1.2. REMUNERATION POLICIES

The 2021 Remuneration Policy related to Executive Directors and Directors with strategic responsibilities hasn't evolved compared to 2020, submitted at the meeting of 13 March 2020 by the Board of Directors.

The Remuneration policy adopted by the Board of Directors of 13 March 2020 is related to the period 2020-2022.

In this regard, it should be noted that the Board of Directors at the meeting of 15 March 2021 decided not to review the Remuneration Policy of Executive Directors and Directors with strategic responsibilities, confirming the current approach and this in relation to the fact that the result of the votes on the First Section of the Policy that took place during the Shareholders' Meeting on 21 April 2020, received 37,416,021 votes equal to 84.330% of the votes represented in the shareholders' meeting and 68.926% of the share capital with voting rights.

The Remuneration Policy adopted by the Board of Directors of 13 March 2020 is related to the period 2020-2022 and subsequently has revoked the previous remuneration plan (2018-2020).

The Remuneration Policy is intended to ensure the Company has the ability to attract, retain and motivate individuals who have professional skills and experience to pursue the achievement of the Company's objectives. The Policy is also instrumental in aligning the interests of the Company's management with those of the shareholders, pursuing the primary objective of the creation of value over a medium-long term period, through the creation of a strong link between remuneration and individual or of the whole society performance.

The Remuneration Policy reflects and takes into account the specificities of the business model adopted by Reply.

Reply operates through a network of companies that highly specializes in processes, applications and technologies. The growth of the network takes place both organically, also through the creation of new startups, and through the acquisitions of control investments in companies always with the mission of becoming excellence centers in its operational scope and grow both operationally and dimensionally.

This model has allowed:

- to ensure a strong involvement of management in various levels of the organization and in the company;
- to develop the size of the Group, partly for internal lines and partly for external lines;
- to achieve, consistently and with a growing trend, excellent performance in terms of turnover and profit.

Due to the distinctive character of Reply's business model, the Remuneration Policy has always identified EBITDA as a prevailing performance indicator both for the short-term period and for the long-term.

During the approval of the last Remuneration Policy, approved by the Board of Directors on 13 March, 2020, it was considered:

- to replace EBITDA with additional performance indicators for the variable medium/long-term component of remuneration;
- to provide for a period of deferment of the payment of the variable components of the remuneration compared with the time of maturity of remuneration, with particular reference to the medium/long term variable component;
- to provide the application of "Claw back" mechanisms, where, with the exception of any other actions allowed in order to safeguard the interests of the Company, it will be possible for Reply to request the return (in all or part), within three years of their disbursement, of incentives paid to those who, by grievousness or gross negligence, have been responsible for (or have contributed to) the facts, as listed below, related to economic and financial parameters included in the Annual Financial Report used for determining the variable premiums of these incentive plans: (i) proven and significant mistakes that result in a non-compliance with accounting principles that Reply claims to apply, or (ii) proven conduct aimed to obtain a specific representation of the financial structure, the net result or cash flows of Reply, or (iii) violations of laws and regulations, the Code of Ethics or company policies.

The Company has an insurance policy on third party liability for damage inflicted by the Board of Directors (apart from the General Manager, but also Directors with Strategic Responsibilities) in performing their duties, with the aim of safeguarding the beneficiaries and the Company from any connected indemnity, excluding cases of malice or gross negligence.

1.4. REMUNERATION OF EXECUTIVE DIRECTORS

With reference to 2020 the Directors were as follows:

Mario Rizzante	Chairman and Chief Executive Officer
Tatiana Rizzante	Chief Executive Officer
Claudio Bombonato	Executive Director
Daniele Angelucci	Executive Director
Filippo Rizzante	Executive Director
Elena Maria Previtera	Executive Director

Under a legal and statutory perspective, remuneration of the Company’s Executive Directors is established in accordance with:

- Article 2389(3) of the Italian Civil Code – “The remuneration of Directors invested with special responsibilities in conformity with the by-laws is determined by the Board of Directors after consultation with the Board of Statutory Auditors”, with the exception of any Director bound to the Company through an employment relationship in the capacity of Director, the remuneration is defined in that report;
- Article 22(2) of the by-laws – “Directors invested with special responsibilities are entitled to share in the profits of the Company, dependent on the Consolidated Gross Operating Margin, whose quantification is established annually by the Shareholders’ meeting at the time the Financial Statements are approved”.

