International Shipping d.a.c.'s vessels, refinanced with another financial institution.
- **US\$ (9.1)m in investments** in the first 9M'20 comprise only drydock costs as DIS' long term investment plan was fully completed in Q4'19.

Despite a softening in asset values in Q2 and Q3'20, thanks to a strong cash generation and further vessel disposals, DIS managed to maintain stable leverage ratios in the first 9M'20.

Financial results. First 9M'20 Results

(US\$ million)	Q3′19	Q3′20
TCE Earnings	59.8	54.1
Result on disposal of vessels	(0.6)	(0.6)
EBITDA	21.4	23.9
Asset impairment	(1.3)	(0.3)
EBIT	2.1	6.9
Impairment of financial assets	0.2	(0.1)
Net Result	(8.2)	(1.7)

9M′19	9M′20
186.1	204.2
(1.5)	(0.7)
69.3	103.4
(13.4)	(6.3)
0.7	45.8
0.9	(0.1)
(32.5)	15.4

Non-recurring items:				
(US\$ million)	Q3′19	Q3′20	9M′19	9M′20
Result on disposal of vessels	(0.6)	(0.6)	(1.5)	(0.7)
Non-recurring financial items	0.1	(0.1)	(1.0)	(2.5)
IFRS 16	(0.5)	(0.4)	(1.4)	(1.1)
Asset impairment	(1.3)	(0.3)	(13.4)	(6.3)
Total non-recurring items	(2.2)	(1.4)	(17.4)	(10.7)
Net Result excl. non-recurring items	(5.9)	(0.4)	(15.1)	26.1

- TCE Earnings US\$ 54.1m in Q3'20 (US\$ 59.8m in Q3'19) and US\$ 204.2m in the first 9M'20 (US\$ 186.1m in the first 9M'19). DIS' total daily average TCE was of US\$ 14,864 in Q3'20 vs. US\$ 13,264 in Q3'19 and US\$ 16,973 in the first 9M'20 vs. US\$ 13,674 in the 9M'19, thanks to a much stronger freight market than in the same period of the previous year (see next slide for further details);
- **EBITDA** − **US\$ 103.4m in the first 9M'20** representing **an increase of 49.2% year-on-year**. Such strong improvement relative to the previous year is mainly attributable to better market conditions. This is reflected also in the **strong operating cash flow of US\$ 70.4m generated in the first 9M'20** vs. US\$ 38.4m in 9M'19 and compared with US\$ 59.3m generated in the entire FY'19:
- Net Result US\$ (1.7)m in Q3'20 vs. US\$ (8.2)m in Q3'19 and US\$ 15.4m in the first 9M'20 vs. US\$ (32.5)m in 9M'19. Excluding results on disposal and non-recurring financial items, as well as the asset impairment and the effects of IFRS 16, from all the above periods, DIS' Net result would have been of US\$ (0.4)m in Q3'20 vs. US\$ (5.9)m in Q3'19 and of US\$ 26.1m in the first 9M'20 vs. US\$ (15.1)m in 9M'19.

Very strong net profit in the first 9M'20, especially if excluding non-recurring items and IFRS16, of US\$ 26.1 million. Despite a weak freight market, DIS achieved almost a breakeven result in Q3'20.

Financial results. Key operating measures

Avg. n. of vessels	49.4	49.8	48.5	49.2	47.6	48.8	46.0	44.4	41.9	44.1
Fleet contact coverage	46.4%	48.0%	51.5%	48.7%	60.4%	51.6%	64.6%	62.6%	63.0%	63.5%
D 'I TOT C :										
Daily TCE Spot (US\$/d)	13,583	13,074	11,616	12,786	17,242	13,683	17,354	25,118	12,866	18,592
	13,583 14,604	13,074 14,398	11,616 14,819	12,786 14,610	17,242 15,130	13,683 14,760	17,354 15,864	25,118 16,236	12,866 16,038	18,592 16,041

- DIS' daily average spot TCE was of US\$ 12,866 in Q3'20 vs. US\$ 11,616 in Q3'19 and of US\$ 18,592 in the first 9M'20 vs. US\$ 12,786 in the 9M'19, which represents a 45.4% (i.e. US\$ 5,806/day) improvement year-on-year.
- At the same time and in line with its strategy, DIS maintained a good level of **coverage** (fixed-rate TC contracts) throughout the first 9M'20, securing through period contracts an average of **63.5%** of its available vessel days **at a daily average TCE rate of US\$ 16,041** (9M'19: 48.7% coverage at US\$ 14,610/day).
- DIS' total daily average TCE (Spot and Time charter) was of US\$ 14,864 in Q3'20 vs. US\$ 13,264 in Q3'19 and of US\$ 16,973 in the first 9M'20 vs. US\$ 13,674 in the 9M'19.

Thanks to the strong freight market of the first part of the year, DIS' daily average spot rate was of US\$ 18,592 in the first 9M'20. In the weaker third quarter, DIS benefited from its high level of coverage achieving a blended daily TC of US\$ 14,864.

TC rates and asset values reverse trend following Covid-19

The one-year TC rate for an eco MR vessel as at the end of October 2020, stood at around US\$ 14,500 per day.

