

Q3 & 9M 2024 Presentation d'Amico International Shipping

November 7th, 2024

d'Amico
INTERNATIONAL SHIPPING S.A.

DISCLAIMER.

There shall be no offering or sale of any securities of d'Amico International Shipping S.A. in the United States of America, Switzerland, Canada, Australia, Japan, the United Kingdom or any jurisdiction in which such offer, solicitation or sale would be unlawful prior to its registration or qualification under the laws of such jurisdiction or to or for the benefit of any person to whom it is unlawful to make such offer, solicitation or sale. No steps have been taken or will be taken regarding the offering of securities of d'Amico International Shipping S.A. outside Luxembourg and Italy in any jurisdiction where such steps would be required. The issuance, exercise, or sale of securities of d'Amico International Shipping S.A. and the subscription to or purchase of such securities are subject to specific legal or regulatory restrictions in certain jurisdictions. d'Amico International Shipping S.A. is not liable in case these restrictions are infringed by any person.

This communication is not for distribution, directly or indirectly, in or into the United States (including its territories and dependencies, any State of the United States and the District of Columbia). This communication does not constitute or form a part of any offer or solicitation to purchase or subscribe for securities in the United States. The securities mentioned herein have not been, and will not be, registered under the United States Securities Act of 1933 (the "Securities Act"). Accordingly, unless an exemption under relevant securities laws is applicable, any such securities may not be offered, sold, resold, taken up, exercised, renounced, transferred, delivered or distributed, directly or indirectly, in or into the United States or any other jurisdiction if to do so would constitute a violation of the relevant laws of, or require registration of such securities in, the relevant jurisdiction. The securities may not be offered or sold in the United States except pursuant to an exemption from the registration requirements of the Securities Act. There will be no public offer of securities in the United States.

If you are not permitted to view the documents on this website or are in any doubt as to whether you are permitted to view these documents, please exit this webpage. The information contained herein does not constitute an offer of securities for sale in the United States, Switzerland, Canada, Japan, Australia, the United Kingdom or any jurisdiction in which such offers or sales are unlawful, and these documents must not be released or otherwise forwarded, distributed or sent in or into the United States, Switzerland, Canada, Japan, Australia, the United Kingdom or any jurisdiction in which such offers or sales are unlawful. Persons receiving these documents (including custodians, nominees and trustees) must not distribute or send it in, into or from the United States, Switzerland, Canada, Japan, Australia, the United Kingdom or any other jurisdiction in which accessing such documents is unlawful.

Confirmation of understanding and acceptance of disclaimer

I warrant that I am not located in the United States and am not resident or located in Switzerland, Canada, Japan, Australia, the United Kingdom or any other jurisdiction where accessing these materials is unlawful, and I agree that I will not transmit or otherwise send any materials contained in this website to any person in the United States, Switzerland, Canada, Japan, Australia, the United Kingdom or any other territory where to do so would breach applicable local law or regulation.

I have read and understood the disclaimer set out above. I understand that it may affect my rights and I agree to be bound by its terms. I confirm that I am permitted to proceed to electronic versions of the materials.

AGENDA.

- Executive summary
- DIS' overview and key financials
- Strategic priorities and market overview
- Why invest in DIS
- DIS' ESG
- Appendix

Executive summary.

- **Net result** – In the first 9M'24, d'Amico International Shipping SA ("DIS" or "the Company") recorded a strong **Net profit of US\$ 163.1m** vs. a Net profit of US\$ 148.7m in the same period of last year (US\$ 40.2m in Q3'24 vs. US\$ 48.9m in Q3'23). The adjusted net result (excluding non-recurring items) was of US\$ 158.9m in the first 9M'24, compared with US\$ 153.0m recorded in the 9M'23.
- **Market performance** – DIS benefitted from a very strong product tanker market during the first nine months of the year, achieving a **daily spot rate of US\$ 37,563 in 9M'24** vs. US\$ 33,434 in 9M'23 (**Q3'24: US\$ 29,679** vs. Q3'23: US\$ 31,782). In the first 9M'24, 42.4% of DIS' employment days were 'covered' through period contracts at an average daily rate of US\$ 27,738 (9M'23: 27.9% coverage at US\$ 27,951). DIS achieved a **total daily average rate of US\$ 33,395 in the first 9M'24** vs. US\$ 31,904 in the same period of last year (**Q3'24 US\$ 28,602** vs. Q3'23 US\$ 30,860).
- **Solid financial structure and comfortable liquidity position** – achieved thanks to the strong freight markets of H1'20, FY'22, FY'23, and the first 9M'24 as well as to the deleveraging plan implemented in the last few years, through vessel disposals and equity capital increases. DIS can now benefit from the strategic and operational flexibility deriving from a strong balance sheet and from a modern fleet. As at the end of September'24, DIS had a Net Financial Position (NFP) of US\$ (83.0)m and Cash and cash equivalents of US\$ 228.7m vs. a Net Financial Position (NFP) of US\$ (224.3)m at the end of FY'23. DIS' **NFP (excluding IFRS16) to FMV ratio was of 6.2% at the end of September'24** vs. 18.0% at the end of FY'23 (36.0% at the end of FY'22, 60.4% at the end of FY'21, 65.9% at the end of FY'20, 64.0% at the end of FY'19 and 72.9% at the end of FY'18).
- **Sale of a vessel** – In Mar'24, DIS signed a memorandum of agreement for the sale of the **MT Glenda Melanie**, a 47,162 dwt MR product tanker vessel, built in 2010 by Hyundai Mipo, South Korea, for a consideration of US\$ 27.4m. This transaction allowed DIS to sell the oldest vessel of its owned and bareboat chartered-in fleet. In addition, DIS generated at the delivery of the vessel in Q2'24, around US\$ 20.4m in cash, net of commissions and the reimbursement of the Vessel's existing bank loan.
- **Order of four LR1 newbuilding vessels** – In Apr'24, DIS signed a shipbuilding contract with Jiangsu New Yangzi Shipbuilding Co., China, for the purchase of two LR1 product tanker vessels at a contract price of US\$ 55.4m each. These new very efficient vessels are expected to be delivered to d'Amico Tankers d.a.c. in September and November 2027.

In the same month, DIS signed a shipbuilding contract with the same yard, for the purchase of two additional new LR1 product tanker vessels at a contract price of US\$ 56.2m each, with deliveries planned for July and December 2027.

Executive summary.

- Exercise of purchase options** – In June'24, DIS exercised its purchase option for the **M/T Crimson Jade**, a 50,000 dwt MR vessel, built in June 2017 by Minaminippon Shipbuilding Co., Ltd., Japan, for a consideration of approximately US\$ 31.0m with delivery having occurred in July 2024.

In August'24, DIS exercised its purchase option for the **M/T Crimson Pearl**, a 50,000 dwt MR vessel, built in August 2017 by Minaminippon Shipbuilding Co., Ltd., Japan, for a consideration of approximately US\$ 31.0m with delivery having occurred in October 2024.

In October 2024, DIS exercised its purchase option for the following vessels:

- M/T High Navigator**, a 49,999 dwt MR vessel, built in May 2018 by Japan Marine United Corporation, Japan, for a consideration of approximately US\$ 34 million¹, with delivery expected between Q1 and Q2 2025
 - M/T High Leader**, a 49,999 dwt medium-range product tanker vessel, built in June 2018 by Japan Marine United Corporation, Japan, for a consideration of approximately US\$ 34 million¹, with delivery expected between Q2 and Q3 2025
- Annual Dividend distribution** – In Mar'24, the Board of Directors of DIS proposed to the Annual General Shareholders' meeting to approve a **dividend to be paid in cash of approximately US\$ 30.0m**, corresponding to US\$ 0.2114, net of the 15% applicable withholding taxes, per issued and outstanding share (treasury shares are not entitled to dividends). The payment of the above-mentioned dividend was made to the Shareholders on May 2nd, 2024, with related coupon n. 7 detachment date (ex-date) on April 29th, 2024 and record date on April 30th, 2024.
- Interim Dividend distribution** – In Nov'24, the Board of Directors of DIS resolved to distribute an interim gross dividend of US\$ 0.2520 (US\$ 0.2142 net, after deducting the maximum applicable withholding tax of 15%) per issued and outstanding share (treasury shares are not entitled to dividends). This corresponds to a **total distribution of approximately US\$ 30.0m**, to be paid out of the distributable reserves, including the share premium reserve. The payment of the above-mentioned interim dividend will be made to shareholders on November 20th, 2024, with related coupon n. 8 detachment date (ex-date) on November 18th, 2024 and record date on November 19th, 2024.
- DIS is well positioned to benefit from the current strong freight markets, which** despite the uncertainties relating to a challenging and unusual economic and geopolitical environment, also because of the war in Ukraine and the disruptions in the Red Sea, **should represent the beginning of a prolonged and sustainable recovery.**

1. Actual amount will depend on exact delivery date, with a decrease in purchase price of US\$100 thousand per month.

DIS' overview and key financials

d'Amico
INTERNATIONAL SHIPPING S.A.

A modern, high-quality and versatile fleet.

DIS Fleet ¹	September 30 th , 2024					%
	LR1	MR	Handy	Total		
Owned	5.0	15.0	6.0	26.0	78.8%	
Bareboat chartered	1.0	2.0	0.0	3.0	9.0%	
Time chartered-in long-term	0.0	2.0	0.0	2.0	6.1%	
Time chartered-in short-term	0.0	2.0	0.0	2.0	6.1%	
TOTAL	6.0	21.0	6.0	33.0	100.0%	

- DIS controls a modern fleet of 33.0 product tankers.
- Flexible, young and efficient:
 - ✓ 82% IMO classed (industry average²: 48%);
 - ✓ An average age of the owned and bareboat fleet of 9.0 years (industry average²: 13.4 years for MRs (25,000 –54,999 dwt) and 14.8 years LR1s (55,000 –84,999 dwt));
 - ✓ 83% of owned and bareboat vessels and 85% of the entire controlled fleet is 'Eco-design' (industry average²: 37%).
 - ✓ Fully in compliance with very stringent international industry rules and long-term vetting approvals from the main Oil Majors.
- **22 newbuildings ordered since 2012** (10 MRs, 6 Handys, 6 LR1s), all delivered between Q1'14 and Q4'19 and **4 additional vessels ordered in Q2'24** with expected delivery in FY'27.

DIS has a modern fleet, a balanced mix of owned and chartered-in vessels, and strong relationships with key market players.

1. Actual number of vessels as at the end of Sep'24.
2. Source: Clarkson Research Services as at Sep'24.

Lighter bank debt repayments and low refinancing risk.

Forecasted bank debt financing cash-flow

(Excluding overdraft facilities)^{1,2,3}

Daily bank loan repayment on owned vessels

(Excluding overdraft facilities)^{1,2,3}

DIS refinanced all its debt maturing in '24 and '25, with the related balloons. Since '20, DIS also benefits from significantly lower bank debt repayments. The reduction in daily average repayments is also attributable to the purchase options exercised on leased vessels, most of which have been kept debt-free.

