Focus on product areas

2022 Guidance and outlook going forward

■ BANKING REVENUES:

➤ Net financial income (net interest income and Profit from Treasury management)

For FY22: expected in a range between 300-310 mln with the current forward rate curve

Going forward: we expect NII to significantly benefit from the new interest rates scenario thanks to the sensitivity and to the volume increase

➤ Banking fees:

For FY22 expected above 50mln

Going forward: expected to keep on growing thanks to the increase of the client base and previous repricing

■ INVESTING REVENUES:

For FY22:

- Revenues expected to increase around mid-teens y/y, already including the negative market effect up to April
- Higher management fees margins y/y
- AUM net sales at around 5 bn (FAM retail net sales at around 5 bn)
- PFAs: net increase in a range of 100-120 PFAs expected

Going forward: strong acceleration in revenues and margins expected thanks to:

- 1) A further increase in our network productivity leading to higher volumes (AUM net sales expected at around ~6bn per year)
- 2) The implementation of the strategic discontinuity in Fineco Asset Management, which is going to increase its penetration in Fineco AUM, with retail net sales expected at around ~6bn per year

This is expected to generate a progressive increase of Fineco management fees margins after-tax up to ~55bps in 2024 (margins pre-tax ~75bps). Based on the most recent numbers, we expect to reach that level before than 2024

■ **BROKERAGE REVENUES:** countercyclical business, it is expected to remain strong with a floor - in relative terms with respect to volatility - definitely higher than in the pre-Covid period

■ OPERATING COSTS:

For FY22: expected to grow around 5% y/y, not including ~7 million of additional costs related to FAM strategic discontinuity to improve the efficiency of the Investing value chain. We will consider in the coming months the possibility to further accelerate the marketing expenses to take advantage by the strengthening of the structural trends.

Going forward we expect FAM costs to stabilize

■ **COST / INCOME:** we confirm our guidance on a continuously declining cost/income in the long-run thanks to the scalability of our platform and to the strong operating gearing we have (excluding potential higher marketing expenses)

■ **SYSTEMIC CHARGES:** in a range -42/44mln of DGS+SRF in provisions for risk and charges

■ **TAX RATE:** for 2022 in a range -0.5/-1 p.p. considering the most recent interest rates scenario

■ **CAPITAL RATIOS:** CET1 floor at 17%, Leverage Ratio very well under control and in a range 3.5%-4.0% (for details see slide 52 in Annex)

■ **DPS:** going forward we expect a constantly increasing dividend per share

■ **COST OF RISK:** below 10 basis points in 2022 thanks to the quality of our portfolio

■ **NET SALES:** robust, high quality and with a mix mainly skewed towards Asset under Management thanks to the new initiatives we are undertaking (see next slides)

Delivering on our discontinuities

Set of initiatives to improve our revenues mix, taking advantage from the acceleration of structural trends and our FinTech DNA

INITIATIVES TO KEEP UNDER CONTROL OUR BALANCE SHEET

Leverage Ratio Sensitivity

OUR PRIORITY

Focus on our **Balance Sheet** to keep under control the growth of deposits and improve our quality revenues mix. Thanks to our new initiatives, which are not yet at full speed, **at the same time we can:**

- 1) sustain our growth
- 2) distribute a growing dividend per share
- 3) keep our Leverage Ratio comfortably above the regulatory requirements and within our guidance (in a range 3.5%-4.0%)

Leverage Ratio comfortably under control

After the successful integration of our asset management business through FAM, we are now applying the same strategy with the launch of Leveraged Certificates thanks to our strong operating leverage and to the consistently increasing volumes

Leveraged Certificates

We have launched our offer Leveraged Certificates offer and are now issuer, market maker and distributor.

Thanks to the **vertical integration** of the business and the **full control in the relationship with clients**, over time we are going to convert low-value flows on other issuers' certificates into our own.

Market size in Italy: 13 bn⁽¹⁾ volumes and 100 mln revenues⁽²⁾. **We are also targeting flows on leveraged ETFs and covered warrants**

Step 1: launch of the first certificates on FTSE MIB, DAX, EuroSTOXX50, CAC and forex (eur/usd, eur/gbp, eur/jpy, gbp/usd)

Step 2: widen the **leveraged certificates offer**

Hi-MTF

On July 22nd, 2021 FinecoBank finalized the acquisition of a 20% stake (cost around 1.25mln) of Hi-MTF

Rationale: to increase our ability to extract value from the vertical integration of the business thanks to our clients' strong volumes
