

Half-Year Financial Report at 30 June 2022

Disclaimer

This document contains forward-looking statements, specifically in the sections entitled "Events after the reporting period" and "Business outlook", that relate to future events and the operating, economic and financial results of Prysmian Group. By their nature, forward-looking statements involve risk and uncertainty because they depend on the occurrence of future events and circumstances. Actual results may differ materially from those reflected in forward-looking statements due to multiple factors.

	Paolo Amato (**)(2)
	Mimi Kung (**)(3)

Board of Statutory Auditors ⁽⁵⁾

Chairman	Stefano Sarubbi
Standing Statutory Auditors	Laura Gualtieri
	Roberto Ruggero Capone
Alternate Statutory Auditors	Stefano Rossetti
	Vieri Chimenti

Independent Auditors ⁽⁶⁾	EY S.p.A.
--	-----------

(*) Independent Director as per Italian Legislative Decree 58/1998

(**) Independent Director as per Italian Legislative Decree 58/1998 and Italy's Corporate Governance Code for Listed Companies (January 2020 edition) approved by the Italian Corporate Governance Committee, comprising business associations (ABI, ANIA, Assonime, Confindustria), Borsa Italiana S.p.A. (the Italian Stock Exchange) and Assogestioni (Italian investment managers association).

(1) Members of the Control and Risks Committee

(2) Members of the Remuneration and Nominations Committee

(3) Members of the Sustainability Committee

(4) Appointed by the Shareholders' Meeting on 28 April 2021

(5) Appointed by the Shareholders' Meeting on 12 April 2022

(6) Appointed by the Shareholders' Meeting on 16 April 2015

Preface

The present Half-Year Financial Report at 30 June 2022 has been drawn up and prepared:

- in compliance with art. 154-ter of Italian Legislative Decree 58/1998 and subsequent amendments and with the Issuer Regulations published by Consob (Italy's securities regulator);
- in compliance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and endorsed by the European Union, and in accordance with *IAS 34 – Interim Financial Reporting*, applying the same accounting standards and policies adopted to prepare the consolidated financial statements at 31 December 2021.

The Half-Year Financial Report has undergone a limited review by the independent auditors.

SIGNIFICANT EVENTS DURING THE PERIOD

Finance activities

Euro 135 million loan to finance R&D activities

On 3 February 2022, the Group announced that it had finalised a loan from the European Investment Bank (EIB) for Euro 135 million to support the European R&D program of the Group until 2024, world leader in the energy and telecom cables industry.

The EIB loan is specifically intended to support projects to be developed at R&D centres in five European countries: France, the Netherlands, Spain, Germany and Italy.

New contracts and other information about contracts

HVDC submarine cable in the Middle East

On 14 January 2022, the Group announced that it had signed a Limited Notice to Proceed (LNTP) for the supply of power cables for a major HVDC submarine cable project in the Middle East, worth approximately Euro 220 million. The LNTP has been awarded to Prysmian by Samsung C&T through its EPC consortium with Jan De Nul Group. The new link, part of the strategic HVDC transmission system for the "Lightning Project" of Abu Dhabi National Oil Company (ADNOC) and Abu Dhabi National Energy Company PJSC (TAQA), will allow bulk power transmission between the Al Mirfa converter station in the Abu Dhabi hinterland and the station on the offshore island of Al Ghallan.

New submarine cable plant in USA and confirmation of award of Commonwealth Wind and Park Wind City projects

On 17 February 2022, the Group announced the finalisation of the contract to purchase the Brayton Point site in Massachusetts, subject to a number of conditions, including the securing of building permits for the new plant.

Prysmian plans to invest around USD 200 million in building the new plant.

The finalisation of plans to establish a submarine cable manufacturing footprint in the United States also entails confirming the award of the Commonwealth Wind and Park Wind City Offshore wind farm cabling projects, worth a total of approximately USD 900 million, by Vineyard Wind, a joint venture between Avangrid Renewables and Copenhagen Infrastructure Partners (CIP). The Notice to Proceed has not yet been issued.

NeuConnect contract

On 2 March 2022, the Group announced that it had been awarded a turnkey contract worth approximately Euro 1.2 billion by NeuConnect Britain Limited and NeuConnect Deutschland GmbH for the design, manufacture, installation, testing and commissioning of a 725 km submarine interconnector that will directly link the German and UK electricity grids for the first time.

Completion of North Sea Link

On 16 March 2022, the Group announced that it had successfully completed the world's longest subsea electricity interconnector between the UK and Norway. The North Sea Link allows renewable energy to be transferred between the two countries for the first time, supporting them both in their journey towards net zero. In 2015, Statnett, Norway's transmission system operator, and the UK's National Grid awarded Prysmian Group a project worth Euro 550 million for Lots 2 and 3 of the North Sea Link, corresponding to approximately 950 km of HVDC submarine cables (1,400 MW, \pm 525 kV), which have been manufactured at Prysmian's Arco Felice plant in Naples and installed in the North Sea along a 720 km route.

SEALink project

On 31 March 2022, the Group was awarded a contract by Alaska Power & Telephone Company (AP&T), worth around Euro 20 million, to supply, install and test two submarine fibre-optic cable links in south-east Alaska. The SEALink project, being undertaken by AP&T Wireless (APTW), a subsidiary of AP&T, will improve telecommunications in this area of the country by bringing broadband to rural areas that are currently without. The SEALink project will create an approximately 340 km-long submarine fibre-optic cable link from Alaska's capital in Juneau to Prince of Wales Island.

Prysmian Group to supply the cable for Australia's fibre network of the future

On 11 May 2022, Prysmian Group announced that it will work with Telstra to develop a state-of-the-art fibre network that will link up Australia's major cities. As part of the multi-year Australian fibre network project, Telstra will build a state-of-the-art dual fibre cable system that will link the country's cities with up to 20,000 km of new optical fibre land cable, increasing transmission capacity both between cities and regionally. Prysmian Group is partnering with Telstra to supply the cables for this project. Prysmian and Telstra InfraCo have initiated intensive research and development at Prysmian's local R&D lab to design, develop and implement one of the most innovative fibre and cable technologies. The Group has recently developed the next generation of high-strength low-loss optical cables, featuring an ultra-rugged design suitable for direct ploughing under extreme conditions and allowing installation over long distances. The state-of-

the-art low-loss cable design using Prysmian's BendBright® G.657.A2 fibre combines high performance with resilience. The Prysmian cables have been developed specifically for Australia's unique environmental conditions and will be engineered and manufactured locally at Prysmian's Northern Beaches plant in Sydney. In fact, Prysmian will support this project by manufacturing the optical cables locally in Dee Why (Sydney), boosting employment and investment in the area's high-tech manufacturing sector. The Group is also investing in upgrading capacity and production at the plant. The first phase of the project will see the installation of 20,000 km of high-resilience dual optical fibre cables, as well as an upgrading of the metropolitan area network.

Suedostlink project in Germany

On 24 June 2022, the Group announced that German transmission system operator TenneT TSO GmbH had awarded Prysmian a contract worth approximately Euro 700 million to develop the second 2GW system to extend the SuedOstLink with 546 km of 525kV HVDC underground cable. The Group has already been awarded contracts to develop the SuedOstLink, SuedLink and A-North HVDC projects in Germany, worth more than Euro 1.5 billion and currently under execution.

Prysmian will supply and install an underground cable system to transport renewable energy from wind farms located in northern and eastern Germany to cities and high-consumption industrial areas in the country's south. SuedOstLink consists of two 2GW projects, V5 and V5a, which together will supply southern Germany/Bavaria with 4GW of power. The first 20 km of approximately 550 km of cables for the 270 km route of SuedOstLink (V5) was completed and delivered in early 2022.

The HVDC P-Laser cable to be used for the project has been developed by Prysmian Group and will be manufactured at the Gron plant in France, where investments are underway in a second production line. The network components will be produced in Livorno (Italy), while the optical fibre cables will be manufactured in Slatina (Romania). The P-Laser cable solution offers a power transmission capacity of more than 2GW on a single system, as well as boasting the first 100% recyclable, environmentally sustainable, high-performance insulation using HPTE (High Performance Thermoplastic Elastomer), which reduces CO2 emissions during production by 30%. Delivery of the cables for V5a is scheduled to start in 2025, with the project due to go into operation in 2030. The V5a extension runs parallel to the SuedOstLink V5 corridor.

Prysmian is already the leading cable supplier to energy utilities in Germany, with approximately 1,900 employees, 6 manufacturing plants in Nordenham, Schwerin, Berlin, Neustadt bei Coburg, Nuremberg and Wuppertal and 4 R&D centres. To support execution of the German HVDC projects, Prysmian has opened three new regional offices in Bayreuth, Würzburg and Wuppertal

and formed a multicultural project development and management team with over 200 employees.

Other significant events

Ravin Cables Limited

In January 2010, Prysmian Group acquired a 51% interest in the Indian company Ravin Cables Limited ("Ravin"), with the remaining 49% held by other shareholders directly or indirectly associated with the Karia family (the "Local Shareholders"). Under the agreements signed with the Local Shareholders, after a limited transition period, management of Ravin would be transferred to a Chief Executive Officer appointed by Prysmian. However, this failed to happen and, in breach of the agreements, Ravin's management remained in the hands of the Local Shareholders and their representatives. Consequently, having now lost control, Prysmian Group ceased to consolidate Ravin and its subsidiary Power Plus Cable Co. LLC. with effect from 1 April 2012. In February 2012, Prysmian was also forced to initiate arbitration proceedings before the London Court of International Arbitration (LCIA), requesting that the Local Shareholders be declared in breach of contract and ordered to sell the shares representing 49% of Ravin's share capital to Prysmian. In a ruling handed down in April 2017, the LCIA upheld Prysmian's claims and ordered the Local Shareholders to sell the shares representing 49% of Ravin's share capital to Prysmian. However, the Local Shareholders did not voluntarily enforce the arbitration award and so Prysmian had to initiate proceedings in the Indian courts in order to have the arbitration award recognised in India. Having gone through two levels of the court system, these proceedings were finally concluded on 13 February 2020 with the pronouncement of a ruling by the Indian Supreme Court under which the latter definitively declared the arbitration award enforceable in India. In view of the continuing failure of the Local Shareholders to comply voluntarily, Prysmian has requested the Mumbai court to enforce the arbitration award so as to purchase the shares representing 49% of Ravin's share capital as soon as possible. This case is currently still pending and so control of Ravin is considered to have not yet been acquired.

Admission of the Group's seven Italian companies to the "Cooperative Compliance" program

On 3 January 2022, the Group announced that it had been admitted to the Cooperative Compliance program with the Italian Revenue Agency after the Group's seven Italian companies successfully passed the rigorous review of the adequacy of the Tax Control Framework for detecting, measuring, managing and controlling tax risk. Admission to the program, which applies from tax period 2020, will allow the Group to establish a relationship based on trust and transparency with the Italian tax authorities, aimed at the pre-emptive analysis of issues with the highest tax risk and an ever-increasing level of oversight of the most relevant tax issues.

Investigation by Germany's Federal Cartel Office (FCO)

On 18 January 2022, the Group announced that the German Federal Cartel Office (FCO) had carried out inspections at some of the Group's sites in Germany. The inspections were conducted as part of an investigation by the FCO into alleged coordination in setting the standard metal surcharges applied by the industry in Germany. Prysmian is co-operating with the FCO.

Approval of financial statements at 31 December 2021 and dividend distribution

On 12 April 2022, the shareholders' meeting of Prysmian S.p.A. approved the financial statements for 2021 and the distribution of a gross dividend of Euro 0.55 per share, for a total of some Euro 145 million. The dividend was paid out from 21 April 2022, with record date 20 April 2022 and ex-dividend date 19 April 2022.

Appointment of the Prysmian S.p.A. Board of Statutory Auditors

On 12 April 2022, the shareholders' meeting of Prysmian S.p.A. appointed the following new members of the Board of Statutory Auditors for the next three years:

- Stefano Sarubbi (Chairman of the Board of Statutory Auditors)
- Roberto Capone (Standing Auditor)
- Laura Gualtieri (Standing Auditor)
- Stefano Rossetti (Alternate Auditor)
- Vieri Chimenti (Alternate Auditor)

Authorisation to buy and dispose of treasury shares

On 12 April 2022, the shareholders' meeting of Prysmian S.p.A. granted the Board of Directors authorisation to buy back and dispose of treasury shares, concurrently revoking the previous authorisation under the shareholder resolution dated 28 April 2021. Under this authorisation it is possible to make one or more buybacks of shares such that, at any one time, the total holding of treasury shares does not exceed 10% of share capital.

New stock grant plan for employees other than managers already covered by individual incentive schemes

On 12 April 2022, the shareholders' meeting of Prysmian S.p.A. approved an equity-settled stock grant plan for employees of Prysmian S.p.A. and Prysmian Group companies, except for managers already covered by individual incentive schemes; the plan aims to foster wide participation in future value creation and to strengthen the level of employee engagement; the plan will be subject to consultation at local level with the relevant trade union representatives, where required.

The shareholders' meeting of Prysmian S.p.A. adopted a resolution to reduce the capital increase serving the incentive plan for Prysmian Group employees approved by the shareholders on 28 April 2020, from a maximum nominal amount of Euro 1,100,000.00, corresponding to 11,000,000 new ordinary shares, to a maximum nominal amount of Euro 800,000.00, corresponding to 8,000,000 new ordinary shares, and to approve a bonus issue of shares to be reserved for Prysmian Group employees in execution of the stock grant plan approved above, allocating the 3,000,000 new ordinary shares to service the new share assignment plan reserved for employees other than the Management already in charge of individual incentive systems.

New investments in optical cable manufacturing at the Jackson plant in USA

On 16 May 2022, the Group announced it was investing another USD 30 million on top of the USD 85 million already announced a few months ago to increase optical fibre cable manufacturing capacity and capability at its North American plants. The Group intends to make its global product innovations more widely available on the US market, by optimising the footprint of local telecom plants and enabling the optical fibre cable business lines to become more industrially efficient.

Building on a long tradition in manufacturing optical fibre and cable for a wide range of applications, this investment will increase the Group's production capacity for loose tube, ribbon and drop cables, optimising its telecom industrial footprint in the United States and confirming its longstanding position as a global leader in developing technology for new, reliable and efficient broadband networks, and providing telecom network operators with new and valuable capabilities and solutions.

Sirocco Hybrid cables named as a "Lightwave Innovation Reviews High Score Recipient"

On 8 June 2022, the Group announced that it was among the winners of the "2022 Lightwave Innovation Reviews" in the "Carrier Fiber, Cable, Enclosures, and Accessories" category for its Sirocco Hybrid power and optical fibre cables designed for blown applications.

Increased digitalisation means continued growth in data volumes, although existing ducts often lack sufficient space: using optical cables that can be installed in this limited space can reduce the amount of civil works, higher costs and malfunctions. The spread of 5G and IoT is also driving the need for remote devices and antennas. This presents an additional challenge for network operators, as devices in remote locations need to be connected to both power cables and fibre optics. Prysmian has recently developed Sirocco Hybrid, an extremely compact blown optical fibre and copper cable for rapid installation in microducts.

With a diameter of 7.7 mm, this cable can be installed by blowing into 10 mm inner-diameter microducts. By benefiting from existing infrastructure and low installation costs without the need

for digging, Sirocco Hybrid features six copper cores with a 1 mm² cross-section, and up to 36 BendBrightXS (ITU-T G.657.A2) optical fibres. The cable can be blown up to 1 km at high speed. The "Lightwave Innovation Reviews" program has been developed to pay tribute to the top products and services in the optical networking industry, selected by a panel of experts drawn from a wide range of service providers, technology developers, industry analysis firms and the media. The judges evaluate the product on the basis of its originality, innovation and positive impact on the customer, applying cost-efficiency criteria, among others.

Sustainability Week

On 17 June 2022, the Group announced the launch of "Sustainability Week", a new stakeholder engagement event running from 20 to 24 June 2022. Top management from the Milan headquarters, business units and regional offices around the world discussed the progress made on the sustainability strategy and the impact on the Group's activities, its innovation-focused DNA and cutting-edge technologies. The event was an opportunity not only to highlight how the development of a trans-European electricity grid plays a strategic role both in the process of decarbonisation and transition to renewable sources and in boosting European and global energy independence, but also to get feedback from customers, investors, suppliers, analysts, associations and universities through online events with special guests including industry leaders and investors.

The event, entitled "We are what we do. Sustainability is not an act, but a habit", stems from the conviction that grid interconnections are essential for the energy transition and energy independence of Europe and the entire planet. In order to meet the global challenges of the coming decades and create value for all stakeholders, it is therefore necessary to integrate sustainability, as a driver of technological innovation, into the core business and daily operations. Through the development of modern decarbonised grids and cutting-edge solutions and products to support the energy transition and generate positive social impact, Prysmian's proactive approach in this regard will therefore be fundamental in making the Group's commitment even more effective, also by paying greater attention to the opinion of local communities in the regions where it operates.

Sustainability Week, however, did not stop there: the different countries also had the opportunity to share experiences relating to People, Culture and Social Sustainability, by discussing the various objectives set by the Group in terms of diversity, equality and inclusion (DE&I), digital inclusion, community empowerment and employee engagement and upskilling. Drawing on the past experience of Prysmian Group's Sustainability Day, the event had a new expanded format featuring five events (compared with three in 2021) led by executives at the Group's Milan headquarters, as well as about two local events per region each day, for a total of 22 events in Europe, North America, Latin America, the Middle East, China, and Oceania-South East Asia. These local events focused on regional CEOs and Sustainability Ambassadors, engaging local

leadership and stakeholders in their own language in order to promote local engagement. A Sustainability Stakeholder Survey was conducted during the event to update the Prysmian Group's Materiality Matrix.

CONSOLIDATED FINANCIAL HIGHLIGHTS*

(Euro/million)

	1st half 2022	1st half 2021	% Change	2021
Sales	7,949	6,034	31.7%	12,736
Adjusted EBITDA before share of net profit/(loss) of equity-accounted companies	683	461	48.2%	958
Adjusted EBITDA ⁽¹⁾	699	470	48.7%	976
EBITDA ⁽²⁾	665	444	49.8%	927
Adjusted operating income ⁽³⁾	521	312	67.0%	647
Operating income	423	278	52.2%	572
Profit/(loss) before taxes	368	238	54.6%	476
Net profit/(loss)	261	164	59.1%	310

(Euro/million)

	30.06.2022	30.06.2021	Change	2021
Net invested capital	6,247	5,612	635	5,295
Employee benefit obligations	361	485	(124)	446
Equity	3,556	2,740	816	3,089
of which attributable to non-controlling interests	183	168	15	174

(Euro/million)

	30.06.2022	30.06.2021	% Change	2021
Net capital expenditure ⁽⁴⁾	118	71	66.2%	275
Employees (at period-end)	30,862	29,826	3.5%	29,763
Earnings/(loss) per share				
- basic	0.98	0.62		1.17
- diluted	0.98	0.61		1.17

¹⁾ Adjusted EBITDA is defined as EBITDA before income and expense for business reorganisation, non-recurring items and other non-operating income and expense.

²⁾ EBITDA is defined as earnings/(loss) for the period, before the fair value change in metal derivatives and in other fair value items, amortisation, depreciation and impairment, finance costs and income, dividends from other companies and taxes.

³⁾ Adjusted operating income is defined as operating income before income and expense for business reorganisation, non-recurring items and other non-operating income and expense, and before the fair value change in metal derivatives and in other fair value items.

⁴⁾ Net capital expenditure reflects cash flows from disposals of Assets held for sale and from disposals and additions of Property, plant and equipment and Intangible assets not acquired under specific financing arrangements, meaning that additions of leased assets are excluded.

(*) All percentages contained in this report have been calculated with reference to amounts expressed in thousands of Euro.

GROUP PERFORMANCE AND RESULTS

(Euro/million)

	1st half 2022	1st half 2021	% Change	2021
Sales	7,949	6,034	31.7%	12,736

Adjusted EBITDA (B+C)	699	470	48.7%	976

The Group's sales in the first six months of 2022 came to Euro 7,949 million, compared with Euro 6,034 million in the corresponding period of 2021, posting a positive change of Euro 1,915 million (+31.7%).