1. Based on the evolution of the current outstanding bank debt – with the exception of overdraft facilities.
 2. Only balloon repayments are assumed to be refinanced. Some older vessels whose existing facilities' fully amortise during their respective terms (without balloons), are assumed to remain debt free thereafter.
 3. Daily bank loan repayments is equal to bank loan repayments (excluding balloons), divided by owned vessel days.

Q4'24 estimated TCE earnings¹.

Q4'24 fixed days

Q4'24 potential blended TCE

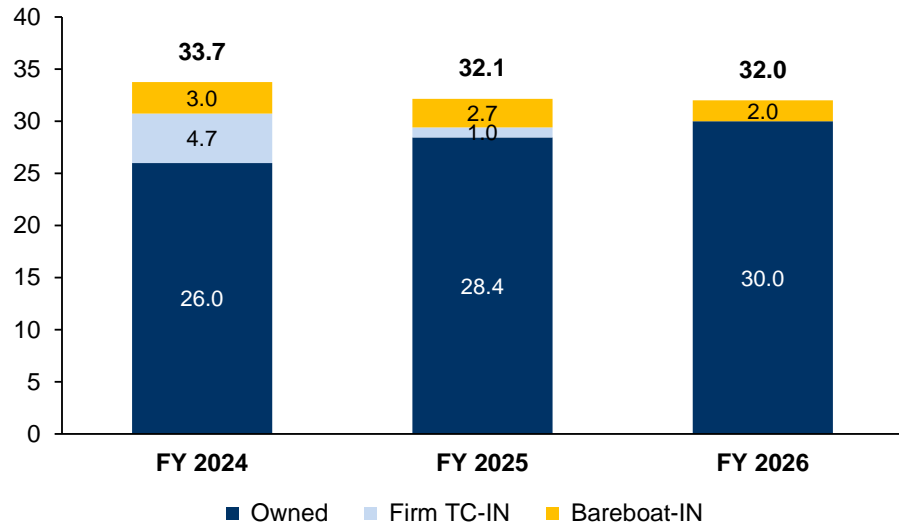

- **Contract coverage:** DIS has fixed ~**39%** of its Q4'24 employment days at a daily average of **US\$ 27,100**.
- **Fixed spot days:** DIS has fixed ~**29%** of its Q4'24 employment days on spot voyages at an **estimated daily average of US\$ 25,937**.
- **Blended fixed daily TCE:** Therefore, DIS has fixed ~**68%** of its Q4'24 employment days at an estimated daily average of **US\$ 26,601**.
- **Free days:** DIS still has ~**32% of free days** (i.e. not yet fixed) in Q4'24, therefore:
 - ✓ Assuming a daily spot rate of US\$ 20,000 on the current free days, DIS would achieve a blended Daily TCE for the quarter of US\$ 24,473;
 - ✓ Assuming a daily spot rate of US\$ 25,000 on the current free days, DIS would achieve a Daily blended TCE for the quarter of US\$ 26,085;
 - ✓ Assuming a daily spot rate of US\$ 30,000 on the current free days, DIS would achieve a Daily blended TCE for the quarter of US\$ 27,697.

Spot days already fixed for Q4'24 were at an estimated average daily rate of US\$ 26.0k, entailing a blended rate of US\$ 26.6k for 68% of the fourth quarter employment days.

Large potential upside to future earnings.

Estimated fleet evolution (avg. n. of vessels)¹

N. of ships (based on 'available days')

Potential upside to earnings²

US\$/mm

Estimated net results on fixed contract days³

US\$/mm

Potential net results⁴

US\$/mm

1. Average number of vessels in each period based on contracts in place as of today (i.e. total estimated 'available days') and subject to changes.

2. Based on estimated spot 'employment days' (i.e. net of estimated off-hire days) and assuming the exercise of DIS' TC-IN options.

3. Based on all estimated fixed days (i.e. contract coverage and fixed spot days) as of today and subject to changes. Costs are estimated based on an assumed daily breakeven of US\$ 15,000/day applied to the assumed cost days of the period (calculated as total days excluding 1.3% statistical off-hire ratio).

4. Calculated as total days (i.e. including free or unfixed days) as of today and subject to changes x three different free rate assumptions (\$/d 20,000, \$/d 25,000, \$/d 30,000). Costs are estimated based on an assumed daily breakeven of US\$ 15,000/day applied to the assumed cost days of the period (according to DIS' internal projections).

Moderating cost pressure.

Daily operating costs – owned and bareboat vessels¹

General & administrative costs – total fleet

- Following the successful results achieved between FY'18 and FY'22 in first reducing and then controlling both operating and G&A costs, it was anticipated that these would increase rapidly in FY'23, due to strong inflationary pressures and increase in variable compensation due to DIS' very strong results.
- G&A costs in the first 9M'24 were, however, lower than in the same period last year.
- After the sharp increase in operating costs in the first 9M'23 relative to the same period of '22, due to, in particular, higher crew and insurance costs, the increase in operating costs in '24 was more moderate, amounting 3.3%.

Several factors, including inflation, contributed to a sharp increase in G&A and operating costs in '23; from '24 we have seen more favorable dynamics as some temporary pressures unwind.

1. Daily operating costs are equivalent to direct operating expenses (excluding costs related to TC-In vessels) divided by cost days of owned and bareboat-in ships.

Financial results. First 9M'24 Net financial position

<i>(US\$ million)</i>	Dec. 31st, 2023	Sep. 30th, 2024
Gross debt	(314.3)	(309.6)
IFRS 16 – additional liabilities	(25.6)	(6.1)
Cash and cash equivalents	111.2	228.7
Other current financial assets ¹	4.5	4.0
Net financial position (NFP)	(224.3)	(83.0)
Net financial position (NFP) excl. IFR16	(198.7)	(76.9)
Fleet market value (FMV)	1,104.5	1,241.2
NFP (excluding IFRS 16) / FMV	18.0%	6.2%

- **Net Financial Position (NFP) of US\$ (83.0)m and Cash and cash equivalent of US\$ 228.7m** as at the end of Sep'24 vs. NFP of US\$ (224.3)m and Cash and cash equivalents of US\$ 111.2m as at the end of Dec'23 (NFP of US\$ (409.9)m at the end of FY'22, US\$ (520.3)m at the end of FY'21, of US\$ (561.5)m at the end of FY'20 and of US\$ (682.8)m at the end of FY'19). In addition, at the end of Sep'24, DIS had approximately US\$ 20.2m in undrawn and available short-term credit lines.
- **The NFP (excluding IFRS16) to FMV ratio was of 6.2% at the end of Sep'24** vs. 18.0% at the end of Dec'23 (36.0% at the end of FY'22, 60.4% at the end of FY'21, 65.9% at the end of FY'20, 64.0% at the end of FY'19 and 72.9% at the end of FY'18). This substantial improvement is attributable to DIS' FY'19 equity capital increase, to the Company's strong operating cash generation in FY'20, FY'22, FY'23, and 9M'24 as well as to the Company's vessel sales in the last few years. In addition, given the current strong market conditions and the positive medium-term outlook for our industry, vessel values have risen markedly since the end of 2021.

DIS has continued to strengthen its financial structure in the first 9M'24, thanks mostly to the strong cash generation achieved during the period. DIS' current leverage (NFP/FMV) stands at a very healthy 6.2% vs. 72.9% at the end of FY'18.

1. The amount as at September 30, 2024 comprises the current portion of deferred losses on disposal on sale and leaseback transactions, amounting to US\$ 1.3m and the positive fair value of derivative financial instruments (mainly interest rate swaps), amounting to US\$ 2.6m.

Financial results. First 9M'24 Results

(US\$ million)	Q3'23	Q3'24	9M'23	9M'24
TCE Earnings	98.3	83.9	301.8	294.5
Total net revenue	99.5	85.2	305.4	298.1
Result on disposal of vessels	(0.6)	(0.3)	(4.4)	4.3
EBITDA	70.4	57.7	213.1	218.8
Asset impairment	-	-	-	-
EBIT	54.5	43.3	166.8	174.3
Net Result	48.9	40.2	148.7	163.1

Non-recurring items:

(US\$ million)	Q3'23	Q3'24	9M'23	9M'24
Result on disposal of vessels	(0.6)	(0.3)	(4.4)	4.3
Non-recurring financial items	0.1	-	0.1	(0.1)
Asset impairment	-	-	-	-
Total non-recurring items	(0.5)	(0.3)	(4.3)	4.2
Net Result excl. non-recurring items	49.4	40.5	153.0	158.9

- TCE Earnings** – US\$ 294.5m in the first 9M'24 vs. US\$ 301.8m in the first 9M'23, and US\$ 83.9m in Q3'24 vs. US\$ 98.3m in Q3'23. **DIS' total daily average TCE was of US\$ 33,395 in the first 9M'24** vs. US\$ 31,904 in the first 9M'23 (US\$ 28,602 in Q3'24 vs. US\$ 30,860 in Q3'23) – see next slide for further details.
- EBITDA** – **US\$ 218.8m in the first 9M'24** vs. US\$ 213.1m in the first 9M'23 (**Q3'24 US\$ 57.7m** vs. Q3'23 US\$ 70.4m). **DIS' operating cash flow was positive for US\$ 228.4m in the first 9M'24** compared with US\$ 224.4m generated in the same period of the previous year.
- Net Result** – **Net profit of US\$ 163.1m in the first 9M'24** vs. US\$ 148.7m in the same period of last year (**US\$ 40.2m in Q3'24** vs. US\$ 48.9m in Q3'23). Excluding the result on disposals and non-recurring financial items, as well as the asset impairment, DIS' Net result would have been of US\$ 158.9m in the first 9M'24 vs. US\$ 153.0m in the first 9M'23 (US\$ 40.5m in Q3'24 vs. US\$ 49.4m in Q3'23).

DIS recorded a very profitable first nine months of the year, benefitting from a very strong product tanker market.

Financial results. First 9M'24 Key operating measures

Key Operating Measures	Q1 2023	Q2 2023	Q3 2023	9M 2023	Q4 2023	FY 2023	Q1 2024	Q2 2024	Q3 2024	9M 2024
Avg. n. of vessels	36.0	36.0	36.0	36.0	36.0	36.0	35.5	33.5	33.0	34.0
Fleet contact coverage	25.2%	27.2%	31.2%	27.9%	35.6%	29.8%	41.3%	42.5%	43.5%	42.4%
Daily TCE Spot (US\$/d)	36,652	31,746	31,782	33,434	30,999	32,873	38,201	44,949	29,679	37,563
Daily TCE Covered (US\$/d)	26,367	28,383	28,830	27,951	28,474	28,107	28,123	27,903	27,204	27,738
Daily TCE Earnings (US\$/d)	34,056	30,831	30,860	31,904	30,099	31,451	34,043	37,698	28,602	33,395

- DIS' **daily average spot TCE** was of **US\$ 37,563 in the first 9M'24** vs. US\$ 33,434 in the first 9M'23, and of **US\$ 29,679 in Q3'24** vs. US\$ 31,782 in Q3'23.
- At the same time and in line with its strategy, DIS maintained a good level of **coverage** (fixed-rate period contracts) in **the first 9M'24**, securing through period contracts an average of **42.4% of its available vessel days** at a daily average TCE rate of US\$ 27,738 (9M'23: 27.9% coverage at US\$ 27,951/day).
- DIS' **total daily average TCE (Spot and Time charter¹)** was of **US\$ 33,395 in the first 9M'24** vs. US\$ 31,904 in the first 9M'23 and of **US\$ 28,602 in Q3'24** vs. US\$ 30,860 in Q3'23.