TC rates had been moving up since October 2016, with some temporary and brief inflections, until May 2020, when due to the effects of the Covid-19 outbreak, after a brief spike, rates collapsed from June 2020, although with a slight pick-up from the end of August. Asset values have followed a similar pattern, although with less volatility.

Large drop in oil demand and refining throughputs.

- The reduction in oil demand linked to COVID-19 was unprecedented, according to the IEA **global demand from January to July 2020 was 10.5m b/d lower than last year**. Global demand rose 3.4m b/d m-o-m in July and based on some preliminary data, demand gained a further 1.5 mb/d m-o-m in August, as coronavirus restrictions eased and summer holidays in the northern hemisphere supported a rise in transport fuel demand. The IEA has revised down their Q3'20 oil demand forecast by 14 kb/d. This reduction was, however, offset by slightly higher growth estimates for Q4'20.
- According to the IEA, global oil demand is expected to fall by 8.4m b/d (91.7m b/d) in 2020 relative to the previous year and to recover by 5.5m (97.2m b/d) b/d in 2021.
- Anticipated increases in demand in Q4-20 might, however, not materialise due to a second wave of Covid-19 cases in several countries, which is leading to lockdown measures, teleworking and a weak aviation.
- Strong gains in global refinery throughput in July and relatively stable runs in August and September came at the cost of a steep fall in refining margins, which in Q3'20 saw one of their worst quarters. **Global refinery runs are forecast to fall by 7.2m b/d in 2020 to 74.5m b/d. In 2021, runs are expected to rebound by only 4.9m b/d**, just above the two thirds of the 7.2m b/d lost in 2020.

The ongoing recovery in demand and refining throughputs is likely to be temporarily derailed due to the recent surge in contagions in the most important developed economies

Large but temporary build-up in floating storage.

Crude oil price (Brent, US\$ bbl), forward curve¹

- The large drop in oil demand resulting from Covid-19 as well as the breakdown of OPEC+ negotiations in early March, which resulted in a temporary sharp increase in oil production, has led to a huge oversupply of oil, resulting in a sharp drop in prompt oil prices and the forward oil price curve moving into steep contango.
- As onshore facilities started to rapidly fill-up, oil started to be stored onboard vessels. According to Kpler and various broker reports, floating storage of refined products increased from 25 million barrels in December 2019 to a peak of 75 million barrels as at early May 2020.
- In response to this oversupply, OPEC+ cut production by around 10 million b/d with other voluntary shut-downs leading to a reduction in supply of almost 14 million b/d.
- The tighter market resulting from this supply curtailment flattened the forward oil price curve and contributed to a gradual reduction of floating storage. Floating storage at a global level, fell by 35 million barrels from the mid-May highs to 40 million barrels as at the end of September. More recently however the gradual increase in output from OPEC+, coupled with a slower growth in demand attributable to the resurgence of COVID cases in Europe and an acceleration of the contagion in some large emerging markets, has led to a drop in the oil price, with floating storage for some refined products having turned profitable again.

The market has been rapidly rebalancing with 70% of the Covid related increase in floating storage already unwound by the end of September '20.

1. Source: 2020 ICE Data Derivatives, Inc. (formerly known as Super Derivatives Inc.) as at Oct 29, '20.

Source: Various shipbrokers as at Oct'20

Longer-term: healthy and resilient demand growth.

World seaborne refined products trade¹

Product share of Oil Seaborne trade¹

- Seaborne oil product trade demand has contracted in 2019 and is expected to fall sharply in 2020 before resuming growth in 2021; It has been growing at a CAGR of 3.1% since 2000.
- Furthermore, refineries are increasingly being built far from the main consuming areas, contributing to a rise in volumes transported by sea, and average distances sailed.
- Unsurprisingly, refined products have increased their share of the total oil seaborne trade from 25% in 2000 to 34% in 2020.

Longer-term: large potential upside to asset values.

Historical MR TC and spot rates¹

Historical MR asset values¹

Current asset values are well below cycle peaks, providing a very attractive potential upside.

Longer-term: growth in refinery capacity.

Capacity additions 2019-2024 by region

Refinery growth 2020-2024

- Global refinery crude distillation capacity is estimated to have risen by 2.0 mb/d in '19 (a record) and should rise by a further 6.1m b/d in the '20-24 period. Most of the expansion in the '20-24 period is expected in China (+1.7m b/d) and in the Middle East (+1.7m b/d).
- ~76% of the planned refinery additions in the '20-'24 period are in Asia and the Middle East.
- The large increase in refining capacity in the Middle East in 2020 of 0.6 million b/d, is likely to be very beneficial for product tankers, since it should also entail long sailing distances, as a large portion of their output is likely to be exported to Asia.
- According to the IEA, over the next few years, Europe and all the regions of the southern hemisphere are expected to remain reliant on product imports from the United States, Russia, the Middle East and China. Furthermore, the United States is expected to overtake Russia as the top product exporter and China will surpass India in product exports, becoming the largest supplier in Asia.