The main factors behind this change were:

- positive organic sales growth, accounting for an increase of Euro 865 million (+14.3%). Excluding the *Projects* segment, organic sales growth would have been +12.5%;
- favourable exchange rate effects, generating an increase of Euro 366 million (+6.1%);
- fluctuation in the price of metals (copper, aluminium and lead), generating a sales price increase of Euro 653 million (+10.8%);
- increase of Euro 31 million (+0.5%) due to the change in the scope of consolidation after acquiring control of Omnisens S.A. and Eksa SP.ZOO.

Organic sales growth by the three operating segments was as follows:

Projects	+28.4%;
Energy	+13.6%;
Telecom	+6.6%.

The first six months of 2022 delivered a solid set of results for the Group, with organic growth of +14.3% (+12.5% excluding the *Projects* segment). These results, which made the second quarter of 2022 the best ever, with an Adjusted EBITDA of Euro 411 million, were achieved by focus on serving customers, efficient and flexible operations and exposure to structural growth drivers.

The organic change described above is explained by the following main factors:

- an increase by the *Energy & Infrastructure* business with +16.5% organic growth in sales, with a very positive performance in all regions;
- an increase by the *Industrial & Network Components* business with +8.7% organic growth in sales, thanks to excellent performance by OEM and Renewables;
- an increase by the *Telecom* segment with +6.6% organic growth in sales, driven by solid growth in the optical business.

The Group's Adjusted EBITDA (before net expenses for business reorganisation, net non-recurring expenses and other net non-operating expenses) came to Euro 699 million in the first six months of 2022, up Euro 229 million (+48.7%) on the corresponding 2021 figure of Euro 470 million. The Adjusted EBITDA margin on sales was 8.8%, but would have been 9.4% with metal prices at the same level as in 2021 (7.8% in the first half of 2021).

At the individual business level, *Energy* performed exceptionally well, led by E&I, OEM and Renewables, as did Telecom, driven by North America. Furthermore, as expected, there was an improvement in the *Projects* segment which achieved Adjusted EBITDA of Euro 55 million in the second quarter of 2022 alone.

EBITDA is stated after net expenses for business reorganisation, net non-recurring expenses and other net non-operating expenses totalling Euro 34 million (Euro 26 million in the first six months of 2021).

Amortisation, depreciation and impairment amounted to Euro 179 million in the first six months of 2022, up from Euro 164 million in the same period last year.

The fair value change in metal derivatives was a negative Euro 27 million in the first six months of 2022 compared with a positive Euro 16 million in the same period of 2021.

A total of Euro 36 million in costs were recognised in the first six months of 2022 to account for the effects of the long-term incentive plan and employee share purchase scheme.

Reflecting the effects described above, the Group's operating income came to Euro 423 million, compared with Euro 278 million in the first half of 2021, thus reporting an increase of Euro 145 million.

Net finance costs amounted to Euro 55 million in the first six months of 2022, up from Euro 40 million in the prior year equivalent period, which had included the recognition of Euro 16 million in positive effects in connection with the 2021 convertible bond issue.

Taxes came to Euro 107 million, representing an effective tax rate of around 29% (31% in the first six months of 2021).

Net profit for the first six months of 2022 was Euro 261 million (of which Euro 259 million attributable to the Group) compared with Euro 164 million in the same period of 2021 (of which Euro 162 million attributable to the Group).

Net financial debt stood at Euro 2,330 million at 30 June 2022, down Euro 57 million from Euro 2,387 million at 30 June 2021. In the past 12 months, the Group generated Euro 174 million in free cash flow, excluding Euro 19 million in outlays for business combinations and Euro 57 million in proceeds received under legal settlements with third parties. This cash flow generation was allowed by effective working capital management mitigating raw material price increase. Despite this, net operating working capital represented 8.4% of annualised sales, slightly up from 7.3% at the end of the same period last year.

With reference to the most significant contract awards in the *Projects* segment, in the first half of the year the Group secured contracts worth Euro 2.4 billion, foremost of which the Neuconnect interconnection project for Euro 1.2 billion, a submarine cable project in the Middle East for Euro 220 million, an extension of the Suedostlink project for Euro 700 million, and the construction of two submarine interconnections in Spain for Euro 250 million.

REVIEW OF PROJECTS OPERATING SEGMENT

(Euro/million)

	1st half 2022	1st half 2021	% Change	2021
Sales	922	681	35.4%	1,594
Adjusted EBITDA before share of net profit/(loss) of equity-accounted companies	87	76	14.4%	210
% of sales	9.4%	11.1%		13.2%
Adjusted EBITDA	87	76	14.4%	210
% of sales	9.4%	11.1%		13.2%
Adjustments	(18)	(4)		(8)
EBITDA	69	72	-3.7%	202
% of sales	7.5%	10.6%		12.7%
Amortisation and depreciation	(41)	(32)		(69)
Adjusted operating income	46	44	4.7%	141
% of sales	5.0%	6.5%		8.8%

The *Projects* Operating Segment, whose focus is on projects and their execution, as well as on product customisation, incorporates the high-tech businesses of High Voltage Underground, Submarine Power and Telecom, and Offshore Specialties.

The Group engineers, produces and installs high and extra high voltage cables for electricity transmission both from power plants and within transmission and primary distribution grids. These highly specialised, tech-driven products include cables insulated with oil or fluid-impregnated paper for voltages up to 1100 kV and extruded polymer (XLPE) insulated cables for voltages up to 600 kV. These are complemented by laying and post-laying services, grid monitoring and preventive maintenance services, power line repair and maintenance services, as well as emergency services, including intervention in the event of damage.

In addition, Prysmian Group engineers, produces and installs "end-to-end" submarine cable solutions for power transmission and distribution. The products offered include cables with different types of insulation: cables insulated with layers of oil or fluid-impregnated paper for AC and DC transmission up to 700 kV; extruded polymer insulated cables for AC transmission up to 400 kV and DC transmission up to 600 kV. The Group uses specific technological solutions for power transmission and distribution in underwater environments, which satisfy the strictest international standards.

With the acquisition of General Cable, Prysmian Group has re-entered the Submarine Telecom cables business, specialised in the production and installation of data transmission cables.

The Offshore Specialties business incorporates a wide range of products for the oil industry, including umbilical cables, hoses and all electrical, optical and signalling components for oil well management from seabed to offshore platform.

FINANCIAL PERFORMANCE

Sales to third parties by the *Projects* segment amounted to Euro 922 million in the first half of 2022, versus Euro 681 million in the same period of 2021, recording a positive change of Euro 241 million (+35.4%).

The factors behind this change were:

- organic sales growth, accounting for an increase of Euro 193 million (+28.4%);
- exchange rate trends, resulting in an increase of Euro 17 million (+2.5%);
- metal price fluctuations, producing an increase of Euro 31 million (+4.5%).

The *Projects* segment's organic growth is largely attributable to Submarine Power contracts in progress, which recorded a higher level of first-half activity than in the same period last year, taking asset saturation to a very high level for both manufacturing and laying and installation assets.

The High Voltage Underground business also reported significant growth, particularly in France, China and Italy, thanks to the growing contribution of cable manufacturing for the German Corridors.

The Submarine Telecom business saw no significant change in business volumes, while the Offshore Specialties business showed signs of growth.

The main Submarine Power projects on which work was performed during the period were: the Crete-Attica interconnector project in Greece, the Viking Link between Great Britain and Denmark, the two interconnection projects in Turkey, offshore wind projects in France, the United States and Germany (Dolwin5), plus contracts to supply just export and inter-array cables for offshore wind farms.

Sales in the period were the result of cable manufacturing activities by the Group's industrial facilities (Pikkala in Finland, Arco Felice in Italy, Drammen in Norway and Nordenham in Germany) and installation services, performed with the assistance of both its own assets and third-party equipment.

The value of the Group's Submarine Power order backlog stands at around Euro 2.2 billion, mainly consisting of the following contracts: the offshore wind contracts in France (Fecamp and Calvados), Germany (Dolwin5) and Great Britain (Sofia); the interconnector between Great Britain and Denmark (Viking Link); and the Crete-Attica link in Greece. In addition to these, there are the offshore contract in North America (Vineyard Wind), the interconnection contracts in Turkey and the Middle East and the lots of the new Thyrranian Link and Saudi-Egypt contracts released by the respective customers.

The value of the Group's High Voltage order backlog is around Euro 1.9 billion, mostly consisting of German Corridor contracts, which, including the Submarine Telecom and Offshore Specialties businesses, takes the total order backlog of the *Projects* segment to around Euro 4.25 billion.

Adjusted EBITDA for the first half of 2022 came to Euro 87 million, up from Euro 76 million in the same period of 2021. The *Projects* business reported a margin of 9.4%, which would have been 9.7% at constant 2021 metal prices (11.1% in the first half of 2021). The lower margin is attributable to several factors, including the execution of a different project mix in the Underground High Voltage and Submarine businesses, the cost of non-recurring events in the Submarine Telecom business, as well as the rising price of metals, which has a major impact on sales by reducing the margin.

In the second quarter of the year, however, *Projects* recorded double-digit margins (of 10.7%) thanks to higher asset utilisation and flawless project execution.

REVIEW OF ENERGY OPERATING SEGMENT

(Euro/million)

	1st half 2022	1st half 2021	% Change	2021
Sales	6,116	4,551	34.4%	9,557
Adjusted EBITDA before share of net profit/(loss) of equity-accounted companies	471	270	74.6%	542
% of sales	7.7%	5.9%		5.7%
Adjusted EBITDA	474	271	75.0%	546
% of sales	7.8%	6.0%		5.7%
Adjustments	(15)	(19)		(46)
EBITDA	459	252	82.3%	500
% of sales	7.5%	5.5%		5.2%
Amortisation and depreciation	(97)	(89)		(184)
Adjusted operating income	377	182	106.7%	362
% of sales	6.2%	4.0%		3.8%

The *Energy* Operating Segment, encompassing businesses offering a complete and innovative product portfolio to a variety of industries, is organised around the business areas of *Energy & Infrastructure* (comprising Trade & Installers, Power Distribution and Overhead Transmission Lines) and *Industrial & Network Components* (comprising Oil & Gas, Downhole Technology, Specialties & OEM, Elevators, Automotive and Network Components).

Sales to third parties by the *Energy* segment came to Euro 6,116 million, versus Euro 4,551 million in the first half of 2021, posting a positive change of Euro 1,565 million (+34.4%), the main components of which were as follows:

- positive organic sales growth of Euro 619 million (+13.6%);
- increase of Euro 308 million (+6.8%) for positive exchange rate fluctuations;
- sales price increase of Euro 607 million (+13.3%) for metal price fluctuations;
- positive change of Euro 31 million (+0.7%) due to the acquisition of Eksa SP.ZOO, consolidated from 1 January 2022, and of Omnisens S.A., consolidated from 1 November 2021.

Adjusted EBITDA came to Euro 474 million, up Euro 203 million (+75%) from Euro 271 million in the first half of 2021, reflecting higher volumes, up from pre-pandemic levels, and a rise in sales prices which offset the increased cost of key raw materials, energy and transport.

The *Energy* business reported a margin of 7.8%, which would have been 8.4% at constant 2021 metal prices, compared with a margin of 6.0% in the same period last year.

The following paragraphs describe market trends and financial performance in each of the *Energy* operating segment's business areas.

ENERGY & INFRASTRUCTURE

(Euro/million)

	1st half 2022	1st half 2021	% Change	2021
Sales	4,194	3,048	37.6%	6,361
Adjusted EBITDA before share of net profit/(loss) of equity-accounted companies	342	168	103.8%	353
% of sales	8.2%	5.5%		5.5%
Adjusted EBITDA	344	169	104.0%	356
% of sales	8.2%	5.5%		5.6%
Adjusted operating income	281	109	156.7%	233
% of sales	6.7%	3.6%		3.7%

Prysmian produces high and medium voltage cable systems to connect industrial and/or civilian buildings to primary distribution grids and low voltage cables and systems for power distribution and the wiring of buildings. All the products offered comply with international standards regarding insulation, fire resistance, smoke emissions and halogen levels. The low voltage product portfolio includes rigid and flexible cables for distributing power to and within residential and commercial buildings. The Group concentrates product development and innovation activities on high performance cables, such as Fire-Resistant and Low Smoke zero Halogen cables, capable of guaranteeing specific safety standards. The product range has been lately expanded to satisfy the demand for cables serving infrastructure such as airports, ports and railway stations, by customers as diverse as international distributors, buying syndicates, installers and wholesalers.

FINANCIAL PERFORMANCE

Sales to third parties by the *Energy & Infrastructure* business amounted to Euro 4,194 million in the first half of 2022, compared with Euro 3,048 million in the first half of 2021, posting a positive change of Euro 1,146 million (+37.6%), the main components of which were as follows:

- positive organic sales growth of Euro 501 million (+16.5%);
- positive change of Euro 193 million (+6.3%) for exchange rate fluctuations;
- sales price increase of Euro 424 million (+13.9%) for metal price fluctuations;
- increase of Euro 28 million (+0.9%) due to the acquisition of Eksa SP. ZOO with effect from 1 January 2022.

The *Energy & Infrastructure* business's positive organic sales growth of +16.5% in the first half of 2022 was mainly due to the excellent performance of the Trade & Installers business, with prices rising in all regions, and the Power Distribution business in the Americas and Europe.

Trade & Installers enjoyed positive organic growth, albeit with geographical differences: good in South and Central Europe, recovering in North Europe, stable and slightly declining in the United

Kingdom and the Middle East. Growth was robust in North America and in line with expectations in LATAM. APAC recorded a good recovery, thanks to China.

These factors enabled the profitability of the Trade & Installers business to increase significantly on the same period last year.

The Power Distribution business posted very strong organic growth in every region. There was an improvement in profitability, due to the recovery of rising costs through sales prices and a favourable product mix in the Middle East and North America. In Europe, persistently strong price pressure and difficulties in recovering key commodity price increases were partially offset by gains in industrial efficiency.

In the Overhead Lines business, volumes reported a year-on-year contraction in both North America and LATAM, putting pressure on profitability in this region.

Given the factors described above, Adjusted EBITDA in the first half of 2022 came to Euro 344 million, versus Euro 169 million in the first half of 2021, reflecting an increase of Euro 175 million (+104%), of which Euro 27 million attributable to exchange rate effects. The *Energy & Infrastructure* business reported a margin of 8.2%, which would have been 8.9% at constant 2021 metal prices (5.5% in the first half of 2021), which was underpinned by the excellent performance of both the Trade & Installers and Power Distribution businesses, which recorded a sound growth in the second quarter of the year.

INDUSTRIAL & NETWORK COMPONENTS

(Euro/million)

	1st half 2022	1st half 2021	% Change	2021
Sales	1,714	1,349	27.0%	2,838
Adjusted EBITDA before share of net profit/(loss) of equity-accounted companies	129	99	30.5%	195
% of sales	7.5%	7.3%		6.9%
Adjusted EBITDA	130	99	30.7%	196
% of sales	7.6%	7.3%		6.9%
Adjusted operating income	98	72	36.3%	139
% of sales	5.7%	5.3%		4.9%

The extensive range of cables developed specially for certain industries is characterised by the highly specific nature of the solutions offered. In the transport market, Prysmian cables are used in the construction of ships and trains, and in the automotive and aerospace industries; in the infrastructure market, the principal fields of application for its cables are railways, docks and airports. The product range also includes cables for the mining industry, for elevators and for applications in the renewable energy field (solar and wind power), cables for military use and for nuclear power stations, able to withstand the highest radiation environments.

Prysmian also offers a wide range of products and systems for the petrochemicals sector covering every need both onshore and offshore: low and medium voltage power cables, instrumentation and control cables as well as Downhole Technology (DHT) solutions, with cables encased in steel pipes to control and power monitoring systems within extraction wells.

Lastly, the Group produces accessories and network components, as well as sophisticated control systems; for example, joints and terminations for low, medium, high and extra high voltage cables and submarine systems to connect cables with one another and/or connect them with other network devices, suitable for industrial, construction and infrastructure applications and for use within power transmission and distribution networks.

FINANCIAL PERFORMANCE

Sales to third parties by the *Industrial & Network Components* business area amounted to Euro 1,714 million in the first half of 2022, compared with Euro 1,349 million in the first half of 2021, recording a positive change of Euro 365 million (+27%), the main components of which were as follows:

- positive organic sales growth of Euro 118 million (+8.7%).
- positive change of Euro 105 million (+7.8%) for exchange rate fluctuations;
- sales price increase of Euro 139 million (+10.3%) for metal price fluctuations;
- positive change of Euro 3 million (+0.2%) due to the acquisition of Omnisens S.A..

Industrial & Network Components turned in a positive performance in the first half of 2022, thanks to strong growth by the OEM and Renewables businesses.

Specialties, OEM and Renewables all grew and recorded a healthy level of profit and positive organic growth in line with expectations, displaying good resilience to the global economic situation, particularly in Europe, LATAM and APAC.

The Elevator business was stable, with a particularly positive performance in North America, which made up for the difficulties experienced in China caused by partial Covid-19 lockdowns.

There was a slight downturn in the Automotive business organic growth, with a contraction in volumes in North America and Asia.

The Network Components business area remained stable at first-half 2021 levels despite facing strong price pressure, mainly thanks to the MV segment in Europe and America. The HV and

EHV businesses were in slight retreat due to the phasing of some projects despite recovering in APAC.

Given the factors described above, Adjusted EBITDA for the first half of 2022 came to Euro 130 million, up from Euro 99 million in the first half of 2021, reporting a positive change of Euro 31 million (+30.7%), of which Euro 10 million attributable to the trend in exchange rates.

The *Industrial & Network Components* business reported a margin of 7.6%, which would have been 8.1% at constant 2021 metal prices, up from 7.3% in the same period last year.

OTHER

(Euro/million)

	1st half 2022	1st half 2021	2021
Sales	208	154	358
Adjusted EBITDA before share of net profit/(loss) of equity-accounted companies	0	3	(6)
Adjusted EBITDA	0	3	(6)
Adjusted operating income	(2)	1	(10)

This business area encompasses occasional sales by Prysmian Group operating units of intermediate goods, raw materials or other products forming part of the production process. These revenues are normally linked to local business situations, do not generate margins or have limited profitability and can vary in size from period to period.

REVIEW OF TELECOM OPERATING SEGMENT

(Euro/million)

	1st half 2022	1st half 2021	% Change	2021
Sales	911	802	13.6%	1,585
Adjusted EBITDA before share of net profit/(loss) of equity-accounted companies	125	115	8.1%	206
% of sales	13.7%	14.4%		13.0%
Adjusted EBITDA	138	123	11.5%	220
% of sales	15.1%	15.4%		13.9%
Adjustments	(1)	(1)		9
EBITDA	137	122	12.2%	229
% of sales	15.0%	15.2%		14.4%

Adjusted operating income	98	86	13.7%	144
% of sales	10.8%	10.7%		9.1%

As partner to leading telecom operators worldwide, Prysmian Group produces and manufactures a wide range of cable systems and connectivity products used in telecommunication networks. The product portfolio includes optical fibre, optical cables, connectivity components and accessories and copper cables.

FINANCIAL PERFORMANCE

Sales to third parties by the *Telecom* operating segment came to Euro 911 million in the first six months of 2022, compared with Euro 802 million in the same period of 2021.

The positive change of Euro 109 million (+13.6%) is explained by:

- organic sales growth of Euro 53 million (+6.6%);
- sales price increase of Euro 15 million (+1.9%) for metal price fluctuations;
- positive change of Euro 41 million (+5.1%) for exchange rate fluctuations.

First-half organic sales growth in 2022 was driven by continued expansion of the optical business, particularly in North America, which reported rising volumes and prices.

In Europe, volumes were steady with rising prices. Major European customers accepted an upward price revision justified by the rising cost of raw materials and energy.

In South America, volumes grew in line with the positive market trend.

Globally, copper cables continued their steady decline with the retirement of traditional networks in favour of new-generation ones.

The high value-added business of optical connectivity accessories continued to perform well, prompted by the development of new FTTx (last-mile broadband) networks, particularly in Great Britain.