DIS achieved a daily average spot rate of US\$ 37,563 in the first 9M'24 and of US\$ 29,679 in Q3'24. This, coupled with the Company's period coverage, led to a very profitable total daily TCE of US\$ 33,395 in the first 9M'24 and of US\$ 28,602 in Q3'24.

1. The bareboat charter rate earned by the Cielo di Londra was converted to a time-charter equivalent rate.

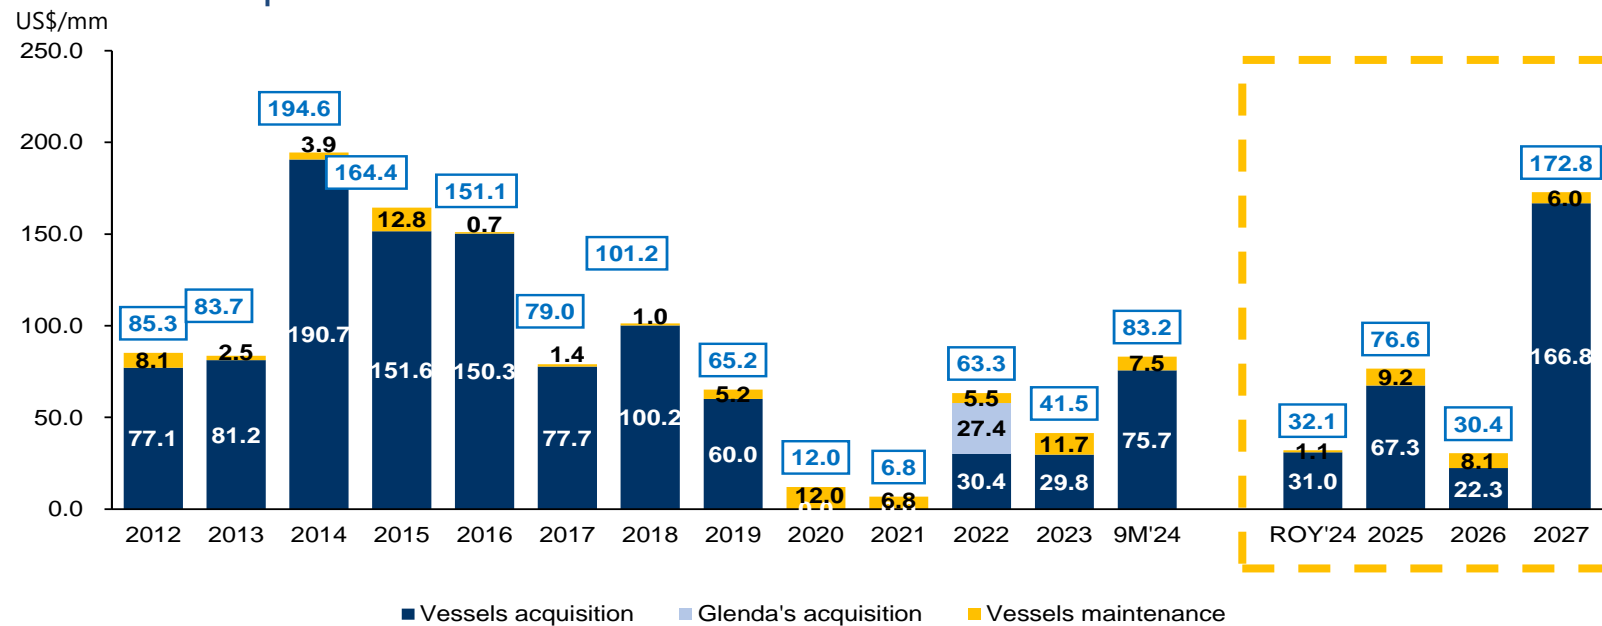

Strategic priorities and market overview

d'Amico
INTERNATIONAL SHIPPING S.A.

DIS' CAPEX¹ commitments.

Investment plan

- DIS invested US\$ 924.4m¹ from FY'12 to FY'19, mostly related to 22 newbuildings ordered since 2012.
- DIS invested US\$ 30.4m in FY'22, US\$ 29.8m in FY'23 and US\$ 31.0m in Q3'24 to exercise its purchase options on High Adventurer, High Explorer and Crimson Jade, respectively. Additionally, DIS exercised its purchase option on Crimson Pearl for US\$31.0 million, with delivery completed in October 2024. DIS also recently exercised its purchase options on High Navigator and High Leader, with delivery expected between Q1 and Q3 2025.
- In Q2'24, DIS signed a shipbuilding contract with Jiangsu New Yangzi Shipbuilding Co., China, for the purchase of 4 LR1 vessels for a total investment of approximately US\$ 233.8m¹. DIS paid 20% of the newbuildings' contract price to the shipyard in Q2'24, with the remaining instalments for these vessels due between FY'26 and FY'27.

DIS' large investment plan, which led to an important renewal of its owned fleet, consisting now mostly of eco-vessels, was completed in Oct'19. In FY'24 DIS' investments relate mainly to the exercise of purchase options on two time-chartered-in vessels and to the first-installment for 4 recently ordered LR1 newbuildings.

1. In addition to yard Instalments, total CAPEX from FY'12 to FY'19 includes also cost of supervision, first supply and the installation of one scrubber, costing US\$ 2.2 million on the last LR1 delivered in Oct'19. The total amount shown for FY'27 includes the cost of supervision, first supply, extras, and the installation of two scrubbers.

DIS' purchase options on leased vessels.

Exercised purchase options:

Vessel Name	Build Date	Purch. Option Delivery Date
High Priority ¹	Mar-05	Feb-21
High Voyager ²	Nov-14	Jan-23
High Freedom ³	Jan-14	May-23
High Fidelity	Aug-14	Sep-22
High Discovery	Feb-14	Sep-22
High Trust ⁴	Jan-16	Jul-23
High Trader ⁵	Oct-15	Jul-23
High Loyalty ⁶	Feb-15	Jun-23

Unexercised purchase options:

Vessel Name	Build Date	Purch. Option First Ex. Date	Purch. Obligation Date	First Ex. Option (In/Out of the money) ⁷
High Fidelity	Aug-14	Sep-25	Sep-32	In the money
High Discovery	Feb-14	Sep-24	Sep-32	In the money
Cielo di Houston	Jan-19	Mar-24	Sep-25	In the money

- DIS has flexible purchase options on all its bareboat chartered-in vessels, allowing it to acquire them with three months' notice from the first exercise date. Based on today's depreciated market values and their respective exercise prices, all these options are either in the money or, for those still not exercisable, theoretically in the money.
- Starting from Sep'22, the previous leasing arrangements on the High Discovery and the High Fidelity were replaced with new ones, with ten-year terms, at a substantially lower cost and similar terms to the previous contracts, also in relation to early reimbursement. In addition, DIS exercised its purchase options on the High Voyager and High Freedom in Dec'22 and Jan'23, respectively, and on the High Trader, High Trust and High Loyalty, in May'23. DIS has another 3 options that it plans to exercise in the future.

DIS plans to lower its break-even costs by gradually exercising the remaining purchase options on leased vessels.

1. On Feb 5, 2021, DIS announced the exercise of its purchase option on the MT High Priority for a consideration of US\$ 9.7m.
2. On Dec 7, 2022, DIS announced the exercise of its purchase option on the MT High Voyager for a consideration of US\$ 20.8m.
3. On Jan 12, 2023, DIS announced the exercise of its purchase option on the MT High Freedom for a consideration of US\$ 20.1m.
4. On May 2, 2023, DIS announced the exercise of its purchase option on the MT High Trust for a consideration of US\$ 22.2m.
5. On May 9, 2023, DIS announced the exercise of its purchase option on the MT High Trader for a consideration of US\$ 21.6m.
6. On May 16, 2023, DIS announced the exercise of its purchase option on the MT High Loyalty for a consideration of US\$ 21.4m.
7. Market values as at Sep 30, 2024 depreciated linearly up to first exercise date (based on 25 years vessels' useful life less scrap value), less first exercise price.

DIS' purchase options on time-chartered-in vessels.

Exercised purchase options (US\$ mm)¹:

Vessel Name	Build Date	Purch. Option Delivery Date	Est. Market Value less Ex. Price at Ex. Date	Est. Market Value less Book Value at Sep'24
High Adventurer	Nov-17	Dec-22	8.6	10.4
High Explorer	May-18	May-23	12.0	13.1
Crimson Jade	Jun-17	Jul-24	13.5	13.6
Crimson Pearl	Aug-17	Oct-24	13.5	n.a.
High Navigator	May-18	Q1/Q2-25	12.0	n.a.
High Leader	Jun-18	Q2/Q3-25	11.8	n.a.
			71.4	37.1

- DIS has also exercised its six purchase options on its time-chartered-in vessels, which were all well in the money relative to their current market value.
- Two of these options, relating to the **High Adventurer** and **High Explorer**, were in Yen and were particularly attractive due to the currency's strong depreciation relative to the US\$. These options were exercised with delivery of the High Adventurer and of the High Explorer having occurred in December'22 and in May'23, respectively.
- In Q2'24 DIS exercised its purchase option on **Crimson Jade**, with delivery having occurred in July'24.
- In Q3'24, DIS exercised its purchase option on **Crimson Pearl**, with delivery having occurred in October'24.
- Additionally, in Q4'24 DIS exercised its purchase options also on **High Navigator** and **High Leader**, with delivery expected between Q1 and Q3'25.

Through the exercise of these options, DIS has taken ownership of six young and efficient MR vessels, all built by some of the most renowned Japanese shipyards, at purchase prices significantly below their current market value, creating substantial value for our Company and Shareholders.

1. The estimated final purchase price of High Navigator and High Leader is based on their expected delivery dates, while their estimated market value reflects the valuation as of September 2024, adjusted for the estimated delivery date of the vessels and assuming a 3% annual reduction in vessel values.

2. Crimson Pearl, High Navigator, and High Leader had not been delivered as of the end of September 2024; therefore, their book values are currently not reported.

Contracts and modern fleet to drive future results.

Average TC and TC equivalent covered rates¹

- For Q4'24, DIS has covered ~39% of its available vessel days at an average TC equivalent rate of ~US\$ 27.1 thousand.
- **TC contracts allow DIS to:**
 - ✓ **consolidate strategic relationships with Oil Majors** (Chevron, Exxon, Total, Saudi Aramco) and leading trading houses;
 - ✓ **hedge against spot market volatility** allowing DIS to secure TCE Earnings (FY'24 US\$ 136.3m; FY'25 US\$ 73.0m; FY'26 US\$ 48.8m are already secured as of today);
 - ✓ **improve its operating cash flow** (TC Hires are paid monthly in advance).
- DIS aims usually for a period contract coverage of between 40% and 60% in the following 12 months, although currently, due to the very positive market outlook it aims to keep more of its fleet on the spot market.

