Report on Review of Condensed Interim Financial Statements

Introduction

We have reviewed the accompanying condensed interim financial statements of Carraro Finance S.A. comprising the condensed interim statement of financial position as at 30 June 2024, and the related condensed interim income statement, the condensed interim statement of comprehensive income, the condensed interim statement of changes in shareholders' equity and the condensed interim statement of cash flows for the period from 1 January 2024 to 30 June 2024 ("the interim financial information"). The Board of Directors is responsible for the preparation and fair presentation of this interim financial information in accordance with the International Accounting Standard IAS 34 "Interim Financial Statements", as adopted by the European Union ("IAS 34"). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements (ISRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity".

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information does not give a true and fair view of the financial position of the company as at 30 June 2024 and of the results of its operations for the period from 1 January 2024 to 30 June 2024 in accordance with the IAS 34.

Carraro Finance S.A. (the “Company” or “Carraro Finance”) was incorporated on 30 October 2020 via Carraro International S.E. and subsequently, in January 2021, again via Carraro International S.E., a business unit concerning the finance and treasury function for the Carraro Group was transferred to it.

The Company belongs to the Carraro Group (the “Group”), leader in transmission systems for off-highway vehicles and specialised tractors, with Headquarters in Italy in Campodarsego (Padua).

As at 30 June 2024 Carraro Finance was 14.46% owned by Carraro International S.E. and 85.54% owned by Carraro S.p.A.

To date the Group’s activities are divided into two Business Areas:

– **Drive systems**

Through the Companies belonging to the Drivelines Business area, the Group designs, manufactures and sells transmission systems (axles, transmissions and drives) mainly for agricultural and construction equipment, and also markets a wide range of components and gears for very diverse sectors, from the automotive industry to material handling, agricultural applications and construction equipment.

– **Tractors**

Through Carraro S.p.A.’s Divisione Agritalia, the Group designs and manufactures specialised tractors (for vineyards and orchards from 60 to 100 hp) for third-party brands, namely John Deere, Massey Ferguson and Claas, as well as a specialised “Carraro Tractors” range; Agritalia also provides engineering services for the design of innovative tractor ranges.

Summary of the period ending on 30 June 2024

In order to evaluate the Company’s financial performance, management has identified the following Alternative Performance Measures (each an “APM”):

- EBITDA: the sum of operating profit/(loss) of the income statement, amortisation (including any adjustments), depreciation and impairment of fixed assets. The Company’s management believes that EBITDA is a useful additional indicator that enables users to evaluate the Company’s operating performance.

- Net financial position of operations: Net Debt determined in accordance with the recommendations contained in the ESMA document n. 32-382-1138 dated March 4, 2021, deducted, where applicable, non-current receivables and financial assets, in addition to the effects deriving from the first application of IFRS 16. The Company’s management believes the Net financial position of operations is relevant to the enable users as it is a metric on the overall debt situation of a Company.