The Multimedia Solutions business recorded positive organic growth due to an upturn in North American market volumes.

Adjusted EBITDA for the first half of 2022 came to Euro 138 million, reporting an increase of Euro 15 million (+11.5%) from Euro 123 million in the same period of 2021. The *Telecom* business posted a margin of 15.1%, which would have been 15.3% at constant 2021 metal prices (15.4% in the first half of 2021).

RESULTS BY GEOGRAPHICAL AREA

(Euro/million)

	Sales		Adjusted EBITDA	
	1st half 2022	1st half 2021	1st half 2022	1st half 2021
EMEA*	3,318	2,584	183	150
North America	2,527	1,810	335	166
Latin America	636	487	62	46
Asia Pacific	546	472	32	32
Total (excluding Projects)	7,027	5,353	612	394
Projects	922	681	87	76
Total	7,949	6,034	699	470

(*) EMEA = Europe, Middle East and Africa

As stated in the Explanatory Notes to this Half-Year Financial Report, the Group's operating segments are: *Energy*, *Projects* and *Telecom*, reflecting the structure used in the periodic reports prepared to review business performance. The primary performance indicator used in these reports, presented by macro type of business (*Energy*, *Projects* and *Telecom*), is Adjusted EBITDA, defined as earnings (loss) for the period before non-recurring items, the fair value change in metal price derivatives and in other fair value items, amortisation, depreciation and impairment, finance costs and income and taxes.

Although the primary operating segments remain those by business, in order to provide users of the financial statements with information that is more consistent with the Group's greater geographical diversification following the General Cable acquisition, Sales and Adjusted EBITDA have been reported above by geographical area, excluding the *Projects* business whose geographical breakdown is unrepresentative. For this purpose, sales of goods and services are analysed geographically on the basis of the location of the registered office of the company that issues the invoices, regardless of the geographic destination of the products sold. This type of presentation does not produce significantly different results from analysing sales of goods and services by such destination.

EMEA

The EMEA region's sales amounted to Euro 3,318 million in the first half of 2022, reflecting year-on-year organic growth of +11.1%. Adjusted EBITDA came to Euro 183 million (Euro 150 million in the first half of 2021), reporting a margin on sales of 5.5%, which would have been 5.9% at constant 2021 metal prices (5.8% in the prior year equivalent period). The solid results are attributable to the E&I, OEM and Renewables businesses.

North America

The region's sales amounted to Euro 2,527 million, reporting year-on-year organic growth of +18.7%. Adjusted EBITDA amounted to Euro 335 million (Euro 166 million in the first half of 2021), reporting a margin on sales of 13.2%, which would have been 14.1% at constant 2021 metal prices (9.1% in the prior year equivalent period). All the main business areas recorded excellent results thanks to the Group's position as market leader, with an outstanding performance by E&I and Telecom.

LATAM

The LATAM region's sales amounted to Euro 636 million, reflecting organic growth of +9.8%. Adjusted EBITDA came to Euro 62 million (Euro 46 million in the first half of 2021), reporting a margin on sales of 9.8%, which would have been 10.5% at constant 2021 metal prices (9.5% in the prior year equivalent period). Growth was primarily driven by the Renewables business which, together with E&I, accounted for the improvement in Adjusted EBITDA.

APAC

The APAC region's sales amounted to Euro 546 million in the first half of 2022, reflecting negative organic growth of -0.3%. Adjusted EBITDA came to Euro 32 million, the same as in the first half of 2021, reporting a margin on sales of 5.9%, which would have been 6.3% at constant 2021 metal prices (6.9% in the prior year equivalent period).

There was growth in the Telecom segment, offset by the Industrial business (especially Elevators), which was impacted by the lockdowns in China caused by the Covid-19 pandemic.

GROUP STATEMENT OF FINANCIAL POSITION

RECLASSIFIED STATEMENT OF FINANCIAL POSITION

(Euro/million)

	30.06.2022	30.06.2021	Change	31.12.2021
Net fixed assets	5,521	5,061	460	5,304
Net working capital	1,374	1,129	245	650
Provisions and net deferred taxes	(648)	(578)	(70)	(659)

Total equity	3,556	2,740	816	3,089
of which attributable to non-controlling interests	183	168	15	174
Net financial debt	2,330	2,387	(57)	1,760
Total equity and sources of funds	6,247	5,612	635	5,295

NET FIXED ASSETS

(Euro/million)

	30.06.2022	30.06.2021	Change	31.12.2021
Property, plant and equipment	2,899	2,648	251	2,794
Intangible assets	2,225	2,073	152	2,137
Equity-accounted investments	384	328	56	360
Other investments at fair value through other comprehensive income	13	13	-	13
Assets and liabilities held for sale (*)	-	(1)	1	-
Net fixed assets	5,521	5,061	460	5,304

(*) Excluding the value of financial assets and liabilities held for sale.

At 30 June 2022, net fixed assets amounted to Euro 5,521 million, compared with Euro 5,304 million at 31 December 2021, posting an increase of Euro 217 million mainly due to the combined effect of the following factors:

- Euro 118 million in net capital expenditure on property, plant and equipment and intangible assets;
- Euro 179 million in amortisation, depreciation and impairment for the period;
- Euro 23 million in increases for property, plant and equipment accounted for in accordance with IFRS 16;
- Euro 216 million in positive currency translation differences affecting property, plant and equipment and intangible assets;
- Euro 24 million for the net increase in equity-accounted investments;
- Euro 15 million for monetary revaluations due to hyperinflation.

NET WORKING CAPITAL

(Euro/million)

	30.06.2022	30.06.2021	Change	31.12.2021
Inventories	2,636	1,979	657	2,054
Trade receivables	2,392	1,970	422	1,622
Trade payables	(3,165)	(2,465)	(700)	(2,592)
Other receivables/(payables)	(434)	(545)	111	(608)
Net operating working capital	1,429	939	490	476
Derivatives	(55)	190	(245)	174
Net working capital	1,374	1,129	245	650

Net working capital of Euro 1,374 million at 30 June 2022 was Euro 245 million higher than the corresponding figure of Euro 1,129 million at 30 June 2021. Net operating working capital, which excludes the value of derivatives, amounted to Euro 1,429 million (8.4% of last-quarter annualised sales) at 30 June 2022, up Euro 490 million from Euro 939 million (7.3% of last-quarter annualised sales) at 30 June 2021. The increase in net working capital over the past twelve months has been severely impacted by the increase in raw material prices.

Cash and cash equivalents	427	1,066	(639)	1,702
Total financial assets	708	1,319	(611)	1,981
Net financial debt	2,330	2,387	(57)	1,760

Net financial debt of Euro 2,330 million at 30 June 2022 has decreased by Euro 57 million from Euro 2,387 million at 30 June 2021 and has increased by Euro 570 million from Euro 1,760 million at 31 December 2021.

As regards the principal factors behind the change in net financial debt, reference should be made to the next section containing the "Statement of cash flows".

STATEMENT OF CASH FLOWS

(Euro/million)

	1st half 2022	1st half 2021	Change	12 months (1 July 2021 to 30 June 2022)	2021
Adjusted EBITDA	699	470	229	1,205	976
Adjustments	(34)	(26)	(8)	(57)	(49)

Capital contributions and other changes in equity	-	-	-	1	1
Net cash flow provided/(used) in the period	(616)	(481)	(135)	62	197
Opening net financial debt	(1,760)	(1,986)	226	(2,387)	(1,986)
Net cash flow provided/(used) in the period	(616)	(481)	(135)	62	197
Equity component of Convertible Bond 2021	-	49	(49)	-	49
Partial redemption of Convertible Bond 2017	-	(13)	13	-	(13)
Increase in net financial debt for IFRS 16	(23)	(15)	(8)	(71)	(63)
Net financial debt of EHC	-	9	(9)	(1)	8
Other changes	69	50	19	67	48
Closing net financial debt	(2,330)	(2,387)	57	(2,330)	(1,760)

Net cash flow provided by operating activities (before changes in net working capital) amounted to Euro 627 million in the first half of 2022.

The increase in net working capital used Euro 851 million in cash flow. After Euro 87 million in tax payments and Euro 2 million in dividend receipts, operating activities in the first six months of 2022 therefore resulted in a net cash outflow of Euro 309 million.

Net operating capital expenditure used Euro 118 million in cash in the first six months of 2022, a large part of which relating to projects to increase and rationalise production capacity and to develop new products.

In addition, Euro 42 million in net finance costs were paid during the period.

In the past 12 months, the Group generated Euro 174 million in free cash flow, excluding Euro 19 million in outlays for business combinations and Euro 57 million in proceeds received under legal settlements with third parties. The net inflow of Euro 174 million was generated by:

- a) Euro 1,094 million in net cash flow provided by operating activities before changes in net working capital;
- b) Euro 363 million in cash flow absorbed by the increase in net working capital;
- c) Euro 322 million in cash outflows for net capital expenditure;
- d) Euro 160 million in tax payments;
- e) Euro 67 million in payments of net finance costs;
- f) Euro 15 million in cash flow absorbed by restructuring costs;
- g) Euro 7 million in dividends received from associates.

ALTERNATIVE PERFORMANCE INDICATORS

In addition to the standard financial reporting formats and indicators required under IFRS, this document contains a number of reclassified statements and alternative performance indicators. The purpose is to help users better evaluate the Group's economic and financial performance. Such reclassified statements and performance indicators should not however be treated as substitutes for the accepted ones required by IFRS.

In this regard, on 3 December 2015, Consob adopted the ESMA guidelines in Italy with publication of "ESMA Guidelines/2015/1415" which supersede the "CESR Recommendation 2005 (CESR/05-178b)". The alternative performance measures have therefore been revised in light of these guidelines.

The alternative indicators used for reviewing the income statement include:

- **Adjusted operating income:** operating income before income and expense for business reorganisation¹, before non-recurring items², as presented in the consolidated income statement, before other non-operating income and expense³ and before the fair value change in metal derivatives and in other fair value items. The purpose of this indicator is to present the Group's operating profitability without the effects of events considered to be outside its recurring operations;
- **EBITDA:** operating income before the fair value change in metal price derivatives and in other fair value items and before amortisation, depreciation and impairment. The purpose of this indicator is to present the Group's operating profitability before the main non-monetary items;
- **Adjusted EBITDA:** EBITDA as defined above calculated before income and expense for business reorganisation, before non-recurring items, as presented in the consolidated income statement, and before other non-operating income and expense. The purpose of this indicator is to present the Group's operating profitability before the main non-monetary items, without the effects of events considered to be outside the Group's recurring operations;

¹ Income and expense for business reorganisation: these refer to income and expense that arise as a result of the closure of production facilities and/or as a result of projects to optimise organisational structure;

² Non-recurring income and expense: these refer to income and expense related to unusual events that have not affected profit or loss in past periods and are not likely to affect the results in future periods;

³ Other non-operating income and expense: these refer to income and expense that management considers should not be taken into account when measuring business performance.

- **Adjusted EBITDA before share of net profit/(loss) of equity-accounted companies:**

Adjusted EBITDA as defined above calculated before the share of net profit/(loss) of equity-accounted companies;

- **Organic growth:** growth in sales calculated net of changes in the scope of consolidation, changes in metal prices and exchange rate effects.

The alternative indicators used for reviewing the reclassified statement of financial position include:

- **Net fixed assets:** sum of the following items contained in the statement of financial position:

- Intangible assets
- Property, plant and equipment
- Equity-accounted investments
- Other investments at fair value through other comprehensive income
- Assets held for sale (excluding financial assets and liabilities held for sale)

- **Net working capital:** sum of the following items contained in the statement of financial position:

- Inventories
- Trade receivables
- Trade payables
- Other non-current receivables and payables, net of long-term financial receivables classified in net financial debt
- Other current receivables and payables, net of short-term financial receivables classified in net financial debt
- Derivatives, net of interest rate and forex risk hedges of financial transactions classified in net financial debt
- Current tax payables

- **Net operating working capital:** net working capital, as defined above, net of derivatives not classified in net financial debt.

- **Provisions and net deferred taxes:** sum of the following items contained in the statement of financial position:

- Provisions for risks and charges – current portion
- Provisions for risks and charges – non-current portion
- Provisions for deferred tax liabilities

- Deferred tax assets

• **Net invested capital:** sum of Net fixed assets, Net working capital and Provisions.

• **Employee benefit obligations** and **Total equity:** these indicators correspond to Employee benefit obligations and Total equity reported in the statement of financial position.

• **Net financial debt:** sum of the following items:

- Borrowings from banks and other lenders – non-current portion
- Borrowings from banks and other lenders – current portion
- Derivatives on financial transactions recorded as Non-current derivatives and classified under Long-term financial receivables
- Derivatives on financial transactions recorded as Current derivatives and classified under Short-term financial receivables
- Derivatives on financial transactions recorded as Non-current derivatives and classified under Long-term financial payables
- Derivatives on financial transactions recorded as Current derivatives and classified under Short-term financial payables
- Medium/long-term financial receivables recorded in Other non-current receivables
- Loan arrangement fees recorded in Other non-current receivables
- Short-term financial receivables recorded in Other current receivables
- Loan arrangement fees recorded in Other current receivables
- Financial assets at amortised cost
- Financial assets at fair value through profit or loss
- Financial assets at fair value through other comprehensive income
- Cash and cash equivalents

BUSINESS OUTLOOK

In 1H 2022, global economy continued to grow sharply as in 2021, thanks to the easing of pandemic restrictions and to national plans in support of the development of infrastructure, energy transition and digitalisation projects. The strong recovery of economic activity was accompanied by considerable inflationary pressure, triggered mainly by the increase in energy and commodity prices and supply chain disruptions, exacerbated by the war in Ukraine. To mitigate rising inflation, several central banks began to pare back some monetary stimuli and to increase interest rates.

Global economic growth expectations for 2022, while remaining positive, have been revised downwards, primarily following the conflict in Ukraine and the related international tensions. After the 6.1% rebound in 2021, the global economy is expected to grow by 3.2% in 2022, according to the most recent estimates issued in July by the International Monetary Fund. This figure has been revised downwards by 0.4% compared to the April 2022 projections. In any event, there continues to be a high level of uncertainty regarding global macroeconomic performance, with risks of further downwards revisions of growth prospects, in view of a possible deterioration of the geopolitical crisis relating to Ukraine, and a resurgence of the pandemic at the global level.

The results for 1H 2022 further confirmed the Prysmian Group's focus on proactively and seamlessly serving its customers, also leveraging its efficient and geographically widespread industrial footprint. This approach is supported by the excellent results achieved by the Energy segment, which hit a record level in 1H, by the Telecom business' solid performance and the Euro 2.4 billion orders awarded to the Projects business YTD. In this segment, considering an order backlog of approximately Euro 4.3 billion as well as orders with a total value of Euro 5.8 billion to be included in the backlog in the next 18 months, total order visibility exceeds Euro 10 billion.

As a result, for the full year 2022 Prysmian Group expects a moderate demand growth in the construction and industrial cables businesses after last year's excellent performance, with results also supported by the ability to implement pricing policies to contain inflation-driven cost pressures. In the high-voltage underground and submarine cables and systems business, the Group aims to confirm its leadership on the market, which is expected to grow sharply, driven by the development of offshore wind farms and interconnections to support the energy transition, as well as the start of a significant market uptrend in the United States, where the Group has decided to expand its production capacity and has already obtained the first construction permits for the new submarine cable plant at Brayton Point (Massachusetts). For this segment, the Group

expects results to be up on the previous year, with a more marked acceleration in the second half of 2022. In the Telecom segment, the Group forecasts volumes growth in the optical business, mainly thanks to the North American market, where it is strengthening its commitment to meeting the country's growing demand for broadband optical fibre connectivity.

Prysmian Group's long-term growth drivers are confirmed, mainly linked to the energy transition, the strengthening of telecommunications networks (digitalisation) and the electrification process. The Group can also leverage its broad business and geographical diversification, solid capital structure, efficient and flexible supply chain and lean organisation, all of which is enabling it to effectively seize growth opportunities.

In light of the above considerations and in addition to the Group's solid performance in 1H 2022, the Group revises its guidance for the FY 2022 upwards compared to that announced in March. For FY 2022, the Group expects an Adjusted EBITDA in the range of Euro 1,300-1,400 million, up by about 30% from the Euro 1,010-1,080 million range previously announced.

Moreover, the Group upgraded the cash generation target as it now expects to generate cash flows of approximately Euro 400-460 million (FCF before acquisitions and disposals) for FY 2022, compared to the previous target of Euro 400 million \pm 15%.

These forecasts assume no material changes in both the geopolitical crisis relating to the military conflict in Ukraine and in the development of the health situation. The forecasts also assume that global supply chains will remain under pressure in the coming months, but there will not be any further tensions and extreme dynamics in the prices of factors of production. The forecasts assume, for the upper part of the range, a substantial stability in the current market conditions for the Energy segment, whilst for the lower part, a significant deterioration, particularly with regard to the United States, where the current inflationary and pricing dynamics provide for considerable profit opportunities. In addition, the forecasts are based on the Company's current business scope, assuming a EUR/USD exchange rate of 1.05, and do not include impacts on cash flows related to Antitrust issues.

FORESEEABLE RISKS IN 2022¹

Prysmian Group is exposed in the normal conduct of its business to a number of financial and non-financial risk factors which, if they should occur, could also have a material impact on its results of operations and financial condition. The Group has always acted to maximise value for its shareholders by putting in place all necessary measures to prevent or mitigate the risks inherent in the Group's business, which is why it adopts specific procedures to manage the risk factors that could influence its business results. Given operating performance in the first six months of the year and the specific macroeconomic context, the foreseeable risk factors are described below according to their nature.

STRATEGIC RISKS

Risk of instability in the Group's countries of operation

Prysmian Group operates and has production facilities and/or companies in Asia, Latin America, the Middle East, Africa and Eastern Europe. The Group's operations in these countries are exposed to different risks linked to local regulatory and legal systems, the imposition of tariffs or taxes, exchange rate volatility, and political and economic instability affecting the ability of business and financial partners to meet their obligations.

Significant changes in the macroeconomic, political, tax or legislative environment of such countries could have an adverse impact on the Group's business, results of operations, assets and financial condition; consequently, as mentioned in a later paragraph, the Group constantly monitors developments on the global geopolitical stage that could require it to revise existing business strategies and/or adopt mechanisms to safeguard its competitive position and performance.

The Russia-Ukraine war could have significant negative effects on economic activity and exacerbate problems in the supply chain, including by raising the price of raw materials used by the Group. It is currently not possible to foresee the extent of the consequences of not only higher energy prices and inflation as a whole but also of trade restrictions and sanctions, as well as the backlashes to this conflict and its duration. In a worse scenario, this could have a significantly negative impact on the European economy.

Risks associated with the competitive environment

Many of the products offered by Prysmian Group, primarily in the Trade & Installers and Power Distribution businesses, are made in conformity with specific industrial standards and so are

¹ The risks described in this section are those that, at the date of the present document, the Group believes, if they were to occur, could have a material adverse near-term impact on its business, financial condition, earnings and future prospects.

interchangeable with those offered by major competitors. Price is therefore a key factor in customer choice of supplier. The entry into mature markets (e.g. Europe) of non-traditional competitors, meaning small to medium manufacturing companies with low production costs, and the need to saturate production capacity, together with the possible occurrence of a contraction in market demand, translate into strong competitive pressure on prices, with possible consequences for the Group's expected margins.

Moreover, high value-added businesses - such as high voltage underground and submarine cables - are seeing an escalation in competition both from existing operators and from new players, not necessarily from the industry but with leaner more flexible organisational models, and/or significant financial resources, with a potentially negative impact on both sales volumes and selling prices.

Although the existence of certain barriers to entry (such as those relating to ownership of technology, know-how and track record that are difficult to replicate) may limit the number of players able to compete effectively on a global scale in high value-added segments (such as high voltage underground cables, optical cables and, to a much lesser extent, submarine cables), Prysmian Group cannot rule out either the entry of new competitors into these market segments or an escalation of competition from existing players, with potential consequences for the Group's expected sales volumes and selling prices. The Group may be unable either to reduce its costs sufficiently to offset the reduction in demand and the increased pressure on prices, or to effectively limit the greater competition from both new entrants and existing players, which could have a material adverse effect on its economic and financial condition and/or results of operations.

