Technoprobe Group

Technoprobe is a leading company in the semiconductor and microelectronics industry. Established in 1996 from a business idea of its founder Giuseppe Crippa, Technoprobe specialises in the design and manufacture of electro-mechanical interfaces called Probe Cards for chip function testing. Its business sector is non-memory semiconductor or SOC (system on chip) testing. The Group is Italy’s only Probe Card manufacturer and one of the world leaders in terms of volume and turnover. Within its portfolio of collaborations and partnerships, the Group includes the world’s major manufacturers of microchips in the microelectronics, IT and digital sectors. Probe Cards are high-tech devices, tailor-made to the specific chip, that allow the functioning of chips to be tested during their construction process. These are technological designs and solutions that ensure the operation and reliability of devices that play a decisive role in the Information Technology industry, 5G, Internet of Things, home automation, automotive, aerospace and more. Today, the Technoprobe Group is an ever-expanding research and innovation technology hub with about 2,700 employees (of which about 1,700 are in Italy), 3 research centres and over 600 certified patents. In Italy, the Group has its registered office in Cernusco Lombardone (LC), on the outskirts of Milan, where there is also a production centre occupying a covered area of approximately 18,000 square metres. In addition, the Group has two other production plants in Italy: the first of about 3,000 square metres in Agrate Brianza (MB), and the second of about 5,000 square metres in Osnago (LC). Finally, the Group has another 11 locations worldwide, spread across Europe (France, Germany), Asia (Taiwan, South Korea, China, Japan Philippines and Singapore) and the United States (two locations in California).