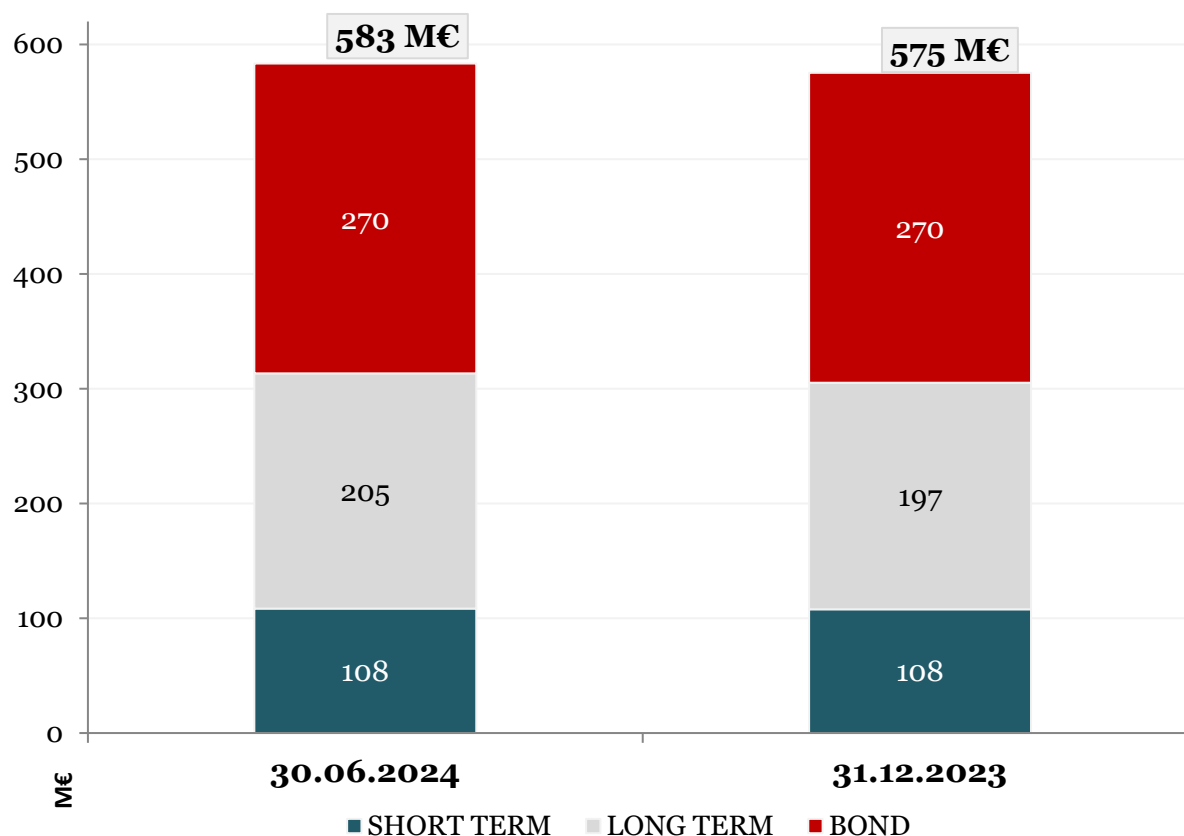

Performance

Carraro Finance S.A. is the treasury centre of Carraro Group and as such it's responsible to arrange and negotiate in order to make available to Carraro Group's Companies the resources necessary to cover their financial needs at the best possible conditions. KEY RISKS AND UNCERTAINTIES TO WHICH CARRARO FINANCE IS EXPOSED

The main risks identified for Carraro Finance are listed below.

Strategic risks

Risks associated with the general economic conditions.

The Company's earnings, financial and equity situation is influenced by various factors within the general macroeconomic framework, such as changes in gross national product, the state of the agricultural and construction industries, the cost of raw materials and the level of business confidence in the various countries in which the Carraro Group operates, which affect the financial results of Carraro Group's Companies, thus ensuring the repayment of funds provided by Carraro Finance.

Significant macro-economic events, such as the evolution of the geopolitical circumstance following the conflict in Ukraine a generalised and significant increase in the prices of raw materials, enduring uncertainty and volatility of the financial and capital markets, falling interest rates and unfavourable changes in the exchange rates of the major currencies to which the Group is exposed are all negative factors for the Group's operations and future, as well as its economic results and its financial position.

The dynamics in the global economy and international trade in 2024 was characterised by instability in some areas of the world and related consequences on increasing cost of raw material and energy also due to the effects of global economic post pandemic recovery.

Risks related to the trends on the markets/industrial customers

The market sectors in which the associates operate are influenced to varying degrees by boom and recession cycles, and the dynamics are gradually becoming less predictable. The ways in which our main customers absorb these fluctuations in demand and pass them on throughout the production chain significantly impact the production volumes that the Group is required to fulfil. This has an effect on the purchasing and stock management policies and by implication, on the working capital requirement and the capacity to adequately absorb fixed costs.

Country risk

The Carraro Group operates in different countries and its exposure to them has gradually increased over the years. These markets show cyclical conditions of economic and political instability (for example in Turkey). This has affected and may continue to negatively affect the subsidiaries' situation and results. A global presence is fundamental for the Group, encompassing a strategy serving clients and seizing opportunities on new markets for its product range.

Financial risks

Risks associated with funding requirements

Carraro Finance's liquidity risk is mainly connected to the sourcing and maintenance of adequate funding to support the Group's industrial operations and its ability to service that funding through cash flow.