In addition, the acceleration of technological innovation observed in recent years, with an increasingly widespread use of renewable energy and a shift towards digitalisation, also fostered by the Covid-19 pandemic, represents a further area of competition in the medium and long term.

The strategy of rationalising manufacturing footprint currently in progress, the consequent optimisation of cost structure, the policy of geographical diversification and, last but not least, the ongoing pursuit of innovative technological solutions, all help the Group to address the potential effects arising from the competitive environment.

Risks associated with changes in macroeconomic conditions and demand

Factors such as trends in GDP and interest rates, the ease of getting credit, the cost of raw materials, and the general level of energy consumption, significantly affect the energy demand of countries which, in the face of persistently difficult economic conditions, then reduce investments that would otherwise develop the market. Government incentives for alternative energy sources and for developing telecom networks also face cuts for the same reason.

In addition, current shortages of equipment, materials and labour in some sectors could hamper the production of goods, causing delays in contract execution and slowing the recovery in some sectors of the economy; these bottlenecks are expected to persist for some time. In periods of negative or no growth, Prysmian Group could experience a decrease in sales and net profit, which could have a significant adverse effect on its financial condition and results of operations. To counter this risk, the Group is pursuing, on the one hand, a policy of geographical diversification in non-European countries and, on the other, a strategy to reduce costs by rationalising its manufacturing footprint around the world in order to mitigate possible negative effects on the Group's performance in terms of reduced sales and lower margins.

In addition, the Group constantly monitors developments on the global geopolitical stage which, as a result - for example - of the introduction of specific industrial policies by individual countries, could require it to revise existing business strategies and/or adopt mechanisms to safeguard its competitive position.

Risk of market contraction or softer demand due to Covid-19

The global macroeconomic situation deteriorated over the course of 2020 following the spread of the Covid-19 pandemic.

In response to this health emergency, governments in most countries adopted containment measures, including travel bans, quarantines and other public emergency measures, with serious repercussions for economic activity and the entire production system. These restrictions on travel and freedom of movement continued in the second half of 2020 and early 2021 in response to the "second and third waves", and in autumn 2021 and early 2022 in response to the "fourth wave". More recently, the emergence of the Omicron variant has threatened an intensification of the pandemic on a global scale and made uncertainty about its future evolution even greater. This "wave" (and any future "waves") has caused (and may continue to cause) fresh disruptions in the economies of those nations already impacted by Covid-19 (as, for instance, the latest lockdown occurred in China) and could lead to further negative impacts on the global economy in general. Potential impacts, including a global, regional or other economic recession, are increasingly uncertain and difficult to assess. If the spread of Covid-19 persists for a significant period of time or if other restrictions are put in place, this could have further negative impacts on the global economy that will depend heavily on the duration and severity of the outbreak itself. Any persistent or aggravated adverse impact on the global economy could affect the Group's business, financial condition and/or results of operations. The program of extraordinary measures, swiftly deployed by the Group since the onset of the Covid-19 pandemic, is proving effective and has put people first. Accordingly, in order to preserve the permanent employment of its resources, steps have been taken to safeguard the health of employees, including through the ongoing performance of tests and provision of hygiene materials and personal protective equipment. The Group has also implemented a series of measures intended to mitigate risks

arising from the Covid-19 pandemic with the purpose of defending its cash generating capability, through strict working capital management and effective cost monitoring designed to reduce both fixed and variable expenditure. A much more rigorous investment policy has also been adopted, while preserving a strategic allocation of resources.

Risks related to acquisitions and disposals

The Group reviews potential acquisition targets on an ongoing basis and whenever it acquires new companies, their integration may pose challenges, particularly if management information and accounting systems are substantially different from those used elsewhere in the Group. It is also possible that unforeseen problems may be encountered in one or more of the acquired entities.

In addition, the Group may have to incur additional debt on each occasion to finance acquisitions. Prysmian Group may also dispose of some of its businesses through M&A transactions, themselves subject to uncertainty. Agreements entered into as part of disposal transactions typically provide for mutual obligations as well as representations and warranties and seller obligations to indemnify the buyer for any liabilities arising from the breach of such representations and warranties. In addition, such agreements typically contain conditions precedent that must be satisfied prior to completion, otherwise the buyer's termination rights may be triggered, and therefore there is no guarantee that transactions in progress but not yet completed will actually be completed within the expected timeframe.

FINANCIAL RISKS

Prysmian Group's risk management strategy focuses on the unpredictability of markets and aims to minimise the potentially negative impact on the Group's financial performance. Some types of risk are mitigated by using financial instruments (including derivatives).

Financial risk management is centralised with the Group Finance department which identifies, assesses and hedges financial risks in close collaboration with the Group's operating companies. The Group Finance, Administration and Control department provides guidelines on risk management, with particular attention to exchange rate risk, interest rate risk, credit risk, the use of derivative and non-derivative instruments, and on how to invest excess liquidity. Such financial instruments are used solely to hedge risks and not for speculative purposes.

Risks associated with availability of financial resources and their cost

The volatility of the international banking and financial system could be a potential risk factor in terms of obtaining finance and its associated cost. In addition, failure to comply with the financial and non-financial covenants contained in the Group's credit agreements could limit its ability to

increase its net indebtedness, other factors remaining equal. In fact, should it fail to satisfy one of these covenants, this would trigger a default event which, unless resolved under the terms of the respective agreements, could lead to their termination and/or early repayment of any credit drawn down. In such a situation, the Group might be unable to repay the amounts demanded early, in turn giving rise to a liquidity risk.

Given the current amount of financial resources and undrawn committed credit lines, totalling in excess of Euro 1 billion at 30 June 2022, and six-monthly monitoring¹ of financial covenant compliance (fully satisfied at 30 June 2022), the Group is of the opinion that it has significantly mitigated this risk and that it is capable of raising sufficient financial resources at a competitive cost. A more detailed analysis of the risk in question, including a description of the Group's principal sources of finance, can be found in the Explanatory Notes of the Half-Year Financial Report at 30.06.2022.

Exchange rate volatility

Prysmian Group operates internationally and is therefore exposed to exchange rate risk on the currencies of the different countries in which it operates. Exchange rate risk occurs when future transactions or assets and liabilities recognised in the statement of financial position are denominated in a currency other than the functional currency of the company which undertakes the transaction.

To manage exchange rate risk arising from future trade transactions and from the recognition of foreign currency assets and liabilities, most Prysmian Group companies use forward contracts arranged by Group Treasury, which manages the various positions in each currency.

However, since Prysmian prepares its consolidated financial statements in Euro, fluctuations in the exchange rates used to translate the financial statements of subsidiaries, originally expressed in a foreign currency, could affect the Group's results of operations and financial condition. Exchange rate volatility is monitored both locally and centrally, by the Group Finance department, also using specific indicators designed to intercept potential risk situations which, when deemed to exceed the defined tolerance limits, will trigger immediate mitigating actions. A more detailed analysis of the risk in question can be found in the "Financial Risk Management" section of the Explanatory Notes to the FY2021 Consolidated Financial Statements.

Interest rate volatility

Changes in interest rates affect the market value of Prysmian Group's financial assets and liabilities as well as its net finance costs. The interest rate risk to which the Group is exposed is mainly on long-term financial liabilities, carrying both fixed and variable rates. Fixed rate debt

¹ The financial covenants are measured at the half-year reporting date of 30 June and at the full-year reporting date of 31 December.

exposes the Group to a fair value risk. The Group does not operate any particular hedging policies in relation to the risk arising from such contracts since it considers this risk to be immaterial. Variable rate debt exposes the Group to a rate volatility risk (cash flow risk). In order to hedge this risk, the Group uses Interest Rate Swaps (IRS), which transform the variable rate into a fixed rate, thus reducing the risk caused by interest rate volatility. IRS contracts make it possible to exchange on specified dates the difference between contracted fixed rates and the variable rate calculated with reference to the loan's notional value. A potential rise in interest rates, from the record lows reached in recent years, could be a risk factor in the next six months.

A more detailed analysis of the risk in question can be found in the "Financial Risk Management" section of the Explanatory Notes to the FY2021 Consolidated Financial Statements.

Credit risk

Credit risk is represented by Prysmian Group's exposure to potential losses arising from the failure of business or financial partners to discharge their obligations. This risk is monitored centrally by the Group Finance department, while customer-related credit risk is managed operationally by the individual subsidiaries. The Group does not have any excessive concentrations of credit risk, but given the economic and social difficulties faced by some countries in which it operates, the exposure could undergo a deterioration that would require closer monitoring. Accordingly, the Group has procedures in place to ensure that its business partners are of proven reliability and that its financial partners have high credit ratings. In addition, in mitigation of credit risk, the Group has a global trade credit insurance program covering almost all its operating companies; this is managed centrally by the Risk Management department, which monitors, with the assistance of the Group's Credit Management function, the level of exposure to risk and intervenes when tolerance limits are exceeded due to difficulty in finding coverage on the market.

It should be noted that credit risk has not been particularly impacted during 2022 by the spread of the Covid-19 pandemic nor by the Russian-Ukraine conflict.

A more detailed analysis of the risk in question can be found in the "Financial Risk Management" section of the Explanatory Notes to the FY2021 Consolidated Financial Statements.

Liquidity risk

Liquidity risk indicates the sufficiency of an entity's financial resources to meet its obligations to business or financial partners on the agreed due dates.

With regard to Prysmian Group's working capital cash requirements, these increase significantly during the first half of the year when it commences production in anticipation of order intake, with a consequent temporary increase in net financial debt.

Prudent management of liquidity risk involves the maintenance of adequate levels of cash, cash equivalents and short-term securities, the availability of sufficient committed credit lines, and

timely renegotiation of loans before their maturity. Given the dynamic nature of the business in which Prysmian Group operates, the Group Finance department prefers flexible forms of funding in the form of committed credit lines.

At 30 June 2022, the Group's total financial resources and undrawn committed credit lines stood in excess of Euro 1 billion.

A more detailed analysis of the risk in question can nonetheless be found in the "Financial Risk Management" section of the Explanatory Notes to the FY2021 Consolidated Financial Statements.

Commodity price volatility risk

The Group's operating results could be affected by changes in the prices of commodities and strategic materials (such as copper, aluminium, lead, resins and polyethylene compounds as well as fuels and energy), which are subject to market volatility.

The main commodities purchased by the Group are copper, aluminium and lead, accounting for more than 50% of the total raw materials used to manufacture its products. The Group neutralises the impact of possible variations in the price of copper, aluminium and, although less significant, lead through hedging activities and automatic sales price adjustment mechanisms. Hedging activities are based on sales contracts or sales forecasts, which if not met, could expose the Group to the risk of price volatility in the underlying assets.

A dedicated team within the Group Purchasing department monitors and coordinates centrally those sales transactions requiring the purchase of metals and the related hedging activities carried out by each subsidiary, ensuring that the level of exposure to risk is kept within defined tolerance limits.

A more detailed analysis of the risk in question can be found in the "Financial Risk Management" section of the Explanatory Notes to the FY2021 Consolidated Financial Statements.

Risks associated with meeting pension plan obligations

Group companies have defined benefit pension plans in place throughout the world, into which they are required to pay specific contributions. Under these plans, the Group is obliged to provide a defined level of benefits to plan participants, and is therefore subject to the risk that the related assets are insufficient to cover the benefits. If a fund is in deficit, its managing trustee it will require Prysmian Group to fund the plan. In addition, the Group may be called upon to advance substantial contributions or provide further financial support to certain plans if their creditworthiness declines or if beneficiaries withdraw en masse from the plans and require immediate coverage of their deficits. The Group has taken measures to mitigate its exposure to these risks, including by preventing new participants from joining funded plans and requiring ongoing contributions from the original beneficiaries, but there can be no assurance that these measures will be sufficient to mitigate the relevant risks. The costs of defined benefit pension plans are determined on the basis of a number of actuarial assumptions, including an expected

long-term rate of return on assets and a discount rate. The use of these assumptions makes pension expense and cash contributions subject to volatility from year to year.

A more detailed analysis of this risk can be found in the note on "Employee benefit obligations" within the Explanatory Notes to the FY2021 Consolidated Financial Statements.

OPERATIONAL RISKS

Liability for product quality/defects

Possible defects in the design and manufacture of Prysmian Group's products could give rise to civil or criminal liability towards its customers or third parties. Therefore, the Group, like other companies in the industry, is exposed to the risk of product liability legal actions in its countries of operation. In line with the practice followed by many industry operators, the Group has taken out insurance which it considers provides adequate protection against the risks arising from such liability. Should such insurance coverage prove insufficient, the Group's results of operations and financial condition could be adversely affected.

In addition, the Group's involvement in this kind of legal action and any negative outcome could expose it to reputational damage, with potentially further adverse consequences for its results of operations and financial condition.

Risks associated with failure to meet contractual conditions in turnkey projects

Turnkey projects involve operational and management complexities that can affect delivery times, the quality of the cables produced, the costs estimated at the contractual stage and, consequently, the agreed consideration and any costs related to guarantees. The Group uses the percentage of completion method to account for such projects, whereby the margins recognised in its financial statements depend on a project's progress and its estimated margins at completion. Consequently, work in progress and margins on incomplete projects may not be recognised correctly if the revenues and costs of completion, including any contractual variations and cost overruns and penalties that might reduce expected margins, have not been estimated correctly. The percentage of completion method requires the Group to estimate the costs of project completion and involves making estimates based on factors that could change over time and therefore could have a significant impact on the recognition of revenues and margins. Although the Group has policies and procedures designed to manage and monitor the implementation of each project, there can be no assurance that such problems will not arise. This could have a material adverse effect on the Group's business, financial condition and/or results of operations.

Specifically, projects for high/medium voltage submarine or underground power cables are characterised by contractual forms entailing a "turnkey" or end-to-end type of project management that therefore demands compliance with deadlines and quality standards,

guaranteed by penalties calculated as an agreed percentage of the contract value and that can even result in contract termination if the Group (or its subcontractors and/or other third parties used by the Group in the execution of these projects) fails to comply with specific deadlines and quality standards.

The application of such penalties, the obligation to pay damages as well as indirect effects on the supply chain in the event of late delivery or manufacturing problems, could significantly affect project performance and hence the Group's margins. Possible damage to market reputation cannot be ruled out.

Given the complexity of turnkey projects, Prysmian Group has implemented a quality management process involving an extensive series of tests on cables and accessories before delivery and installation, as well as ad hoc insurance coverage, often through insurance syndicates, to mitigate exposure to risks starting from the manufacturing stage through to delivery.

In addition, the ERM assessments for this particular risk have led the Risk Management department, with the support of the Sales department, to implement a systematic process of Project Risk Assessment for all turnkey projects, involving the assignment of a Project Risk Manager, right from the bidding stage, with the aim of identifying, assessing and monitoring over time the Group's exposure to specific risks and of foreseeing the necessary mitigation actions. The decision to present a bid proposal to a customer will therefore also depend on the results of risk assessment.

Management periodically carries out an assessment of completed and ongoing contracts, analysing the risks involved, including a potential domino effect on the order backlog. The Group has set aside specific provisions for such risks that represent the best estimate of the related liabilities based on available information.

Business interruption risk due to dependence on key assets

The submarine cables business is heavily dependent on certain key assets, such as the plants in Pikkala (Finland) and Arco Felice (Italy) for the production of a particular type of cable, and the cable-laying vessels owned by the Group (the "Giulio Verne" and the new "Leonardo da Vinci" in operation since 2021), some of whose technical capabilities are hard to find on the market. The loss of one of these assets due to unforeseen natural events (e.g. earthquakes, storms, etc.) or other incidents (e.g. fire, terrorist attacks, etc.) and the consequent prolonged business interruption could have a critical economic impact on the Group's performance.

Prysmian addresses asset dependency risk by having:

- a systematic Loss Prevention program, managed centrally by the Risk Management department, which, through periodic on-site inspections, makes it possible to assess the adequacy of existing systems of protection and to decide any necessary remedial actions to mitigate the estimated residual risk. As at 30 June 2022, the Group's operating plants

were sufficiently protected and there were no significant risk exposures. All the plants have been classified as "Excellent Highly Protected Rated (HPR)", "Good HPR" or "Good not HPR", in accordance with the methodology defined by internationally recognised best practices in the field of Risk Engineering & Loss Prevention;

- specific disaster recovery & business continuity plans that make it possible to activate, as quickly as possible, the countermeasures required to contain the impact following a catastrophic event and manage any resulting crisis;
- specific insurance schemes covering damage to assets and loss of associated contribution margin due to business interruption, so as to minimise the financial impact of this risk on cash flow.

Environmental risks

The Group's production activities are subject to specific environmental regulations, amongst which those concerning the management of raw materials, energy resources and hazardous substances, water discharges, atmospheric emissions and waste, including pollution prevention and minimisation of impacts on environmental factors (soil, subsoil, water resources, atmosphere).

As these regulations evolve, they are placing an ever-heavier compliance burden on businesses, often calling for the upgrading of technology (Best Available Techniques) and the relevant risk prevention systems, with associated related costs.

Despite the Group's risk management measures, there is no guarantee that certain environmental accidents will not occur in the normal course of business. This may result in criminal and/or civil penalties and, in some cases, safety violations. There are also costs associated with the Group's compliance with health, safety and environmental rules and regulations. The occurrence of environmental accidents or non-compliance with health, safety and environmental legislation may have a material adverse effect on the business, its financial condition and/or results of operations.

Given the Group's large number of production sites, the probability of an accident, with consequences not only for the environment but also for the continuity of production, cannot be ignored or the resulting economic and reputational impact, which could be significant.

In order to prevent and mitigate environmental risks, the Group has adopted an ISO14000 certified environmental management system at most of its production sites.

Environmental issues are managed centrally by the HQ Health Safety & Environment (HSE) department which, by coordinating local HSE departments, is responsible for adopting systems to ensure strict compliance with legislation in accordance with best practice, for collecting and analysing environmental data via a centralised platform, for monitoring risk exposure using specific indicators, for organising specific training activities and carrying out production site audits.

Cyber security risks

The growing prevalence of web-based technologies and business models allowing the transfer and sharing of sensitive information through virtual spaces (i.e. social media, cloud computing, etc.) carries computing vulnerability risks which Prysmian Group cannot ignore in conducting its business. Exposure to potential cyberattacks could be due to several factors such as the necessary distribution of IT systems around the world, their obsolescence, their inadequate maintenance and the possession of high value-added information such as patents, technology innovation projects, as well as financial projections and strategic plans not yet disclosed to the market, unauthorised access to which could damage a company's results, financial situation and image.

In particular, with regard to cyber risk, the Group has adopted a Cyber Security Program, which includes a governance structure, policies and procedures, training, Security Reports, technologies and processes for monitoring, analysing and containing incidents, Security Assessment for selected plants, periodic review of the Threat Model and in-depth analysis of the complex structural factors that form the framework of a modern Security system for the corporate community.

Given the increasing frequency of manufacturing cyberattacks and the growing introduction of IoT systems in Operations and probable acceleration of these technologies due to energy transition plans, the potential consequences under possible future scenarios (IEA - STEPS, APS, SDS and NZE) have been analysed and a secure redesign and segregation project for production plants is underway, starting from the most strategic ones.

A special Information Security Committee, consisting of the key figures involved in managing cyber risk, has been appointed with the mission of defining the strategic and operational cyber security objectives, of coordinating the main initiatives undertaken, and of examining and approving policies, operating procedures and instructions. The Committee is convened on a periodic basis (twice a year) and in any case upon the occurrence of any significant events or crises. Lastly, specific e-learning training sessions have been provided to all the Group's IT staff with the aim of raising their awareness of this issue.

Risk of losing key resources or not attracting qualified personnel

The Group is exposed to the risk of lack or loss of key resources in strategic operational roles. Such persons can be identified by their managerial responsibilities and/or specific know-how, necessary for the implementation of corporate strategies, and are hard to replace quickly.

