PRESS RELEASE**FNM RECEIVED AN ESG RISK RATING OF 7.4 BY MORNINGSTAR SUSTAINALYTICS*****FNM ranks among the top 50 entities rated by Sustainalytics worldwide***

Milano, 18 July 2022 – With the aim of strengthening the commitment to a greater integration of ESG principles in the strategies and management of the Group, and in a spirit of transparency towards the stakeholders, FNM S.p.A. voluntarily requested Morningstar Sustainalytics - a leading provider of ESG research and ratings – to evaluate the ESG Risk Rating of the FNM Group.

Sustainalytics considered the ESG risk profile which the FNM Group is exposed to as "negligible", providing an ESG Risk Rating equal to 7.4 (on a scale between 0 and >40, where 0 indicates the best rating and >40 the worst).

The score places FNM as one of the top 50 entities among the approximately 15,000 firms rated by Sustainalytics worldwide and 4th in the Transportation Infrastructure industry out of the 171 entities assessed.

The ESG Risk Rating measures a company's exposure to industry-specific material ESG risks and how efficiently a company manages these risks, supporting investors in the development and implementation of responsible investment strategies. In particular, Sustainalytics positively assessed the management of risks related to product governance, community relations, occupational health and safety and bribery and corruption. The unmanaged residual risk was deemed to be negligible.

Andrea Gibelli, FNM Chairman, commented: *“Obtaining an ESG rating on the basis of a voluntary request by FNM is the proof the Group's commitment to environmental, social and corporate governance sustainability issues. I am very proud of the result obtained, which represents a recognition of the work carried out to date, but at the same time encourages us to further improve transparency and attention to sustainability issues, which are increasingly important to support the generation of sustainable value for our stakeholders”*.
