Six transactions done, six in progress

Outline of recent
transactions and
on-going tenders-
initiatives

Cross financing final approval; acquisition of SITAF; EcoRodovias Transaction; disposal of A7 Serravalle; ATIVA / A21, A12 / A10 Tenders won; 6 on-going Tenders

Overview of recent transactions and on-going tenders-initiatives

Transactions completed

Asti-Cuneo cross-financing approval

2 NOVEMBER 2020: New additional deeds signed with the MIT for the cross-financing loan of the A33 Asti-Cuneo. The signing of the Additional Deeds will make it possible to initiate the works to complete the AstiCuneo with important and positive benefits for Italy in terms of higher employment and growth in production both nationwide and in Piedmont.

Sitaf consolidation

27 OCTOBER 2020: Ownership transfer of shares (19.347% stake in the share capital of SITAF that ASTM S.p.A. was awarded in the tender held in July 2020), with consequent payment of the fee equal to EUR 272 million. ASTM participation, directly and indirectly held, equal to 67.22%

Milano-Serravalle stake disposal

29 JULY 2020: ASTM Group sold its 13.6% stake in the share capital of MI-SE (A7)

EcoRodovias: ASTM to take majority control

30 JULY 2020: ASTM Group entered into a dissociation agreement with Primav Construções to reorganize their equity stakes held in EcoRodovias and, ultimately, to capitalize EcoRodovias. As a consequence of the transactions contemplated by the Agreement the ASTM Group will consolidate its control over EcoRodovias in 2021.

Italian tenders

A12-A10 Tender

A21-A5/A4 Tender

Comments:

- Currently operated by ASTM
 - Tender awarded definitively: **19 November 2020** (by MIT)
 - Duration: **11.5 yrs awarded**
 - Concession awarded at the best economic bid
- Currently operated by ASTM
 - Tender awarded: **27 November 2020** (by MIT)
 - Duration: **11.5 yrs awarded**
 - Concession awarded at the best economic bid
 - 15 January 2021 TAR rejected ASTM's recourse basing its decision solely on the tender terms, without addressing the underlying questions of Law
 - Next step: recourse to the Council of State (w/in 2 m)

ASTM is fully confident of the legitimacy of its behaviour in the A21-A5/A4 pre-qualification procedure to utilize an TAE*, the leader of which was a concessionaire company, since the TAE was endowed with the requisites envisaged by Law (Art. 95 DPR 207/2010)

*TAE: Temporary Association of Enterprises (Associazione temporanea di imprese, "ATI")

Comments:

- ASTM Group Concessions' Economic & Financial Plans ("EFP/PEF"), according to the "Mille Proroghe" ("1000 Extensions") Act, will be reviewed by the MIT by 30 June 2021
 - In general ASTM's concessions will operate in 2021 with the following tariff increases:
 - Autovia Padana, whose tariff will increase 3..2% as a result of inflation (0.5%), rebalancing (-0.45%) and investments (3.15%, related to €27.8 m of capex)
 - SITAF: an increment of 1.54% for vehicles using the T4 Frejus tunnel, as a result of a 0.59% inflation adjustment (9/2018 to 8/2019) and 0.95% for safety costs.
- January 2021 ASTI – Cuneo A33:
 - the MIT and the MEF signed the inter-ministerial act in the first week of January
 - Preliminary works have begun
 - Last technical hurdle: registration by Corte dei Conti (State Accounting Court) expected w/in 1 month
 - The First lot (2.6b), which has all the necessary authorizations, of 5 km that connects the towns of Alba, Roddi and Verduno will start immediately and will take approximately 2 years.
 - Contemporaneously, ASTM proceeding to obtain the necessary authorizations for executing 2nd lot
 - The construction for both lots is forecast to be completed by the end of 2024
 - Funding from SATAP: €772m o/w €346m for future capex (Return: 7.09%), €280m for past capex (Return: 9.23%), €146m for figurative items (missed accrued return on RAB) (Return: 9.23%)
 - Tariff: constant 2018.2022; from 2023 will increase 2.2% p.a. minimum (o/w 1.2% for inflation).

Our platform to growth in South America

The EcoRodovias
transaction

The EcoRodovias transaction

The EcoRodovias transaction has a strong strategic rationale

The transaction consolidates ASTM's control of EcoRodovias...

- Reorganization: ASTM Group to become the direct controlling shareholder of EcoRodovias
 - Primav capital increase fully subscribed by ASTM Group to refund outstanding debt (R\$ 850m at the signing date)
 - Partial spin-off of Primav, transfer of EcoRodovias and Vem ABC shares to ASTM Group

- EcoRodovias Capitalization: Public offering of newly issued shares up to R\$1.8bn
 - ASTM Group is committed to subscribe an aggregate amount of R\$1.2bn
 - ASTM Group has a priority right to subscribe and/or acquire on the market sufficient shares to reach a 51% stake, consolidating the control of the Company

... unlocking value, opportunities to unleash synergies and growth in the future

Strategic rationale

- Integrate EcoRodovias in the **ASTM “One Company” model**, improving its operational efficiency, development effectiveness, **managerial standards and internal procedures**
- **Simplify** group structure
- Allow EcoRodovias to **maximize financing access to seize upcoming opportunities**
- **Consolidate role to capture the positive outlook** of the Brazilian market

Significant upsides

- Improve ASTM Group profitability and average concession duration
- Enhance EcoRodovias' value perception in ASTM Group valuation
- Strengthening to participate in the **toll Brazilian road privatization program** that includes 13 concessions to tender by 2022, incl. the wealthy and growing Sao Paulo and Rio states

Growth ability even in a challenging environment

SITAF success
and the upcoming
opportunities

SITAF

T4 – Frejus Tunnel: 13km

A32 Motorway: 73Km (Torino – Bardonecchia)

Maturity: 2050

Revenues: 2019: €276m

... presents opportunities to unleash synergies and generate upsides for the next years

Strategic rationale

- Strengthen position as leading motorway operator in **North-West Italy**
- Extend average **concession duration** by 9 years⁽¹⁾
- Ensure **stable tariff scheme**
- Unlock significant synergies through **ASTM “One Company” model**
- **Rationalize** SITAF’s **subsidiaries** operating in the O&M, Technology and Engineering
- **Optimize** SITAF **debt-structure** and centralization of treasury activities

Significant upsides

- **Frejus 2nd tunnel**, expected for next year, with **increase traffic capacity and safe** coupled with the **shortening of waiting times**
- **Expected closure** of the **alternative route**, for a significantly long period, conveying additional traffic
- Enhancement of **relationship with SFTRF**, potential **future privatization**

On 27 October 2020, ASTM acquired an additional 19.347% stake in the share capital of SITAF, which brought its total participation to 67.22% (directly and indirectly)

(1) Calculated as a multiplier of EBITDA of the concessions sector for the ASTM Group as at 31 December 2019

The long concession life (till 2050) more than offsets the additional debt, which stood at €788m at 30 June 2020**. ASTM currently foresees that SITAF will be consolidated starting as soon as the modification of SITAF's Bylaws will be approved (expected 1 April 2021).

* According to International Accounting Standards IAS/IFRS; € 92 m according to ITA GAAP

** Inclusive of NPV of Debt towards Anas - Fondo Centrale di Garanzia (€511m)