Longer-term: changes in refining landscape driving demand

Forecasted changes in refining throughput 2019-2025¹

- New refineries in the US, Middle East and Asia can obtain much higher margins than those in Europe and the FSU.
- Europe is still one of the world's largest refining regions, but capacity and throughput are on a sharp downward trend.
- The large increase expected in refinery capacity worldwide, is going to create further difficulties for European refineries.
- In addition, the 0.5% sulphur content limit in marine fuels worldwide from January 2020, is posing an additional challenge for European and Russian refineries, which are large producers of marine fuel oil.
- Further reductions in European and Russian refineries throughput is therefore expected, with their volumes being displaced by the more competitive North American, Asian and Middle Eastern refineries. The effect of this process is an increase in volumes transported and average ton-miles.

European refining capacity is on a downward trend, creating pent-up demand for seaborne transportation of refined petroleum products.

E-MARKET SDIR CERTIFIED

Slowing fleet growth.

MR & LR1 deliveries and scrapping (m dwt) (lhs), and net fleet growth (%)¹ (rhs)

Scheduled deliveries are slowing. Even with limited scrapping, fleet growth is expected to be of only 2.3% in 2020. Fleet growth in 2021 is expected to be of 1.2%, assuming no additional vessels are ordered for delivery that year.

Current MR & LR1 fleet age

profile¹

Reduction in fleet growth expected already in H2'20.

SDIR

A historically low orderbook and a pick-up in demolitions, which have been minimal this year since demolition yards were closed most of the time, should contribute to limited fleet growth over the next two years.

Limited newbuild orders.

MR Newbuilding parity curve vs second-hand values¹

MR & LR1 orders

- Shipyards worldwide are facing severe financial difficulties, which has led to a **sharp reduction in shipbuilding capacity**.
- Due to the correction in freight rates since May 2020, second-hand values of even young eco-vessels are again trading at a discount to newbuilding parity.
- Furthermore, uncertainty regarding technological innovation to achieve the ambitious IMO targets for reduction in CO² emissions, is reducing newbuilding orders.
- Lower interest in the sector from financial investors (Private Equity), and limited capacity for further investments by industrial players, which have already renewed their fleets and currently have stretched balance sheets, is contributing to a drop in new construction contracts, which reached a ten-year low of 15 MRs and LR1s in 2016. Average annual orders of MRs and LR1 since the beginning of 2016, is the lowest of any 4-year period since 2007. 80 MRs and LR1s have been ordered in 2019 and only 35 so far in 2020.

Strong long-term fundamentals.

Seaborne volume and MR/LR1 fleet growth (lhs)%¹ vs 1year MR and LR1 TC rate (rhs)

The Covid-19 outbreak completely changed the market dynamics, leading to an unprecedent surge in freight rates by the end of April, with a sharp correction from the beginning of May. The virus created a great deal of uncertainty regarding the timing of the recovery in oil demand and the unwinding of the large product stocks which have built-up in the first part of the year. Demand for product tankers contracted sharply in 2020 and is expected to rebound in 2021.

Historical NAV evolution.

DIS' Historical NAV evolution¹

	Dec-12	Dec-13	Dec-14	Dec-15	Dec-16	Dec-17	Dec-18	June-19	Sep-19	Dec-19	June-20	Sep-20
Discount to NAV (End of Period)	35%	5%	23%	16%	34%	20%	58%	54%	59%	39%	63%	53%

As at 30 September 2020, DIS' NAV¹ was estimated at US\$ 266.1m, its fleet market value at US\$ 761.3m², and its closing stock price was 53% below its NAV/share.

^{1.} DIS' owned and bareboat fleet market value according to a primary broker, less Net Debt, excluding the impact of IFRS 16. It includes the value of the leased assets for which DIS has a purchase obligation, less the discounted value of the financial payments on such leases.

Why invest in DIS today.

- Young-fleet, most of which acquired at historically attractive prices and at top-tier yards. Furthermore, vessels are mostly eco-design (70% of owned and bareboat ships following delivery of all DIS' newbuildings) and IMO classed (78% of owned and bareboat ships following delivery of all DIS' newbuildings).
- First-class in-house technical management provides DIS access to long-term charters with demanding oil majors and allows it to anticipate and benefit from regulatory changes.
- Invested mostly in the MR1 and MR2, and more recently in the LR1, segments **these vessels** are the workhorses of the industry, since they **are the most flexible commercially and also the most liquid on the S&P market**.
- Prudent commercial strategy, always aiming to maintain between 40% and 60% of the fleet covered through long-term fixed-rate contracts over the following 12 months.
- International reach with chartering offices in 4 countries and 3 continents (Stamford, London, Singapore, and Dublin), allowing DIS to maintain close relationships with clients and brokers, increasing employment opportunities for vessels.
- **Strong relationships with debt capital providers**, including with the top European shipping banks and Japanese leasing investors.
- Attractive valuation of DIS in absolute terms NAV discount of 53% as at the end of September 2020 and relative to peers.
- Although the market needs to initially rebalance and absorb excess inventories, as oil demand and supply recovers, returning to pre-COVID 19 levels, the sector should benefit from very attractive market fundamentals, driven also by a historically low orderbook.