The raising of funds is intended to finance both Carraro Group working capital and investments in R&D and innovation, in line with the latest Group business plan, as well as investments in fixed assets necessary to ensure sufficient and technologically advanced production capacity. This requirement is directly proportional to the trend in customer orders and the resulting trend in the volume of business, and also to the Group's efforts in directing its research and innovation.

The cash flows envisaged for 2024 also include, besides the trend in working capital and operational investment management, the effects of the maturity of current liabilities and the short-term portion of medium-long term loans.

The management of finance, the need to fulfil funding requirements and to guarantee adequate cash flow for the Group, is the responsibility of Carraro Finance whose objective is to administer the available resources as efficiently as possible.

Liquidity management, the funding needs and cash-flow are managed directly by the treasury department of the Group that work with the goal to manage at the best the resources available.

Risks of fluctuating interest rates and exchange rates

Carraro Finance S.A. and the Group are also exposed to interest rate risks in relation to financial liabilities which are accepted either to fund core business, or, where applicable, to fund the Group's expansion through acquisitions. The Company is exposed to low-interest rate risk as described in note 19 to the interim financial statements. Changes in interest rates may have positive or negative effects on both the financial outcome and on cash flows.

The Company is not exposed in such rate risks because all the main transaction are made in Eur currency. However, if the Company will occur in some of those risks will follow the criteria set by the Groups policy in terms of the management of financial risks with appropriate initiatives to hedge or reduce the risks identified, using the instruments available on the market.

Credit risk

The Company is exposed to credit risk when a customer or counterparty in a financial transaction generates a financial loss by defaulting on a debt obligation; in the case of Carraro Finance this risk exists almost exclusively in relation to financial receivables.

In providing finance to the Group entities, the Company evaluates the cash flow forecasts, the financial balance and the feasibility of the subsidiaries' industrial plans, in order to take the most appropriate decisions with regard to fundraising and agreeing on the repayment plans.

Receivables are recognised in the accounts net of any write-downs determined by assessing the counterparty's risk of insolvency based on the information available.

In the last years the effects of the spread of the Covid-19 pandemic and the conflict in Ukraine did not have significant consequences on the overall operations of Carraro Group customers such as to jeopardize the continuity of cash flows from the sale of the Group's products.

Operational risks

Risks related to IT systems and cyber security.

IT systems have a major supporting role in business processes; it therefore follows that effective monitoring of the risks related to IT security is a significant matter for the Company.

Statistics from the last few years show a growing number of cyber-attacks on private Companies and public entities, not only large in scale, with sophisticated techniques to penetrate Company networks and which are more aggressive in causing harm to data and information archives.

One condition favouring these attacks may also be the expansion of Company networks, which has been necessary – in the recent circumstances caused by the pandemic – to provide access to all staff enabled to work remotely using connections not directly managed by the Company.

Control and risk management systems in relation to the financial reporting process

The following set of procedures, organisational structure and related activities aimed at ensuring, a timely and accurate reporting of financial data:

- An adequate organizational structure that establishes new procedures and set up a perception of control so that the flow of responsibilities and transactions is diversified among staff – as much as possible, as well through the control activities which include top-level reviews and segregation of duties.
- The Board of Directors oversight establishes the guidelines, evaluates management and supervisory activities, the budget and all other financial information and statements of the Company.
- A comprehensive process for the annual strategic and business planning process.
- An appropriate risk assessment, management, or mitigation of risk, including the use of control processes, information and communication systems; and processes for monitoring and reviewing their continuing effectiveness.

Environmental risks

The Company is not directly involved in this kind of risk, but the Group operates across 7 manufacturing sites in 4 different nations.

The manufacturing processes carried out at the Group's industrial sites are essentially mechanical processing of iron and steel and assembly of purchased components.

These processes have accessory materials such as packaging, lubricants, paints and solvents. The objective of limiting the impact of emissions into the environment has seen a significant improvement from 2008 onwards through an important investment in moving from solvent-based coatings to water-based paints that reduce atmospheric emissions.

Under the EH&S Management System, each site operates in compliance with local environmental regulations; as a result of relentless management engagement, most of the plants have acquired ISO 14001 Environmental Certification.

Particular attention has been paid to increasing the efficiency of processes in order to maximise energy savings.

Risks related to climate change

The pressure of conclusions reached in scientific circles has gradually led to climate change and its possible effects establishing itself as a topic of increasing importance for international bodies, national authorities, politicians and in public debate.

