## Rome, November 13, 2024

The Board of Directors of Iccrea Banca examined the consolidated results of BCC Iccrea Group as of September 30, 2024.

In the first nine months of 2024, the BCC Iccrea Group, the largest Italian cooperative banking group, recorded a positive trend in both the main income statement items and key capital, financial, and liquidity indicators.

Net loans to customers stood at €93.6 billion (€90.9 billion at the end of 2023). Credit quality improved compared to the end of 2023, with a gross NPL ratio of 3.6% and a net NPL ratio of 1.0%. The improvement of the indicators was also facilitated by the Group's de-risking initiatives. In the third quarter of 2024, the BCC Iccrea Group completed a multi-originator sale of non-performing loans to various investors, involving unlikely-to-pay (UTP) loans and bad loans from 66 affiliated banks. Approximately €0.3 billion of non-performing loans were sold, which, along with other de-risking initiatives, enabled the Group to achieve an NPL ratio of 3.6% by the end of September 2024.

<sup>1</sup> Financial liabilities to customers and Securities issued

<sup>2</sup> Includes operations (mainly repurchase agreements) with institutional counterparties of about €4.3 billion (about €1.6 billion as of Dec. 31, 2023)

The coverage ratio of non-performing loans remained high, at 72.9% (72.2% at the end of 2023). This figure is particularly noteworthy considering the significant portion of non-performing loans secured by collateral and the increasingly limited share of bad loans in the portfolio (less than one-third of the total non-performing portfolio).

Direct funding stood at €135 billion, showing a slight increase compared to the end of 2023. Key liquidity indicators remained well above supervisory requirements and among the highest in the sector, with the NSFR at 158% and the LCR at 277%, substantially unchanged from the end of 2023. The Group's readily available liquidity reserves amounted to €44.3 billion.

In terms of revenues, the Group reported a gross income of €4,501 million in the first nine months of 2024 (+7.7% y/y), driven particularly by the positive performance of the net interest income, which amounted to €3,310 million (+11.0% y/y). Net commissions also performed positively in the nine months (+2.3% y/y) and in the third quarter (+1.8% vs 2Q24).

Operating costs amounted to €2,288 million (+2.3% y/y).

Consequently, the Group's cost/income ratio stood at 50.8% (compared to 55.4% at the end of 2023).

Net adjustments for credit risk amounted to €225 million (€304 million over the first nine months of 2023), defining an annualized cost of risk of 32 basis points (45 basis points over the first nine months of 2023).

Net profit for the period was €1,679 million (€1,401 million in the first nine months of 2023).

Consolidated equity rose to €15.5 billion (€13.9 billion at the end of 2023), and own funds reached €15.9 billion (€14.3 billion at the end of 2023).

Risk-weighted assets (RWA) stood at €64.2 billion (€64.4 billion at the end of 2023).

Capital ratios remained well above regulatory requirements and showed further growth, with a CET1 ratio of 23.7% and a TC ratio of 24.8%.
