Press Release

September 11, 2023

Landi Renzo: Board of Directors approves financial results as of June 30, 2023

Consolidated revenues increased compared to the same period of the previous fiscal year and to the first three months of 2023. The growth in the Green Transportation segment's turnover continued, recording positive results in terms of industry margin in the second quarter, showing a turnaround compared to the first quarter of the year.

Clean Tech Solutions segment reports an improvement in terms of profitability and steady demand growth for bio-methane and hydrogen applications.

- Consolidated revenues were equal to €151.8 million, up (+5.1%) from €144.4 million in the same period of the previous year.
- Adjusted EBITDA amounted to €3.9 million, compared to €6.5 million as of June 30, 2022; EBITDA was negative and amounted to €0.3 million (compared to €5.3 million as of June 30, 2022), including non-recurring costs amounting to €4.2 million (€1.2 million as of June 30, 2022). With respect to the second quarter of 2023, adjusted EBITDA was positive and amounted to €4.9 million, strongly improving compared to negative €1.0 million as of March 31, 2023, thanks to turnover growth and to an action to improve margins with one of the Group's major customers.
- In the first six months of 2023, Green Transportation segment reported revenues of €104.3 million, up €10.4 million (+11.1%) compared to the same period of the previous. Adjusted EBITDA was positive and amounted to €0.2 million, with a decline equal to €3.2 million compared to the first half of the previous year. It should be noted that in the second quarter of 2023 a strong improvement of the figure was reported compared to the negative result reported in the first quarter of the same year (adjusted EBITDA was positive and amounted to €2.7 million in the second quarter compared to negative adjusted EBITDA amounting to €2.5 million in the first quarter).
- Clean Tech Solutions segment revenues amounted to €47.5 million, with a slight decrease (-6%) from the first quarter of 2022; adjusted EBITDA amounted to €3.8 million, growing from the same period of the previous year (€3.2 million).
- Net Result was negative and equal to €20.9 million (after depreciation of deferred tax assets amounting to €5.9 million), compared to negative net result amounting to €6.6 million as of June 30, 2022.
- Net Financial Position of the Group was negative and amounted to €103.9 million (negative and equal to €92.3 million as of December 31, 2022); as of June 30, 2023, adjusted Net Financial Position, excluding the application of IFRS 16, the fair value of derivative financial instruments and the residual debt for Put/Call shares of Metatron Control System, amounted to €89.7 million.

Press Release

September 11, 2023

Cavriago (RE), September 11, 2023 - The Board of Directors of Landi Renzo, chaired by Stefano Landi, met today and approved the Company's quarterly Financial Statements as of June 30, 2023.

Global economy in the first half of 2023 continued to perform well, although at a slower pace than in 2022 and with different speeds in various geographical areas.

There is a growing acknowledgement among governments around the world that in order to ensure resilient and lasting growth, new energy and socio-economic models based on the use of renewable energy sources are required. In this scenario, the production of sustainable energy sources, mainly including biomethane and hydrogen, is gaining increasing attention from lawmakers and international policymakers, in the field of policies aimed at supporting investments as a means of fostering both their implementation and development.

Such dynamics are beneficial to the positioning of Landi Renzo Group, which is operating along the whole value chain in both the natural gas, biomethane and hydrogen distribution ("Clean Tech Solutions" Group segment), and in the Green Mobility one, where the Group is an acknowledged as leader in designing, developing and marketing vehicle components or other off-road applications powered by natural gas, biomethane, liquefied natural gas, LPG or hydrogen ("Green Transportation" Group segment).

The Group managed to deliver an increase of the turnover in the first quarter of 2023, despite the persisting unfavorable macroeconomic condition that weighed on profitability, resulting in an overall performance below expectations. However, second quarter results already show a turnaround, with an improvement in both operating margins and cash flow. Despite the deflationary market trend, price reductions towards clients are not foreseen. The existing order backlog is also improving, with further commercial negotiations in an advanced stage, especially for biomethane and hydrogen applications.

"The first half of the year saw the continuing effects produced by geopolitical tensions and economic and financial turmoil on the markets, which led to a slowdown of the After Market channel in some geographical areas" Stefano Landi, Chairman of Landi Renzo S.p.A., said. "Even in an overly uncertain context, Landi Renzo Group strengthened its position within its target markets, thanks to a volume increase in the "Green Transportation" segment and to a significant margin improvement in the "Clean Tech Solutions" segment. Investments made to strengthen the structure, as well as the recent management renewal, ensure the necessary conditions for the Group to continue to leverage the positive trends already reported in the second quarter and to accelerate its growth path."