DIS' increasing % of 'Eco' fleet (based on all controlled vessels)

- **DIS' percentage of 'Eco' vessels** was of only 38% in Q1'18, increasing to 78% in FY'22 and is **expected to reach 84% in FY'24**.
- **The eco percentage should rise even higher than indicated on the chart on the left**, as during the next two years DIS is likely to sell some of its older vessels in a stronger market.
- **An increasing percentage of 'Eco' vessels will increase DIS' earnings potential**, given the premium rates achieved by these ships.

1. Situation based on covered 'employment days' (net of estimated off-hire days), and on current contracts in place, which are always subject to changes and assuming the exercise of DIS' TC-IN options.
 2. 'Daily average TC rate' refers to TC contracts only, whilst 'Daily average TC equivalent covered rate' includes also bareboat-out contracts, based on an assumed daily operating expenses in line with DIS' average actual cost.

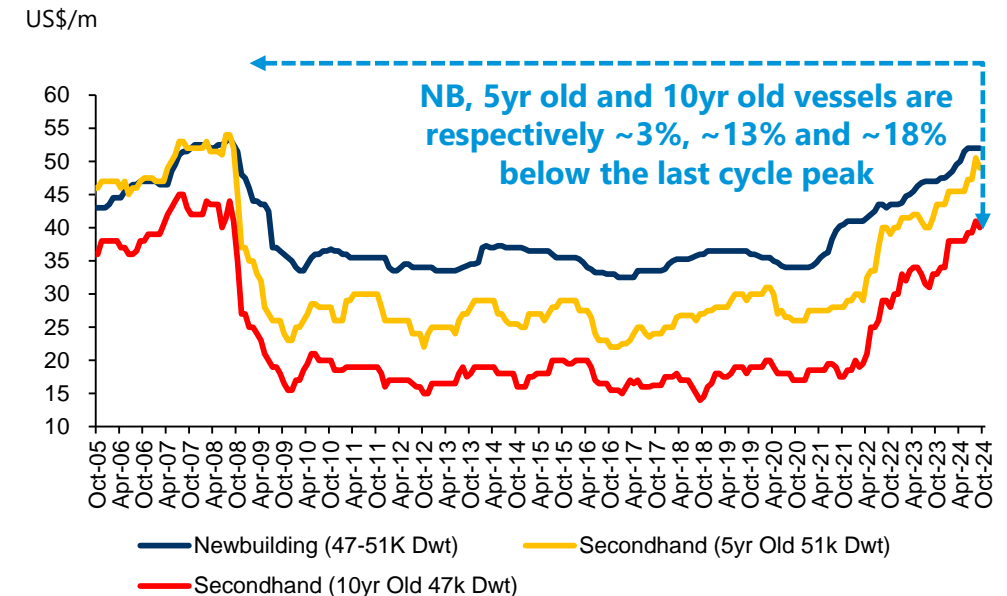

Potential upside to asset values.

Historical MR TC and spot rates¹

Historical MR asset values¹

- According to Clarksons, the **one-year time-charter rate for an Eco MR vessel is currently of US\$ 27,000 per day** and the **one-year time-charter rate for an Eco LR1 vessel is of US\$ 29,000 per day.**

Asset values and freight rates have surged since the onset of the war in Ukraine. While freight rates have reached record levels, asset values still have room to rise relative to the previous cycle peak.

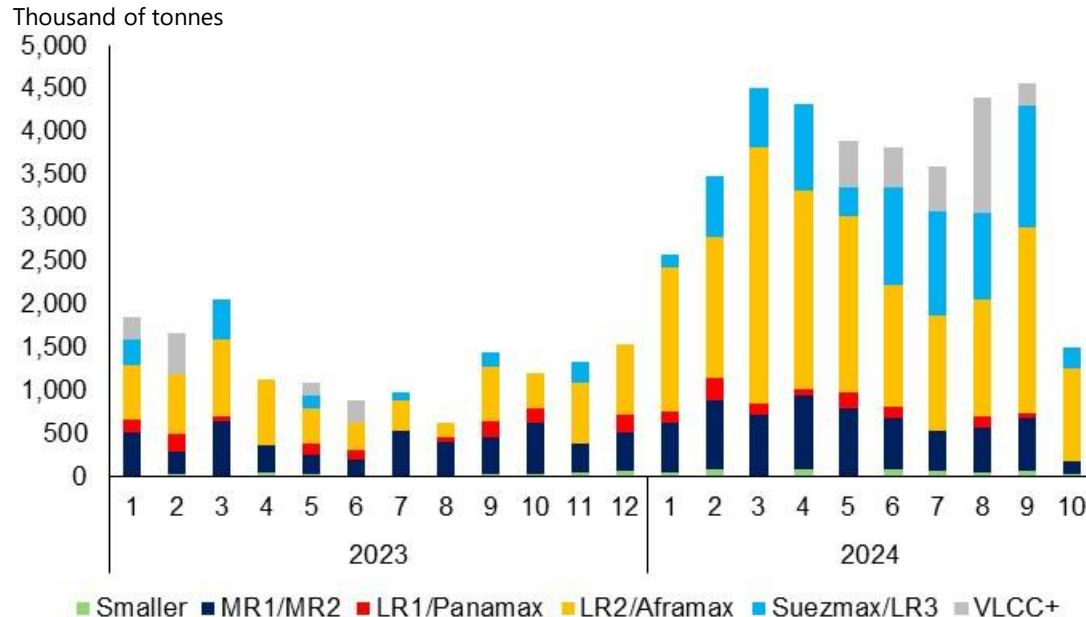

1. Source: Clarkson research services as at Oct'24.

Cannibalization of CPP voyages by uncoated ships.

Uncoated share of long haul CPP trade¹

Gasoil around the Cape of Good Hope²

- In Q3 2024, DPP trading coated ships have increasingly switched to clean trading. This shift has led to a record number of clean-trading Aframax vessels in August, resulting in a 9.5% increase in the LR2 fleet since the beginning of the year.
- As DPP earnings declined and VLCCs, in particular, were impacted by lower Chinese crude demand, larger vessels have also been drawn to the comparatively more lucrative clean markets.
- Several Suezmax and VLCCs have cleaned up between July and September this year, lifting large cargoes from the Middle East and Far East destined for the UKC or West Africa.
- According to Steem 1960, approximately 13% of the long-haul volumes going east of Suez were lifted by uncoated vessels in July and August alone, marking a 25-year high.

DPP markets are expected to strengthen seasonally in Q4, likely leading to a reduction in uncoated ships cannibalizing CPP cargoes.

 2. Source: Vortexa, as at 1 November '24. Based on departure date.

Trade disruptions. Russian refined product exports¹

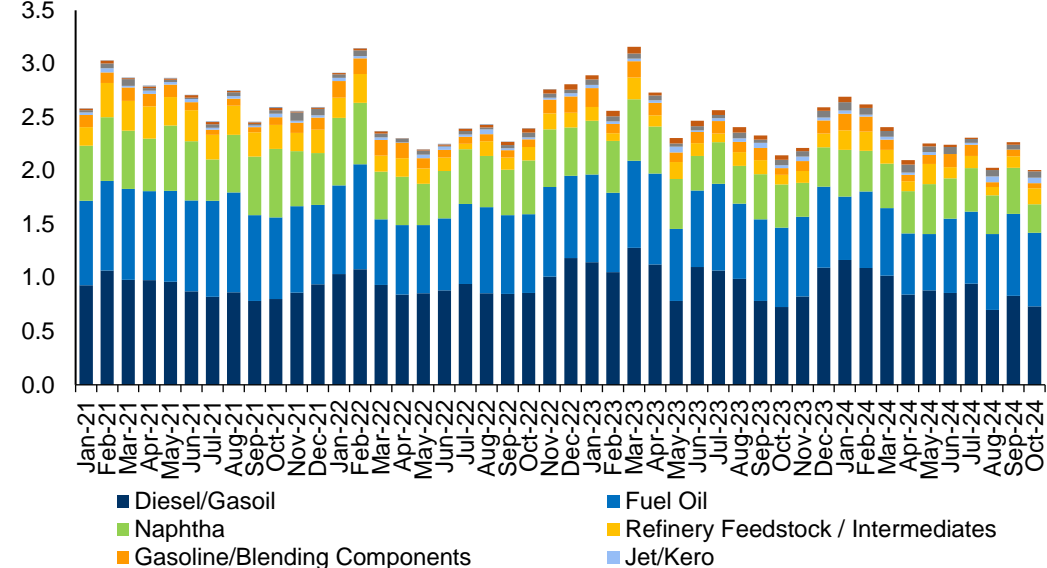

Russia's refined product exports by destination

Million barrels per day

Russia's refined product exports

Million barrels per day

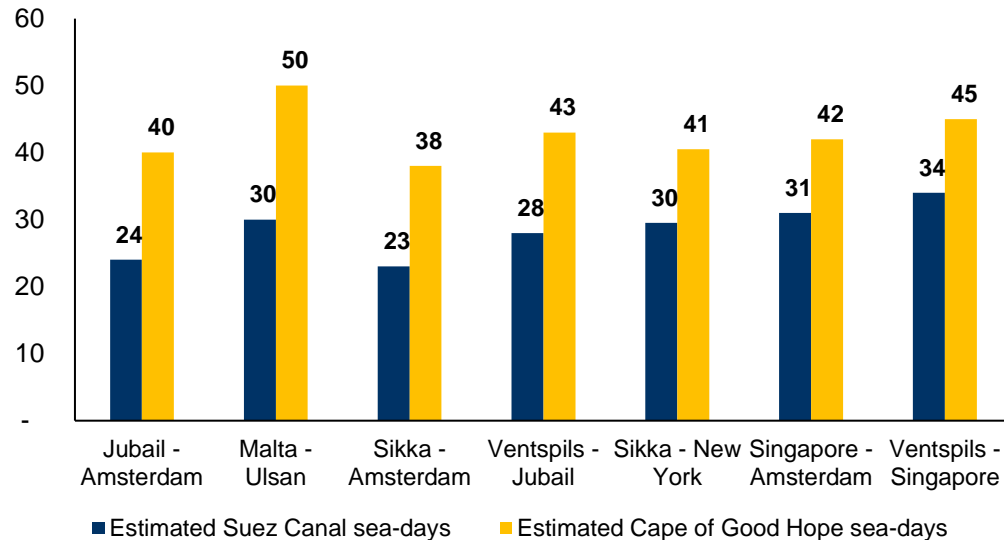

- According to Vortexa, in the first 10 months of 2024, Russian exports of refined product amounted on average to 2.3 mb/d, 14.8% lower than the average of FY'21. In the same period Russian exports to the EU fell by 1.2 mb/d (-97%), whilst their exports rose to China by 0.2 mb/d (+434%), to India by 0.1 mb/d (+245%), to Turkey by 0.3 mb/d (+189%), to the Middle East by 0.1 mb/d (+156%), to Latin America by 0.2 mb/d (+214%) and to Africa by 0.3 mb/d (+387%).
- Disruptions to trade flows due to the rerouting of Russian oil to new more distant locations have significantly increased sailing times. In fact, shipments from Western Russia (Baltic) to Northwest Europe took around 10 days, while voyages from the same loading ports to India and China take approximately 30 to 40 days, respectively.