In order to ensure business continuity in line with its strategic objectives, the Group has established the following:

- "Job Band Program" to define staff grading based on correct job weighting with respect to responsibility, problem-solving ability and know-how, in line with company strategies, using a common, global organisational language;

- "Group Academy" to teach and develop Leadership skills (Management School), Technical skills (Professional School) and E-Learning (Digital school) within the Group, which, since 2021, have been complemented by "Local Schools", i.e. the series of training initiatives promoted by the Regions and inspired by the principle of continuous on-site training, often in the local language. Such initiatives are designed to meet local, contingent needs, linked to the challenges of existing roles or with a view to local growth of a more short-term nature;
- "Stem it", "Sell it", "Sum it" recruitment programs for professionals in the production, quality, purchasing, logistics, sales and finance functions. The "Stem it" program also contains a specific policy dedicated to attracting and retaining female technical specialists, in order to help make the Group increasingly gender-balanced;
- "People Performance Program" to manage career paths;
- "Talent Management Program" to accelerate development of our talents;
- "MyMentorship", an in-house mentoring program operating globally to support the growth of key people through an exchange of technical or leadership skills;
- "Long-Term Incentive Program" to motivate and retain the Group's key managers;
- "Graduate Program" aimed at attracting and recruiting talented, high-potential personnel to ensure successful future staff replacements internally;
- "Non-compete agreements" formalised for those employees who possess technical process and product innovation know-how representing strategic value added for the business in its particular competitive sector;
- "Internal Job Posting", already active since 2020 regionally but intended to go global at a later date, to facilitate the development of people's cross-functional skills and continue to build a global corporate culture.

Key supplier dependence risks

In carrying out its operations, Prysmian Group uses numerous suppliers of goods and services, some of which are important suppliers of raw materials like, for example, certain metals (copper, aluminium and lead) and some polymer compounds, especially in the high voltage and submarine cables business.

Dependence on key suppliers obviously constitutes a risk in the event of delivery problems, quality issues or price rises, and, in the case of certain raw material suppliers, Prysmian is potentially exposed to their industrial risk (fire, explosion, flood, etc.).

With the objective of preventing and mitigating these risks, the Group has a well-established qualification system to select and work with reliable suppliers of goods and services and, where possible, identify possible alternatives, thus avoiding single-source situations.

The mitigation strategy is therefore based on partnerships with a number of key suppliers aimed at reducing the Group's exposure to supply shortages, on close monitoring of their performance and on projects and investments in R&D to develop alternative technical solutions.

Risks of dependence on key distributors and resellers for the non-exclusive sale of the Group's products

Distributors and resellers account for a significant portion of the Group's sales. These distributors and resellers are not contractually obliged to purchase the Group's products on an exclusive basis. Therefore, they may purchase competitor products or cease to purchase the Group's products at any time. The loss of one or more major distributors could have a material adverse effect on the Group's business, financial condition and/or results of operations.

LEGAL AND COMPLIANCE RISKS

Risks of non-compliance with Code of Ethics, Policies and Procedures

Non-compliance risk generically represents the possibility of incurring legal or administrative sanctions, material financial losses or reputational damage as a result of violations of applicable laws and regulations. Prysmian Group has put in place a series of organisational tools to define the principles of legality, transparency, fairness and honesty through which it operates. In particular, since its inception, the Group has adopted a Code of Ethics, a document which contains the ethical standards and the behavioural guidelines that all those engaged in activities on behalf of Prysmian or its subsidiaries (including managers, officers, employees, agents, representatives, contractors, suppliers and consultants) are required to observe. Through its Internal Audit & Compliance department, the Group undertakes to constantly monitor compliance with and effective application of these rules, not tolerating any kind of violation.

However, despite this ongoing attention, close vigilance and periodic information campaigns, it is not possible to rule out future episodes of misconduct in breach of policies, procedures or the Code of Ethics, and hence of applicable laws and regulations, by persons carrying out activities on Prysmian's behalf, which could result in legal sanctions, fines or reputational damage, even on a material scale.

Risks of non-compliance with Data Protection (Privacy) legislation

In today's increasingly globalised business environment, with a proliferation of channels and ways to access information, as well as growth in the volume and types of data managed, Prysmian is addressing the various data management issues, ranging from compliance with recent legislation to defence against potential threats to confidentiality, integrity and availability of information.

Accordingly, it is fundamental to have a global vision when managing sensitive information, not only with respect to regulatory compliance but also with respect to security and business priorities.

Furthermore, Europe's General Data Protection Regulation (GDPR), which came into force in May 2018, has now become one of the main reference points for a renewed commitment to data protection, particularly personal data.

If the Group does not adequately comply with or successfully implement processes in response to these new regulatory requirements, and particularly in light of its large number of employees and the growing trend towards global data management (including cloud storage and the use of mobile devices), it could be at risk of individual claims for compensation for alleged mismanagement of personal data, imposition of sanctions by relevant authorities and reputational damage.

The personal data protection program adopted by Prysmian is based on the following key elements, involving the entire corporate structure:

- Implementation of a data-based model, through mapping the personal data processed by company departments and keeping a record of processing activities;
- Definition of a governance model, designed to comply with the requirements of the GDPR and other emerging data protection regulations, featuring:
 - an organisational structure under which the Data Protection Officer (DPO) serves in an advisory and monitoring capacity where personal data management is concerned, with the duties and related responsibilities delegated to those materially engaged in data processing activities;
 - policies and documents supporting the model (company policies, disclosure statements, internal appointments, clauses applicable to suppliers, etc.);
- Evaluation and adoption of adequate technical and organisational measures to ensure a level of security appropriate to the risk, also with the help of new tools such as Data Protection Impact Assessment introduced by the GDPR;
- Definition of communication and training material specifically for those parties identified within the data protection organisational model, so that all the parties involved are aware of the revised regulatory requirements and take steps to fulfil them;
- Review of video surveillance systems, with particular reference to the new European guidelines and the regulations applicable in Italy.

In addition, the following activities have been undertaken to ensure data protection compliance:

- Verification of the adequacy of the procedures adopted by the Group to manage the green pass and related access controls by the employer;

- Review of the process for appointing System Administrators, periodically updating appointments and managing system logs;
- Coordination of the adoption of a privacy model in relation to the Group's legal entities in Chile and Brazil.

Monitoring and support have been provided to Prysmian's many European legal entities in applying the model to ensure its consistent application and the establishment of an internationally shared corporate culture in this regard.

The activities to comply with the recent European legislation are capitalised on as much as possible in the compliance activities required by other national regulations.

Risks of non-compliance with anti-bribery legislation

In recent years, legislators and regulators have devoted much attention to the fight against bribery and corruption, with a growing tendency to extend responsibility to legal entities as well as to natural persons. With growing internationalisation, organisations more and more often find themselves operating in contexts exposed to the risk of bribery and having to comply with a variety of relevant legislation, such as Italian Legislative Decree 231/2001, Italy's Anti-bribery Law (Law 190/2012), the Foreign Corrupt Practices Act, the UK Bribery Act etc., all with a common objective: to fight and repress corruption.

The Group's business model, with a global presence in over 50 countries and a multitude of diverse product applications, brings it into constant contact with numerous third parties (suppliers, intermediaries, agents and customers). In particular, the management of large international projects in the Energy (submarine and high voltage) business involves having business relationships, often through local commercial agents and public officials, in countries at potential risk of corruption (as per the Corruption Perception Index).

Prysmian Group has therefore implemented a series of actions designed to manage bribery and corruption on a preventive basis; foremost amongst these is the adoption of an Anti-Bribery Policy which prohibits the bribery of both public officials and private individuals and requires employees to abide by it and to observe and comply with all anti-bribery legislation in the countries in which they are employed or active, if this is more restrictive. In addition, specific e-learning activities (training and testing) for all Group personnel are periodically conducted to raise awareness about compliance with this legislation.

Prysmian Group has continued its monitoring activities and maintained its focus on compliance through a special anti-bribery compliance program inspired by the guidelines of ISO 37001:2016 "Anti-bribery Management Systems". This program is intended to provide greater control over the management of bribery risk and minimise the risk of incurring penalties as a result of corrupt offences by employees or third parties.

In 2021, the Group initiated the process of obtaining ISO 37001:2016 certification by updating its anti-bribery risk assessment, its "Anti-bribery Management Systems" as well as its Anti-bribery Policy in order to comply with ISO 37001. In addition, a specific anti-bribery unit was set up within the Compliance office.

ISO 37001 certification was obtained in December 2021 from an outside independent certifier. The core of the ISO 37001 standard is the audit of third parties (suppliers, intermediaries, agents and customers) through due diligence designed to reveal any critical issues or negative events that undermine the reputation of third parties with whom Prysmian Group deals.

In this regard, in 2019 the Group implemented a "Third Party Program", a new Group Policy aimed at preventing and managing the risk of bribery arising from relationships with third parties (such as distributor agents, and certain categories of supplier). In particular, prior to establishing any business relationship with third parties, it is mandatory to perform - through a dedicated online platform - due diligence checks on the third party. As a result, each third party receives a risk rating (high, medium, low) and is consequently submitted to an approval process, differing according to the level of risk.

In addition, in line with the Group's ongoing commitment to ensure that the financial and personal interests of its employees and consultants do not conflict with the ability to perform their duties in a professional, ethical and transparent manner, a new Conflict of Interest policy was issued in 2019. A new online platform was implemented in 2021 for reporting potential conflicts of interest, both inside and outside the business. In particular, all Prysmian Group employees were required to disclose all personal or financial relationships that could potentially lead to a conflict of interest.

In 2021, the Gifts and Entertainment Policy was also updated, establishing a series of rules to be complied with before making or receiving gifts or paying entertainment expenses and distinguishing between private companies and government agencies/public officials. In the same period, a new online platform was also implemented so that before making or receiving gifts or paying entertainment expenses, all Prysmian employees make appropriate disclosures and obtain the necessary approvals.

All compliance policies (Code of Ethics, Global Compliance, Helpline, Anti-Bribery, Gifts & Entertainment, Third Party Program, Antitrust, Antitrust EU, Conflict of Interest, Export Control) are published on the corporate intranet and are available in the official languages of the Prysmian Group.

Further details about the actions taken by the Group to prevent corrupt practices can be found in the specific section of the annual Sustainability Report.

Risks of non-compliance with antitrust law

Competition rules on restrictive agreements and abuse of dominant position now play a central role in governing business activities in all sectors of economic life. Its extensive international

presence in more than 50 countries means the Group is subject to antitrust law in Europe and every other country in the world in which it operates, each with more or less strict rules on the civil, administrative and criminal liability of parties that violate the applicable legislation. In the last decade, local antitrust authorities have paid increasing attention to commercial activities by market players, also involving a tendency for international collaboration between authorities themselves. Prysmian aspires to operate on the market in compliance with the competition rules. In keeping with the priorities identified by the ERM process, the Board of Directors has adopted an Antitrust Code of Conduct that all Group employees, Directors and managers are required to know and abide by in the conduct of their duties and in their dealings with third parties.

Like with other Policies, following the acquisition of General Cable, the Antitrust Code of Conduct has also been updated in order to have a single document, valid for the entire Prysmian Group and designed to provide an overview of the problems associated with applying antitrust law and the consequent standards of conduct to follow.

More detailed documents on the antitrust regulations in force in the European Union, North America, China and Australia have also been adopted.

The Antitrust Code of Conduct is an integral part of the training program and is intended to provide an overview of the issues concerning application of EU and Italian competition law on collusive practices and abuse of dominant positions, within which specific situations are assessed on a case-by-case basis. These activities represent a further step in establishing an "antitrust culture" within the Group by promoting knowledge and making individuals more accountable for their professional duties under antitrust legislation.

With regard to the antitrust investigations still in progress, details of which can be found in the note on Provisions for risks and charges in the Explanatory Notes to the Consolidated Financial Statements, the Group has a specific provision for risks and charges amounting to approximately Euro 165 million as at 30 June 2022. Despite the uncertainty of the outcome of the investigations and legal actions in progress, the amount of this provision is considered to represent the best estimate of the liability based on the information available at the date of the current report.

Risks arising from export restrictions, trade tariffs and other changes in trade policy

Prysmian Group's activities also involve the shipment and transfer of finished products, semi-finished goods and raw materials between different countries, exposing the Group to risks related to changes in the tax, customs tariff and trade regimes of different political jurisdictions. In addition, many countries have rules on international trade and apply laws and regulations governing trade in products, software, technology and services, including financial transactions and intermediation.

For example, export control regimes, governed by the laws of the United States, the EU (article 215 of the Treaty on the Functioning of the EU) and the United Nations (Chapter VII of the UN Charter), identify the parties (natural or legal persons) to whom the application of specific

restrictions (e.g. arms embargoes, travel bans, financial or diplomatic sanctions, etc.) is mandatory.

Failure to comply may result in the imposition of fines and criminal and/or civil penalties, including imprisonment.

Any of the above circumstances could have a material adverse effect on the business, financial condition and/or results of operations of Prysmian Group and could affect its ability to fulfil issuer obligations under its Bond issues.

In order to prevent and mitigate this risk, Prysmian Group has adopted a policy to manage and control its exports that involves among other things:

- Monitoring of countries and parties subject to restrictions, as well as the level of restrictions in force;
- Due Diligence on restricted persons, in order to avoid transactions with prohibited parties, including screening of Prysmian Group employees and visitors;
- Product classification to determine which export compliance requirements are applicable. This classification allows the Group to understand where and to whom products can be exported and whether a licence or other permit is required;
- Basic training for all employees on export controls and specific training for staff in functions responsible for international trade transactions and export controls;
- Requirement for an end-user declaration certifying that the buyer or end-user of goods/technology complies with applicable export regulations.

Risks related to changes in industry standards and legal requirements

Group companies are required to comply with specific federal, state, local and foreign legal and regulatory requirements, as well as certain industry standards. Changes in applicable laws and regulations may affect the growth of the markets in which the Group operates. Growth in the cable industry is partly due to legislation on energy and alternative and renewable energy sources, as well as to incentives for investing in utilities and infrastructure. It is not foreseeable whether, in the future, there will be changes and/or industry standards that are detrimental to the Group's business. Although the Group's business is managed to mitigate such risks, there can be no assurance that changes in applicable standards, laws and regulations will not result in significant costs, which could have a material adverse effect on the Group's business, financial condition and/or results of operations.

PLANNING AND REPORTING RISKS

Planning and reporting risks are related to the adverse effects that irrelevant, untimely or incorrect information might have on the Group's strategic, operational and financial decisions. At present, in view of the reliability and effectiveness of internal procedures for reporting and planning, the Group does not consider these risks to be relevant.

In addition, the risks related to climate change are reproduced below from the Consolidated Non-Financial Information Statement (Sustainability Report 2021) and the TCFD Report 2021, in which further details can be found.

Risks related to climate change

Events related to climate change, including extreme weather events such as storms, floods, hailstorms, changes in summer and winter rainfall and increased temperatures, may also affect the Group's activities.

The Group's plants use water for industrial uses, mainly for certain cooling phases of their processes, although in relatively small quantities. Consequently, the Group is exposed to the potential risk of reduced water availability, which is affected by climate change. In addition, any rise in sea level could lead to an increased risk of coastal flooding as a result of adverse weather conditions in the locations where the Group's production facilities are located. Analysis of these physical risks has been extended to the Group's entire supply chain. On top of physical risks, climate change also entails a transition risk accompanying the energy market's evolution in the wake of the climate crisis. Firstly, the Group is exposed to the potential risk of inadequate support for technological innovation and the emergence of alternative or substitute technologies. This could mean a reduction in demand for products and services, which in turn would lead to a decrease in revenues. Secondly, new energy transition policies, and the consequent impact of increased market opportunities, are rapidly changing an already competitive scenario. The expansion or entry of new players may reduce or disrupt the Group's leadership, resulting in lost revenues or reduced margins.

The need to decarbonise our economy also translates into more complex market demands, increasing the likelihood that Prysmian's products contain patented third-party solutions. This could expose the business to risks associated with the management of third-party patents and possible costs arising from litigation.

In addition, there is a risk of a climate change-related increase in costs for the Group due to a potential rise in production costs caused by the wider application of emission laws and regulations, both in the form of carbon taxes and emission trading schemes. Finally, although already mentioned, the energy transition is accelerating the digitisation of physical assets and increasing the risks and consequences related to cyber security. This could lead to higher adaptation and monitoring costs.

Any of these circumstances may have a material adverse effect on the Group's business, financial condition and/or results of operations.

RELATED PARTY TRANSACTIONS

Related party transactions do not qualify as either atypical or unusual but form part of the normal course of business by Group companies. Such transactions take place under market terms and conditions, according to the type of goods and services provided.

Information about related party transactions, including that required by the Consob Communication dated 28 July 2006, is presented in Note 20 of the Explanatory Notes.

Milan, 28 July 2022

ON BEHALF OF THE BOARD OF DIRECTORS

THE CHAIRMAN
Claudio De Conto

Consolidated financial statements and explanatory notes

EXPLANATORY NOTES

A. GENERAL INFORMATION

Prysmian S.p.A. ("the Company") is a company incorporated and domiciled in Italy and organised under the laws of the Republic of Italy. The Company has its registered office in Via Chiese 6, Milan (Italy).

Prysmian S.p.A. was floated on the Italian Stock Exchange on 3 May 2007 and since September 2007 has been included in the FTSE MIB index, comprising the top 40 Italian companies by capitalisation and stock liquidity. Since 18 October 2021, the stock has been included in the MIB® ESG, the first "Environmental, Social and Governance" index dedicated to Italian blue chips, which features the most important listed issuers that demonstrate the implementation of ESG best practices.

The Company and its subsidiaries (together "the Group" or "Prysmian Group") produce cables and systems and related accessories for the energy and telecommunications industries, and distribute and sell them around the globe.

The present Half-Year Financial Report was approved by the Board of Directors of Prysmian S.p.A. on 28 July 2022 and has undergone a limited review by the independent auditors.

A.1 SIGNIFICANT EVENTS IN 2022

The review of significant events in the period can be found in the Directors' Report in the section entitled "SIGNIFICANT EVENTS DURING THE PERIOD".

B. FORM AND CONTENT

The present Half-Year Financial Report has been prepared on a going concern basis, since the Directors have assessed that there are no financial, operating or other kind of indicators that might provide evidence of the Group's inability to meet its obligations in the foreseeable future and particularly in the next 12 months.

The information contained in these Explanatory Notes must be read in conjunction with the Directors' Report, an integral part of the Half-Year Financial Report, and the annual IFRS Consolidated Financial Statements at 31 December 2021.

All the amounts shown in the Group's financial statements are expressed in millions of Euro, unless otherwise stated.

B.1 FINANCIAL STATEMENTS AND DISCLOSURES

The Group has elected to present its income statement according to the nature of expenses, whereas assets and liabilities in the statement of financial position are classified as current or non-current. The statement of cash flows has been prepared using the indirect method.

Prysmian Group has prepared the present Half-Year Financial Report at 30 June 2022 in accordance with art. 154-ter of Legislative Decree 58/1998 and the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and endorsed by the European Union, and in compliance with *IAS 34 – Interim Financial Reporting*, applying the same accounting standards and policies adopted to prepare the consolidated financial statements at 31 December 2021.

When preparing the Half-Year Financial Report, management has made judgements, estimates and assumptions that affect the value of revenues, costs, assets and liabilities and the disclosures relating to contingent assets and liabilities at the reporting date. As estimates, these may differ from the actual results attained in the future. Certain valuation processes, particularly more complex ones, such as the determination of any fixed asset impairment, are only fully carried out during the preparation of the year-end consolidated financial statements when all the necessary information is available. No evidence of impairment has been identified during the first half of 2022, as confirmed by internal sources and all other external sources except as reported below.

Impacts of the Russian-Ukraine conflict

With reference to the direct economic and financial consequences of the ongoing conflict between Russia and Ukraine on the Group's assets and liabilities, it should be noted that the Group has no operating activities in Ukraine, while it operates on the Russian market through its subsidiary, which represents 0.6% of the Group's total net invested capital and produces revenues amounting to approximately 0.4% of the Group's total revenues, operating almost exclusively at the local level.

The Group's exposure is therefore limited. The Group constantly monitors the evolution of the conflict, in order to intercept any changes in the geopolitical context that may require a review of the company strategies already defined and/or the adoption of mechanisms to safeguard its competitive positioning, investments, business performance and its own resources. In the preparation of this Half-Year Financial Report, the possible impacts of the conflict, mainly attributable to the recoverability of receivables and investments, were considered.