Annalisa Stupenengo, Chief Executive Officer of Landi Renzo S.p.A., added: "Half year results, although not in line with expectations, show a positive trend in both segments in which the Group works, with a special reference to the last three months. The implementation of a series of measures aimed also at improving operation management will enable Landi Renzo to build new momentum for the achievement of its growth plan targets. In this context, actions will be strengthened to consolidate the Group's

Press Release

September 11, 2023

leadership in sustainable mobility, especially within the areas that today are already showing outstanding results and which will also be the foundation for future business development.

Key Consolidated results as of June 30, 2023

In the first half of the year, Landi Renzo Group reported revenues equal to € 151.8 million (€ 144.4 million as of June 30, 2022), up 5.1% compared to the first half of 2022.

As of June 30, 2023, Group's adjusted EBITDA amounted to €3.9 million, compared to €6.5 million in the same period of the previous year. The decline was mainly due to an unfavorable sales mix for the Green Transportation segment, which was only partially offset by the improved margins in the Clean Tech Solutions segment.

In the second quarter of 2023, adjusted EBITDA (€4.9 million) improved significantly compared to the first quarter of 2023 (negative and equal to €1.0 million), thanks to the increase in turnover and an action to improve margins with one of the Group's main customers.

Group's EBIT was negative and amounted to €8.8 million (negative and equal to €3.4 million as of June 30, 2022), as a result of amortization and depreciation of €8.5 million (€8.7 million as of June 30, 2022). €1.7 million were due to the application of IFRS 16 – Leases, compared to €1.8 million as of June 30, 2022.

Total financial expenses (interest income, interest expense, and exchange rates effects) amounted to €6.8 million (€2.7 million as of June 30, 2022) and included negative exchange rate effects amounting to €1.8 million (positive and amounting to €0.8 million as of June 30, 2022). Financial expenses alone, amounting to €5.4 million, were up compared to the same period of the previous year (€3.5 million) and are directly linked to rising interest rates and higher conditions on bank debt (compared to 2022, which was characterized by lower interest rates, or even negative in the first half of the year).

In the first six months of 2023 Group's EBT was negative and amounted to €15.6 million (negative and equal to €6.1 million as of June 30, 2022).

Group and third-party's Net Result as of June 30, 2023, after a write-down on the recoverability of deferred tax assets in Q2 2023, equal to €5.9 million, reported a €20.9 million loss, compared to a loss equal to €6.6 million as of June 30, 2022.

Net Financial Position as of June 30, 2023, was negative and equal to €103.9 million (negative and equal to €92.3 million as of December 31, 2022). Adjusted Net Financial Position, excluding €14.2 million due to the application of IFRS 16 – Leases, €0.5 million (positive) due to the fair value of derivative financial instruments, and the Put/Call debt related to Metatron Control System shares amounting to €0.5 million, amounted to €89.7 million, of which €80.5 million related to the Green Transportation segment and

Press Release

September 11, 2023

€9.2 million related to the Clean Tech Solutions segment.

It should be noted that, after a Q1 2023 marked by a significant cash absorption mainly due to operations management, Q2 2023 was against this trend, in particular in the 'Clean Tech Solutions' segment, where cash increased by €5.5 million.

Performance of the "Green Transportation" operating segment (Automotive)

Revenues of Green Transportation segment as of June 30, 2023, amounted to €104.3 million, with an increase of €10.4 million (+11.1%), driven by rising volumes in the OEM sector.

The Group's sales in the OEM channel amounted to €65.9 million, up by €16.7 million compared to June 30, 2022. Said growth is driven by a strong boost of bi-fuel and LPG engines in Passenger Cars in Europe and by an increase in sales in China (natural gas) in the Mid&Heavy Duty segment.

Sales in the After Market channel, equal to €38.4 million (down by €6.2 million compared to June 30, 2022), are mainly related to orders from distributors and authorised installers, both domestic and foreign, and are decreasing as a result of the slowdown in sales in some areas, such as North Africa, LatAm and Eastern Europe.

As for the sales distribution by geographical area in the *Green Transportation* sector:

- In Italy, Group's sales in the first half of 2023 were significantly in line with those of previous year.
- The rest of Europe (58.5% of total sales) increased by 37.3% compared to the same period of previous year (47.3%), thanks to increased sales to a major OEM customer.
- In the American continent, sales amounted to €10.0 million (€15.2 million as of June 30, 2022), recording a 34.3% decline due to the challenging macroeconomic environment, especially in Brazil and Argentina.
- Markets in Asia and the Rest of the World accounted for 20.1% of total sales and were essentially in line with the first six months of 2022.

