PRESS RELEASE

EDIL SAN FELICE: SIGNED THE FIRST TWO IMPLEMENTATION CONTRACTS OF THE FRAMEWORK AGREEMENT WITH “ANAS SARDEGNA”

The framework agreement signed in May 2023 with Anas Sardegna has a four-year duration and provides for the installation of new metal road barriers in the region.

Naples, 18 December 2023 - Edil San Felice S.p.A. Società Benefit ("the Company" or "Edil San Feli-ce"), a leading integrated operator active in the maintenance of critical infrastructures in Italy, listed on the Euronext Growth Milan market - announces the signing of the first two contracts implementing the framework agreement with Anas Sardegna for the maintenance and installation of new road safety barriers.

The agreement, with a total economic value of five million euro, was signed in May 2023, will last four years and will allow Edil San Felice to enter a new region, continuing its territorial expansion.

The metal barriers installed will be of the "triple wave bridge edge class H2" type. According with the client's requests, only barriers guaranteed in accordance with UNI EN1317 will be used.

The first implementation contract, with a value of EUR 944,237.39, is related to the redevelopment and upgrading of the edge barriers on the works of art, between km 10+000 and 48+000 of the S.S. 133 in Palau.

The second, on the other hand, is worth EUR 1,219,970.16 and concerns the replacement of the current metal road barriers with new ones and the upgrading of the embankments on the S.S. 389, between km 0+600 and 26+500, in the province of Sassari.

The start of the works is scheduled for January 2024 and the delivery will take place jointly for both implementation contracts, which have a lead time of approximately 200 days each from the start date.

*"We are very pleased to be able to start work on an important framework agreement with Anas S.p.A. in Sardinia" commented CEO **Lorenzo Di Palma**. "This confirms our role as the leading installer of safety barriers in Italy and allows us to increase our capillarity throughout the country, importing our expertise into a new region. The replacement of safety barriers with modern, higher-performance barriers is a crucial issue for road safety in Italy, and as Edil San Felice we are ready to take on this important challenge".*