In addition, it should be noted that assessments of the possible presence of impairment indicators also took into account the indirect consequences of the conflict on interest rates and the cost of raw materials and energy.

Therefore, the Group, although not significantly exposed in the regions affected by the conflict, considering the possible negative impacts that the conflict itself could generate on the results of the activities, considered it appropriate to carry out a specific impairment test of the CGU Energy North Europe (CGU which includes the Russian subsidiary), from which no value loss to be recorded has arisen as a relevant headroom was confirmed, which would be reset by a theoretical WACC of 16.4%.

B.2 ACCOUNTING STANDARDS

Accounting standards used to prepare the Half-Year Financial Report

The basis of consolidation, the methods used to translate financial statements into the presentation currency, the accounting standards, estimates and policies adopted are the same as those used for the consolidated financial statements at 31 December 2021, to which reference should be made for more details, except for income taxes, which are recognised using the best estimate of the Group's weighted average tax rate expected for the full year, and except for the application of *IAS 29 - Financial Reporting in Hyperinflationary Economies* to the subsidiaries in Turkey, as better described below.

Impacts of applying IAS 29 - Financial Reporting in Hyperinflationary Economies

The Group controls companies based in Turkey, for which, after a long period of monitoring the country's inflation rates, a consensus was reached as to the existence during the first half of 2022 of a hyperinflationary economic environment, as defined by international accounting standards. In fact, a steep devaluation of the local currency and escalating inflation have both been observed. Based on these parameters and taking into account the guidance of the accounting standard, *IAS 29 - Financial Reporting in Hyperinflationary Economies* has been applied as from 1 April 2022 to the Turkish subsidiaries. It is recalled that this standard has been applied to the subsidiary in Argentina since 1 July 2018. In the first 6 months of 2022, in Argentina there was a further acceleration of the inflation index, leading the cumulative levels of consumer price indices to reach 251% in the last 3 years.

The Group's consolidated results at 30 June 2022 therefore include the effects from the application of the aforementioned accounting standard also for its Turkish subsidiaries, effective from 1 April 2022, leading the cumulative levels of consumer price indices to reach 136% in the last 3 years.

In accordance with IAS 29, the restatement of financial statements as a whole requires the application of certain procedures as well as judgement.

With reference to the income statement, income and expenses have been restated by applying the change in the general price index. The income statement thus restated has been translated into Euro at the closing rate on 30 June 2022 instead of at the average rate for the reporting period. The effects of applying the standard have added Euro 1 million to net sales with no impact on net profit.

With reference to the statement of financial position, monetary items have not been restated because they are already expressed in terms of the monetary unit current at the end of the reporting period; non-monetary assets and liabilities have been revalued from the date the assets and liabilities were originally recorded through until the reporting date. This has resulted in the recognition of an overall expense of Euro 3 million, reported in the income statement under net Finance income (costs), while the effects of the standard's first-time application on 1 April 2022 have been recorded directly in equity for an amount of Euro 8 million.

Accounting standards, amendments and interpretations applied from 1 January 2022

The following is a list of new standards, interpretations and amendments whose application became mandatory from 1 January 2022 but which have not shown to have had a material impact on the consolidated financial statements at 30 June 2022:

- *Amendments to IFRS 3 Business Combinations;*
- *Amendments to IAS 16 Property, Plant and Equipment;*
- *Amendments to IAS 37 Provisions, Contingent Liabilities and Contingent Assets;*
- *Annual Improvements 2018-2020.*

Accounting standards, amendments and interpretations applicable to annual reporting periods after 2022

The following is a list of new standards, interpretations and amendments, already approved by the European Union for mandatory application to annual reporting periods after 2022, and which, based on preliminary assessments, will not have a material impact on the consolidated financial statements:

- *Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2: disclosure of financial accounting policies;*
- *Amendments to IAS 8 Accounting policies, changes in accounting estimates and errors;*
- *IFRS 17 Insurance Contracts.*

B.3 CHANGES IN THE SCOPE OF CONSOLIDATION

The Group's scope of consolidation includes the financial statements of Prysmian S.p.A. (the Parent Company) and the companies over which it exercises direct or indirect control, which are consolidated from the date when control is obtained until the date when such control ceases.

The changes in the scope of consolidation at 30 June 2022, compared with 31 December 2021, are listed below.

Liquidations

Liquidated companies	Nation	Date
EHC Japan K.K	Japan	1 June 2022

Mergers

Merged companies	Survivor companies	Nation	Date
General Cable Industries Inc.	Prysmian Cables and Systems USA, LLC	United States	1 January 2022
EHC Brazil Ltda	Prysmian Cabos e Sistemas do Brasil S.A	Brazil	31 March 2022

Name changes

For a clearer understanding of the scope of consolidation, the following table shows the name changes that took place in the period:

Previous name	New name	Nation	Date
Eksa sp.z.o.o	Prysmian Poland sp. z o.o.	Poland	10 February 2022
EHC Turkey Asansör ve Yürüyen Merdiven Sanayi Limited Şirketi	Tasfiye Halinde EHC Turkey Asansör ve Yürüyen Merdiven Sanayi Limited Şirketi	Turkey	13 June 2022

Appendix A to these notes contains a list of the companies included in the scope of consolidation at 30 June 2022.

C. FINANCIAL RISK MANAGEMENT

The Group's activities are exposed to various types of risk: market risk (including exchange rate, interest rate and price risks), credit risk and liquidity risk.

The current Half-Year Financial Report does not contain all the information about the financial risks described in the Annual Financial Report at 31 December 2021, which should be consulted for a more detailed review.

With reference to the risks described in the Annual Financial Report at 31 December 2021, there have been no material changes in the types of risks to which the Group is exposed or in its policies for managing such risks.

D. FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

IFRS 13 requires assets and liabilities recognised in the statement of financial position at fair value to be classified according to a hierarchy that reflects the significance of the inputs used in measuring fair value.

Financial instruments are classified according to the following fair value measurement hierarchy:

Level 1: Fair value is determined with reference to quoted prices (unadjusted) in active markets for identical financial instruments;

Level 2: Fair value is determined using valuation techniques where the input is based on observable market data;

Level 3: Fair value is determined using valuation techniques where the input is not based on observable market data.

(Euro/million)

				30.06.2022
	Level 1	Level 2	Level 3	Total
Assets				
<i>Financial assets at fair value:</i>				
Derivatives through profit or loss	-	71	-	71
Hedging derivatives	-	123	-	123
Financial assets at fair value through profit or loss	225	-	-	225
Financial assets at fair value through other comprehensive income	11	-	-	11
Other investments at fair value through other comprehensive income	-	-	13	13
Total assets	236	194	13	443
Liabilities				
<i>Financial liabilities at fair value:</i>				
Derivatives through profit or loss	-	85	-	85
Hedging derivatives	-	160	-	160
Total liabilities	-	245	-	245

Financial assets classified in fair value Level 3 have reported no significant movements in the period.

Given the short-term nature of trade receivables and trade payables, their carrying amounts, net of any allowances for impairment, are treated as a good approximation of fair value.

Financial assets at fair value through profit or loss, classified in fair value Level 1 and amounting to Euro 225 million, include Euro 200 million in money market funds in which the Parent Company has invested its liquidity, with the remainder referring to funds in which the Brazilian and Argentine subsidiaries have temporarily invested their liquidity.

Financial assets at fair value through other comprehensive income of Euro 11 million, classified in fair value Level 1, refer to Italian government securities.

During the first half of 2022 there were no transfers of financial assets and liabilities between the different levels of the fair value hierarchy.

The valuation techniques are described below:

Level 1: The fair value of financial instruments quoted in an active market is based on market price at the reporting date. The market price used for derivatives is the bid price, while for financial liabilities the ask price is used.

Level 2: Derivatives classified in this category include interest rate swaps, currency forwards and derivative contracts on metals and other commodities that are not quoted in active markets. Fair value is determined as follows:

- for interest rate swaps, it is calculated on the basis of the present value of forecast future cash flows;
- for currency forwards, it is determined using the forward exchange rate at the reporting date, appropriately discounted;

- for metal derivatives, it is determined using the prices of such metals at the reporting date, appropriately discounted.

Level 3: The fair value of instruments not quoted in an active market is primarily determined using valuation techniques based on estimated discounted cash flows.

E. BUSINESS COMBINATIONS

Omnisens S.A.

Prysmian Group acquired control of Omnisens S.A. on 11 November 2021. For accounting purposes, the acquisition date was backdated to 1 November 2021.

The total consideration for the acquisition was approximately Euro 18 million.

The fair value of the assets and liabilities of Omnisens S.A. has been determined on a provisional basis, since the acquisition accounting processes were still being finalised at the current reporting date.

As permitted by IFRS 3, the fair value of the assets, liabilities and contingent liabilities will be finalised within twelve months of the acquisition date.

The excess of the purchase consideration over the provisional fair value of net assets acquired has been recognised as goodwill, quantified at Euro 17 million.

Such goodwill is primarily justified by the future earnings expected from integrating the company into Prysmian Group, including the benefits of run-rate synergies. The process of purchase price allocation is currently in progress, as permitted by the relevant accounting standard.

Details of the net assets acquired and goodwill are as follows:

(Euro/million)

	Euro
Purchase price	18
Total cost of acquisition (A)	18
Fair value of net assets acquired (B)	1
Goodwill (A-B)	17

(Euro/million)

	Euro
Inventories	2
Trade and other receivables	5
Trade and other payables	(6)
Borrowings from banks and other lenders	(1)
Cash and cash equivalents	1
Net assets acquired (B)	1

Prysmian Poland sp.zo.o (formerly Eksa Sp.z.o.o.)

On 31 December 2021 Prysmian Group completed the acquisition of Eksa Sp.z.o.o., 30% of whose capital it already owned.

The total consideration for the acquisition was approximately Euro 7 million.

The fair value of the assets and liabilities of Eksa Sp.z.o.o. has been determined on a provisional basis, since the acquisition accounting processes were still being finalised at the current reporting date.

As permitted by IFRS 3, the fair value of the assets, liabilities and contingent liabilities will be finalised within twelve months of the acquisition date.

Since the purchase consideration is equal to the provisional fair value of the net assets acquired, no goodwill has been recognised.

The process of purchase price allocation is currently in progress, as permitted by the relevant accounting standard.

Details of the net assets acquired are as follows:

(Euro/million)

	Euro
Total cost of acquisition (A)	7
Assets already held (B)	3
Fair value of net assets acquired (C)	10
Goodwill/(Badwill) (A+B-C)	-

(Euro/million)

	Euro
Property, plant and equipment	1
Trade and other receivables	7
Borrowings from banks and other lenders	(1)
Cash and cash equivalents	3
Net assets acquired (C)	10

F. SEGMENT INFORMATION

The Group's operating segments are:

- *Energy*, whose smallest identifiable CGU are Regions/Countries depending on the specific organisation;
- *Projects*, whose smallest identifiable CGUs are the High Voltage, Submarine Power, Submarine Telecom and Offshore Specialties businesses;
- *Telecom*, whose smallest CGU is the operating segment itself.

Segment information is structured in the same way as the report periodically prepared for the purpose of reviewing business performance. This report presents operating performance by macro type of business (*Energy*, *Projects* and *Telecom*) and the results of operating segments primarily on the basis of Adjusted EBITDA, defined as earnings (loss) for the period before non-recurring items, the fair value change in metal price derivatives and in other fair value items, amortisation, depreciation and impairment, finance costs and income and taxes.

This report also provides information about the statement of financial position for the Group as a whole but not by operating segment.

In order to provide users of the financial statements with clearer information, certain economic data is also reported by sales channels and business areas within the individual operating segments:

A) *Projects* operating segment: encompassing the following high-tech and high value-added businesses whose focus is on projects and their execution, as well as on product customisation: High Voltage, Submarine Power, Submarine Telecom and Offshore Specialties.

B) *Energy* operating segment: encompassing the businesses offering a complete and innovative product portfolio designed to meet the various and many needs of the market, namely:

- Energy & Infrastructure (E&I): this includes Trade and Installers, Power Distribution and Overhead lines;
- Industrial & Network Components: this comprises Specialties and OEM, Elevators, Automotive, Network Components, core Oil & Gas and DHT;
- Other: occasional sales of residual products.

C) *Telecom* operating segment: encompassing the manufacture of cable systems and connectivity products used in telecommunication networks. This segment is organised in the following lines of business: optical fibre, optical cables, connectivity components and accessories, OPGW (Optical Ground Wire) and copper cables.

All Corporate fixed costs are allocated to the *Projects*, *Energy* and *Telecom* operating segments. Revenues and costs are allocated to each operating segment by identifying all revenues and costs directly attributable to that segment and by allocating indirectly related costs.

Group operating activities are organised and managed separately according to the nature of the products and services provided: each segment offers different products and services to different

markets. Sales of goods and services are analysed geographically on the basis of the location of the registered office of the company that issues the invoices, regardless of the geographic destination of the products sold. All transfer prices are set using the same conditions applied to other transactions between Group companies and are generally determined by applying a mark-up to production costs.

Assets and liabilities by operating segment are not included in the data reviewed by management and so, as permitted by IFRS 8, this information is not presented in the current report.

F.1 OPERATING SEGMENTS

The following tables present information by operating segment.

(Euro/million)

	Projects	Energy			Telecom	1st half 2022	
		E&I	Industrial & NWC	Other		Total Energy	Group total

- Impairment	(1)	-	-
- Currency translation differences	99	88	29
- Monetary revaluation for hyperinflation	15	-	-
Balance at 30 June 2022	2,899	1,731	494
Of which:			
- Historical cost	5,341	1,731	1,173
- Accumulated depreciation/amortisation and impairment	(2,442)	-	(679)
Net book value	2,899	1,731	494

(Euro/million)

	Property, plant and equipment	Goodwill	Other intangible assets
Balance at 31 December 2020	2,648	1,508	489
Movements in 2021:			
- Business combinations	8	55	1
- Investments	65	-	9
- Increases for leases (IFRS 16)	15	-	-
- Disposals	(1)	-	-
- Depreciation and amortisation	(125)	-	(33)
- Impairment	(3)	-	-
- Currency translation differences	44	33	11
- Reclassifications (to)/from Assets held for sale	(4)	-	-
- Monetary revaluation for hyperinflation	1	-	-
Balance at 30 June 2021	2,648	1,596	477
Of which:			
- Historical cost	4,753	1,616	1,064
- Accumulated depreciation/amortisation and impairment	(2,105)	(20)	(587)
Net book value	2,648	1,596	477

Investments in the first six months of 2022 amounted to Euro 120 million, of which Euro 112 million in Property, plant and equipment and Euro 8 million in Intangible assets.

This expenditure is analysed as follows:

- 64%, or Euro 76 million, for projects to increase and rationalise production capacity and develop new products;
- 13%, or Euro 16 million, for projects to improve industrial efficiency;
- 23%, or Euro 28 million, for IT implementation projects.

2. EQUITY-ACCOUNTED INVESTMENTS

Details are as follows:

(Euro/million)

	30.06.2022	31.12.2021
Investments in associates	384	360
Total equity-accounted investments	384	360

Investments in associates

Information about the main investments in associates:

Company name	Registered office	% owned
Yangtze Optical Fibre and Cable Joint Stock Limited Company	China	23.73%
Yangtze Optical Fibre and Cable (Shanghai) Co. Ltd	China	42.80%
Kabeltrommel GmbH & Co.K.G.	Germany	44.93%
Power Cables Malaysia Sdn Bhd	Malaysia	40.00%
Elkat Ltd.	Russia	40.00%

Yangtze Optical Fibre and Cable Joint Stock Limited Company is a Chinese company formed in 1988 whose main shareholders are: China Huaxin Post and Telecommunication Economy Development Center, Wuhan Yangtze Communications Industry Group Company Ltd. and Prysmian Group. The company is one of the industry's most important manufacturers of optical fibre and cables. Its products and solutions are sold in more than 50 countries, including the United States, Japan, the Middle East and Africa. The company was listed on the Main Board of the Hong Kong Stock Exchange in December 2014 and in July 2018 it was also listed on the Shanghai Stock Exchange.

At 30 June 2022, the fair value of the investment in Yangtze Optical Fibre and Cable Joint Stock Limited Company was Euro 297 million (based on the share price quoted on the Hong Kong market), while its carrying amount was Euro 326 million, thus higher than fair value as identified by the aforementioned market price. However, taking into account specific analyses, this should not be treated as a lasting situation, also in view of the fact that the share price has enjoyed a substantial rebound since the third quarter of 2021 and in the first half of July 2022 reached values close to the carrying amount. This situation will continue to be monitored over the coming months.

Yangtze Optical Fibre & Cable (Shanghai) Co. Ltd, formed in 2002 and based in Shanghai (China), is an associate company, 25% of whose share capital is held by Prysmian Group and 75% by Yangtze Optical Fibre and Cable Joint Stock Limited Company. The company specialises in the manufacture and sale of optical fibre and cables, offering a wide range of optical fibre cables and accessories, services and FTTx solutions.

Kabeltrommel GmbH & Co. K.G. is a German company that heads a consortium for the production, procurement, management and sale of disposable and reusable cable carrying devices (drums). The services offered by the company include both the sale of cable drums, and the complete management of logistics services such as drum shipping, handling and subsequent retrieval. The company operates primarily in the German market.

Power Cables Malaysia Sdn Bhd is based in Malaysia. The company, a leader in the local market, manufactures and sells power cables and conductors.

Elkat Ltd. is based in Russia and manufactures and sells copper conductors; it is the only company certified by the LME to test copper cathodes for the local market. No deterioration in the company's performance has been registered as a consequence of the Russian-Ukraine conflict.

3. TRADE AND OTHER RECEIVABLES

Forward currency contracts on commercial transactions	10	4
Forward currency contracts on financial transactions	3	3
Metal derivatives	42	16
Total current	128	42
Total	233	68

Interest rate derivatives designated as cash flow hedges refer to:

- interest rate swaps, for an overall notional value of Euro 600 million, with the objective of hedging variable rate interest flows for the period 2018-2023 on loans contracted by the Group to acquire General Cable. Euro 400 million in IRS against these loans were closed out during the period, realising about Euro 1 million in finance income, as better described in Events after the Reporting Period;
- interest rate swaps for an overall notional value of Euro 110 million, with the objective of hedging variable rate interest flows over the period 2018-2024;
- interest rate swaps for an overall notional value of Euro 100 million, with the objective of hedging variable rate interest flows over the period 2020-2024;

- interest rate swaps for an overall notional value of Euro 75 million, with the objective of hedging variable rate interest flows over the period 2021-2025;
- interest rate swaps for an overall notional value totalling Euro 400 million, with the objective of hedging variable rate interest flows over the period 2022-2027, as better described in Events after the Reporting Period.

6. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

Financial assets at fair value through profit or loss, amounting to Euro 225 million (Euro 244 million at 31 December 2021), include Euro 200 million in money market funds in which the Parent Company has temporarily invested its liquidity, with the remainder referring to funds in which the Brazilian and Argentine subsidiaries have temporarily invested their liquidity.

7. CASH AND CASH EQUIVALENTS

Details are as follows:

(Euro/million)

	30.06.2022	31.12.2021
Cash and cheques	1	1
Bank and postal deposits	426	1,701
Total	427	1,702

Cash and cash equivalents, deposited with major financial institutions, are managed centrally through the Group's treasury company and in its various operating units.

Cash and cash equivalents managed by the Group's treasury company amounted to Euro 70 million at 30 June 2022, while at 31 December 2021 the figure was Euro 1,183 million.

8. EQUITY

Consolidated equity has recorded a positive change of Euro 467 million since 31 December 2021, mainly reflecting the net effect of:

- the net profit for the period of Euro 261 million;
- positive currency translation differences of Euro 350 million;
- a negative post-tax change of Euro 119 million in the fair value of derivatives designated as cash flow hedges;
- an increase of Euro 61 million in the reserves for actuarial gains and losses on employee benefits;
- a positive change of Euro 36 million in the share-based compensation reserve linked to stock option plans;
- an increase of Euro 26 million for the effects of hyperinflation;
- a decrease of Euro 148 million for dividends declared.