Since the European sanctions and associated price cap on exports of Russian refined products came into force on 5 February '23, Russian exports to Europe have collapsed and those to Asia (India and China), Africa, Turkey, Brazil, and the Middle East, have surged .

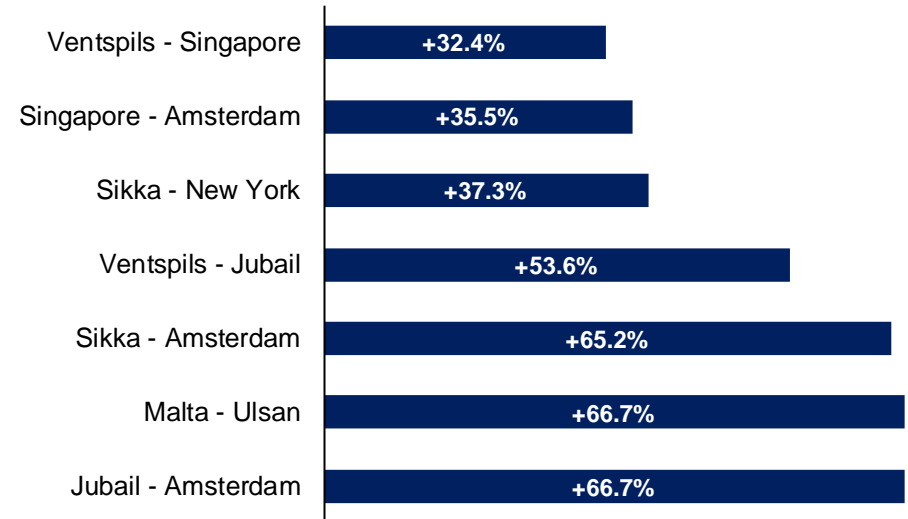

1. Source: Vortexa as at Oct'24 excluding LPG.

Trade disruptions. Red Sea attacks

Voyage duration increase on key trades (sea-days)²

Voyage duration increase on key trades (%)²

CPP monthly volumes going via the Suez Canal¹

- Around 12-14% of all refined products volumes transited through the Red Sea prior to the Houthi attacks.
- Volumes crossing Suez have dropped by 74% since December '23.
- According to our estimates voyage duration for the main routes typically crossing Suez increase by between 32% and 67% if vessels have instead to sail through the Cape of Good Hope.
- Assuming traded volumes on these routes are not affected, the ton-mile effect on demand of the disruption is of between 5 to 7%. Actual increase in demand is, however, likely to be smaller and of around 3%.

The diversion of trade through the much longer route around the Cape of Good Hope has caused a significant increase in ton-mile demand for product tankers.

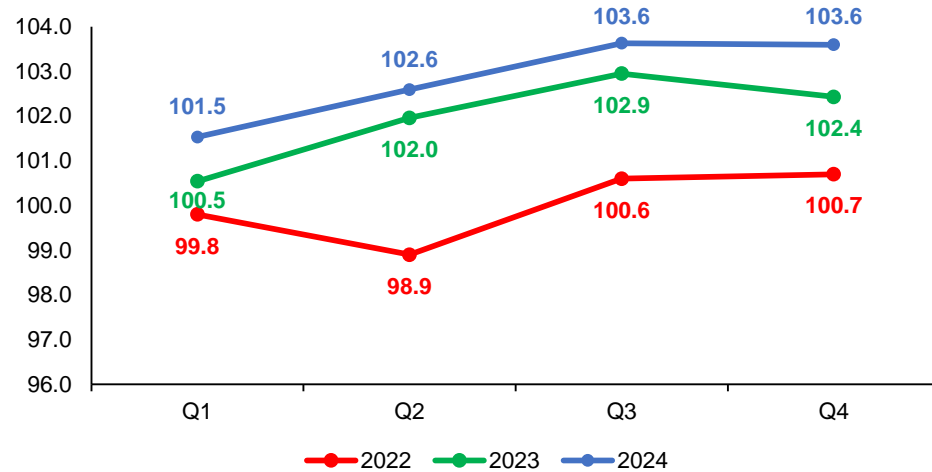

1. Source: Affinity Oct'24.

2. Source: d'Amico International Shipping management's estimates, assuming ships steaming at 13 knots with 10% weather. Routes via Suez assume 1 day canal transit.

Oil demand and refining throughputs recovering.

Global oil demand¹

Million barrels per day

Global refinery throughputs¹

Million barrels per day

The IEA expects global oil demand to grow by 0.9 mb/d in FY'24 to 102.8 mb/d.

- Despite a slowdown in construction and manufacturing, China remains a significant source for global oil demand growth in FY'24, accounting for about 17% of the total estimated gains, with India now forecasted to be the leading contributor in FY'24.

Global refinery throughputs increased by 1.2 mb/d in FY'23 to 82.3 mb/d and is forecasted to increase by a further 0.5 mb/d in FY'24 to 82.8 mb/d.

- Growth in FY'24 continues to be dominated by countries East of Suez. However, last year's non-OECD refinery throughput increase of 1.5 mb/d was largely driven by China (+0.9 mb/d), while in FY'24 growth will be led by the Middle East (+0.7 mb/d), followed by Africa (+0.3 mb/d), and Asian countries excluding China (+0.2 mb/d).
- The strong rise in Middle East refinery throughput is the result of recently commissioned capacity in Kuwait and Oman, as well as a rebound in Saudi Arabian runs following a heavy Q4'23 maintenance schedule.

Despite the Ukrainian war and an economic slowdown in Europe, a recovery in demand and refining throughputs is ongoing.

1. Source: IEA as at Oct'24.

Healthy oil supply growth.

World oil production¹

Million barrels per day

- In FY'24 world oil supply is projected to expand by 0.7 mb/d, averaging 102.9 mb/d.**
 - Non-OPEC+ production is expected to rise by 1.5 mb/d, while OPEC+ output is forecast to fall by 0.8 mb/d, assuming existing voluntary cuts remain in place.
- In FY'25, global gains could accelerate to 2.0 mb/d, with supply reaching a new record of 105.0 mb/d.**
 - For the third year running, non-OPEC+ is forecast to lead gains, adding 1.5 mb/d.** If voluntary OPEC+ cuts – that were extended and deepened from 1Q24 – stay in place, the alliance's output could rise by a relatively modest 490 kb/d.
- Non-OPEC+ expansion should be led by the United States, accounting for 43% of the growth from these countries in '24 and 41% in '25.** Other non-OPEC+ producers such as Brazil, Guyana, and Canada should also make significant contributions. This additional oil supply should support the product tankers market, allowing consuming nations to rebuild depleted inventories.
- The potential for disruptions to Middle Eastern supplies due to a widening of the conflict between Israel and Hamas/Iran, could have a major impact on the above supply picture.

Despite prolonged OPEC+ cuts, a benign oil supply picture is expected for next year thanks to continued production growth from the USA, Brazil and other non-OPEC+ countries.

1. Source: IEA as at Oct'24.

Refined product inventories at low levels.

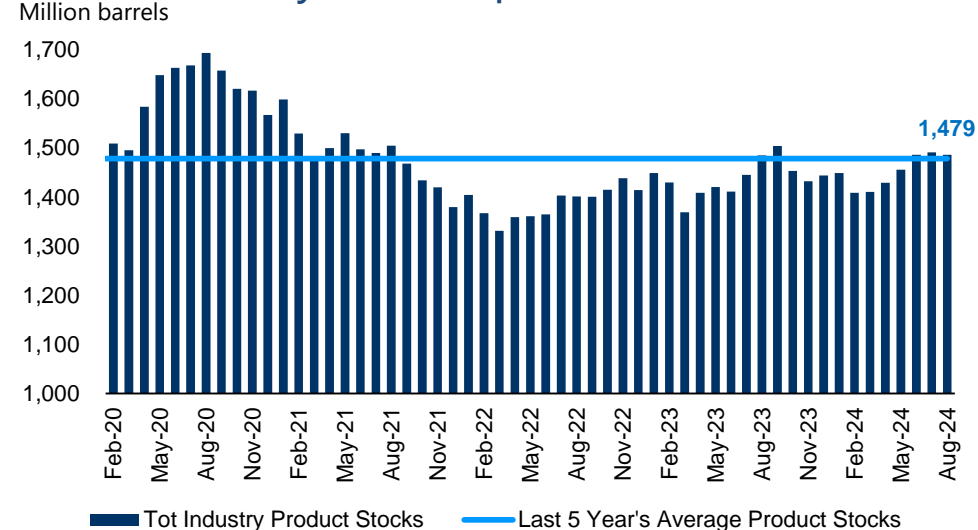

Crude oil price (Brent, US\$ bbl), forward curve¹

CPP vs DPP and crude oil floating storage²

OECD industry refined product stocks³

- **Floating storage of clean petroleum products has come full circle and after peaking at 75 mb in May'20, has fallen sharply to 25 mb by the end of '20, holding at around the same level since.**
- Following nearly two years of decline, oil product inventories started increasing in April'22, rising by 118 million barrels between March'22 and January'23. In FY'23 movements in stocks have been more erratic, with an initial sharp decline until March, followed by a rebound to 1.5 billion barrels as at September'23, and then a decrease of 60 million barrels to around 1.4 billion barrels by the end of the year. In the first eight months of FY'24, stocks increased by 42 million barrels.

OECD industry refined product stocks are broadly in line with their 5-year average.

Gasoline and Jet Fuel to lead demand growth in '24.

