## PRESS RELEASE

# RELATECH: A PARTNERSHIP AGREEMENT SIGNED WITH CYNET, A WORLD LEADING COMPANY IN CYBERSECURITY

## THE GROUP STRENGTHENS ITS POSITIONING IN CYBERSECURITY WITH NEW SOLUTIONS

Milan, 30<sup>th</sup> December 2020

**Relatech S.p.A.**, *Digital Enabler Solution Knowledge (D.E.S.K.) Company* and innovative SME listed on AIM Italia market (Ticker: RLT), announces that, its subsidiary **Mediatech** has signed a contract for the use of Cynet's Cybersecurity services. **Cynet 360** is the world's first self-contained breach protection platform that consolidates and automates monitoring and control, attack prevention and detection, and response orchestration, and is the only platform that can see the actual context of each activity versus other solutions endpoint or network protection, which only see portions of the perimeter resulting in reduced accuracy and scope of protection.

The partnership represents a further strengthening of the Relatech Group in the cybersecurity sector as it will allow it to expand the offer with new services and cutting-edge technological solutions in line with the new needs of companies and institutions that are exponentially exposed to risks of digital attacks and therefore they require significant interventions to protect their systems, networks and programs. Relatech, thanks to the experience gained over years of activity and strengthened by the new services integrated into the digital and cloud based platform RePlatform, through the ReData and ReSec modules, will allow the customer to benefit from a complete solution to protect the company value thanks to sophisticated technologies based on artificial intelligence, machine learning, cognitive computing and blockchain able to analyze data not considered in the past and to innovate security intelligence processes.

**Silvio Cosoleto**, Chief Operating Officer of Relatech and **Giuseppe Dominoni** CEO of Mediatech: *"The signing of this agreement is a further demonstration that Relatech is very attentive to the issue of the safety of its customers and will allow us to raise security to a higher level of the services, already certified UNI CEI SO/IEC 27001: 2017, that we offer from our*

*data center. We believe that the cybersecurity and cyber-intelligence sector is strategic and will be increasingly in the near future, staying behind means making infrastructures, the production system and our institutions more vulnerable to cyber-attacks that are increasingly frequent even against large companies, as evidenced by the numerous recent attacks against national and international multinational giants. Our value lies in grasping the potential of a rapidly growing market, with two relevant strands: the intensification of smart working and the growing need for protection of connected devices of the Internet of Things, now widespread in various areas ranging from homes and buildings, to cities or vehicles, and which have dramatically increased the risk of cyber-attacks. In a very fragmented offer context, Relatech is able to choose the best solutions by expanding our ecosystem with partners such as Cynet and integrating the technology into the RePlatform platform in order to offer customers a single solution. The implementation of **integrated platforms will reduce costs and greatly simplify processes** but will also allow for **greater visibility** on the components and solutions to be monitored".*

**Andrea Zani**, Regional Sales Director Italy, Spain and Portugal of **Cynet**: *"In less than two years Cynet has consolidated itself in an extraordinary way, reaching a role as a player of primary interest and actually consolidating itself in Banking, Manufacturing, Fashion and the Services sector. We believe that the collaboration with the Relatech Group can add a further important step in this growth path".*