At 30 June 2022, the share capital of Prysmian S.p.A. comprises 268,144,246 shares, each of nominal value Euro 0.10 for a total of Euro 26,814,424.60.

Movements in the ordinary shares and treasury shares of Prysmian S.p.A. are reported in the following table:

	Ordinary shares	Treasury shares	Total
Balance at 31 December 2020	268,144,246	(4,759,433)	263,384,813
Allotments and sales	-	106,565	106,565
Balance at 31 December 2021	268,144,246	(4,652,868)	263,491,378

Convertible Bond 2017	-	250
Total	2,812	3,518

The Group's principal credit agreements in place at the reporting date are as follows:

Revolving Credit Facility 2019

On 3 April 2019, the Group renewed a Euro 1,000 million five-year revolving credit facility with a syndicate of leading Italian and international banks. The funds may be drawn down for business and working capital needs, including the refinancing of existing facilities. The Revolving Credit Facility 2019 can also be used for the issue of guarantees. At 30 June 2022, this facility was not being used.

CDP Loans

On 28 October 2019, the Group entered into an agreement with Cassa Depositi e Prestiti S.p.A. (CDP) for a Euro 100 million long-term loan for 4 years and 6 months from the date of signing, with a bullet repayment at maturity. The purpose of this loan is to finance part of the Group's capital expenditure and expenditure on research, development and innovation in Italy and Europe. Interest rate swaps have been arranged in respect of this loan, for an overall notional value of Euro 100 million, with the objective of hedging variable rate interest flows over the period 2020-2024.

On 28 January 2021, a second loan was agreed with CDP for Euro 75 million with a term of 4 years and 6 months, for the purpose of financing part of the Group's expenditure on purchasing the "Leonardo Da Vinci" cable-laying vessel.

This loan, drawn down in full on 9 February 2021, is repayable in a lump sum at maturity on 28 July 2025. Interest rate swaps have been arranged in respect of this loan, for an overall notional value of Euro 75 million, with the objective of hedging variable rate interest flows over the period 2021-2025.

At 30 June 2022, the fair value of the CDP Loans approximates their related carrying amount.

EIB Loans

On 10 November 2017, Prysmian S.p.A. entered into a loan agreement with the European Investment Bank (EIB) for Euro 110 million to support the Group's R&D programs in Europe over the period 2017-2020. The loan was received on 29 November 2017 and is repayable in a lump sum at maturity on 29 November 2024. Interest rate swaps have been arranged in respect of this loan, for an overall notional value of Euro 110 million, with the objective of hedging variable rate interest flows over the period 2018-2024.

On 3 February 2022, the Group announced that it had finalised a loan from the European Investment Bank (EIB) for Euro 135 million to support its European R&D program in the energy and telecom cable systems sector over the period 2021-2024.

The EIB loan is specifically intended to support projects to be developed at R&D centres in five European countries: France, the Netherlands, Spain, Germany and Italy.

The loan was received on 28 January 2022 and is repayable in a lump sum at maturity on 29 January 2029.

At 30 June 2022, the fair value of the EIB Loans approximates their carrying amount.

Term Loan

The Term Loan was drawn down by the Group in June 2018 for the purpose of having the necessary financial resources to pay the General Cable purchase consideration, to refinance the existing debt of General Cable and its subsidiaries and to finance acquisition-related fees,

commissions, costs and expenses. The Term Loan is for Euro 1 billion and matures on the fifth anniversary of the acquisition closing date (6 June 2023).

The interest rates applied are indexed to 6M and 3M Euribor, depending on the company's choice. The line was drawn down in full upon acquiring General Cable.

At 30 June 2022, the fair value of the Term Loan approximates its carrying amount.

Interest rate swaps have been arranged in respect of this loan, for an overall notional value of Euro 1,000 million, with the objective of hedging variable rate interest flows. On 17 June 2022, Euro 400 million of these interest rate swaps were closed out in view of the full repayment of the Term Loan in the initial weeks of July 2022, as described in Events after the Reporting Period.

Unicredit Loan

On 15 November 2018, Prysmian S.p.A. entered into an agreement with Unicredit for a long-term cash loan for a maximum amount of Euro 200 million for 5 years from the date of signing. The loan was drawn down in full on 16 November 2018 and is repayable in a lump sum at maturity. The interest rate applied is indexed to 6M and 3M Euribor, depending on the company's choice. At 30 June 2022, the fair value of this loan approximates its carrying amount.

Mediobanca Loan

On 20 February 2019, the Group entered into an agreement with Mediobanca for a Euro 100 million long-term loan for 5 years from the date of signing. The loan was drawn down in full on 22 February 2019 and is repayable in a lump sum at maturity. The interest rate applied is indexed to 6M and 3M Euribor, depending on the company's choice. At 30 June 2022, the fair value of this loan approximates its carrying amount.

Intesa Loan

On 11 October 2019, the Group entered into an agreement with Intesa Sanpaolo for a Euro 150 million long-term loan for 5 years from the date of signing. The loan was drawn down in full on 18 October 2019 and is repayable in a lump sum at maturity. At 30 June 2022, the fair value of this loan approximates its carrying amount.

The fair value of loans has been determined using valuation techniques that refer to observable market data (Level 2 of the fair value hierarchy).

The following table summarises the committed lines available to the Group at 30 June 2022 and 31 December 2021:

(Euro/million)

			30.06.2022
	Total lines	Drawn	Undrawn

Bonds

As at 30 June 2022, Prysmian Group had the bond issues in place described in the following paragraphs.

Non-convertible bond issued in 2015

The Convertible Bond 2015, issued in March 2015, reached maturity in April 2022 and so has been repaid in full for an amount of Euro 750 million.

Convertible Bond 2017

The Convertible Bond 2017, issued in January 2017 and partially redeemed in January 2021, matured in January 2022 and so has been repaid in full for an amount of Euro 250 million.

Convertible Bond 2021

On 26 January 2021, the Group announced the successful placement of an equity-linked bond (the "Bonds") for the sum of Euro 750 million.

The Bonds have a 5-year maturity and denomination of Euro 100,000 each and are zero coupon. The issue price was Euro 102.50, representing a yield to maturity of minus 0.49% per annum. The initial price for the conversion of the Bonds into the Company's ordinary shares is Euro 40.2355, representing a 47.50% premium on the weighted average price by volume of Prysmian

ordinary shares on the Milan Stock Exchange between the start and end of the book-building process on 26 January 2021.

The Shareholders' Meeting held on 28 April 2021 authorised the convertibility of the equity-linked bond and approved the proposal for a share capital increase serving the conversion of the convertible bond for a maximum nominal amount of Euro 1,864,025.50 by issuing up to 18,640,255 ordinary shares with a nominal value of Euro 0.10 each.

As provided for in the Bond regulations, the Group has the option to call all - but not just a part - of the Bonds at their principal amount from 12 February 2024, should the share price exceed 130% of the conversion price for at least 20 days within a period of 30 consecutive trading days. On 14 June 2021, the Bond was admitted to listing on the multilateral trading facility of the Vienna Stock Exchange.

The following table summarises the values of the Convertible Bond 2021 as at 30 June 2022:

(Euro/million)

Value of Convertible Bond 2021	768
Equity reserve for convertible bond	(49)
Change in conversion option fair value	(16)
Issue date net balance	703
Interest - non-monetary	13
Related costs	(4)
Balance at 30 June 2022	712

At 30 June 2022, the fair value of the Convertible Bond 2021 (equity component and debt component) is Euro 679 million, entirely attributable to the debt component. In the absence of trading on the relevant market, the fair value of the bond's debt and equity components has been determined using valuation techniques that refer to observable market data (Level 2 of the fair value hierarchy).

Other borrowings from banks and other lenders and Lease liabilities

The following tables report movements in Borrowings from banks and other lenders:

(Euro/million)

	CDP Loans	EIB Loans	Conv. Bonds	Non- conv. Bond	Term Loan	Unicredit, Mediobanca and Intesa Loans	Other borrowings / Lease liabilities	Total

Net financial debt		2,330	1,760

The following table presents a reconciliation of the Group's net financial debt to the amount reported in accordance with the requirements of CONSOB advice notice no. 5/21 of 29 April 2021 concerning compliance with the "Guidelines on disclosure requirements under the Prospectus Regulation" published by ESMA on 4 March 2021 (reference ESMA32-382-1138):

(Euro/million)

	Note	30.06.2022	31.12.2021
Net financial debt - as reported above		2,330	1,760
Adjustments to exclude:			
Long-term financial receivables and other assets	3	7	6
Long-term bank fees	3	1	1
Cash flow derivatives (assets)		10	-
Adjustments to include:			
Net non-hedging forward currency contracts on commercial transactions, excluding non-current assets	5	-	(6)
Net non-hedging metal derivatives, excluding non-current assets	5	18	(26)
Recalculated net financial debt		2,366	1,735

10. TRADE AND OTHER PAYABLES

Details are as follows:

(Euro/million)

	30.06.2022		
	Non-current	Current	Total
Trade payables	-	3,165	3,165
Total trade payables	-	3,165	3,165
Other payables:			
Tax and social security payables	1	248	249
Advances from customers	-	497	497
Payables to employees	-	176	176
Accrued expenses	-	126	126
Other	5	196	201
Total other payables	6	1,243	1,249
Total	6	4,408	4,414

(Euro/million)

	31.12.2021		
	Non-current	Current	Total
Trade payables	-	2,592	2,592
Total trade payables	-	2,592	2,592
Other payables:			
Tax and social security payables	1	204	205
Advances from customers	-	549	549
Payables to employees	-	149	149
Accrued expenses	-	130	130
Other	5	159	164
Total other payables	6	1,191	1,197
Total	6	3,783	3,789

Trade payables include around Euro 653 million (Euro 665 million at 31 December 2021) for the supply of strategic metals (copper, aluminium and lead), whose payment terms are longer than 60 days.

Advances from customers include the liability for construction contracts, amounting to Euro 423 million at 30 June 2022 and Euro 454 million at 31 December 2021. This liability represents the excess of amounts invoiced over costs incurred plus accumulated profits (or losses), recognised using the percentage of completion method.

11. PROVISIONS FOR RISKS AND CHARGES

Details are as follows:

(Euro/million)

	30.06.2022 (*)		
	Non-current	Current	Total
Restructuring costs	-	19	19
Legal, contractual and other risks	24	382	406
Environmental risks	5	94	99
Tax risks	20	105	125
Total	49	600	649

(*) Provisions for risks at 30 June 2022 include Euro 131 million for contingent liabilities recorded under IFRS 3 "Business Combination".

(Euro/million)

	31.12.2021 (*)		
	Non-current	Current	Total
Restructuring costs	-	21	21
Legal, contractual and other risks	29	395	424
Environmental risks	5	92	97
Tax risks	12	99	111
Total	46	607	653

(*) Provisions for risks at 31 December 2021 include Euro 123 million for contingent liabilities recorded under IFRS 3 "Business Combination".

The following table presents the movements in these provisions during the reporting period:

(Euro/million)

	Restructuring costs	Legal, contractual and other risks	Environmental risks	Tax risks	Total
Balance at 31 December 2021	21	424	97	111	653
Increases	2	28	-	2	32
Uses	(4)	(17)	(1)	(2)	(24)
Releases	-	(17)	-	(4)	(21)
Currency translation differences	-	7	5	12	24
Other	-	(19)	(2)	6	(15)
Balance at 30 June 2022	19	406	99	125	649

The provision for contractual, legal and other risks amounts to Euro 406 million at 30 June 2022 (Euro 424 million at 31 December 2021). This provision mainly includes the provision for Euro 165 million related to antitrust investigations in progress and legal actions brought by third parties against Group companies as a result of and/or in connection with decisions adopted by the competent authorities, as described below. The rest of this provision relates to provisions related to and arising from business combinations and for risks associated with ongoing and completed contracts.

Antitrust - European Commission proceedings in the high voltage underground and submarine cables business

The European Commission started an investigation in late January 2009 into several European and Asian electrical cable manufacturers to verify the existence of alleged anti-competitive practices in the high voltage underground and submarine cables markets.

On 2 April 2014, the European Commission adopted a decision under which it found that, between 18 February 1999 and 28 January 2009, the world's largest cable producers, including Prysmian Cavi e Sistemi S.r.l. ("Prysmian CS"), had engaged in anti-competitive practices in the European market for high voltage submarine and underground power cables. The European Commission held Prysmian CS jointly liable with Pirelli & C. S.p.A. ("Pirelli") for the alleged infringement in the period 18 February 1999 - 28 July 2005, ordering them to pay a fine of Euro 67.3 million, and it held Prysmian CS jointly liable with Prysmian S.p.A. ("Prysmian") and The Goldman Sachs Group Inc. ("Goldman Sachs") for the alleged infringement in the period 29 July

2005 - 28 January 2009, ordering them to pay a fine of Euro 37.3 million. Prysmian, Prysmian CS, Pirelli and Goldman Sachs each filed a separate appeal against this decision with the General Court of the European Union, in first instance, and later with the Court of Justice of the European Union. In rulings handed down on 24 September 2020, 28 October 2020 and 27 January 2021 respectively, the Court of Justice definitively dismissed the appeals brought by Prysmian and Prysmian CS, Pirelli and Goldman Sachs, thus upholding the liability and fine envisaged under the European Commission's original decision. Further to the ruling dismissing the appeal by Prysmian and Prysmian CS, the European Commission requested Prysmian Group to pay the sum of approximately Euro 20 million, corresponding to half of the fine for the period from 29 July 2005 to 28 January 2009. Following the ruling dismissing the Pirelli appeal, the European Commission requested Prysmian Group to pay the sum of approximately Euro 37 million, corresponding to half of the fine for the period from 18 February 1999 to 28 July 2005. Using the provisions already set aside in previous years, the Group made these payments within the required timeframe.

In a ruling handed down on 14 November 2019, the Court of Justice of the European Union also dismissed the appeal brought by General Cable, thus definitively confirming the fine previously levied against it by the European Commission in its April 2014 decision. As a result, the Group during the previous periods went ahead and paid a fine for Euro 2 million.

In November 2014 and October 2019 respectively, Pirelli filed two civil actions, recently combined, against Prysmian CS and Prysmian in the Court of Milan, seeking (i) to be held harmless from any claim brought by the European Commission in enforcement of its decision and for any expenses incidental to such enforcement; (ii) to be held harmless from any third-party claims for damages relating to the conduct forming the subject of the European Commission's decision and (iii) to be compensated for the damages allegedly suffered and quantified as a result of Prysmian CS and Prysmian having requested, in certain pending legal actions, that Pirelli be held liable for the unlawful conduct found by the European Commission in the period from 1999 to 2005. As part of the same proceedings, Prysmian CS and Prysmian, in addition to requesting full dismissal of the claims brought by Pirelli, have filed symmetrical and opposing counterclaims to those of Pirelli in which they have requested (i) to be held harmless from any claim brought by the European Commission in enforcement of its decision and for any expenses incidental to such enforcement; (ii) to be held harmless from any third-party claims for damages relating to the conduct forming the subject of the European Commission's decision and (iii) to be compensated for damages suffered as a result of the legal actions brought by Pirelli. This action is currently pending.

In view of the circumstances described and the developments in the proceedings, the Directors, with the assistance of their legal advisors, have recognised what they consider to be an adequate level of provisions to cover the potential liabilities related to the matters in question.

Antitrust - Claims for damages resulting from the European Commission's 2014 decision

During the first few months of 2017, operators belonging to the Vattenfall Group filed claims in the High Court of London against a number of cable manufacturers, including companies in the Prysmian Group, to obtain compensation for damages purportedly suffered as a result of the alleged anti-competitive practices sanctioned by the European Commission. During the month of June 2020, the Prysmian companies concerned presented their defence as well as serving a summons on another party to whom the EU decision was addressed. During the month of July 2022, an agreement was reached with which the judgment brought by Vattenfall against the Group companies was defined in a settlement. On the other hand, the judgment of recourse promoted by the Group companies against the other party to whom the EU decision is addressed continues.

On 2 April 2019, a writ of summons was served, on behalf of Terna S.p.A., on Pirelli, Nexans and companies in the Prysmian Group, demanding compensation for damages purportedly suffered as a result of the alleged anti-competitive practices sanctioned by the European Commission in its April 2014 decision. This action has been brought before the Court of Milan. On 24 October 2019, the Prysmian Group companies concerned responded by presenting their preliminary defence. By an order dated 3 February 2020, the Court upheld the points raised by the defendants, giving Terna until 11 May 2020 to complete its writ of summons and scheduling a hearing for 20 October 2020. Terna duly completed its summons, which was filed within the required deadline. The proceedings are at a pre-trial stage.

On 2 April 2019, a writ of summons was served, on behalf of Electricity & Water Authority of Bahrain, GCC Interconnection Authority, Kuwait Ministry of Electricity and Water and Oman Electricity Transmission Company, on a number of cable manufacturers, including companies in the Prysmian Group, on Pirelli and Goldman Sachs. This action, brought in the Court of Amsterdam, once again involved a claim for compensation for damages purportedly suffered as a result of the alleged anti-competitive practices sanctioned by the European Commission. On 18 December 2019, the Prysmian Group companies concerned presented their preliminary defence, the hearing of which took place on 8 September 2020. On 25 November 2020, the Court of Amsterdam handed down a ruling under which it upheld the submissions made and declined jurisdiction over defendants not based in the Netherlands, thus excluding them from the proceedings. On 19 February 2021, the plaintiffs announced that they had filed an appeal against this ruling. The Prysmian Group companies concerned, together with the other third-

party first-instance defendants, have entered an appearance in court contesting the plaintiff's claims. The appeal decision is pending.

In view of the circumstances described and the developments in the proceedings, the Directors, with the assistance of their legal advisors, have recognised what they consider to be an adequate level of provisions to cover the potential liabilities related to the matters in question.

In addition, on 4 April 2019, the Group learned that another two legal actions had been brought in the Court of London, one by Scottish and Southern Energy (SSE) group companies and the other by Greater Gabbard Offshore Winds Limited and SSE group companies, both of which involving claims for damages purportedly suffered as a result of the alleged anti-competitive practices sanctioned by the European Commission. Both proceedings have been concluded through settlements agreed between the parties during 2021 for the first action and in June 2022 for the second action.

Prysmian and Prysmian CS were summoned by Nexans France SAS and Nexans SA to appear before the Court of Dortmund (Germany) in notifications dated 24 and 25 May 2018 respectively. The plaintiffs have asked the Court concerned to ascertain the existence of joint and several liability between Prysmian and Prysmian CS, on the one hand, and Nexans France SAS and Nexans SA, on the other, for any damages suffered by third parties in Germany as a result of the alleged cartel in the market for high voltage underground and submarine power cables sanctioned in the European Commission's decision. The Court concerned issued a stay of execution dated 3 June 2019 pending the outcome of the appeal against the European Commission's decision brought before the European Courts by both Prysmian and Nexans. Following the conclusion of the appeal proceedings pending before the European Court of Justice, Nexans resumed the previously stayed legal action, but then filed a notice in March 2022, abandoning the action and thus ending the dispute.

Antitrust - Other investigations

In Brazil, the local antitrust authority (CADE) initiated proceedings against a number of manufacturers of high voltage underground and submarine cables, including Prysmian, notified of such in 2011. On 15 April 2020, the CADE Tribunal issued the operative part of the decision under which it held Prysmian liable for the alleged infringement in the period from February 2001 to March 2004 and ordered it to pay a fine of BRL 10.2 million (approximately Euro 1.8 million). Using the provisions already set aside in previous years, the Group made these payments within the required timeframe. Prysmian Group has filed an appeal against the CADE ruling. The appeal decision is pending.

At the end of February 2016, the Spanish antitrust authority commenced proceedings to verify the existence of anti-competitive practices by local low voltage cable manufacturers and distributors, including the Group's local subsidiaries. On 24 November 2017, the local antitrust authority notified the Group's Spanish subsidiaries of a decision under which they were held liable for the alleged infringements in the period from June 2002 to June 2015 and were jointly and severally ordered to pay a fine of Euro 15.6 million. The Group's Spanish subsidiaries have appealed against this decision. The appeal decision is still pending. The decision of 24 November 2017 also held the Spanish subsidiaries of General Cable liable for breach of local antitrust law. However, they have obtained immunity from paying the related fine (quantified at about Euro 12.6 million) having filed for leniency and collaborated with the local antitrust authority in its investigations. The Spanish subsidiaries of General Cable have also appealed against the decision of the local antitrust authority; the appeal decision is still pending.