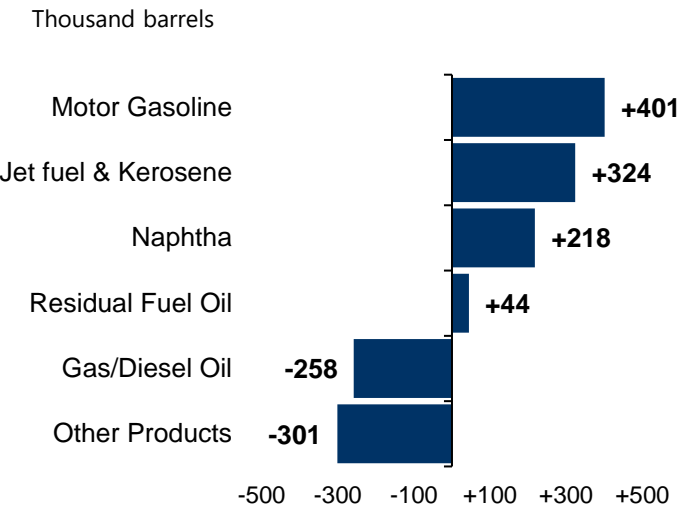

% Change in number of commercial flights vs. 2019¹

Jet fuel & Kerosene demand 2021-2023 (kbpd)²

Global demand growth by product 2024 (kbpd)²

- The **number of commercial flights has been steadily increasing since June 2020**, and finally surpassed 2019 levels for the first time in early Feb'23. This upward trend continued since then, also due to the **lifting of Covid restrictions in China**.
- **Jet fuel/kerosene demand continued its post-pandemic rebound in 2023, having grown by 1.0 mb/d (+16.3% year-on-year), to reach 7.1 mb/d, corresponding to approximately 90% of 2019 levels.**
- **The drivers of oil demand growth in '24 are expected to be Motor Gasoline (+0.4 mb/d), Jet Fuel (+0.3 mb/d), and Naphtha (+0.2 mb/d).**

Jet fuel was the largest source of oil demand growth in 2023, and together with gasoline is expected to drive consumption growth also in 2024.

1. Source: www.flightradar24.com/data/statistics as of Oct'24.
 2. Source: IEA – Oct'24.

Support expected also from crude tanker market¹.

Coated LR2 fleet: clean vs. dirty trading¹

Crude tankers' orderbook % Fleet (dwt)²

Historical crude tankers' TCE spot rates²

- Crude tankers can, as they have done recently, clean-up to transport clean product cargoes when dirty markets are weak.
- **Crude tankers, however, will benefit over the coming years from a record low orderbook and the post-pandemic recovery in oil demand.**
- Albeit with significant volatility, since the onset of the Ukrainian war freight rates have been strong for crude tankers, particularly in Q4'22 and in Q1'23.
- **The percentage of LR2s trading clean has risen recently but could fall as the expected strong crude markets might draw some vessels into that trade.**

Strong fundamentals for crude tankers over the next few years should provide further support for product tankers.

1. Source: Clarksons Oct'24.
 2. Source: Clarksons Oct'24.

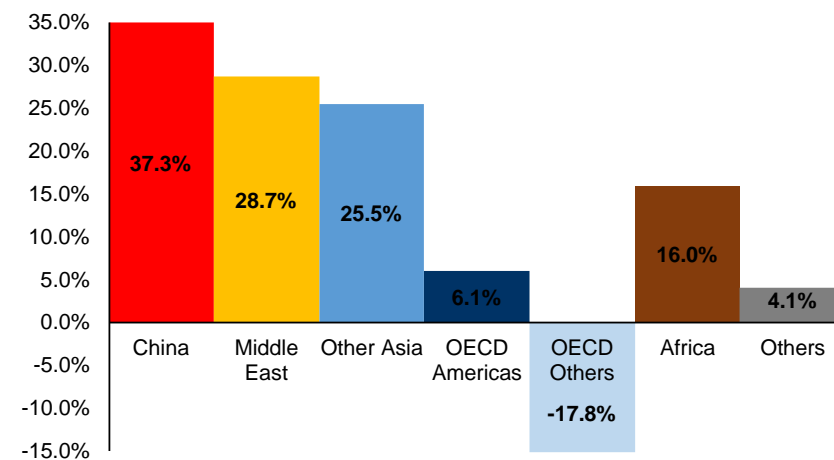

Longer-term demand. Changes in the refinery landscape

Net refinery capacity additions by year '23-'26¹

Thousand barrels/day

% of net refinery capacity additions '23-'26¹

- Global refinery crude distillation capacity should rise by 3.9m b/d in the '23-26 period.

- Planned refinery net capacity additions in the '23-'26 period are mainly in China (+1.5m b/d, 37.3% share), Africa (+0.7m b/d, 16.0% share), Rest of Asia and mainly India (+1.0m b/d, 25.5% share) and the Middle East (+1.2m b/d, 28.7% share).

- The substantial increase in refining capacity in India and the Middle East is likely to be very beneficial for product tankers, since it should also entail long sailing distances, as a large portion of their output is likely to be exported to Asia and if Russian sanctions persist, also to Europe.

- Older refineries, in particular in Europe but also in other areas such Australia/New Zealand and the US, have been suffering from poor margins and were destined for closure due to the planned ramp-up in capacity from more modern refineries in the Middle East and Asia.

- Covid-19 has accelerated this process with ~2.2 mbpd of capacity closures/conversions in the '20-21 period, mostly in Europe the US and in Australia/New Zealand. More closures are anticipated in these regions in the coming years.

- Over the next few years, imports by Europe and by all the regions of the southern hemisphere, from the Middle East, India and China, are likely to expand.

Strong growth in refinery capacity in the Middle East and Asia from '23-'26, to contribute to a further increase in ton-miles.

1. Source: IEA "Oil 2024 - Analysis and forecast to 2030" report.

Growing pool of demolition candidates.

Historical and forecasted fleet composition by age (MRs and LR1s)¹

- The proportion of vessels which have more than 15 and 20 years has been rising rapidly and this trend is expected to accelerate over the coming years as many of the vessels that were delivered during the last 2003-2008 super cycle cross these thresholds.

Vessels turning 25 years from '25 onwards (MRs and LR1s)²

- The orderbook is currently aligned with the fleet that has more than 20 years.
- From FY'27 to FY'33, the annual share of the fleet crossing the 25-year-old threshold will increase steadily and sharply.

The rapidly ageing fleet, coupled with the many forces spurring demolition, should contribute to very limited fleet growth in the next few years.

1. Source: Dwt as at period-end based on Clarksons Research as at Aug'24 and management estimates, including that new vessels ordered each year are equivalent to 4.0% of the previous year-end fleet and that demolitions each are equivalent to 20% of the previous year's end fleet which is over 20 years-old.
 2. Based on the delivery dates of vessels, assuming they are not demolished earlier.

Planned deliveries to stay at low levels in '24 and H1'25.

MR & LR1 deliveries, 2024-2025¹

MR & LR1 demolitions, 2018-2024¹

The strong freight markets since FY'22, led to a sharp slowdown in demolitions from Q2'22. Deliveries will, however, be at historically low levels in '24 and H1'25. As the fleet ages rapidly, more demolitions are to be expected even in a strong market.

1. Source: Clarkson Research Services as at Oct'24.

Newbuild orders rising.

MR newbuilding parity curve vs second-hand values¹

MR & LR1 orders²

- **Shipbuilding capacity has fallen sharply over the last few years**, as yards were confronted with a dearth of orders.
- **Newbuild costs are rising** due to regulations and markedly higher steel prices.
- In FY'23 there was an increase in MR and LR1 newbuild orders to 165. In the first 9 months of 2024, 170 MRs and LR1s were ordered.
- Due to the large number of containers and gas carriers ordered in the past few years, in some of the same yards that build product tankers, deliveries of these vessels is, however, spread over several years and **vessels ordered today are in most yards only for delivery at the end of '27 or even in '28, with only very few slots available for earlier deliveries.**

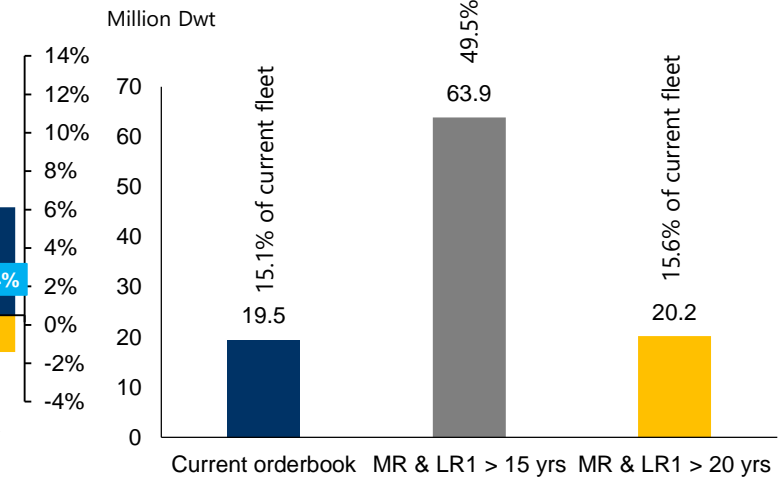

1. Source: Vessel prices from Clarkson Research Services as at Oct'24. Newbuilding prices evolution based on 25 years depreciation, including US\$ 1m first supply and US\$ 5.0m scrap value.
 2. 'N. of vessels': from Clarksons Research, 2024 refers to YTD figures. 'Orderbook/fleet ratio': from Clarksons' Oil & Tanker Trades Outlook reports (product tanker fleet 25,000 to 84,999 dwt from 2014 to 2023, product tanker fleet 25,000 to 79,999 dwt from 2010 to 2013, double-hull fleet 25,000 to 79,999 dwt from 2007 to 2009).

Slow fleet growth.

MR & LR1 deliveries and scrapping (m dwt) (lhs), and net fleet growth (%)¹ (rhs)

Current MR & LR1 fleet age profile¹

Even with limited scrapping, fleet growth was of only 1.0% in 2023 and is expected to be of 1.0% also in 2024 and 2.4% in 2025.

1. Source: Clarkson Research Services as at Oct'24 and Clarksons Oil & Tanker Trades Outlook – Oct'24.

Why invest in DIS

d'Amico
INTERNATIONAL SHIPPING S.A.

Historical NAV evolution.

DIS' Historical NAV evolution^{1,2,3}

	Dec-12	Dec-13	Dec-14	Dec-15	Dec-16	Dec-17	Dec-18	Dec-19	Dec-20	Dec-21	Dec-22	Dec-23	Sep-24
Discount to NAV (End of Period)	39%	9%	29%	23%	37%	20%	60%	44%	48%	58%	37%	24%	37%

As at Sep 30th 2024, DIS' NAV^{1,2,3} was estimated at US\$ 1,225.9m, its fleet market value at US\$ 1,241.2m² and its closing stock price was 37% below its NAV/share.

1. DIS' owned and bareboat fleet market value according to a primary broker, less Net Debt, excluding the impact of IFRS 16. It includes the market value of the leased assets for which DIS has a purchase obligation, less the discounted value of the financial payments on such leases.
 2. Fleet valued as at September 30, 2024.
 3. To achieve a more accurate view of DIS' NAV, the Company's Net Working Capital and the positive delta between the estimated market value of DIS' TC-IN vessels (for which there are exercisable purchase options) and their respective theoretical purchase option prices were added to the calculation.

Potential use of funds (excluding cash returned to shareholders).