From the perspective of the Remuneration Policy, the remuneration of the Executive Directors is generally comprised of the following elements:

- **A gross annual fixed component;**
- **A variable component** linked to general predetermined, measurable objectives.

The Board of Directors keeps in mind two factors when determining remuneration and its single components: the specific proxy that each Executive Directors holds and/or the function and the role actually carried out by each Executive Director within the Company, thus ensuring in particular that the variable component is coherent with the tasks assigned.

Under an accounting perspective, the remuneration of the Executive Directors is recorded in the Financial Statements in the year in which the services are rendered both for the fixed gross annual component and the variable component, even though payment is made through profit sharing in accordance with Article 22 of the Company By-laws; This is consistent with the International Financial Reporting Standards IAS/IFRS in as much as profit-sharing is considered to all effects as part of the remuneration and therefore the relative allocation is recorded in the Financial Statements in the year in which the Executive Directors’ services are rendered; for

such reason, the proposal to attribute profit-sharing is the object of resolution by the Board of Directors at the same time as approval of the draft annual Financial Statements.

From a procedural point of view,

- the Board of Directors, upon proposal of the Remuneration Committee adopts the resolutions granting the fixed component of the Executive Directors and establishes the methods for determining the variable component of the remuneration of Executive Directors through the recognition of a profit sharing pursuant to art. 22 of the Bylaws, and with new annual resolutions, for the short term component, and at the beginning of the three-year period, concerning the medium-term variable component;
- the Shareholders' meeting approves with a binding resolution the first section of the Remuneration Report containing the Remuneration Policy;
- the Remuneration Committee carries out a performance audit annually, both with reference to the short-term variable component and at the end of the three year period to the variable medium/long-term component and, taking into account the information provided and data processing prepared by the internal structures, makes to the Board of Directors proposals for profit sharing to be submitted to the General Shareholders' meeting, together with the relevant breakdown;
- the Board of Director, on the basis of the proposal of the Remuneration Committee, makes the proposal for profit sharing to be submitted to the General Shareholders' meeting, together with the relevant breakdown;
- the Shareholders' meeting shall be called to approve the proposal regarding the variable component of remuneration.

From a criteria point of view, with reference to the period 2020-2022, remuneration is based on the following:

- the predetermination of performance objectives, or of economic results and other specific objectives linked to the disbursement of variable, measurable and value-creation components;
- the weight of the short term variable component, being understood that the fixed component must be sufficient to compensate the performance of Executive Directors in case the variable component is not paid out when performance objectives established by the Board of Directors are not achieved;
- the correct balance between the short term and long term fixed and variable component according to the Company's strategic objectives and the risk management policy, also considering the areas of activities in which it operates and the characteristics of the actual business activity, with this, in case of full payment of the maximum amounts, for each Executive Director and Directors with strategic responsibilities:
 - › a relationship between the medium-long-term variable component and the fixed component not exceeding 2 to 1;
 - › a relationship between the short-term variable component and the fixed component not exceeding 2 to 1;

- the relationship between the variance of the results achieved and the variance of the remuneration is guaranteed through scaling of the variable compensation up to a maximum limit related to a scale of objectives;
- deferral of payment of the variable components with respect to when the compensation matures in order to verify the fulfillment of the objectives and moreover enable a proper risk management of the company within the Remuneration Policy requirements.