In view of the circumstances described and the developments in the proceedings, the Directors, with the assistance of their legal advisors, have recognised what they consider to be an adequate level of provisions to cover the potential liabilities related to the matters in question.

In addition, in January 2022, an investigation was initiated by the German antitrust authority (Federal Cartel Office) concerning alleged coordination in setting the standard metal surcharges applied by the industry in Germany. Further information can be found in the Directors' Report in the section entitled "Significant events during the period".

During June 2022, the competition authorities of the Czech Republic and Slovakia conducted inspections at the offices of the Group's local subsidiaries with regard to alleged anti-competitive practices in setting metal surcharges.

Given the high degree of uncertainty as to the timing and outcome of these ongoing investigations, the Directors currently feel unable to estimate the related risk.

Antitrust - Claims for damages ensuing from other investigations

In February 2020, a writ of summons was served on a number of cable manufacturers, including Prysmian Group's Spanish subsidiaries, under which companies belonging to the Iberdrola Group have claimed compensation for damages supposedly suffered as a result of the alleged anti-competitive practices sanctioned by the Spanish antitrust authority in its decision of 24 November 2017. The proceedings are pending before the Court of Barcelona.

In July 2020, a writ of summons was served on a number of cable manufacturers, including Prysmian Group's Spanish subsidiaries, under which companies belonging to the Endesa Group have claimed compensation for damages supposedly suffered as a result of the alleged anti-competitive practices sanctioned by the Spanish antitrust authority in its decision of 24 November 2017. The proceedings are pending before the Court of Barcelona.

During March, April and May 2022, other third-party lawsuits were filed against certain cable manufacturers, including the Group's Spanish subsidiaries, to obtain compensation for damages supposedly suffered as a result of the alleged anti-competitive conduct sanctioned by the Spanish antitrust authority in its decision of 24 November 2017. The proceedings are pending before the Court of Barcelona.

In view of the circumstances described and the developments in the proceedings, the Directors, with the assistance of their legal advisors and in consistency with the accounting policies, have adjusted the related provisions for risks to a level deemed appropriate to cover the potential liabilities for the matters in question.

With reference to the above matters, certain Group companies have received a number of notices in which third parties have claimed compensation for damages, albeit not quantified, supposedly suffered as a result of Prysmian's alleged involvement in anti-competitive practices sanctioned by the European Commission and the antitrust authorities in Brazil and Spain.

Based on the information currently available, and believing it unlikely that these potential or unquantifiable liabilities will arise, the Directors have decided not to make any provision.

Despite the uncertainty of the outcome of the investigations and legal actions in progress, the amount of this provision, the substance of which explained above, is considered to represent the best estimate of the liability based on the information available to date and the developments in the proceedings described above.

12. EMPLOYEE BENEFIT OBLIGATIONS

Details are as follows:

(Euro/million)

	30.06.2022	31.12.2021
Pension plans	270	359
Italian statutory severance benefit	16	15
Medical benefit plans	34	31
Termination and other benefits	41	41
Total	361	446

Movements in employee benefit obligations have had an overall impact of Euro 9 million on the period's income statement, of which Euro 6 million classified in Personnel costs and Euro 3 million in Finance costs.

The employee benefit obligations registered a decrease due to higher discount rates used in the actuarial evaluations.

The following table shows the period average headcount and period-end closing headcount, calculated using the Full Time Equivalent method:

	1st half 2022	1st half 2021
Average number	30,429	29,239
	30.06.2022	31.12.2021
Closing number	30,862	29,763

13. OPERATING INCOME

Operating income is a profit of Euro 423 million in the first six months of 2022 (compared with a profit of Euro 278 million in the first six months of 2021) and is stated after the following adjustments:

(Euro/million)

	1st half 2022	1st half 2021
Business reorganisation ⁽¹⁾	(5)	(9)
Non-recurring (expense)/income ⁽²⁾	(12)	(2)
Other non-operating (expense)/income ⁽³⁾	(17)	(15)
Total adjustments	(34)	(26)

⁽¹⁾ Income and expense for business reorganisation: these refer to income and expense that arise as a result of the closure of production facilities and/or as a result of projects to optimise organisational structure;

⁽²⁾ Non-recurring income and expense: these refer to income and expense related to unusual events that have not affected profit or loss in past periods and are not likely to affect the results in future periods;

⁽³⁾ Other non-operating income and expense: these refer to income and expense that management considers should not be taken into account when measuring business performance.

14. FINANCE COSTS AND INCOME

Finance costs are detailed as follows:

(Euro/million)

	1st half 2022	1st half 2021
Interest on loans	8	8
Interest on non-convertible bond	5	9
Interest on Convertible Bond 2021 - non-monetary component	5	4
Interest on Convertible Bond 2017 - non-monetary component	-	3
Interest Rate Swaps	4	4
Interest on lease liabilities	3	2
Amortisation of bank and financial fees and other expenses	4	4
Employee benefit interest costs net of interest on plan assets	3	3
Other bank interest	3	2
Costs for undrawn credit lines	2	2
Sundry bank fees	9	8
Change in fair value of financial instruments through profit or loss	6	-
Non-recurring other finance costs	-	2
Other	-	2
Finance costs	52	53
Foreign currency exchange losses	480	317
Total finance costs	532	370

Finance income is detailed as follows:

(Euro/million)

	1st half 2022	1st half 2021
Interest income from banks and other financial institutions	4	3
Non-recurring finance income	-	16
Other finance income	3	1
Finance income	7	20
Net gains on forward currency contracts	6	12
Gains on derivatives	6	12
Foreign currency exchange gains	464	298
Total finance income	477	330

15. TAXES

Taxes have been estimated on the basis of the expected average tax rate for the full year. The tax charge for the first six months of 2022 is Euro 107 million, while the tax rate is approximately 29.1%.

16. EARNINGS/(LOSS) PER SHARE

Both basic and diluted earnings (loss) per share have been calculated by dividing the net result for the period attributable to owners of the parent by the average number of the Company's outstanding shares.

Diluted earnings/(loss) per share are affected by the options under the employee stock ownership plan (YES Plan) as well as by the deferred shares and matching shares that have vested for 2020 and 2021 under the Long-Term Incentive Plan 2020-2022. Diluted earnings/(loss) per share have not however been impacted by the Convertible Bond 2021, whose conversion is currently out of the money or by the deferred shares and matching shares for 2022 and the performance bonus options under the Long-Term Incentive Plan 2020-2022, since the target results achieved up to 30 June 2022 have not yet triggered their allotment.

(Euro/million)

	1st half 2022	1st half 2021
Net profit/(loss) attributable to owners of the parent	259	162
Weighted average number of ordinary shares (thousands)	263,492	263,386
Basic earnings per share (in Euro)	0.98	0.62
Net profit/(loss) attributable to owners of the parent for purposes of diluted earnings per share	259	162
Weighted average number of ordinary shares (thousands)	263,492	263,386
Adjustments for:		
Dilution from incremental shares arising from exercise of stock options (thousands)	1,274	615
Weighted average number of ordinary shares to calculate diluted earnings per share (thousands)	264,767	264,001
Diluted earnings per share (in Euro)	0.98	0.61

17. CONTINGENT LIABILITIES

As a global operator, the Group is exposed to legal risks primarily, by way of example, in the areas of product liability and environmental, antitrust and tax rules and regulations. The outcome of legal disputes and proceedings currently in progress cannot be predicted with certainty. An adverse outcome in one or more of these proceedings could result in the payment of costs that are not covered, or not fully covered, by insurance, which would therefore have a direct effect on the Group's financial position and results. As at 30 June 2022, contingent liabilities for which the Group has not recognised any provision for risks and charges, on the grounds that an outflow of resources is considered unlikely, but for which reliable estimates are available, amount to approximately Euro 57 million and are mainly related to legal and fiscal matters.

18. RECEIVABLES FACTORING

The Group has factored some of its trade receivables on a without-recourse basis. Receivables factored but not yet paid by customers amounted to Euro 496 million at 30 June 2022 (Euro 295 million at 31 December 2021).

19. SEASONALITY

The Group's business features a certain degree of seasonality in its revenues, which are usually higher in the second and third quarters. This is due to the fact that utilities projects in the northern hemisphere are mostly concentrated in the warmer months of the year. The Group's level of debt is generally higher in the period May-September, with funds being absorbed by the growth in working capital.

20. RELATED PARTY TRANSACTIONS

Transactions by Prysmian S.p.A. and its subsidiaries with associates mainly refer to:

- trade relations involving purchases and sales of raw materials and finished goods;
- services (technical, organisational and general) provided by head office for the benefit of group companies;
- recharge of royalties for the use of trademarks, patents and technological know-how by group companies.

All the above transactions form part of the Group's continuing operations.

The following tables provide a summary of the other related party transactions during the six months ended 30 June 2022:

(Euro/million)

			30.06.2022		
	Equity- accounted companies	Compensation of directors, statutory auditors and key management personnel	Total related parties	Total reported amount	Related party % of total

Transactions with associates

Trade and other payables refer to goods and services provided in the ordinary course of the Group's business. Trade and other receivables refer to transactions carried out in the ordinary course of the Group's business.

Compensation of Directors, Statutory Auditors and Key Management Personnel

The compensation of the Directors, Statutory Auditors and Key Management Personnel totals Euro 4 million at 30 June 2022 (Euro 5 million in the first six months of 2021).

21. ATYPICAL AND/OR UNUSUAL TRANSACTIONS

In accordance with the disclosures required by Consob Communication DEM/6064293 dated 28 July 2006, it is reported that no atypical and/or unusual transactions were carried out during the first half of 2022.

22. COMMITMENTS

Contractual commitments, already given to third parties at 30 June 2022 and not yet reflected in the financial statements, amount to Euro 242 million for Property, plant and equipment and Euro 3 million for Intangible assets.

As at 30 June 2022, there were no outstanding loans or guarantees by the Parent Company or its subsidiaries to any of the directors, senior managers or statutory auditors.

23. DIVIDEND DISTRIBUTION

On 12 April 2022, the shareholders' meeting of Prysmian S.p.A. approved the financial statements for 2021 and the distribution of a gross dividend of Euro 0.55 per share, for a total of some Euro 145 million. The dividend was paid out from 21 April 2022, with record date 20 April 2022 and ex-dividend date 19 April 2022.

24. STATEMENT OF CASH FLOWS

The increase in net working capital used Euro 851 million in cash flow. After Euro 87 million in tax payments and Euro 2 million in dividend receipts, operating activities in the first six months of 2022 therefore resulted in a net cash outflow of Euro 309 million.

Net operating capital expenditure used Euro 118 million in cash in the first six months of 2022, a large part of which relating to projects to increase and rationalise production capacity. More details can be found in Note 1. Property, plant and equipment and Intangible assets of these Explanatory Notes. Finance costs paid, net of finance income received, came to Euro 42 million. These include interest income received of Euro 4 million (Euro 3 million in the first six months of 2021) and interest expense paid of Euro 37 million (Euro 39 million in the first six months of 2021). During the period, the Group repaid the non-convertible bond for Euro 750 million and

the convertible bond issued in 2017 for Euro 250 million.

25. FINANCIAL COVENANTS

The principal credit agreements in place at 30 June 2022, details of which are presented in Note 9. Borrowings from banks and other lenders, require the Group to comply with a series of covenants on a consolidated basis. The main covenants, classified by type, are listed below:

a) Financial covenants

- Ratio between EBITDA and Net finance costs (as defined in the relevant agreements);
- Ratio between Net Financial Debt and EBITDA (as defined in the relevant agreements).

The covenants contained in the relevant credit agreements are as follows:

EBITDA/Net finance costs ⁽¹⁾ not less than:	Net financial debt / EBITDA ⁽¹⁾ not more than:
4.00x	3.00x

⁽¹⁾ The ratios are calculated on the basis of the definitions contained in the relevant credit agreements. The Net Financial Debt-EBITDA ratio can go as high as 3.5 following extraordinary transactions like acquisitions, no more than three times, including on non-consecutive occasions

b) Non-financial covenants

A number of non-financial covenants have been established in line with market practice applying to transactions of a similar nature and size. These covenants involve restrictions on the grant of secured guarantees to third parties and on amendments to the Company's by-laws.

Default events

The main default events are as follows:

- default on loan repayment obligations;
- breach of financial covenants;
- breach of some of the non-financial covenants;
- declaration of bankruptcy by Group companies or their involvement in other insolvency proceedings;
- issuing of particularly significant court orders;
- occurrence of events that may adversely and significantly affect the business, the assets or the financial conditions of the Group.

Should a default event occur, the lenders are entitled to demand full or partial repayment of the amounts lent and not yet repaid, together with interest and any other amount due. No collateral security is required.

Actual financial ratios reported at period end, calculated at a consolidated level for the Prysmian Group, are as follows:

	30 June 2022	31 December 2021
EBITDA / Net finance costs ⁽¹⁾	20.46x	15.82x
Net financial debt / EBITDA ⁽¹⁾	1.80x	1.63x

⁽¹⁾ The ratios are calculated on the basis of the definitions contained in the relevant credit agreements

The above financial ratios comply with both covenants contained in the relevant credit agreements and there are no instances of non-compliance with the financial and non-financial covenants indicated above.

26. EXCHANGE RATES

The main exchange rates used to translate financial statements in foreign currencies for consolidation purposes are reported below:

27. EVENTS AFTER THE REPORTING PERIOD

Euro 1.2 billion Sustainability-Linked Term Loan

On 7 July 2022, the Group signed a Sustainability-Linked medium-term loan for Euro 1.2 billion with a pool of leading Italian and International banks. This loan has been fully used on 14 July 2022 and is mainly intended to refinance the Euro 1 billion medium-term Term Loan obtained in 2018.

With the aim of strengthening its financial structure and the integration of ESG factors into the Group's strategy, Prysmian Group has chosen to include important environmental and social KPIs among the parameters determining the terms of the loan. In fact, the Sustainability-Linked Term Loan is also linked to the decarbonisation targets already set by the Group (annual GHG emissions from 2022 to 2026), to the ratio of female white-collar and executive hires to total Group hires, and to sustainability audits performed in the supply chain.

The interest rates applied have been indexed to the 1, 3 and 6 months Euribor, depending on the company's choice. With the aim of covering variable interest rate flows, interest rate swap contracts have been concluded for a total notional value of Euro 1,200 million.

These contracts have been signed in 2 tranches: the first one in mid-June 2022, for a total amount of Euro 400 million, and the other one at the beginning of July, for a total amount of Euro 800 million. At the same time, the interest rate swap contracts related to the 2018 term loan for a total notional value of Euro 1,000 million, have been closed.

Contract worth Euro 250 million to develop two new submarine power interconnections between two Canary Islands and between the Spanish mainland and Ceuta in North Africa

On 18 July 2022, the Group was awarded two contracts worth approximately Euro 250 million by Red Eléctrica (Red Eléctrica de España, S.A.U.) for the development of two projects: a submarine power interconnection between the islands of Tenerife and La Gomera, and another submarine power interconnection between the Spanish mainland and Ceuta (a Spanish city on the north coast of Africa).

Prysmian will install and commission a 66 kV HVAC double-circuit three-core submarine power cable with EPR insulation and synthetic wire armouring, to connect Tenerife and La Gomera at a world record depth for a 66 kV three-core cable of nearly 1,150 metres, as well as a 132 kV HVAC double-circuit three-core submarine power cable with XLPE insulation and synthetic wire armouring to connect the Spanish mainland and Ceuta across the Strait of Gibraltar at a maximum depth of 900 metres. The two systems will have a 90 km submarine section, while the double link between the Spanish mainland and Ceuta will also require 11 km of onshore cables.

President Joe Biden visits the new US high-tech renewable energy hub

On 21 July 2022, the Group welcomed US President Joe Biden on a site visit of its new submarine power cables manufacturing facility in Brayton Point, Massachusetts. As part of its plan to support the development of offshore wind power in the United States, Prysmian Group is committed to transforming the site of the former Somerset coal-fired power station into a high-tech hub for the energy transition process. The Brayton Point facility will manufacture innovative inter-array and export submarine cables of up to 275 kV AC and 525 kV DC, needed to connect offshore wind farms to mainland power grids. The plant will also have an R&D facility with a high-voltage testing lab, which will be the first of its kind in the United States.

Milan, 28 July 2022

ON BEHALF OF THE BOARD OF DIRECTORS
THE CHAIRMAN
Claudio De Conto

SCOPE OF CONSOLIDATION – APPENDIX A

CERTIFICATION OF THE HALF-YEAR CONDENSED CONSOLIDATED FINANCIAL STATEMENTS PURSUANT TO ART. 81-TER OF CONSOB REGULATION 11971 DATED 14 MAY 1999 AND SUBSEQUENT AMENDMENTS AND ADDITIONS

1. The undersigned Valerio Battista, as Chief Executive Officer, Stefano Invernici and Alessandro Brunetti, as managers responsible for preparing the financial reports of Prysmian S.p.A., certify, also taking account of the provisions of paragraphs 3 and 4, art. 1-bis of Italian Legislative Decree 58 dated 24 February 1998, that during the first half of 2022 the accounting and administrative processes for preparing the half-year condensed consolidated financial statements:

- have been adequate in relation to the business's characteristics and
- have been effectively applied.

2. The adequacy of the accounting and administrative processes for preparing the half-year condensed consolidated financial statements at 30 June 2022 has been evaluated on the basis of a procedure established by Prysmian in compliance with the internal control framework published by the Committee of Sponsoring Organizations of the Treadway Commission, which represents the generally accepted standard model internationally.

It is nonetheless reported that:

- during the first half of 2022, some of the Prysmian Group's companies were involved in the information system changeover project. The process of fine-tuning the new system's operating and accounting functions is still in progress for some of them; in any case, the system of controls in place ensures uniformity with the Group's system of procedures and controls.

3. It is also certified that:

3.1 The half-year condensed consolidated financial statements at 30 June 2022:

- a) have been prepared in accordance with applicable international accounting standards recognised by the European Union under Regulation (EC) 1606/2002 of the European Parliament and Council dated 19 July 2002;
- b) correspond to the underlying accounting records and books of account;

- c) are able to provide a true and fair view of the issuer's statement of financial position and results of operations and of the group of companies included in the consolidation.

3.2 The interim directors' report contains a fair review of important events that took place in the first six months of the year and their impact on the half-year condensed consolidated financial statements, together with a description of the main risks and uncertainties in the remaining six months of the year. The financial report at 30 June 2022 also contains a fair review of the disclosures about significant related party transactions.

Review report on the interim condensed consolidated
financial statements

(Translation from the original Italian text)

Review report on the interim condensed consolidated financial statements (Translation from the original Italian text)

To the Shareholders of
Prysmian S.p.A.

Introduction

We have reviewed the interim condensed consolidated financial statements, comprising the statement of financial position, the income statement, the other comprehensive income, the statement of changes in equity, the statement of cash flows and the related explanatory notes of Prysmian S.p.A. and its subsidiaries (the "Prysmian Group") as of 30 June 2022. The Directors of Prysmian S.p.A. are responsible for the preparation of the interim condensed consolidated financial statements in conformity with the International Financial Reporting Standard applicable to interim financial reporting (IAS 34) as adopted by the European Union. Our responsibility is to express a conclusion on these interim condensed consolidated financial statements based on our review.

Scope of Review

We conducted our review in accordance with review standards recommended by Consob (the Italian Stock Exchange Regulatory Agency) in its Resolution no. 10867 of 31 July 1997. A review of interim condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (ISA Italia) and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the interim condensed consolidated financial statements.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim condensed consolidated financial statements of Prysmian Group as of 30 June 2022 are not prepared, in all material respects, in conformity with the International Financial Reporting Standard applicable to interim financial reporting (IAS 34) as adopted by the European Union.

Milan, 29 July 2022

EY S.p.A.