In the first six months of 2023, adjusted EBITDA of the Green Transportation segment, excluding nonrecurring costs amounting to \le 3.5 million, was positive and amounted to \le 0.2 million (equal to 0.2% of revenues), decreasing from the same period of the previous year (\le 3.3 million or 3.5% of revenue and net of non-recurring costs of \le 1.1 million).

It should be noted that, in the second quarter of 2023, there was a significant improvement of the figure compared to the negative result recorded in the first quarter of the same year (positive adjusted EBITDA of €2.7 million in the second quarter compared to negative adjusted EBITDA of €2.5 million in the first quarter.)

Press Release

September 11, 2023

Performance of the "Clean Tech Solutions" operating segment

In the first six months of 2023, the Clean Tech Solutions segment reported revenues amounting to €47.5 million, slightly down (-6%) compared to the same period of the previous year (€50.6 million). Despite the sales increase in bio-methane and hydrogen applications (positive effects on North America and Europe), revenues were negatively affected by declining volumes for methane applications, largely seen in the North African market.

Adjusted EBITDA, as of June 30, 2023, amounted to €3.8 million, showing an improvement (+16.6%) compared to the same period of last year.

Key performance highlights of Landi Renzo S.p.A. (Parent Company) as of June 30, 2023

In the first six months of 2023 Landi Renzo S.p.A. reported revenues of $\[\in \]$ 70.9 million, compared to $\[\in \]$ 68.5 million in the same period of the previous year. EBITDA was negative in the amount of $\[\in \]$ 2.2 million (including non-recurring expenses in the amount of $\[\in \]$ 2.4 million) compared to positive $\[\in \]$ 2.6 million as of June 30, 2022 (including non-recurring expenses in the amount of $\[\in \]$ 1.1 million), while net financial position was negative and equal to $\[\in \]$ 79.0 million compared to negative $\[\in \]$ 68.5 million as of December 31, 2022.

At the end of the half-year, the Parent Company had 282 employees, which was mostly in line with the figure as of December 31, 2022 (289 employees).

Significant events after the end of H1 2023

• On July 11, 2023, the Board of Directors of Landi Renzo coopted Annalisa Stupenengo as CEO of Landi Renzo Group, appointing her General Director as well. Annalisa Stupenengo boasts almost thirty years of experience in the mobility sector, developed worldwide holding roles of increasing responsibility at the Iveco Group, CNH Industrial and FCA. She currently sits on the Board of Directors and on the Remuneration and Appointments Committee of Prysmian. The Board of Directors also appointed Paolo Cilloni as Group's Chief Financial Officer, as well as Investor Relator and Financial Reporting Manager, and announced the continuation of the relationship with Cristiano Musi as CEO of SAFE&CEC, Safe and Idro Meccanica, all subsidiaries of the Landi Renzo Group.

Foreseeable management development

Visibility on market performance in 2023 is still low due to macroeconomic uncertainties, with high inflation and rising interest rates.

Based on first-half results and the existing order backlog, revenue growth in the "Green Trasportation" segment is expected in the current year, mainly driven by higher sales in the OEM channel, while

September 11, 2023

revenues in the "Clean Tech Solutions" segment are expected to be in line with last year.

As regards profitability (adjusted EBITDA), in the "Green Transportation" segment, results are expected to be lower compared to the full year 2022, but better than in the first half of the year.

As regards the "Clean Tech Solutions" segment, profitability (adjusted EBITDA) is expected to improve from last year, in line with what was already recorded in the first half of the year.

Pursuant to Article 154-bis, paragraph 2, of Italian Legislative Decree No. 58 of February 24, 1998, the Financial Reporting Manager in charge of drawing the Company's financial statements, Paolo Cilloni, declares that the accounting information contained in this press release corresponds to the documented results, books, and accounting records. This press release is also available on the corporate website www.landirenzogroup.com

Landi Renzo is the global leader in the natural gas, biomethane and hydrogen sustainable mobility and infrastructure sector. The Group stands out for its extensive presence at global level in over 50 countries, generating nearly 90% of its revenues abroad. Landi Renzo S.p.A. has been listed on the Euronext STAR Milan segment of Borsa Italiana since June 2007.
