Rome, August 13, 2024

The Board of Directors of Iccrea Banca examined the consolidated results of BCC Iccrea Group as of June 30, 2024.

In the first half of the year, the BCC Iccrea Group, the largest Italian cooperative banking group, recorded positive trends in both the main income statement items and the key balance sheet, financial, and liquidity indicators. Volumes intermediated with customers, in terms of credit disbursed and deposits, remained stable compared to the end of the year. This stability confirms the Group's commitment to supporting local economies and maintaining a strong presence in its operational areas.

Net loans to customers amounted to €93.0 billion (€90.9 billion at the end of 2023); in terms of credit quality, both the gross NPL ratio of 3.9% and the net NPL ratio of 1.1% remained essentially unchanged compared to the pro-forma data at the end of 2023.

The coverage ratio of non-performing loans remained particularly high at 72.8% (72.2% at the end of 2023). This is particularly significant considering the high proportion of non-performing loans secured by collateral and the increasingly limited share of bad loans in the portfolio (less than 1/3 of the total non-performing portfolio).

Direct funding stood at €137.6 billion, up from €134.9 billion at the end of 2023. Liquidity indicators remain well above regulatory requirements and among the highest in the system, with the NSFR at 161% and the LCR at 263%, remaining largely

¹ Including transactions (mainly repurchase agreements) with institutional counterparties amounting to approximately €4.4 billion (approx. €1.6 billion as of Dec.31, 2023).

² Net of transactions with institutional counterparties

unchanged from the end of 2023. The Group's readily available liquidity reserves amount to €44.9 billion.

In terms of revenues, in the first half of 2024, the Group reported a gross income of €2,987 million (+10.8% compared to the first half of 2023), thanks to the positive trend in net interest income, which amounted to €2,201 million (+13.0% compared to the first half of 2023). Net commissions also performed positively, amounting to 681 million euros (+1.4% compared to the first half of 2023).

Operating costs amounted to €1,576 million euros (+1.2% compared to the first half of 2023).

The Group's cost/income ratio stood at 52.7% (57.7% in the first half of 2023).

Net adjustments for credit risk amounted to €179 million (€197 million in the first half of 2023), resulting in an annualized cost of credit of 38 basis points.

Net profit for the period was €1,056 million (€797 million in the first half of 2023).

Consolidated equity rose to €14.7 billion (€13.9 billion at the end of 2023) and own funds to €15.2 billion (€14.3 billion at the end of 2023).

Risk-weighted assets (RWA) stood at €63.9 billion (€64.4 billion at the end of 2023).

Capital adequacy ratios remain well above regulatory requirements and continue to grow, with a CET1 ratio of 22.7% and a TC ratio of 23.8%.
