Fitch Upgrades UnipolSai's IFS to 'A-' on Sovereign Upgrade; Outlook Stable

Fitch Ratings - Frankfurt am Main - 13 Dec 2021: Fitch Ratings has upgraded Unipol Gruppo S.p.A.'s and UnipolSai Assicurazioni S.p.A.'s (the group's primary insurance subsidiary, together Unipol) Long-Term Issuer Default Ratings (IDRs) to 'BBB+' from 'BBB'. Fitch has also upgraded UnipolSai's Insurer Financial Strength (IFS) rating to 'A-' (Strong) from 'BBB+' (Good). The Outlooks are Stable. A full list of rating actions is at the end of this commentary.

Key Rating Drivers

The upgrades follow the upgrade of Italy's sovereign rating by Fitch to 'BBB' from 'BBB-' (see "Fitch Upgrades Italy to 'BBB'; Outlook Stable", published 3 December 2021, at www.fitchratings.com). Unipol's credit quality is highly linked to Italy's sovereign rating given the group's exposure to Italian sovereign debt. The Stable Outlook reflects that on Italy's sovereign rating.

The ratings reflect Unipol's reduced, although still high, asset concentration risk, following the reduction in the group's exposure to Italian sovereign debt in 2020. The ratings also reflect improvement to Unipol's capitalisation in 2020 - despite the adverse and volatile business and capital-market conditions caused by the coronavirus pandemic - as well as Unipol's strong profitability, moderate leverage and 'most favourable' business profile among rated peers.

The sovereign upgrade is captured in Fitch's assessment of Unipol's investment risk via its Sovereign Investment Concentration Risk factor. Unipol significantly reduced its holdings of Italian bonds to 2.8x consolidated shareholders' equity at end-2020, and this was further decreased to 2.6x at end-1Q21. Unipol's risky assets ratio (RAR), which measures the ratio of risky assets to capital, slightly improved to 146% at 1Q21 from 156% at end-2020. Following Italy's upgrade, it improved again to 105%. Fitch considers a portion of an insurer's exposure to 'BBB' category sovereign investments as risky assets. As a result of Italy's upgrade, this portion has decreased to 30% from 50%, as per Fitch's insurance criteria.

Fitch has increased Italy's score for "Industry Profile and Operating Environment" (IPOE) and, as a result, Unipol's assessment for "Company Profile", both defined under the agency's insurance criteria. This follows Italy's upgrade. The increase of Italy's IPOE score reflects Italy's reduced economic and country risks. The "Company Profile" scoring is tethered to the IPOE score to reflect our assessment of country risk.

RATING SENSITIVITIES

Factors that could, individually or collectively, lead to positive rating action/upgrade:

--A reduction in Unipol's exposure to Italian sovereign debt to below 2.0x consolidated shareholders' equity and a Prism FBM score in the high range of 'Very Strong' (end-2020: 'Very Strong'), both on a sustained basis.

--A one-notch upgrade of Italy's Long-Term Local-Currency IDR.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

--A one-notch downgrade of Italy's Long-Term Local-Currency IDR.

--A sustained increase in Unipol's exposure to Italian sovereign debt to above 3.0x consolidated shareholders' equity.

--A decrease in Unipol's Prism FBM score to the lower range of 'Strong', or the FLR weakening to above 35%, on a sustained basis.

Best/Worst Case Rating Scenario

International scale credit ratings of Financial Institutions and Covered Bond issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of four notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance.