Faced with worrying signs, resulting in unpredictable climate changes whose root causes seem to have been identified (increased greenhouse gases, global warming), studies are ongoing into the possible consequences on the planet's equilibrium in terms of continuity of access to natural resources, the seasons, and the effect on agricultural, mining and more general productive activities.

The emerging picture of uncertainty leads to new hypothetical types of risks or, at least, risks of a different gradation to those currently identified, with a future direction that is still difficult to imagine and, moreover, quantify even roughly.

Given this situation, the Group has set out to collect and aggregate all the information that gradually becomes available, so as to conduct an analysis that will help to adapt the risk framework of its business segments to the new future of industrial activities in the agricultural and construction equipment sectors.

ACCOUNTING STANDARDS USED IN PREPARING THE FINANCIAL STATEMENTS

These financial statements are drawn up in compliance with the International Financial Reporting Standards (IFRS), as adopted by the European Union. Furthermore, these financial statements are based on the assumption that the Company is a going concern.

OTHER INFORMATION

The Company does not hold own shares, nor shares in parent Companies, not even through fiduciary Companies or intermediaries. During the past year, it has not carried out any operation in relation to such shares.

The Company does not hold any branch.

Transactions with related parties carried out during the period gave rise to relationships of a commercial, financial or advisory nature and were entered into at arm's-length conditions, in the economic interest of the individual Companies involved in the transactions.

No transactions were carried out that were atypical or unusual with compared to normal business operations and the interest rates and terms applied to and by the Companies in their reciprocal financial relationships are in line with market terms.

The Company did not directly incur any research and development expenses.

The Company has not any branches.

The company did not use financial instruments other than financial liabilities mainly composed of bank loans and bonds.

For further detailed information on the transactions carried out with related parties, reference should be made to the Notes to the Financial Statements.

EXPLANATORY AND SUPPLEMENTARY NOTES

1. Introduction

Carraro Finance S.A. (hereinafter also “Company” or “Carraro Finance”) is a Company incorporated under the Luxembourg law registered with the (R.C.S.) Luxembourg under no. B248536. The registered office of the Company is 11, rue de Beaumont L-1219 Luxembourg.

The Company is owned 14.46% owned by Carraro International S.E. and 85.54% owned by Carraro S.p.A. The Company is included in the consolidated financial statements of Carraro S.p.A. The register office of that company is located in Campodarsego, Padua (Italy), Via Olmo 37 and the consolidated accounts are available either on the company website being <https://www.carraro.com/>, either at the trade register of commerce of Padua.

The Company was incorporated on 30 October 2020 by notarial deed no. 17154 of 30 October 2020 and with effect from 1 February 2021 the parent Company, Carraro International S.E., transferred the business unit relating to the finance and treasury functions for the benefit of the Carraro Group to Carraro Finance, including the 2 Bonds issued for which Carraro Finance chose Luxembourg as the member state of origin pursuant to the Transparency Directive.

The financial instruments are currently listed on the Luxembourg stock exchange and in Italy on the Mercato Telematico delle Obbligazioni di Borsa Italiana (MOT).

These financial statements are expressed in euros and amounts are rounded to the nearest whole euro, unless otherwise indicated.

Carraro Finance S.A. provides financial, treasury and consulting services to subsidiaries, affiliates and to the parent Company, in line with the approved policies and the strategic needs of the Carraro Group.

Publication of the Financial Statements of Carraro Finance S.A. for the period from 1 January 2024 to 30 June 2024, was authorised by Board of Directors resolution dated 26 September 2024.

Reporting criteria and accounting principles

The interim financial statements of the Company as of 30 June 2024, have been prepared in accordance with International Accounting Standard (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and endorsed by the European Union. The term IFRS also includes the revised International Accounting Standards (IAS) and all interpretations of the International Financial Reporting Interpretations Committee (IFRIC) previously known as the Standard Interpretation Committee (SIC). These standards are the same as those used for the Financial Statements as at December 31, 2023, with the exceptions described in the paragraph 2.2 “Accounting standards, amendments and interpretations not relevant for the company or not yet applicable and not adopted in advance by the company”.

The interim financial statements were prepared in compliance with IAS 34 and assuming that the Company is a going concern.