Potential use of funds for investments and lease reimbursements

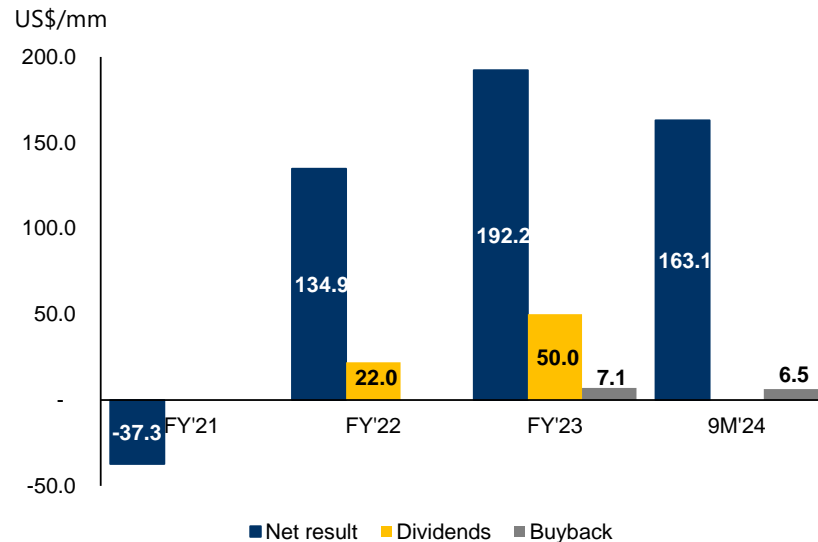

- DIS currently plans investments and lease reimbursements of US\$ 189.8 million (US\$ 158.8 million excluding the first 9M'24), arising from the exercise of purchase options on its time-chartered-in and bareboat-chartered-in vessels.
- Furthermore, considering DIS' robust financial position and its strategic objective of managing a modern fleet while maintaining its current fleet size at a consistent level, in Q2'24 DIS ordered 4 newbuilding LR1s with estimated delivery in FY'27. The total investment for these newbuildings, including extras, first supply, scrubbers on two vessels, and supervision fees, could amount to up to US\$233.8 million (US\$ 189.1 million excluding the first 9M'24).

DIS plans investments and lease reimbursements of US\$ 189.8 million, to exercise its remaining purchase options. Additional investments on four newbuilds will lead to a total potential use of funds of US\$ 423.6 million (US\$ 347.9 million excluding the first 9M'24) between FY'24 and FY'27.

Increasing shareholder returns.

Cash returned to shareholders

Financial Leverage (NFP to FMV)

Thanks to robust earnings and a very healthy financial structure (with a Net Financial Position to Fleet Market Value ratio of 6.2% as at the end of September'24), DIS has been steadily increasing cash returned to its shareholders through a combination of share buybacks and dividends.

DIS' fleet. Focus on enhanced technical efficiency.

- On the operational side, DIS' Fleet has adopted measures such as cutting of users, Tekomar health check for CO2 reduction, condition based maintenance (CBM), propeller cleaning, biofouling risk management, and hull full blasting for ships older than 10 years.
- These operational efficiency measures have already been implemented across various ships in the fleet.

Planned operational improvements will also contribute to a lower environmental impact and stronger performance of DIS' fleet.

Why invest in DIS today.

- **Young-fleet, most of which acquired at historically attractive prices and at top-tier yards.** Furthermore, vessels are mostly eco-design (83% of owned and bareboat ships) and IMO classed (79% of owned and bareboat ships).
- **First-class in-house technical management** provides to DIS **access to long-term charters** with demanding oil majors and allows it to **anticipate and benefit from regulatory changes.**
- Invested mostly in the MR1 and MR2, and more recently in the LR1, segments – **these vessels** are the workhorses of the industry, since they **are the most flexible commercially, with the MRs also the most liquid on the S&P market.**
- **Good spot exposure in a strong-market, with a very positive short to medium-term outlook.**
- **International reach with chartering offices in 4 countries and 3 continents** (New York, London, Singapore, and Dublin), allowing DIS to maintain close relationships with clients and brokers, increasing employment opportunities for vessels.
- **Strong relationships with debt capital providers**, including with the top European shipping banks and important Japanese banks and leasing investors.
- **Attractive valuation of DIS in absolute terms – NAV discount of 37% as at the end of September 2024 – and relative to peers.**
- **Very strong market fundamentals** driven by amongst others, a **low orderbook**, the **positive effects on average sailing distances** of sanctions on Russia and the changing refining landscape.

DIS' ESG

d'Amico
INTERNATIONAL SHIPPING S.A.

DIS' PURPOSE and VALUES.

Long-term vision, Family tradition and Innovation

Inspired by the values of our family, we build our business with a long-term view, focusing on innovative solutions and adequate risk management.

Business Ethics

Our sustainable business model pursues the goal of creating value and generating a positive impact on the communities we work with. Integrity, transparency and an open dialogue are the foundations of our relations with stakeholders.

Strong commitment to Sustainability

Respect for the environment is a priority. Safeguarding the planet and a strong focus on future generations guide our investment choices, without compromises. At all times, we take care of our seas and promote a sustainable lifestyle for our people.

People Care

We believe in the value of diversity and promote a multi-cultural, inclusive and motivating work environment where our people are part of a unique team. We offer our people an 'employee experience' that allows them to develop their skills, and to nurture their talent for their professional and personal fulfilment, while taking care of their well-being.

Our purpose is connecting the world by sea, our responsibility is to create economic and social value, respecting the environment and guaranteeing reliable and transparent relationships for our stakeholders

1. Excluding M/T Bright Future since it is bareboat chartered-out.

DIS' ESG. Environment and Safety

DIS seeks to be an industry leader on environmental and safety issues:

- Among the first fleets worldwide compliant with Monitoring Reporting and Verification criteria for CO2 emissions.
- Since 2011 DIS has a fleet performance monitoring department to optimize vessel efficiency.
- Health and safety goal reached on board: 0 injuries in 2023.
- Environmental goal reached: 0 accidents and spills in 2023.
- Digitalization of onboard record books.
- Implementation of condition based maintenance, enabling it to achieve the highest level required by the TMSA 3.
- Environmental certification ISO 14001.
- Energy efficiency certification ISO 50001.
- Occupational Health and Safety certification ISO 45001.
- Quality certification ISO 9001.

- First in Italy to obtain the prestigious RINA Best 4 Plus: compliance certification for main maritime standards in force.
- Selection of suppliers according to quality and environmental certifications.
- Approved by the main oil-majors for long-term period contracts, of up to 5 years.
- Participation with leading roles in international organizations, such as INTERTANKO.
- US\$ 755 million invested between 2012 and 2019 in 22 newbuilding Eco product tanker vessels (10 MRs, 6 Handys, 6 LR1s) all delivered between Q1'14 and Q4'19.
- 79% of DIS' owned and bareboat fleet is 'ECO' (industry average: 36%), as at December 31, 2023.

DIS' fleet modernisation and constant focus on efficient fuel management has led to a significant improvement in CO2 emissions in 2022 and 2023.

DIS' ESG. Corporate Governance

DIS is listed on the most demanding segment of the Milan stock exchange (the Star), and has therefore adopted a first-class corporate governance framework:

- Incorporated in Luxembourg, it is organized and governed in compliance with Luxembourg laws
- Listed on the STAR segment of the Italian Stock Exchange (Euronext Milan) since 2007 and compliant with the principles and recommendations of the Borsa Italiana Corporate Governance Code
- DIS' high corporate governance standards include:
 - Internal committees entirely composed by independent directors with a major influence on the Board of Directors' decisions.
 - Constantly updated Code of Ethics and Organizational and Control Model;
 - Regulation of important and significant transactions and of transactions with related parties
 - Regulation of the Board of Directors
 - Regulation of Shareholders' meetings
 - Nomination and Remuneration Committee regulation
 - Control and Risk Committee regulation
 - Supervisory Committee regulation
 - Internal Dealing Code
 - Internal regulation governing inside information and the set-up of a list of persons who have access to insider information
 - General Remuneration Policy
 - Internal Control Guidelines
 - Internal Auditor Mandate
 - Organizational Management and Control Model pursuant to Decree 231
 - Code of Ethics
 - Privacy regulation
 - Diversity policy
 - Assignment of Powers and Delegations Regulation
 - Whistleblowing policy and respective procedure
 - Sanctions Policy.
 - Long-term incentive based remuneration scheme;

DIS' ESG. Social responsibility

DIS seeks a diverse and inclusive work environment, where teamwork is highly valued. The high levels of employee satisfaction result in high retention rates.

- 25 onshore personnel as at 31 December 2023;
- 626 seagoing personnel as at 31 December 2023;
- 100% retention rate for onshore personnel in 2023;
- 95% retention rate for seagoing personnel in 2023;
- Cultural diversity in workforce with 18 nationalities represented (onshore and seagoing) as at the end of 2023;
- Balanced gender mix with women representing 40.0% of our onshore employees as at the end of 2023;
- 15.2 average hours of training for onshore personnel and 18.8 average hours for seagoing personnel in 2023.

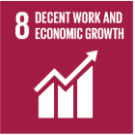

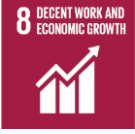

UN'S SUSTAINABLE DEVELOPMENT GOALS.

Vessel energy efficiency	 	Integrated management system for ongoing improvement	 	Ship recycling	
Innovation: Fleet efficiency and safety		Occupational health and safety		Stakeholder engagement	
High quality of services	 	People care	 	Waste reduction and material recycling	
Business ethics	 	Value generated and distributed		Multicultural approach	
Protection of marine biodiversity		Personnel training and development		Promoting public attention towards social, cultural and environmental topics	
Atmospheric emissions and climate change	 	Sustainable supply chain		Consumption of water and energy in offices	

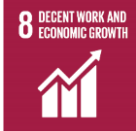

SUSTAINABLE DEVELOPMENT GOALS

Our approach to sustainability starts with the United Nations Sustainable Development Goals. By aligning with these goals DIS has joined the movement towards a more peaceful and prosperous planet.

UN'S SUSTAINABLE DEVELOPMENT GOALS.

DIS' Sustainability Topics	Sustainable Development Goals	Activity performed by DIS
Vessel energy efficiency	 	<ul style="list-style-type: none"> Renewal of the fleet with "Eco" vessels, in line with IMO directives, thanks to the implementation of innovative technologies.
Innovation: Fleet efficiency and safety		<ul style="list-style-type: none"> Projects aimed at improving vessel performance from an environmental viewpoint and in terms of onboard safety and efficiency.
High quality of services	 	<ul style="list-style-type: none"> Highest attention to the service offered, through qualified and updated staff, appropriate equipment, on-board inspections, process control and effective internal communications; Customer engagement through: direct communications, complaints and reports, internal ship reports and feedback on service quality.
Business ethics	 	<ul style="list-style-type: none"> Compliance with laws and regulations; Honesty, fairness and transparency in everyday actions, avoiding situations of conflict of interest and unfairness towards competitors; Respect for personal data and confidential information; Respect for the dignity of individuals; Respect for the environment and the community.
Protection of marine biodiversity		<ul style="list-style-type: none"> Minimum impact of activities on environmental integrity at all times and in all places; Ongoing prevention of every possible form of pollution, with a zero pollution goal.
Atmospheric emissions and climate change	 	<ul style="list-style-type: none"> Activities to raise awareness on climate change issues in personnel and the community; Implementation of activities seeking to reduce damages to individuals caused by water and air pollution.

