To provide a better understanding of the Company's financial performance for the first three months of 2022, a comparative Consolidated Income Statement for the corresponding period in 2021 showing percentage changes is enclosed as Attachment 1.

Consolidated gross operating profit for the first quarter of 2022 amounted to €13,816 thousand, corresponding to a 28.4% margin on sales, up by 35.9% on €10,166 thousand reported in the first three months of 2021 (26.6% of margin on sales). The incidence of the cost of goods sold rose as did the weight of the cost for services during the period. Personnel costs in absolute terms increased by 8.8% compared to the first quarter of 2021, mainly as a result of the increase in the average number of Group workers from 763 in the first quarter of 2021 to 810 in the first quarter of 2022. However, the percentage of personnel costs as a percentage of turnover decreased from 29.9% to 25.6%.

The consolidated operating profit for the first quarter of 2022 amounted to €10,950 thousand, corresponding to a 22.5% margin on sales, up by 48.5% on €7,374 thousand reported in the first three months of 2021 (19.3% of margin on sales).

Consolidated profit before taxes for the first three months of 2022 amounted to €10,985 thousand, representing a 22.6% margin on sales, up by 46.6% on the profit before taxes reported in the first quarter of 2021, amounting to €7,494 thousand and corresponding to a 19.6% margin on sales.

Consolidated net profit for the period rose by 46.2% compared to 2021 from €5,640 thousand, representing 14.7% of sales, to €8,243 thousand, representing 16.9% of sales.

The net financial position as at March 31, 2022 is composed as follows:

	(euro '000)	03/31/2022	12/31/2021	03/31/2021

The net financial position as at March 31, 2022, amounting to a positive €16.6 million, was down compared to December 31, 2021, when it amounted to €20.6 million.

The net financial position at March 31, 2021 was a positive €9.6 million.

The investments made by the Group in the first quarter of the current year came to €2.3 million in property, plant and equipment and €0.2 million in intangible assets. Investments totalled €3.3 million in the first three months of 2021.

Subsequent events

The situation in Ukraine continues to be of concern and, unfortunately, its resolution is uncertain. The economic effects of the conflict are especially negatively affecting the prices of raw materials and energy resources. The explosion of contagions in the Shanghai area is also alarming, and has prompted the Chinese government to apply severe restrictions on freedom of movement, which risk heavily affecting the logistics chain, given the strategic importance of the Chinese city as a port of call.

Outlook

The Cembre Group has no significant exposure to the markets affected by the Russia-Ukraine conflict; sales in these markets have never been significant and there have been no direct supplies from these markets.

It is extremely complicated to make reliable forecasts: geopolitical tensions, the evolution of infections and material and service price trends make the future scenario highly uncertain; furthermore, the consequences and indirect effects of this negative international situation are difficult to predict. In any case, the Cembre Group's consolidated revenues are expected to grow in 2022 and the consolidated economic result is expected to be positive.

The Interim Report was prepared according to the “separation of periods method”, based on which the reference period is considered an autonomous financial year. The income statement for the quarter thus reflects the income components relating to the period based on the accrual method.

Bonuses recognised to customers at the end of the period were estimated based on past sales and their expected future performance.