2. Form and content of the financial statements

This document contains a number of “alternative performance indicators” not envisaged by the IFRS accounting standards:

- EBITDA: the sum of operating profit/(loss) of the income statement, amortisation (including any adjustments), depreciation and impairment of fixed assets. The Company’s management believes that EBITDA is a useful additional indicator that enables users to evaluate the Company’s operating performance.

- Net financial position of operations: Net Debt determined in accordance with the recommendations contained in the ESMA document n. 32-382-1138 dated March 4, 2021, deducted, where applicable, non-current receivables and financial assets, in addition to the effects deriving from the first application of IFRS 16. The Company’s management believes Net financial position of operations is relevant to the enable users as it is a metric on the overall debt situation of a Company.

2.1 Accounting standards and measurement criteria

Income Statement

Items on the income statement are classified by their nature.

Statement of Comprehensive Income

The statement of comprehensive income includes items of income and costs that are not posted in the period income statement, as required or permitted by the IFRS, such as changes to the cash flow hedge reserve, changes to the provision for employee benefits, actuarial gains and losses and changes to the translation reserve.

Statement of financial position

The statement of the financial position is presented with separate disclosure of Assets, Liabilities and Shareholders’ Equity.

Assets and Liabilities are presented in these financial statements according to their classification as “current” and “non-current”.

Statement of Changes in Shareholders’ Equity

The statement of changes in shareholders’ equity is presented in accordance with the IAS, showing the profit (loss) for the period and all changes generated from transactions with shareholders.

Statement of Cash Flows

The cash flow statement illustrates the changes in cash and cash equivalents (as presented in the statement of financial position) divided by cash generating area in accordance with the “indirect method”, as permitted by IAS 7.

ALL

Accounting schedules of transactions with related parties

With reference to the reporting of related-party transactions in the financial statements, balances of a significant amount are specifically indicated, to facilitate understanding of the assets and liabilities, financial position and results of the Company, in the table of section 9 below concerning related party transactions.

3. Accounting principles

3.1 Accounting standards and measurement criteria

IFRS accounting standards, amendments and interpretations adopted since 1 January 2024:

Amendments to IAS 1 “Presentation of Financial Statements: Classification of Liabilities as Current or Non-current”

(published on 23 January 2020)

The purpose of the document is to clarify how to classify short-term and long-term payables and other liabilities. The amendments entered into force on 1 January 2024. The adoption of this amendment had no effect on the financial statements of the Company.

Amendments to IAS 16 “Lease Liability in a Sale and Leaseback”

(published on 22 September 2022)

The purpose of this amendment requires a seller-lessee to subsequently measure lease liabilities arising from a leaseback in a way that it does not recognise any amount of the gain or loss that relates to the right of use it retains. The new requirements do not prevent a seller-lessee from recognising in profit or loss any gain or loss relating to the partial or full termination of a lease.

The amendments will enter into force on 1 January 2024. The adoption of this amendment had no effect on the financial statements of the Company.

Amendments to IAS 1 “Presentation of Financial Statements: Non-Current Liabilities with Covenants”

(published on 31 October 2022)

The purpose of the document is to clarify how to classify short-term and long-term payables and other liabilities. The amendments will enter into force on 1 January 2024. The adoption of this amendment had no effect on the financial statements of the Company.

Amendments to IAS 12 “Income Taxes: International Tax Reform – Pillar Two Model Rules”

(published on 23 May 2023)

The document introduces a mandatory temporary exception to the accounting for deferred taxes arising from the jurisdictional implementation of the Pillar Two model rules; and Disclosure requirements for affected entities to help users of the financial statements better understand an entity’s exposure to Pillar Two income taxes arising from that legislation, particularly before its effective date. The mandatory temporary exception – the use of which is required to be

disclosed – applies immediately. The remaining disclosure requirements apply for annual reporting periods beginning on or after 1 January 2023, but not for any interim periods ending on or before 31 December 2023.

For further details please refer to Note 10 “Deferred tax assets and liabilities”.

IFRS standards, amendments and interpretations not yet endorsed by the European Union as at 30 June 2024:

Amendments to IAS 7 “Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures: Supplier Finance Arrangements”

(published on 25 May 2023)

The document requires a new disclosure requirement in IFRS Standards to enhance the transparency and, thus, the usefulness of the information provided by entities about supplier finance arrangements. At the moment, the directors are considering the possible impacts of this amendment on the Group consolidated financial statements.