UN'S SUSTAINABLE DEVELOPMENT GOALS.

DIS' Sustainability Topics	Sustainable Development Goals	Activity performed by DIS
Integrated management system for ongoing improvement	 	<ul style="list-style-type: none"> • Transparent statement of policies governing operations on board managed ships - in order to ensure safety and efficiency - and of the methods to respond to unscheduled events; • Identification of a basic reference for all the management documents needed for checking the Group's daily activities.
Occupational health and safety		<ul style="list-style-type: none"> • Protecting the health and well-being of employees by reducing occupational risks from exposure to hazards; • Preventing hazardous actions, injuries, illnesses, accidents to personnel, material and environmental damage; • Improving the safety of all employees by developing first of all an internal culture of safety.
People care	 	<ul style="list-style-type: none"> • Application of adequate remuneration and economic benefits for personnel, also to ensure adequate social protection.
Personnel training and development		<ul style="list-style-type: none"> • Adequate training for all personnel, allowing them to carry out their job better and increase their skills and abilities, without distinction of sex or ethnicity.
Sustainable supply chain		<ul style="list-style-type: none"> • Accurate supplier assessment and selection, also based on energy performance and including possible performance of inspections and controls; • Collection of full and clear details on purchase orders and on responsibilities.

UN'S SUSTAINABLE DEVELOPMENT GOALS.

DIS' Sustainability Topics	Sustainable Development Goals	Activity performed by DIS
Ship recycling		<ul style="list-style-type: none"> Preparation of hazardous material inventories on all new buildings and on the existing fleet.
Stakeholder engagement	 	<ul style="list-style-type: none"> Stakeholder mapping and detection of needs and expectations of each category and of related actions.
Waste reduction and material recycling		<ul style="list-style-type: none"> Plastic-free project in the Group's offices; Separate waste collection in all d'Amico offices.
Multicultural approach	   	<ul style="list-style-type: none"> Cultural integration in DIS' offices and onboard all ships.
Promoting public attention towards social, cultural and environmental topics	 	<ul style="list-style-type: none"> Training activities in support of solidarity initiatives and cultural initiatives.
Consumption of water and energy in offices	 	<ul style="list-style-type: none"> Reducing travel between offices and increasing use of video conference and conference call systems.

DIS' estimated sensitivity to interest rates¹.

<i>(US\$ million)</i>	FY'24	FY'25	FY'26
Estimated average bank debt	(229.9)	(198.7)	(170.8)
Estimated average hedged bank debt	100.0	63.8	23.3
Estimated average unhedged bank debt	(129.9)	(134.9)	(147.4)
Assumed average cash & equivalents	100.0	100.0	100.0
Estimated average unhedged bank debt net of assumed cash	(29.9)	(34.9)	(47.4)
% of bank debt hedged	43%	32%	14%
% of bank debt hedged net of assumed cash	87%	82%	72%
Average all-in interest rate on hedged bank debt	4.07%	3.66%	3.81%
Average spread on SOFR on unhedged bank debt	1.99%	1.94%	1.93%

- Assuming only a refinancing of balloons and no prepayments of existing facilities, DIS is expected to have an average bank debt of US\$ 229.9m in FY'24, US\$ 198.7m in FY'25, and US\$ 170.8m in FY'26.
- DIS has already hedged the following percentages of its bank debt through interest rate swap agreements: 43% in FY'24, 32% in FY'25, 14% in FY'26.
- Therefore, **DIS has a sensitivity for every +/- 1% change in the USD interest rate of: US\$ 0.3m in Q4'24, US\$ 1.3m in FY'25, and US\$ 1.5m in FY'26.**
- However, taking into consideration an assumed average cash balance of US\$ 100m, DIS percentage of hedged bank debt rises to 87% in FY'24, 82% in FY'25, and 72% in FY'26.
- Therefore, including the above cash assumption, **DIS has a net sensitivity for every +/- 1% change in the USD interest rate of: US\$ 0.1m in Q4'24, US\$ 0.3m in FY'25, and US\$ 0.5m in FY'26.**

DIS has a significant percentage of its bank debt hedged and a limited interest rate sensitivity.

1. All figures are based on estimated and/or assumed data and are subject to changes.

IMO (MEPC 76): CII and EEXI. 1/2

In June 2021, IMO's Marine Environment Protection Committee (MEPC 76) adopted amendments to the International Convention for the Prevention of Pollution from Ships (MARPOL) Annex VI that will require ships to reduce their greenhouse gas emissions. These amendments combine technical and operational approaches to improve the energy efficiency of ships and are in line with the ambition of the Initial IMO GHG Strategy, which aims to reduce carbon intensity of international shipping by 40% by 2030, compared to 2008.

The new measures will require all ships to calculate their **Energy Efficiency Existing Ship Index (EEXI)** following technical means to improve their energy efficiency and to establish their **annual operational carbon intensity indicator (CII) and CII rating**. Carbon intensity links the GHG emissions to the vessel deadweight over distance travelled. These amendments entered into force on 1 November 2022, **with the requirements for EEXI and CII certification coming into effect from 1 January 2023**. A review clause requires the IMO to review the effectiveness of the implementation of the CII and EEXI requirements, by Jan 1 '26 at the latest, and, if necessary, develop and adopt further amendments.

- **Attained Energy Efficiency Existing Ship Index (EEXI)** indicates the energy efficiency of the ship compared to a baseline. Ships are required to meet a specific required EEXI, which is based on a required reduction factor (expressed as a percentage relative to the EEDI baseline). **EEXI will be applicable from the first annual, intermediate or renewal IAPP survey after Jan 1 '23**. Ships which do not have (PRE-EEDI) or have an insufficient attained EEDI to respect the new limits (20% compared with the baseline), will have to derate engines or improve their efficiency.
- **Annual operational carbon intensity indicator (CII) and CII rating**. The CII determines the annual reduction factor needed to ensure continuous improvement of the ship's operational carbon intensity within a specific rating level. The actual annual operational CII achieved would be required to be documented and verified against the required annual operational CII. The rating would be given on a scale - operational carbon intensity rating A, B, C, D or E - indicating a major superior, minor superior, moderate, minor inferior, or inferior performance level. The performance level would be recorded in the Ship Energy Efficiency Management Plan (SEEMP). A ship rated D for three consecutive years or a ship rated E for one year, would have to submit a corrective action plan, to show how the required index (C or above) would be achieved. To reduce CII of international shipping by 40% by 2030, compared to 2008, the IMO has set the following reduction path for the entire world fleet up to 2026: 5% by 2023, 7% by 2024, 9% by 2025 and 11% by 2026.

IMO (MEPC 76): CII and EEXI. 2/2

In July 2023, IMO's Marine Environment Protection Committee (MEPC 78) has set more ambitious targets compared with the Initial IMO Strategy on Reduction of GHG Emissions from Ships. The new targets consider the Well-to-Wake (WtW) GHG emissions of marine fuels, as addressed in the Guidelines on lifecycle GHG intensity of marine fuels (LCA Guidelines) with the overall objective of reducing GHG emissions of international shipping without a shift to other sectors. Targets of the 2023 IMO GHG Strategy are as follows:

1. Carbon intensity of the ship to decline through further improvement of the energy efficiency for new ships;
2. To reduce CO₂ emissions per transport work, as an average across international shipping, by at least 40% by 2030, compared with 2008;
3. Uptake of zero or near-zero GHG emission technologies, fuels and/or energy sources to increase uptake of zero or near-zero GHG emission technologies, fuels and/or energy sources to represent at least 5%, striving for 10%, of the energy used by international shipping by 2030;
4. To peak GHG emissions from international shipping as soon as possible and to reach net-zero GHG emissions by or around, i.e., close to, 2050, considering different national circumstances whilst pursuing efforts towards phasing them out as called for in the Vision consistent with the long-term temperature goal set out in Article 2 of the Paris Agreement.
5. In addition, the Committee established two indicative checkpoints to reach net-zero GHG emissions from international shipping:
 - To reduce the total annual GHG emissions from international shipping by at least 20%, striving for 30% in 2030, compared with 2008;
 - To reduce the total annual GHG emissions from international shipping by at least 70%, striving for 80% by 2040, compared with 2008
6. The Committee agreed on the following timelines for the candidate measures set out in the 2023 IMO GHG Strategy:
 - The review of the short-term mandatory goal-based technical and operational measures shall be completed by 1 January 2026.
 - The basket of mid-term GHG reduction measures shall be finalized and agreed by the Committee by 2025.

Other candidate mid-term GHG reduction measures could be finalized and agreed between 2023 and 2030.

Long-term measures could be finalized and agreed by the Committee beyond 2030, to be developed as part of the 2028 review of the IMO GHG Strategy.

EU Emission Trading System (ETS) and Fuel EU.

The European Commission has recently published a set of legislative proposals to enable the EU to attain its 2030 target of reducing its greenhouse gas emissions by at least 55% by 2030 compared with 1990 levels. In particular, the EU Commission included shipping in the **EU Emissions Trading Scheme (ETS)**, the EU carbon market, and imposed greenhouse gas intensity requirements on shipping fuels, through the **Fuel EU Maritime**.

- **The Emission Trading System (ETS)**, was extended to maritime transport. The ETS is applied from 2024 to all vessels over 5,000 gross tonnes regardless of flag and to all voyages between ports in the European Economic Area (EEA) and which either commence or terminate in a EEA port. For voyages between EEA ports 100% of emissions are considered, whilst for voyages only commencing or terminating in an EEA port 50% of emissions are accounted for. According to the latest agreement reached in December 2023 by the European institutions (Parliament, Council, Commission), shipowners will have to buy emissions allowances for 40% of their emissions reported and verified in 2024, 70% of emissions reported and verified in 2025, and 100% of emissions reported and verified in 2026. According to the latest agreement, the directive will cover not only CO₂ from 1 January 2024 but also Methane (CH₄) and Nitrous oxide (N₂O) from 1 January 2026. The regulations require the shipowner or the entity managing the vessel on behalf of the shipowner to be liable. It also states that any polluter pays, therefore the shipowner could pass the cost to the charterer who is responsible for deciding route, fuel and consumption through a contractual agreement between the parties. The monitoring tool will be the EU MRV (Monitoring, Reporting and Verification), which will have to be partially modified, but for which DIS' fleet is already compliant since 2017.
- **Fuel EU** will come into effect in 2025, with the goal of improving the GHG intensity of the marine fuels, promoting the use of natural, biofuel or low-carbon/emission fuels. The requirements will consider the GHG emissions a fuel generates throughout its lifecycle, from its production to its final consumption by the ship, not just its use by the ship. A baseline will be established, with an improvement relative to that baseline of 2% in 2025, which grow gradually every 5 years to reach 75% in 2050. The proposal also allows owners of different ships to pool vessels together to help each other with compliance (if one ship is over-compliant with the requirements of the previous year, while another is not, the first can transfer its excess credits to the second). Companies that are not compliant with the rules by May 1 of the following year will have to pay a penalty and the money would go into a green fuel fund.