The criteria utilized in defining remuneration for Executive Directors was established by the Board of Directors and is as follows:

- accrual is subordinated to the achievement of one of the accessible terms represented by the capacity of the profits of the Company;
- with reference to short term variable components:
 - › fixing of the annual margin objective represented by the Consolidated Gross Operating Margin (EBITDA) as shown in the consolidated Financial Statements, with the identification of a minimum threshold and maximum threshold;
 - › quantifying the bonus, up to a predetermined maximum amount, related to the degree of the achievement of the target;
 - › breakdown, in general, of the variable short-term profit-sharing component, related to the Consolidated Gross Operating Margin between Directors invested with special responsibilities are entitled pursuant to Article 22 of the Company By-laws;
 - › in order to verify the fulfillment of the objectives, payment of the variable component is deferred by several months with respect to when it comes to maturity;
- with reference to the long term variable components:
 - › setting performance targets for a three-year period related to TSR (Total Shareholder Return), FCFO (Free Cash Flow from Operation) and ROACE (Return On Average Capital Employed);
 - › different consideration of the weighted performance indicators referred to the medium-term variable component assigning a greater weight to those consistent with the company's strategy and for which the Executive Directors and Directors with strategic responsibilities have full operational responsibility, in particular 30% at TSR, 45% at FCFO and 25% at ROACE;
 - › quantifying the bonus, up to a predetermined maximum amount, related to the degree of the achievement of the target;
 - › allocation of the medium-term variable component in proportion to the months the beneficiaries are in charge enter the long-term incentive plan during the three-year period;
 - › allocation of the medium-term variable component, in a single tranche at the end of the three-year period, through a special resolution of the controlling bodies in accordance to existing laws and to the company by-laws;
 - › deferral of the payment of aforesaid variable component from the end of the three-year period;

- › the medium-term variable component in the case of early termination of the office with respect to the end of the three-year period will not be attributed;
- › to provide the application of “Claw back” mechanisms, where, with the exception of any other actions allowed in order to safeguard the interests of the Company, it will be possible for Reply to request the return (in all or part), within three years of their disbursement, of incentives paid to those who, by grievousness or gross negligence, have been responsible for (or have contributed to) the facts, as listed below, related to economic and financial parameters included in the Annual Financial Report used for determining the variable premiums of these incentive plans: (i) proven and significant mistakes that result in a non-compliance with accounting principles that Reply claims to apply, or (ii) proven conduct aimed to obtain a specific representation of the financial structure, the net result or cash flows of Reply, or (iii) violations of laws and regulations, the Code of Ethics or company policies.

Reply strongly believes in environmental and social responsibility issues. For this reason, Reply has always integrated within its values: attention to people, quality and care of its ecosystem. To ensure continuous monitoring and improvement of specific behaviors and initiatives, ESG has also set up a dedicated team that deals, within the group, of verifying the achievement of the objectives as well as encouraging and promoting the Reply culture in these areas.

If the performance targets are not achieved because of extraordinary and/or unpredictable factors, the Board of Directors, following the advice of the Remuneration Committee, after hearing the opinion of the Board of Statutory Auditors, and activating, where required, the Procedure with Related Parties Operations, reserves the right to consider whether to pay the medium-term variable component in all or in part, considering the percentage of deviation with respect to the targets for quantitative objectives.

The Executive Directors are granted other types of benefits related to the office held and recognized within the Group to Directors having strategic responsibilities and/or managers (i.e. company car).

For those Directors employed by the company, these directors are entitled to the employee severance indemnity (TFR, pursuant to Article 2120 of the Italian Civil Code. Directors are also entitled to a termination severance indemnity (TFM) for small amounts (see the annexed table to section 3.1). Following termination of office, the Directors have not signed non-compete agreements.

The Board of Directors can propose to the Shareholders the adoption of the incentive mechanisms through the attribution of financial options, but, at present no incentive plans of this kind have been established.

The Company deems that the Remuneration Policy is consistent with the pursuit of the long-term interests of the company and its risk management.

For further information, see point Remuneration to Executive Directors. Directors with Strategic Responsibilities have the right to severance indemnity (TFR) ex Art. 2120 of the Italian Civil Code. Furthermore, some Directors who cover strategic positions in subsidiaries have also been assigned post termination treatment (TFM) determined in the same manner as severance indemnity.

If the performance targets are not achieved because of extraordinary and/or unpredictable factors, the Board of Directors, following consultation of the Remuneration Committee, after hearing the opinion of the Board of Statutory Auditors, and activating, where required, the Procedure with Related Parties Operations, reserves the right to consider whether to pay the medium-term variable component in all or in part, considering the percentage of deviation with respect to the targets for quantitative objectives.