Amendments to IAS 21 “The Effects of Change in Foreign Exchange Rates: Lack of Exchangeability”

(published on 15 August 2023)

The purpose of the document is to add requirements to help entities to determine whether a currency is exchangeable into another currency, and the spot exchange rate to use when it is not. The amendments will enter into force on 1 January 2025, with early application permitted. At the moment, the directors the possible impacts of this amendment on the Group consolidated financial statements.

Discretionary assessments, significant accounting estimates and key judgements

Estimates and assumptions

In the application of the accounting standards, the Directors have not made decisions based on discretionary evaluations (excluding those which involve estimates) having a significant effect on the values in financial statements.

We present below the key assumptions on the future and other significant sources of uncertainty in the estimates at the reporting date, which could bring about significant changes in the carrying amounts of assets and liabilities within the next financial year.

Deferred tax assets

Deferred tax assets are recognised in compliance with IAS 12, and they include retained tax losses, to the extent that it is likely there will be future tax profits to offset these losses with the returns of the temporary differences absorbed. A significant discretionary valuation is required of the Directors to determine the amount of the deferred tax assets that can be accounted for. They must estimate the probable timing and the amount of future taxable profits as well as a planning strategy for future taxation. The details are provided in note 10.

Bad debts provisions

Bad debts provision has to be estimated on the basis of expected credit losses (ECL) model, as required by IFRS 9 standard. In order to estimate expected losses on receivables a specific and an overall analysis need to be performed at each reporting date.

Fair value

IFRS 13 is the only reference source for fair value measurement and the related disclosures when this measurement is required or permitted by another standard. IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This standard replaces and extends the disclosure required about fair value measurement in other standards, including IFRS 7 Financial instruments disclosures.

IFRS 13 establishes a fair value hierarchy that categorises into three levels the inputs to valuation techniques used to measure fair value in hierarchical order as follows:

- Level 1 inputs: quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly;
- Level 3 inputs: unobservable inputs for the asset or liability.

With the exclusion of the Bonds for which a fixed rate is applied (please refer to note 15), the entity is not measuring its financial instruments at fair value. However, the fair value of medium- and long-term financial assets and liabilities, taking account of the fact that these are almost exclusively for variable-rate funding and that the terms renegotiated with the banking counterparties are in line with the average levels for the market and the segment – even considering the residual volatility of the markets and the relative uncertainty in identifying “reference” conditions – as measured is not significantly different overall from the carrying amounts.

On January 2024, the Company extended the existing contracts for the above credit lines until 31 December 2024. As a result of the assessment performed, we have determined that the expected credit losses on the balances are not significant and hence, no Expected Credit Loss (“ECL”) has been recognized.

Deferred tax assets and liabilities (note 9)

As at 31 December 2023 Euro 600,000 of deferred tax asset was booked using the loss carryover in order to reduce future tax obligations. As at 30 June 2024 the caption is Euro 554,000.

The company holds tax losses carried forward for an amount equal to Euro 8.2 million. Based on the forecasts of taxable income for the next five years, deferred assets of Euro 0.6 million were booked, calculated on tax losses equal to Euro 1.9 million (deferred tax assets not booked equal to Euro 1.4 million upon tax losses carried forward of Euro 6 million).

The Company belongs to a multinational enterprise group that exceeds the annual revenue threshold of Euro 750 million in two of the four previous fiscal years. As a consequence, it falls within the scope of Second Pillar income taxes rules, in accordance with Directive 2022/2523, transposed in Luxembourg by the law of 23 December 2023. For this purpose, the Company received feedback from the ultimate parent entity Carraro S.p.A. regarding the fulfilment, for the Luxembourg jurisdiction, of the so-called "transitional safe harbours" tests, resulting that there are no significant effects deriving from the application of the Second Pillar rules upon the Company. Deferred taxes were not computed based on the tax rates calculated under the Second Pillar rules.

The tax losses carried-forward for which the Company has not recognised a deferred tax as at 30 June 2024 amount to Eur 6 million of which Eur 1.4 million available up the year 2038, Eur 3.85 million available up the year 2039 and Eur 0.8 million available up the year 2040.
